# INTRODUCTION

**Microlog: Canadian Research Index** puts all of Canada's hard-to-find government and research literature at your fingertips. This monthly indexing, abstracting and document delivery service covers all levels of government in Canada, as well as institutions receiving research grants. Most titles included in **Microlog** are available in either paper or microfiche format. Combined with a microfiche collection, the **Microlog Service** is a powerful tool for finding Canadian report publications. The unique **Microlog Accession Number** is the key to immediate retrieval of any document.

## SCOPE

Among other documents, **Microlog** includes research papers in physical, natural and social sciences, policy papers, important statistics, and annual reports. Every effort is made to ensure the currency of the index. For instance, documents appearing in the Checklist of Canadian Government Publications are delivered by **Microlog** approximately two months after publication of the list.

## LANGUAGE POLICY

Documents issued in English or French are indexed and abstracted in the language of publication, while bilingual documents are indexed and abstracted in both languages.

## SOURCES AND COVERAGE

**Federal Documents:** The **Microlog** editors review all checklists issued by the Canadian Government Publishing Centre and order every document relevant to the service. Except for serials, maps, pamphlets, and manuals, all monographs covered by the Federal Depository Plan are included in the index. Also, a special effort is made to track down elusive but important titles which do not appear in the lists.

**Microlog** offers a special collection of documents published by the Federal Government but not issued through the Federal Depository Plan. These titles, available to subscribers as the Non-Depository Publications collection, are indicated in the Titles section by a bullet (●). **Microlog** is also the direct distributing agent for many government bodies.

**Provincial Documents:** Depository arrangements with several provincial libraries have been established to ensure that **Microlog** subscribers receive all publications from those provinces. Where no depository arrangement exists, all publications lists issued by the province are reviewed for acquisitions.

**Municipal Documents:** Since these titles are very difficult to obtain, the **Microlog** editors make special efforts to include publications from municipal sources.

## ACCESS

The Index provides access by subject, corporate or individual author, and series title.

The full **Microlog** file from 19 to date, consisting of almost 50,000 records, is available online through Can/OLE. This is an ideal way to locate hard-to-find reports which may then be ordered directly online through the Can/DOCS service. Contact: Can/OLE Client Services, CISTI, Ottawa/Ontario, K1A 0S2.

## FEATURES

**Microlog** comprises the following sections:

1. **Titles and abstracts:** A full biographic citation and a descriptive abstract for each title.
2. **Name Index:** Access by personal author, corporate author, and conference name.
3. **Series Titles:** Lists by title all reports in series in the service; series available as an ongoing subscription or retrospective collection.
4. **Subject Index:** Descriptor based on Library of Congress and Canadiana Subject Headings are assigned to each document. A cross-referencing structure assists searchers.
5. **Microfiche collections:** Lists contents of each fiche collection for quick reference. These collections can be used as current awareness lists in broad subject areas to notify users of new acquisitions. This section is included in the annual curation as a separate microfiche product.

## MICROLOG AND CANADIAN STATISTICS INDEX

**Statistical Material:** The **Canadian Statistics Index (CSI)** provides further access to statistical material contained in **Microlog** monographs and special or annual reports. The CSI identification number has been included with the **Microlog** citation for the convenience of subscribers to the CSI microfiche collection.

**Annual Reports:** Storage of annual reports in a single sequence has been a problem for clients in the past. The CSI numbers for annual reports are now listed in the bibliographic citation and appear on the microfiche header of each report, to make such sequencing possible.

## DOCUMENT DELIVERY

Institutions may subscribe to complete or partial collections of the documents in **Microlog**. Individual copies on microfiche or paper reprint may be ordered through Micromedia's Document Delivery Service. To order, please contact:

# INTRODUCTION

**Microlog: Index de recherche du Canada** met à votre disposition toutes les publications du gouvernement et les travaux de recherche difficiles à se procurer. Combiné aux collections sur microfiches, le service **Microlog** constitue un outil très efficace pour retrouver les publications des différents gouvernements du Canada, ainsi que celles des organismes qui reçoivent des subventions pour la recherche. **Microlog** est aussi un service de livraison de documents, sur microfiches ou sous forme imprimée.

## CONTENU

**Microlog** contient entre autres des recherches en sciences physiques, naturelles et sociales, des énoncés de politique, des statistiques et des rapports annuels. Par l'intermédiaire du service **Microlog**, on peut obtenir les documents qui figurent sur la Liste des publications du gouvernement du Canada environ deux mois après leur parution sur cette liste.

## POLITIQUE LINGUISTIQUE

Les ouvrages publiés en français ou en anglais sont indexés et résumés dans la langue de publication; les ouvrages bilingues sont traités dans les deux langues.

## SOURCES

**Publications fédérales:** Les rédacteurs de **Microlog** examinent les listes émises par le Centre d'édition du gouvernement du Canada et commandent les documents pertinents. En dehors des publications en série, cartes, brochures et manuels, toutes les monographies régies par le Programme de dépôt du gouvernement fédéral figurent dans l'index, ainsi que des ouvrages importants ne figurant pas sur les listes.

**Microlog** propose aussi une collection spéciale de publications fédérales non déposées, identifiées par un point (●) dans la section Titres et résumés. **Microlog** est aussi l'agent de diffusion de nombreux organismes gouvernementaux.

**Publications provinciales:** Des ententes de dépôt ont été conclues avec plusieurs bibliothèques provinciales pour que les abonnés de **Microlog** reçoivent toutes les publications de ces provinces. Lorsqu'aucune entente n'existe, les listes de publications émises par les provinces sont examinées afin d'acquérir les documents.

**Publications municipales:** Ces ouvrages étant difficiles à se procurer, les rédacteurs de **Microlog** redoublent d'ardeur pour les inclure dans l'index.

## ACCÈS

L'index imprimé est bilingue et les publications sont répertoriées par sujet, par auteur (collectivité et personne physique) et par titre de collection.

Le fichier complet de **Microlog**, de 1979 à aujourd'hui, contient près de 50,000 notices et est accessible sur

Can/OLE. Il s'agit d'un moyen idéal pour mettre la main sur des rapports difficiles à trouver qu'on peut commander par l'intermédiaire du service Can/DOCS. À ce propos, veuillez vous adresser au Service à la clientèle Can/OLE, ICIST, Ottawa (Ontario), K1A 0S2.

## ORGANISATION DE L'INDEX

**Microlog** est divisé en cinq sections:

1. **Titres et résumés:** tous les titres sont catalogués et accompagnés d'un résumé descriptif.
2. **Index des noms:** donne un accès par auteur, collectivité-auteur et titre de conférence.
3. **Titres de collections:** tous les rapports publiés en série sont classés par titre et numéro. Ces collections peuvent être commandées individuellement.
4. **Index des matières:** les descripteurs permettent de trouver facilement les publications pertinentes; un réseau de renvois facilite la recherche.
5. **Collections de microfiches:** chaque collection apparaît dans une section séparée pour faciliter la recherche. Ces listes peuvent aussi servir à renseigner les usagers sur les nouveautés. Dans la refonte, cette section est insérée sous forme de microfiches.

## MICROLOG ET L'INDEX DES STATISTIQUES DU CANADA

**Données statistiques:** L'Index des statistiques du Canada (CSI) constitue une autre source de référence sur les statistiques contenues dans certaines publications indexées dans **Microlog**. Celles-ci ont un numéro d'ordre spécial qui est inclus dans la référence bibliographique.

**Rapports annuels:** Afin de rendre le classement des rapports annuels plus facile, le numéro d'ordre CSI correspondant à ces documents figure maintenant dans les références bibliographiques et est inscrit sur les en-têtes de microfiches.

## LIVRAISON DE DOCUMENTS

On peut s'abonner à l'ensemble ou à certaines des collections de documents de **Microlog**. On peut également commander des reproductions de documents sur microfiches ou sur papier par l'intermédiaire du service de livraison de documents de Micromedia. Pour commander, communiquer avec:

# FICHE COLLECTIONS

Documents from MICROLOG are available on microfiche through various subscription plans ranging from the complete collection to subsets by level of government (jurisdiction), geographic area or subject. Listed below are all the collections available with a short explanation for each one.

## JURISDICTION COLLECTIONS

- CA FEDERAL:** titles issued by Supply and Services Canada, or any other governmental body, about Canada or federal matters, both depository and non-depository.
- PR PROVINCIAL:** titles issued by provincial governments.
- MU LOCAL/MUNICIPAL:** titles issued by local governments, or about local jurisdictional concerns, or about specific cities or towns.

## GEOGRAPHIC COLLECTIONS

Documents included in the geographic collections are published at the provincial level or cover a province.

- AL ALBERTA**
- AP ATLANTIC PROVINCES:** Newfoundland, Nova Scotia, New Brunswick, and PEI.
- BC BRITISH COLUMBIA**
- MS MANITOBA - SASKATCHEWAN**
- NO NORTHERN REGIONS:** Northwest Territories, Yukon, Arctic Regions, Native Peoples, North of 60.
- ON ONTARIO**
- QU QUEBEC**

## SUBJECT COLLECTIONS

- AG AGRICULTURE:** all aspects of agriculture, food and beverage industries; soil sciences; water in agriculture; fur industry; hunting; animal industry; crops and climate; horticulture; wine making.
- BS BEHAVIOURAL SCIENCES:** human behaviour; alcoholism and drug abuse; child abuse; suicide; psychology; public opinion and survey methods.
- CO COMMERCE AND ECONOMICS:** business and finance; consumer affairs; free trade; marketing; tourism; insurance; pension fund administration; taxation; assessment; budget papers for Canada and provinces.
- CU CULTURE, RECREATION AND HUMANITIES:** arts; theatre; sports; lotteries; archaeology; history and historic sites; recreational hunting and fishing; parks; tourism related to recreation; libraries.
- ED EDUCATION:** curriculum; educational research; school and university funding; learning; teacher collective bargaining and pension funds; community and school.
- EN ENERGY:** resources, supply and demand; generation; storage; transmission; regulation; conservation; exploration; alternative resources; insulation.
- EV ENVIRONMENT:** pollution; environmental policy; assessment reports; natural areas and park management; environmental accidents; hazardous wastes; wildlife resources; environmental health.
- EX EXTERNAL AFFAIRS:** international relations; defence; aid to developing countries; international trade; free trade; immigration policy; arms control; wars and warfare.
- FI FISHERIES:** commercial fishing; fish resources; fish biology; aquatic resources; fish habitat; aquaculture; aquatic ecology; fish trade; law of the sea related to fisheries; fishing boat accidents.

- FO FORESTRY:** forest ecology; logging; forest products; wood trade; forest fires; reforestation; wood crops for energy; pulp and paper industry.
- HE HEALTH AND MEDICAL CARE:** public health and health services; health insurance; nutrition; vital statistics; medical ethics; diseases and hygiene; environmental health; disease aspects of occupational health.
- JU JUSTICE AND LAW:** crime; corrections; ombudsman; coroner; human rights; police activities; firearms; law reform.
- LA LABOUR:** employment; manpower; occupational health and safety; collective bargaining; vocational training and retraining; wages; compensation; strikes.
- LS LIFE SCIENCES:** biology; botany; zoology; genetics; biotechnology; medical sciences.
- NP NATIVE PEOPLES:** any material related to issues involving Canada's Native peoples.
- NR NATURAL RESOURCES, EARTH SCIENCES AND MINING:** land, water and mineral resources; land reclamation; flood control; hydrology; oceanography; mining; geology; economic geology; mining techniques; metallurgy.
- PS PHYSICAL SCIENCES:** practical sciences and technology; mathematics; physics; computer sciences; chemistry; meteorology; hydrology; geophysics; oceanography; nuclear science; metallurgy; earth sciences; engineering; astronomy; robotics; telecommunications.
- PL PLANNING, HOUSING AND CONSTRUCTION INDUSTRY:** planning policy and regulation; building technology; housing rehabilitation; availability; land use planning; architecture.
- PA PUBLIC ADMINISTRATION:** politics, government and administration; government operations; intergovernmental relations; public finance, budgets, estimates; parliamentary process; elections; ombudsman; taxation; annual reports of municipalities; privatisation.
- PW PUBLIC WORKS:** government management of infrastructures; public utilities; waste management; fire control; emergency services; Crown land management.
- SA SOCIAL AFFAIRS:** social problems; social services; alcohol and drug problems; housing and public housing; adoption; wife abuse; families; women; Native peoples; minorities; handicapped; public welfare; unemployment; demography; veterans affairs; aged.
- SC SCIENCE & TECHNOLOGY:** agriculture; behavioural sciences; energy; environment; fisheries; forestry; life sciences; natural resources; physical sciences; planning; telecommunications; transportation.
- ST STATISTICS:** all material from Microlog that is included in the Canadian Statistics Index.
- TE TELECOMMUNICATIONS:** communications and broadcasting policy, regulation, technology; information systems; data base management; publishing; courriers and postal service; telephones; telex; communications satellites.
- TR TRANSPORTATION:** all modes of transportation; traffic planning and engineering; vehicles; transportation fuels and fuel conservation; roads and highways; pipelines.

## SPECIAL COLLECTIONS

- CI CRITICAL ISSUES:** newsworthy topics such as abortion, the environment, defence, and free trade.
- CF FISHERIES & OCEANS CANADA:** documents published by the Department of Fisheries and Oceans.
- CM CANADA CENTRE FOR MINERAL & ENERGY TECHNOLOGY (CANMET)**
- **NON-DEPOSITORY COLLECTIONS:** a bullet in the Abstracts Section indicates a document published by the federal government, but not issued through the Federal Depository Plan.

# COLLECTIONS DE MICROFICHES

Les publications incluses dans MICROLOG sont en vente sur microfiches, en collection complète ou en collections plus petites regroupant des titres par juridiction, par aire géographique ou par matière.

## COLLECTIONS GOUVERNEMENTALES

- CA FÉDÉRAL:** publications émises par le ministère des Approvisionnements et Services ou une agence fédérale, régies ou non par le Programme de dépôt.
- PR PROVINCIAL:** publications des gouvernements provinciaux.
- MU LOCAL/MUNICIPAL:** publications émises par les gouvernements locaux et municipaux, ou concernant une juridiction locale ou municipale.

## COLLECTIONS GÉOGRAPHIQUES

Les publications incluses dans ces collections sont publiées au niveau provincial ou concerne une province.

- AL ALBERTA**
- AP PROVINCES ATLANTIQUES:** Terre-Neuve, Nouvelle-Écosse, Nouveau-Brunswick, Île-du-Prince-Édouard.
- BC COLOMBIE-BRITANNIQUE**
- MS MANITOBA et SASKATCHEWAN**
- NO RÉGIONS DU NORD:** Territoires du Nord-Ouest, Yukon, régions arctiques, peuples autochtones, nord du 60e.
- ON ONTARIO**
- QU QUÉBEC**

## COLLECTIONS PAR MATIÈRE

- AG AGRICULTURE:** tous les aspects de l'agriculture; industries des breuvages et de l'alimentation; études des sols; eau en agriculture; industrie de la fourrure; bétail; cultures et climat; horticulture; viniculture.
- BS SCIENCE DU COMPORTEMENT:** comportement humain, alcoolisme et toxicomanie; enfance maltraitée; suicide; psychologie; criminologie; opinion publique et sondage.
- CO COMMERCE ET ÉCONOMIE:** affaires et finances; consommation; libre-échange; marketing; tourisme; assurance; caisses de retraite; taxe et évaluation foncière; budgets fédéral et provinciaux.
- CU CULTURE, LOISIRS ET SCIENCES HUMAINES:** arts; théâtre; sports; loteries; archéologie; histoire; sites historiques; chasse et pêche sportive; parcs; tourisme (aspect récréatif); linguistique; bibliothèques.
- ED ÉDUCATION:** guide pédagogique; financement des écoles et des universités; apprentissage; conventions collectives et caisses de retraite des enseignants.
- EN ÉNERGIE:** offre et demande; production; emmagasinement; transmission; réglementation; conservation; exploration; énergies douces; isolation.
- EV ENVIRONNEMENT:** pollution; politique de l'environnement; études d'impact; zones de conservation et gestion des parcs; accidents écologiques; déchets dangereux; faune; santé et environnement.
- EX AFFAIRES EXTÉRIEURES:** relations internationales; défense; aide étrangère; commerce international (libre-échange); immigration; guerre et armements.
- FI PÊCHE:** pêche commerciale; ressources halieutiques et aquatiques; biologie du poisson; aquiculture; écologie marine; loi de la mer.
- FO FORÊTS ET SYLVICULTURE:** écologie et exploitation forestière; produits de la forêt; incendies de forêts; reboisement; utilisation du bois comme énergie; pâtes et papier.

- HE SANTÉ ET MÉDECINE:** santé publique et services de santé; assurance-maladie; nutrition; statistique médicale; déontologie médicale; maladies et hygiène; santé et environnement; santé au travail (aspect pathologique).
- JU JUSTICE ET DROIT:** criminalité; services correctionnels; protecteur du citoyen; coroner; droits de la personne; activités policières; armes à feu; réforme du droit.
- LA TRAVAIL:** emploi, main d'oeuvre; santé et sécurité au travail; conventions collectives; formation et recyclage professionnel; salaires; accidents du travail; grèves.
- LS BIOLOGIE:** botanique; zoologie; génétique; biotechnologie; médecine.
- NP POPULATIONS AUTOCHTONES:** publications ayant trait aux peuples autochtones canadiens.
- NR RESSOURCES NATURELLES:** ressources du sol, aquatiques et minérales; améliorations foncières; contrôle des crues; hydrologie; océanographie; mines; géologie; techniques minières; métallurgie.
- PS SCIENCES PHYSIQUES:** sciences appliquées et technologie; mathématiques; physique; informatique; chimie; météorologie; hydrologie; géophysique; océanographie; sciences nucléaires; métallurgie; géologie; génie; astronomie; télécommunications.
- PL PLANIFICATION, LOGEMENT ET INDUSTRIE DE LA CONSTRUCTION:** planification, urbanisme et zonage; construction; bâtiment; rénovation domiciliaire; utilisation du sol; architecture.
- PA ADMINISTRATION PUBLIQUE:** politique et gouvernement; opérations gouvernementales; relations inter-gouvernementales; finances publiques et budget; processus parlementaire; élections; protecteur du citoyen; impôt; rapports annuels municipaux; privatisation.
- PW TRAVAUX PUBLICS:** gestion des infrastructures; services publics; élimination des déchets; protection contre l'incendie; services d'urgence; terres de la Couronne.
- SA AFFAIRES SOCIALES:** problèmes sociaux; services sociaux; alcoolisme et toxicomanie; logement public; adoption; femmes battues; familles; autochtones; minorités; handicapés; bien-être social; chômage; démographie; anciens combattants; personnes âgées.
- SC SCIENCE ET TECHNOLOGIE:** agriculture; science du comportement; énergie; environnement; pêche; sylviculture; biologie; ressources naturelles; sciences physiques; planification; télécommunications; transport.
- ST STATISTIQUES:** publications comprises dans Microlog et aussi incorporées à l'Index des statistiques du Canada.
- TE TÉLÉCOMMUNICATIONS:** communications et politiques de radiodiffusion; systèmes d'information; bases de données; édition; service postal et messagerie; téléphones; télex; satellites de communication.
- TR TRANSPORT:** tous les moyens de transport; gestion et génie du transport; véhicules; carburants; système routier; oléoducs et gazoducs; aspect de l'environnement du transport;

## COLLECTIONS PARTICULIÈRES

- CI SUJETS D'ACTUALITÉ:** sujets de l'heure comme l'avortement, l'environnement, la défense et le libre-échange.
- CF PÊCHES ET OCÉANS CANADA**
- CM CENTRE CANADIEN DE LA TECHNOLOGIE DES MINÉRAUX ET DE L'ÉNERGIE**
- **COLLECTIONS NON DÉPOSÉES:** un point dans la section Résumés indique une publication émise par le gouvernement fédéral, mais non régie par le programme de dépôt.

# Sample Microlog Search

*"How can a person from a foreign country  
qualify for refugee status in Canada?"*

The researcher can search in Microlog as in any library catalogue – by subject, author and title.  
Because the index is bilingual, searching can be done in English or in French.

## Recherche type avec Microlog

*"Comment une personne d'un pays étranger  
peut-elle demander le statut de réfugié au Canada?"*

La méthode de recherche dans Microlog est la même que dans une bibliothèque, puisque les documents sont indexés par auteur, par sujet et par titre. L'index étant bilingue, la consultation peut se faire en français ou en anglais.

#### The Convention refugee determination process in Canada

by M. Young Ottawa Library of Parliament  
Research Branch. 1987 13 p. Bibliogr.  
(Current issues review 86-26E)  
French ed. (La reconnaissance au Canada )  
on the same fiche  
SDN 0-660-12567-6 1 fiche  
MICROLOG 88-00800 1 fiche

The increase of refugee status claiming  
immigrants in Canada has led to a review of  
the immigration policy concerning this group.  
This report looks at the weaknesses of current  
legislation which is linked to the Geneva  
Convention and its Protocol, studying Canada's  
past adherence to the rights afforded under its  
protection. Also discusses public and  
government opinion on support for a  
humanitarian and generous refugee policy and  
questions of balancing efficiency with procedural  
fairness to claimants. Gives a chronology of  
events since 1969  
• CA EX JU

#### La Reconnaissance au Canada du statut de réfugié au sens de la Convention

par M. Young Ottawa Bibliothèque du  
Parlement Service de recherche. 1987  
14 p. Bibliogr. (Bulletin d'actualité 86-26F)  
L'éd. anglaise (The Convention refugee ) sur  
la même fiche  
SDN 0-660-92124-3 1 fiche  
MICROLOG 88-00800 1 fiche

Le processus de reconnaissance du statut de  
réfugié au sens de la Convention de Genève  
tel qu'il est énoncé dans la Loi sur  
l'immigration sert à déterminer si les  
personnes qui revendiquent ce statut y ont  
effectivement droit et peuvent bénéficier de la  
protection accordée aux réfugiés au sens de la  
Convention. Ce processus s'est avéré  
inadéquat tant au point de vue juridique que  
pratique. Dans ce bulletin, on examine les  
mécanismes en vigueur actuellement et le  
projet de réforme contenu dans la loi C-55  
déposé en mai 1987

## STEP 2/DEUXIÈME ÉTAPE

### A unified search strategy

The search strategy should include all the monthly  
issues. Start with the most recent issue and work back.  
Monthly issues are cumulated annually.

### Établir une stratégie de recherche unifiée

La stratégie de recherche doit tenir compte de toutes  
les publications mensuelles, à commencer par les plus  
récentes. Chaque année, ces publications font l'objet  
d'une refonte.

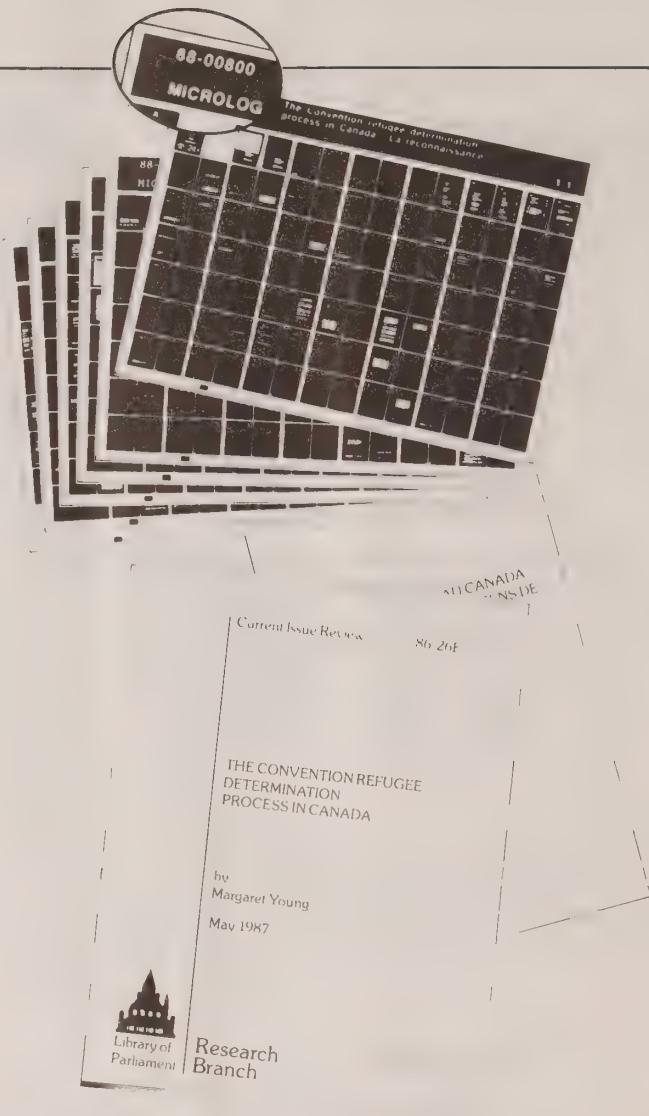

## STEP 3/TROISIÈME ÉTAPE

### Retrieve the publication

Each bibliographic citation gives a full description of the relevant document. Locate the document by the microfiche number in the library's collection or order from Micromedia. Individual publications are available for purchase on microfiche or paper. The bibliographic description provides publisher source information.

### Repérer la publication

Chaque notice bibliographique comprend une description complète du document; celui-ci peut être repéré grâce au numéro de microfiche de la bibliothèque; sinon, il faut le commander à Micromedia. On peut se procurer les monographies sur microfiches ou sur papier. La description bibliographique comporte également des indications sur l'éditeur.

## TITRES ET RESUMES

### 1891 census : Restigouche County, New Brunswick

New Brunswick Genealogical Society.  
Restigouche Branch. Fredericton : Provincial Archives of New Brunswick, 1989. 2 v.  
Contents: Vol. I : Addington, Colbourne, Dalhousie -- vol. II : Durham, Eldon, Index. Bilingual (Recensement 1891...). ISBN 1-55048-187-8  
MICROLOG 90-02229 6 fiche

This census contains the names of all family members, their sex, ages, birthplace, religion, origins, and occupations. It includes census returns from seven parishes. An index follows each parish, and contains the names of all family members as well as individual entries for servants, lodgers, transients, and visitors.

### 1984 mid year review

Charlottetown : Dept. of Finance and Tourism, Economics, Statistics and Fiscal Analysis Division, 1984. 14 p. : ill. (Economic trends : no. 24) CSI 61104.005.  
MICROLOG 90-06913 1 fiche

This document provides a description of the economic situation in the first half of the year based upon available statistics on the economy. Statistics include economic trends, the Canadian dollar, the labour force and population, increase of wage, unemployment insurance benefits paid, percentage growth of retail trade, percentage change in farm cash receipts, and lobster landings from January to July. A summary and conclusions end this report.

### 1986 Hamilton air quality

by F. Dobroff. Toronto : Ministry of the Environment, West Central Region, 1988. vi, 90 p. : ill., maps. Bibliogr. CSI 55123.021. ISSN 0836-0529  
MICROLOG 90-02407 2 fiche

The Ontario Ministry of the Environment operates a network of ambient air monitors throughout Hamilton, concentrated in the lower city, with the major station (Barton/Sanford) providing the data which formed the basis for the Hamilton Air Pollution Index (API). In 1985, 3 new major air monitoring stations were established in preparation for the new Air Quality Index. This report gives the results of a computer program known as a 'pollution rose', a cross-tabulation of hourly pollutant concentrations with wind direction classes, illustrated on various diagrams. For each 'rose' presented, the length of each line drawn is proportional to the average concentration of

a pollutant when the wind was blowing from that direction.

### 1987 energy performance of R-2000 homes update : an analysis of measured energy consumption in R-2000 homes and updated comparisons with the R-2000 target and computer predictions for homes built to current building practice

Ottawa : Energy, Mines and Resources Canada, Energy Efficiency Technology Division, R-2000 Home Program, 1987. iii, 56 p. Bibliogr. (Technical report : 034-MR)  
MICROLOG 90-02489 1 fiche

This report presents the results of energy consumption monitoring from 1985-87 in a sample of R-2000 homes. The report examines different factors affecting energy consumption, determines if R-2000 homes are performing to energy targets, and compares R-2000 home consumption with predicted consumption if built to the 1975 National Building Code and the 1983 Measures for Energy Conservation standards. Space heating, total energy, domestic hot water and light, and appliance consumption are analyzed separately and further subdivided by space heating fuel type and different home characteristics such as interior heated volume.

### The 1988 fenitrothion monitoring study on songbird brain cholinesterase activity

S. Fudge & Associates Limited. Corner Brook, Nfld. : Dept. of Forestry, 1989. vii, 66 p. : ill., maps. Bibliogr.  
MICROLOG 90-01179 1 fiche

An aerial spray program was conducted beginning in 1985 to control an outbreak of the eastern hemlock looper in insular Newfoundland. The main insecticide used was fenitrothion. Monitoring was undertaken to assess the effect of the fenitrothion on forest songbirds such as white-throated sparrows through brain cholinesterase (ChE) activity. This report presents the results of the 1988 survey and compares them with those of previous years.

### 1988 report on fishing vessel performance

Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. 64 p. : map. (Economic and commercial analysis report ; no. 34) ISSN 0843-5626  
MICROLOG 90-00962 1 fiche

Certain components of the Scotia Fundy fleet are surveyed yearly for vessel performance information, with approximately 1/3 of the active fleet covered each year. At the end of a 3-

year cycle, samples of the entire active Scotia Fundy fleet under 65' length overall have been surveyed. The 1988 vessel performance survey focused on those vessels which were mainly involved in harvesting groundfish, and included descriptions of vessel physical characteristics, investment profiles, catch and effort and financial performance.

### 1989 field validation of the proposed ice Regime Shipping Control System onboard MV Lucien Paquin

submitted to Arctic Ship Safety, Canadian Coast Guard Northern ; by D. Wells. Ottawa : Norland Science and Engineering Ltd., 1990. viii, 79 p. : maps. Bibliogr.  
MICROLOG 90-07207 1 fiche

This report presents the findings of a field program to conduct a trial evaluation of the ice regime shipping control system, proposed as part of the revisions to the Canadian Arctic shipping pollution prevention regulations. The shipboard work was conducted onboard MV Lucien Paquin, a general cargo vessel, during the 1989 eastern Arctic sealift and involved operations in Foxe Basin, NWT, during the first half of September. The field trial involved generating experimental ice regime charts for broadcast to the study ship; monitoring the reception and utilization in voyage planning of all ice information products received on the vessel's bridge; and monitoring environmental and navigational particulars during the transit. In post-voyage analysis, ice conditions depicted on the charts were compared to those actually encountered, and an assessment was made of the impact of the regulatory proposal on the advisability of operations of all ice class ships. An assessment was also made of the apparent workability of the ice regime control system.

### 1990-91 budget : additional information : estimates

Québec (Province). Conseil du trésor. Québec : The Conseil, 1990. 94 p. : ill. CSI 66100.007. ISSN 0706-0327 ISBN

2-550-20513-8  
MICROLOG 90-07248 1 fiche

This expenditure budget determines the amount of financial resources the government plans to allocate to the production of public goods and services. It displays the estimates requested by the government for the fiscal year beginning April 1, 1990. This document provides additional information on those estimates and on the budgetary expenditure. It contains a presentation of the government's spending policy with complementary notes which provide an explanation of the budgetary transactions, information on the evolution of total expenditure and estimates, their distribution by broad government mission and by domain of activity, and their distribution by expenditure category, and highlights of the estimates for 1990-91 by department and by program.

### 1990-91 budget : budget speech and additional information

Québec (Province). Ministère des finances. Québec : The Ministère, 1990. 223 p. : ill. *French ed. (Budget 1990-91 : discours...)* 90-05096/3. *Highlights (31 p.) laid in.* CSI 66120.003 ISBN 2-551-14076-5 MICROLOG 90-05111 3 fiche

This speech presents the Minister's seven major objectives of this budget. These are: supporting the economy, training qualified manpower, adapting the taxation system to foster Quebec's economic development, meeting the challenge of the environment, improving individual taxation and assisting families, increasing efficiency in the public sector, and financial framework. Concluding the speech are five appendixes presenting the: fiscal and budgetary measures, medium-term outlook for the Quebec government's financial position, the government's financial position and borrowings in the public sector, review of the economic situation and outlook, and Quebec's public finances.

### 1990-91 estimates of proposed investments : votes by project

Alberta Heritage Savings Trust Fund. Capital Projects Division. Edmonton : The Division, 1990. 27 p. CSI 36029.002. ISBN 0-7732-0195-5 MICROLOG 90-03740 1 fiche

The estimates present to the Legislative Assembly the investment proposals being made for the Capital Projects Division of the Alberta Heritage Savings Trust Fund. Capital Projects Division investments are made in projects which will provide long-term economic or social benefits to the people of Alberta but which may not necessarily by their nature yield a return to the Trust Fund.

### 1990-91 estimates, part I : the government expenditure plan

Canada. Dept. of Finance. Ottawa : Supply and Services Canada, Canadian Government Publishing Centre, 1990. 81, 87 p. *Bilingual (Budget...plan de dépenses...)*. CSI 21104.012. ISBN 0-660-55675-8 MICROLOG 90-03283 2 fiche

The Estimates communicate to Parliament the level and nature of the federal government's spending plans for the coming fiscal year. Part I gives Parliament an overview and situates the estimates in the context of the overall expenditure framework. It covers the policy sector resource envelopes which include the level of resources allocated for all elements of departmental activity and defines the resources earmarked for maintaining, developing and implementing policies and programs. Focuses also on person-years and presents an overall person-year summary. Presents totals for transfer payments, payments to Crown corporations and operating and capital expenditures. Also addresses items which represent investments requiring parliamentary approval.

### 1990-91 estimates, part III : Agriculture Canada

Canada. Dept. of Finance. Ottawa : Supply and Services Canada, Canadian Government Publishing Centre, 1990. 190, 210 p. : ill. *Bilingual (Budget des dépenses...Agriculture...)* CSI 21104.055. ISBN 0-660-55568-9 MICROLOG 90-03716 5 fiche

This document provides Estimates detail for the department and its programs primarily in terms of the results expected and the money spent. It begins with an overview of the roles and responsibilities of the portfolio and the spending plan for the coming fiscal year. This format is followed for the department and each of the programs administered. Administrative information includes a profile of financial requirements by object, personnel requirements, capital expenditures, transfer payments, revenue, loans, investments and advances, and the net cost of the program. Details include such information as personnel requirements, by occupational group, authorized person-years, and current salary range. Program descriptions include formal programs as well as activities related to government policy.

#### 2020 vision : Canada's long term energy outlook : working paper

Canada. Energy. Mines and Resources Canada.  
Energy and Fiscal Analysis Division. Ottawa :  
Energy, Mines and Resources Canada, 1989.  
ii, 104 p. : ill. *French ed. (Vision 2020 :  
perspectives...)* : 90-02374/2  
MICROLOG 90-02347 2 fiche

This annual report of Canada's energy outlook  
is similar in approach to that of 1988. Two oil  
price scenarios were developed, the first a  
reference case in which oil was at US\$18/bbl-  
US\$25/bbl by 2000 and flat thereafter, and an  
alternative case with prices at US\$15/bbl-  
US\$20/bbl by 2005, with a greater economic  
growth rate (by 15%) than under the reference  
case. The results are based on Energy,  
Mines and Resources Canada's inter-fuel  
substitution demand model, which incorporates  
the electricity-based utility generation expansion  
model, updated through 1987. Market share  
equations were re-estimated and some  
behavioural equations were re-specified.  
Policies and programs to deal with  
environmental objectives are included to only a  
limited extent, in general, the outlook does not  
reflect any significant changes in policy  
framework. The report examines the basic  
assumptions underlying the forecast, provides  
an analysis of the forecast results as they  
affect energy demand, looks at the supply side  
of the energy picture, and gives a brief

overview of environmental issues.

#### 28-day compressive strength monitor cement sample CM-1

by G.G. Carette and W.S. Bowman. Ottawa  
Canada Centre for Mineral and Energy  
Technology. Mineral Sciences Laboratories,  
1988. i, 9 p. (Report ; MSL 88-80(TR))  
MICROLOG 90-03951 1 fiche

A national strength monitor cement was  
prepared under the auspices of the Canadian  
Standards Association (CSA) committee on  
hydraulic cements. It was packaged by the  
Canadian Certified Reference Materials Project  
(CCRMP) who will also look after storage and  
sales. A Canadian interlaboratory test program  
was carried out to determine the 28-day  
compressive strength of mortars incorporating  
this material using the CSA procedure  
described in CAN-3-A5-M83. No other property  
was evaluated. CCRMP performed statistical  
analysis of the interlaboratory data and the  
results are presented here.

#### 3,300,000 Canadians : insights from the Parliamentary Forum on the Status of Disabled Persons

Ottawa : House of Commons, Office of the  
Speaker, 1988. i, 45, i, 45 p. : ill. *Bilingual  
(3 300 000 Canadians : aperçu...)*.  
MICROLOG 90-03847 2 fiche

On May 30, 1988, the Speaker of the House  
of Commons and the Standing Committee co-  
hosted the first ever National Parliamentary  
Forum on the Status of Disabled Persons.  
More than 100 speakers and elected members  
from federal and provincial legislatures  
participated in the meeting. They heard and  
discussed the testimony of 13 expert witnesses  
from all parts of Canada. This publication  
presents a summary of the testimony witnesses  
gave during the Parliamentary Forum  
highlighting the three themes of the forum:  
participation, accessibility, and awareness.

#### A la recherche de solutions : le rapport

Canada. Conseiller spécial auprès du ministre  
en matière d'agression sexuelle des enfants.  
Ottawa : le Conseiller, 1990. 215 p. Bibliogr.  
*L'éd anglaise (Reaching for solutions)* :  
90-05745/2 ISBN 0-662-96163-3  
MICROLOG 90-05903 3 fiche

Ce document a pour but d'élaborer un  
programme de travail qui mette l'accent sur les  
réalités concrètes nécessitant des solutions. Il  
se penche particulièrement sur : les dimensions  
du problème de l'exploitation sexuelle contre les  
enfants au Canada, la sensibilisation du public  
et la prévention primaire, la violence sexuelle à  
l'égard des enfants et le système judiciaire, les  
délis de la guérison et du traitement, le besoin  
d'information (éducation, formation et recherche);  
les collectivités aborigènes, les préoccupations  
nouvelles; les étapes de mise en oeuvre; les  
rôles et responsabilités des gouvernements  
fédéral, provinciaux et territoriaux, et, un  
aperçu de la réponse du gouvernement fédéral  
au rapport Badgley 1984-1989.  
BS CA SA

#### A la recherche de solutions : résumé du rapport

Canada. Conseiller spécial auprès du ministre  
en matière d'agression sexuelle des enfants.  
Ottawa : le Conseiller, 1990. 65, 59 p.  
*Bilingue (Reaching for solutions : the  
summary...)*. ISBN 0-662-57518-0  
MICROLOG 90-05902 2 fiche

La violence sexuelle à l'égard des enfants  
présente des caractéristiques marquées selon  
le sexe. Plus de 95 p. 100 des agresseurs  
sont des hommes et la majorité des victimes  
sont des femmes, quoiqu'il y ait aussi beaucoup  
de victimes chez les garçons. Ce document  
se penche sur cette question et examine les  
points suivants : les réflexions personnelles du  
conseiller spécial, les réalités de la violence  
sexuelle faite aux enfants - problèmes et  
solutions, les recommandations, les étapes de  
mise en oeuvre, et, la convention relative aux  
droits de l'enfant, adoptée par les Nations  
Unies

#### A votre tour d'assembler les pièces : étude de cas : déploiement de l'informatique au Canada

Ottawa : Industrie, sciences et technologie  
Canada : Association canadienne de la  
technologie informatique, 1989. 177 p.  
Bibliogr. *L'éd. anglaise (Putting the pieces  
together...)* : 90-02205/2  
MICROLOG 90-02204 2 fiche

L'informatique est le domaine d'activité  
industrielle et commerciale qui évolue le plus  
rapidement dans tout le monde occidental.  
Lorsqu'elle est utilisée comme il faut,  
l'informatique offre des possibilités qui ont une

influence décisive sur la compétitivité des industries et des entreprises. Toutefois, la façon dont on l'utilise constitue un défi de taille sur le plan de la gestion. Ce rapport porte sur l'implantation de l'informatique dans les entreprises canadiennes. Il examine les facteurs qui influent sur le succès d'applications particulières et il met en relief l'expérience de diverses petites et moyennes entreprises lors de l'implantation de systèmes informatiques.

### Abundance, composition spécifique et biomasse du phytoplancton de l'Estuaire moyen du Saint-Laurent

par H. Desilets, J. Painchaud et J.-C. Thériault. Mont-Joli, Québec : Ministère des pêches et des océans, Division de la recherche sur les pêches. Institut Maurice-Lamontagne, 1989. vii, 58 p. : ill., cartes géogr. Bibliogr. (Rapport technique canadien des sciences halieutiques et aquatiques, no 1698) ISSN 0706-6570  
MICROLOG 90-00373 1 fiche

Des données concernant l'abondance et la composition spécifique de 49 échantillons de phytoplancton provenant de l'Estuaire moyen du Saint-Laurent (été 1982) sont présentées dans ce rapport. De plus, la méthode d'estimation de la biomasse phytoplanctonique de Smayda (1978) a été appliquée à ces données. On y traite de la localisation des stations, de l'abondance du phytoplancton, du nombre des taxons, de l'abondance des micro-flagellés, de la biomasse phytoplanctonique, de la concentration de la chlorophylle, et de l'abondance du protozooplancton.

### About electro-magnetic wire-rope testing in New Brunswick mines and related data

by L.B. Geller...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. iii, 51 p. : ill. (Report, MRL 89-40(TR))  
MICROLOG 90-03368 1 fiche

Present day, commercially available, electro-magnetic (EM) type wire-rope test instruments play an important role in making mineshaft hoisting operations safe, but the accuracy of rope strength loss estimates, based upon these EM measurements, still leaves much to be desired. This report examines the level of accuracy, with special regard to the regulatory rope removal criteria, with which EM instrument-based loss of breaking strength estimates are currently being made, and the most likely reasons for the known inaccuracies of estimation by instrument, operator, or regulatory origin.

### Abrasive-disk dehullers in Africa : from research to dissemination

Ottawa : International Development Research Centre, 1989. ix, 98 p. : ill. Bibliogr. (Manuscript report ; 270e) ISSN 0229-7108  
MICROLOG 90-00315 2 fiche (Available on fiche only)

Recent droughts in the Sahel and in eastern and southern Africa have increased the urgency in developing drought-resistant crops. The absence of appropriate dehulling equipment, especially for small grains such as sorghum and pearl millet, has often been cited as a reason for past national neglect of these cereals. This report reviews the development of small-scale, inexpensive, versatile abrasive-disk dehullers in Africa. Topics discussed in detail include the need to understand traditional food habits and preferences; the scope for applying small dehullers in Africa, detailed technical descriptions of various dehuller designs and criteria to be considered in a design process; important grain characteristics as they relate to dehulling and the effect of the dehuller's abrasive agent on the grain; installation and operation of some typical, rural, small-scale milling systems; and the process of introducing technology as one moves from applied research to applying the results.

### Abundance, age, size, sex and coded wire tag recoveries for chinook salmon escapements of Campbell and Quinsam rivers, 1986-88

by R.C. Bocking, K.K. English and T.M. Webb. Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1990. x, 126 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2065) ISSN 0706-6473  
MICROLOG 90-05226 2 fiche

The chinook salmon of the Campbell/Quinsam river system were selected as one of the indicator stocks for assessing the response of Pacific chinook salmon stocks to a new harvest management regime, begun in 1984, to build stocks to historical levels. This report presents the results from 1986-88 of intense escapement monitoring and sampling of chinook salmon, calculated using the adjusted Petersen method by tagging carcasses to produce

separate estimates for sexes and rivers and summing these to form a total estimate for the in-river escapement of chinook. The total recovery of chinook salmon at the Quinsam Hatchery was then added to the in-river estimates to produce a final escapement figure for the entire system. Potential biases in the Petersen method, the carcass and live tagging approaches, and method of stratification are discussed. The results give population estimates and composition (age, length, and sex) and results of coded wire tagging studies.

# **Accelerated sample processing, 1988-89, phase III : northeast cooperative woodstove study : final report**

OMNI Environmental Services. Beaverton, OR OMNI Environmental Consultants, 1989. 13 p. : ill. CANMET contract: 89170-01-SQ MICROLOG 90-03966 1 fiche

The northeast cooperative woodstove study, conducted during the winter of 1988-89, measured particulate stack emissions using the AWES sampling system from 25 new-technology stoves installed in homes in the Glens Falls, N.Y. area. Five stove brands, 3 catalytic and 2 non-catalytic, were selected for the study based on their performance in a laboratory durability test. Each stove brand was represented by 5 stoves. The catalytic stoves were represented by the Blaze King Royal Heir, Country Flame BBF and the Oregon Woodstove. The non-catalytic stoves were the Country Comfort CC150 and the mid-size Regency. Each stove was sampled for 5 weekly periods spanning early January to late March. This type of sampling schedule provided an opportunity to document trends in stove emissions over the heating season as well as average performance.

**Accessing university research : the experience of Canadian industry**

by J.A. Potworowski. Ottawa : International Development Research Centre ; Hamilton, Ont. : Management of Technology and Innovation Institute, 1989. 82 p. Bibliogr. (Manuscript report ; 210e) *French ed. (Comment accéder à la recherche...)* : 90-00252/2  
MICROLOG 90-00251 1 fiche (Available on fiche only)

Review of measures taken by selected Canadian firms to transfer and receive technology from universities. All the firms studied either have a significant in-house R&D capability, or are very dependent on research, and all have benefited from university research. The study determined how each of the selected companies managed the transfer of technology from universities, to determine which approaches worked and which did not. In-depth interviews were carried out with 30 senior industry executives, all of them users of university research. The collective managerial experience of these executives was distilled into a set of guidelines or principles.

**Les Accidents chimiques majeurs : sommes-nous prêts? -- Rev.**

par R. Milko. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 17 p. Bibliogr. (Bulletin d'actualité ; 88-15F) *L'éd. anglaise (Major chemical accidents... sur la même fiche)*. ISBN 0-660-92719-5  
MICROLOG 90-01842 1 fiche

En décembre 1984, une fuite d'isocyanate de méthyle à Bhopal en Inde a tué 3 000 personnes et en a blessé quelque 200 000 autres. Au Canada, ce coup de semonce a incité l'industrie, la population et les pouvoirs publics à entreprendre une évaluation plus poussée des mesures de prévention, de planification et d'intervention en cas d'urgence. Etant donné la diversité et le volume croissants des substances chimiques extraites, fabriquées, commercialisées, transportées, stockées ou évacuées sous forme de déchets, il n'est pas étonnant de constater que le nombre d'accidents chimiques documentés a connu lui aussi une augmentation considérable. Cette étude dresse le bilan des progrès réalisés en matière de prévention, de planification et d'intervention en cas d'urgence au Canada.

**Accidents mortels de navigation de plaisance en Ontario, 1980-87**

Toronto : Ministère des richesses naturelles, Bureau de la navigation de plaisance, 1989. iv, 80, vi, 84 p. : ill. Bibliogr. *Bilingue (Recreational boating fatalities...)*. ISBN 0-7729-5446-1  
MICROLOG 90-01861 2 fiche

La navigation de plaisance peut être une expérience agréable et fascinante; cependant, des situations dangereuses peuvent survenir soudainement et inopinément. Dans la seule province de l'Ontario, il y a en moyenne 87,3 accidents mortels par année. Les compétences et l'expérience, bien qu'utiles, ne sont souvent pas suffisantes pour éviter les accidents de navigation. Le plaisancier doit à la fois connaître les pratiques de navigation sécuritaires et avoir la volonté de les appliquer consciencieusement afin d'éviter les situations dangereuses. Ce document fait la lumière sur le sujet.

### Accumulation of mercury by plankton and benthic invertebrates in riverine lakes of northern Manitoba, Canada importance of regionally and seasonally varying environmental factors

by T.A. Jackson. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 15 p. : ill. Bibliogr. (NHRI contribution ; no. 88041) In Canadian Journal of Fisheries and Aquatic Sciences: vol. 45, no 10, 1988. ISSN 0838-1992  
MICROLOG 90-06484 1 fiche

A previous paper (Jackson 1988b) treated the biogeochemistry of mercury (Hg), especially the production of methyl mercury (CH<sub>3</sub>Hg) in sediments and water of lakes along the Churchill River diversion route in northern Manitoba, with emphasis on the effects of

environmental alteration caused by recent hydroelectric development. In this paper, accumulation of Hg by plankton and benthic invertebrates in these lakes is examined. The study investigated the effects of environmental factors in general, and the impact of reservoir creation in particular, on Hg levels in planktonic and benthic organisms. The samples for this study were taken from Granville Lake, Southern Indian Lake and selected lakes of the Notigi Reservoir complex (Rat Lake, Central Mynarski Lake, and the east and west basins of Notigi Lake).

**Acid generation and inorganic precipitate formation in mine tailings at the South Bay site : final report**

by R.O. Van Everdingen and M. Kalin. Toronto : Boojum Research Limited, 1989. ix, 44 p. : ill. *CANMET contract: 99104-01-SQ*.  
MICROLOG 90-03971 1 fiche

The South Bay tailings site is located on the east shore of Confederation Lake, 65 km northeast of the Town of Ear Falls, Ontario. The site contains tailings from a zinc/copper concentrator operated by BP-Selco from 1971-81. By 1985, oxidation of sulfide minerals in the tailings was producing acidic seepage with elevated iron and zinc contents, which affected water quality in Boomerang Lake. In the fall of 1986, studies were undertaken to design a close-out scenario that would minimize or eliminate the release of heavy metals from the site to surface waters in the area. As part of those studies, piezometers were installed in and around the tailings basin and the mine site during October 1986. Since that time a large set of data on water levels, subsurface temperatures, and composition of subsurface water in and below the tailings has been accumulated. The evaluation of the available data presented in this report was undertaken to attempt determination of the rate of acid generation and release from the tailings area, and the rate of loss of iron and other metals from solution by precipitation within the tailings.

**Acid rain control : potential commercial forestry benefits to Canada**

by G.A. Fraser. Ottawa : Forestry Canada, Economics Branch, 1989. 31 p. Bibliogr. (Information report : E-X-42) *French ed. (Lutte contre les pluies...)* : 90-02898/1. ISSN 0834-938X ISBN 0-662-17171-3  
MICROLOG 90-02467 1 fiche

This study develops a preliminary estimate of the commercial forestry benefits resulting from long range air pollution control. Two

alternative pollution control options are evaluated against a base case in which no further pollution control measures are implemented. The first program of additional controls and regulations simply maintains long range air pollution at recent (1984) levels into the indefinite future. The second program of controls and regulations is much more extreme and can achieve a 50% reduction in long range air pollution levels by 1994 and maintain these new lower pollution levels into the indefinite future. These control programs reflect a subjective assessment of the feasible range of policy options. Noncommercial forestry values are unevaluated and annual tree-cropping activities are not taken into consideration. The relationship between the percentage changes in forest productivity under the alternative pollution scenarios and future commercial harvest rates is also investigated.

**Acid sensitivity of lakes in Ontario, 1989**

Toronto : Environment Ontario, 1990. 30 p. *Bilingue (Sensibilité des lacs...)*. *CSI 55133.002. ISSN 0833-546X*  
MICROLOG 90-05750 1 fiche

The Ontario Ministry of the Environment, in cooperation with the Ministry of Natural Resources, conducts lake surveys to determine the sensitivity of Ontario lakes to acidic precipitation. This 6th summary of the results of the survey includes information on 6,722 lakes throughout the province. The list is cumulative, so changes in the number of acidic lakes from previous brochures reflect new lakes that have been identified, rather than lakes turning acidic since the last listing was published. The brochure presents an alphabetical list by county or district of the lakes sampled to date, with an indication of the relative sensitivity of each of the lakes to the acidification process. The table provides a summary of the number and percentage of lakes in each alkalinity class organized by county or district.

**Acoustic methods for measuring thickness of oil on water**

by A.M. Nawwar...et al. Ottawa Environmental Studies Research Funds ; Kanata, Ont. : Arctec Canada Limited, 1987. v, 57 p. : ill. Bibliogr. (Environmental Studies Research Funds report ; no. 072) ISBN 0-920783-71-6  
MICROLOG 90-06960 1 fiche

The knowledge of the thickness of oil slicks floating on water is a primary requirement to establishing the amount of oil and to deciding on appropriate spill countermeasures. This study focuses on acoustic methods for measuring oil thickness on water using surface acoustic waves or frequency dependence of the amplitude of reflected acoustic energy. The study consisted of a theoretical investigation to assess the feasibility of using surface acoustic waves and an initial exploratory experimental program to generate and detect Rayleigh waves in oil. A limited scope experimental study was undertaken to determine the initial feasibility of the technique and to establish whether a more comprehensive experimental program was justified.

**L'Acquisition et la revente d'immeubles au centre-ville de Terrebonne**

Québec : Gouvernement du Québec, Ministère des affaires municipales, 1989. 7 p. : cartes géogr. (Aménagement et urbanisme) ISBN 2-550-19560-4  
MICROLOG 90-02187 1 fiche

A sa séance du mois d'août 1985, le conseil municipal de Terrebonne adoptait à l'unanimité une résolution prévoyant l'acquisition de deux vastes propriétés situées au sud de la rue Saint-Jean-Baptiste, en plein centre-ville. Ce document a pour but de faire connaître les pouvoirs dont l'ensemble des municipalités du Québec disposent à cet effet, de montrer les avantages qu'on peut en tirer et d'illustrer la façon de les utiliser. Pour ce faire on prend comme exemple un projet en voie de réalisation au centre-ville de Terrebonne.

### Action plan : a waste minimization strategy for Manitoba in the 1990's : final report

Manitoba. Recycling Action Committee. Winnipeg : The Committee, 1990. viii, 73 p. : ill.  
MICROLOG 90-07150 1 fiche

In June of 1989 the Manitoba Recycling Action Committee was set up and directed to advise the government on how the province could reduce its solid waste generation by 50 per cent by 2000. A number of public meetings were held to solicit the opinions and suggestions of the public and stakeholders and a draft policy was produced in March 1990. This document describes the basic strategy of the Plan, waste reduction goals and targets, a waste minimization strategy, the need for education and information, the development of markets and systems, and the actions to be taken. A series of recommendations are included.

### Action santé : les femmes

Ottawa : Santé et bien-être social Canada, 1989. 34 p. : ill. L'édition anglaise (*The Active health : report on women*) sur la même fiche. ISBN 0-662-95919-1  
MICROLOG 90-06462 1 fiche

Ce document fait partie d'une série de rapports interprétatifs issus de l'enquête Promotion Santé Canada. Il est le deuxième à porter sur un groupe de population précis et cherche à établir, à partir des données de l'enquête, la perception qu'ont de leur santé les membres de ces groupes. De plus, les résultats de l'enquête sont également analysés. Son but n'est pas de dresser un tableau définitif de l'état de santé de chaque groupe, mais plutôt de poser des questions et d'y répondre, et de stimuler la discussion sur les meilleures façons de permettre aux membres de chaque groupe de réaliser leurs aspirations personnelles en matière de santé. On a demandé aux femmes d'évaluer leur propre santé, leur stress, leur bonheur et les limites de leurs activités en raison de problèmes de santé. Finalement, l'enquête s'est penchée sur les comportements des femmes en matière de santé.

### The Active health report on women

Ottawa : Health and Welfare Canada, 1989. 29 p. : ill. French ed. (*Action santé : les femmes*) on the same fiche. ISBN 0-662-17631-6  
MICROLOG 90-06462 1 fiche

This document investigates the relationship between women's self-rated health, happiness, and activity-limiting health problems. It also looks at five different groups of women: poor women, women with limited levels of education, unemployed women, senior women, and Native women. The survey findings show consistent evidence of inequalities in health, and indicate a critical need to develop responses that are sensitive to the needs and life circumstances of different groups of women. It discusses prevention of health problems, and examines the capacity of women to cope with activity limitation, stress, unhappiness, and limited social and economic resources, and the need to enhance women's capacity for control in light of challenging environmental demands.

**Adjustment to international competition : short-run relations of prices, trade flows, and inputs in Canadian manufacturing industries**

by R.E. Caves. Ottawa : Economic Council of Canada, 1990. x, 71 p. Bibliogr. ISBN 0-660-13468-3  
MICROLOG 90-04220 1 fiche

This report builds on 2 types of research on the structure and performance of Canadian manufacturing industries. One line addresses industries of domestic producers who serve the small Canadian market in competition with imports and is concerned with the productive efficiency of these industries but not with their short-run responses to international competition. The other line concerns the short-run sensitivity of responses of the manufacturing industries' prices, output, and employment levels to disturbances, focused on responses to domestic disturbances but not international. Using annual data on many individual industries, the study builds a statistical model of adjustments to changes in international competition such as changes in prices and varieties of importable goods, and in Canadian tariffs and the exchange rate. It tracks the effects of those changes on the selling prices of Canadian producers, quantities of imports and exports, and the key input decisions of employment and capital expenditures. It draws conclusions about these adjustment processes for the typical manufacturing industry but also shows how these adjustments vary among sectors and types of industries.

#### The Adsorption of oleic acid on hematite as influenced by pH : a radiometric study

by D. Maksimov and C. Lapointe. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1965. 8 p. ill. (Report : MS 65-88)  
*Presented at the 4th Canadian Conference of Metallurgists*  
MICROLOG 90-04637 1 fiche

The adsorption of fatty acids on metallic oxides has been the subject of extensive studies, and several theories have been proposed to explain the stability of the adsorbed films. This paper describes the measurement of the amounts of oleic acid adsorbed on pure hematite at various concentrations and pH, and the fractions of the adsorbed films remaining on the mineral after drastic extraction with an organic solvent. This will provide information on the nature of the attachment of the oleic acid molecule at the hematite surface.

#### Advanced planning and control technologies for housing construction

by A.D. Russell. Ottawa : Canada Mortgage and Housing Corporation, 1989. 189 p. : ill. Bibliogr.  
MICROLOG 90-03773 3 fiche

Report on the use of advanced planning technologies and computer graphics for defining and evaluating alternative construction plans, development of a process for updating which could account for changes in activity sequencing, activity durations, delays and acceleration of work and scope changes, and for evaluating and selecting appropriate corrective action; and examination of useful

ways for representing project experience to create a knowledge base for the development of an expert system. Two detailed case studies of multi-storey residential construction are used to demonstrate the current state of time management practices in the construction industry, to explore the use of different updating formats and to demonstrate the power of repetitive planning structures, especially for speedy updating when location sequences change. Work on the 3d topic focused on identifying frameworks for standardizing and representing project experience and describing it in the form of rules which could be incorporated into an expert system

#### Aerial application of VirtussR, a nuclear polyhedrosis virus, against whitemarked tussock moth larvae in Newfoundland in 1987

by R.J. West, W.J. Kaupp and J.C. Cunningham. St. John's : Canadian Forestry Service, Newfoundland Forestry Centre, 1989. ii, 10 p. : maps. Bibliogr. (Information report ; N-X-270). ISSN 0704-7657 ISBN 0-662-17397-X  
MICROLOG 90-03317 1 fiche

The whitemarked tussock moth (WMTM) sporadically infests coniferous plantations in eastern North America. Although the insect is primarily a pest of hardwoods, high populations can severely delovate eastern larch, spruce, and balsam fir. This insect is also a nuisance as the larvae have urticating hairs that cause skin rashes on some human individuals. The

market potential for a product to control the WMTM is limited because outbreaks are usually small and self-limiting. The viral insecticide VirtussR, which contains a nuclear polyhedrosis virus (NPV), was aerially applied at a dosage of 2.5 x 10<sup>11</sup> polyhedral inclusion bodies per ha against a larval population in a 25 ha plot containing white birch and balsam fir located near Bottom Brook, Newfoundland in 1987. The treatment was applied at a flow rate of 9.4 L/ha with a fixed-wing aircraft equipped with AU4000 Micronair rotary atomizers. This report presents the results of that spraying.

#### Aerial census of grey seal pups in Iceland in 1982

by E. Hauksson. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 23 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5258) Originally published in Icelandic. ISSN 0704-3716  
MICROLOG 90-02729 1 fiche

An aerial seal survey in the summer of 1980 revealed that direct counting of mature grey seals involves many problems. These problems make it impossible to obtain an accurate assessment of the population. Surveys in Great Britain assess the seal population by counting the pups at the height of the breeding period, estimating the total number of pups that will be born, and then assessing the total number of mature seals from the findings. This paper applies the pup counting method to Icelandic grey seals.

 MICROLOG 90-06621 1 fiche

Inventory and evaluation of aggregate resources in a remote area of northern Ontario, northwest of Fort Frances. The investigation was designed specifically to identify potential sources of road-building aggregate for the planning and future development of forest access roads. A detailed field investigation undertaken in the summer of 1988 and previous studies in the area provide the framework for the study.

#### Aggregate truck load, shift experiment

by J.R. Billing. Toronto : Ministry of Transportation, Transportation Technology and Energy Branch, 1990. v, 29 p. : ill.  
 MICROLOG 90-04047 1 fiche

Aggregate carriers expressed concern over the difficulty in loading their trucks close to the allowable gross weight while not exceeding the allowable axle weights. One reason suggested for this was that the load may be susceptible to shift during transportation. A limited experiment was designed to examine the tendency for truck loads of aggregate to shift during transportation between the quarry and a Ministry truck inspection station. Two loads of each of the 2 aggregates judged most likely to shift by aggregate producers and carriers were used. The load profile inside the trailer box was measured, and axles were weighed at the quarry, on arrival at the truck inspection station, and after an abrupt stop. The entire process was recorded on video tape.

#### Aging and malfunction of valves in CANDU special safety systems, phase 1

prepared by Numet Engineering Ltd. and Spectrum Engineering Corp. Ltd. Ottawa : Atomic Energy Control Board, 1989. vii, 207 p. : ill. Bibliogr. (Report : INFO-0303)  
 MICROLOG 90-00458 3 fiche

The most common type of failure in CANDU nuclear power plants (NPP) involves valve malfunctions. Valve problems have similarly been a major source of operational difficulties in pressurized nuclear systems in the US. The report identifies operational and environmental stressors causing time-dependent degradation of specified valves and failure modes and causes resulting from aging and service wear of the valves; assesses the effectiveness of current inspection, testing, condition monitoring and maintenance methods/practices for their capability to detect and mitigate aging degradation before a valve failure occurs; identifies practical and cost-effective precursor indicators of potential failure modes; provides guidance for selection of practical and cost-effective inspection, testing, condition monitoring, and maintenance methods capable of revealing degradation trends prior to valve failures; and recommends additional studies or tests.

### Air quality survey : suspended particulates, Town of Drayton Valley, September 5 to December 3, 1989

Alberta. Environmental Quality Monitoring Branch. Edmonton : Alberta Environment, Environmental Assessment Division,

Environmental Quality Monitoring Branch,  
1990. xi, 42 p. : ill., maps. Bibliogr.  
MICROLOG 90-05239 1 fiche

A suspended particulate monitoring program was conducted in the Town of Drayton Valley during the autumn of 1989 in response to concerns voiced by local residents regarding a noticeable amount of wood and ash particulate fallout. Suspended particulates were monitored by a network of 4 high volume samplers from September 5-December 3, 1989, and one dichotomous sampler from November 10-December 3, 1989. The dichotomous sampler was set up to monitor inhalable particulates in support of a coincident indoor air quality monitoring program. Suspended particulate data was analyzed for total suspended particulate loading, particle identification, and quantification of the primary constituents of particulate loading. The results were compared with wind direction frequencies so that source identification would be possible.

#### **Air-blast freezing of herring : studies of necessary freezing time**

by G. Lorentzen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 38 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5254) Originally published in Norwegian, by the Director of Fisheries, Norway. ISSN 0704-3716  
MICROLOG 90-02725 1 fiche

A major portion of the Norwegian production of frozen herring is brine-frozen in half-boxes, a method which increases rancidity and decreases the quality of the fish for food and bait. Air-blast freezing is increasingly substituted but takes a longer time and increases the cost. Up to the present, a satisfactory basis for a reliable calculation of the necessary freezing time has been lacking, although it is necessary to determine the correct size for a freezer plant. This paper presents the results of studies done from 1954-56 to establish freezing time by determining the most important variables, such as air temperature and velocity, which influence the freezing in 2 types of packaging. The study also included temperature equalization after the package had been removed from the freezer and placed in the storage area.

#### **Airborne respirable combustible dust mass determination : characterization of ashing properties of silver membrane and acrylic bound glass fiber filters**

by M. Grenier. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iii, 13 p. Bibliogr. (Report ; MRL 90-18(TR))  
MICROLOG 90-06006 1 fiche

The determination of the combustible component of airborne respirable dust is an important issue. Ashing of airborne dust samples at a high temperature is one way of obtaining the respirable combustible dust (RCD) fraction. This report gives the results of preliminary laboratory testing of silver membrane and one type of glass fiber filter submitted to ashing tests. The results are used to help develop a sampling protocol for the determination of RCD concentration in mine air as well as RCD size distribution.

#### **Airline deregulation in Canada**

by J. Christopher. Ottawa : Library of Parliament, Research Branch, 1989. 15 p. Bibliogr. (Current issue review ; 89-2E) French ed. (La Déréglementation du transport...) on the same fiche. ISBN 0-660-13323-7  
MICROLOG 90-01845 1 fiche

The domestic airline situation in Canada has evolved from one in which Air Canada (formerly Trans-Canada Airlines) had a monopoly in the domestic field to one in which the domestic airline industry - subject to certain restrictions on safety and foreign ownership - is completely deregulated. This paper gives a background and history of the process of deregulation, beginning in 1979. Committee hearings on the 1985 position paper are summarized, including such issues as air services in the north, the role of Air Canada, and foreign ownership. A summary of the 1986 National Transportation Act is given, along with its effect on the present situation. A chronology is included.

#### **An Airspace design system using a graphics workstation : the pilot project : final report**

by Lily Lam, Denis Leclerc ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Montreal : Virtual Prototypes Inc., 1988. xvi, 44 p. : ill. Bibliogr.  
MICROLOG 90-05800 1 fiche

Aircraft operating under instrument flight rules fly on predetermined flight paths from take-off to landing. To ensure safe operation of aircraft in flight, these paths must be designed based on established criteria. A pilot project was begun to build a computer aided design system for the design of airways and instrument approach procedures. This report presents the results of the pilot implementation of the airspace design system (ADS) and suggests recommendations for future development of the system. The pilot system was restricted to a specific test region covering the southern parts of Ontario and Quebec. A design module for computing an instrument landing system instrument approach procedure was chosen as a test module for implementation. The major system components of ADS are the flight procedure design expert system, the man-machine interface, the graphics manager and the data manager.

#### **Airtightness and pressure monitoring**

by A. Colantonio. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. v, 40, v, 44 p. Bibliogr. (Building performance evaluation series ; Document D36) Bilingual (Contrôle de la pression...) MICROLOG 90-02179 2 fiche

Air leakage (infiltration and exfiltration) represents a substantial part of the heating and cooling load of most large buildings and can also be an important parameter of indoor-outdoor pollution relationships by allowing untreated air to penetrate the building. Heat loss associated with envelope air leakage of typical office buildings can be as much as 40% of the total heat load in most Canadian climates. This document outlines the methods employed to determine airtightness characteristics and infiltration rates at different pressure differentials. The first method used is that of calibrated fans to either pressurize or depressurize a building to determine the airtightness characteristics at various pressure differentials. In the case of a very large building, the tracer gas decay rate method is used to determine infiltration rates at various mechanical system operating settings and resulting pressure differences.

#### **Albedo survey on Andrei Glacier, Iskut River Basin, B.C., midsummer, 1980**

by S. Fogarasi. Saskatoon, Sask. : Inland Waters Directorate, National Hydrology Research Institute, 1981. v, 13 p. : ill. Bibliogr. (NHRI paper ; no. 15)  
MICROLOG 90-05386 1 fiche

Andrei Glacier is located in the Boundary Range of the Coast Mountains in B.C. This report gives the results of measurements taken at 9 sites on ice surfaces which were contaminated to varying degrees by aeolian dirt, classified as white, whitish, dirty and very dirty. Albedo values were tabulated and plotted along a grid of 500m mesh. Suggestions are also given on how to model hourly ice surface albedo distribution over the glacier.

#### **Albert Mines oil shale deposit drill core resampling and calcium analysis**

by Three-D GeoConsultants Limited, for Canadian Occidental Petroleum Ltd., Alternate Fuels Division. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1990. 36 p. : maps. (Open file report ; 90-5) Fold maps not filmed. ISSN 0712-4562  
MICROLOG 90-06087 1 fiche

All analytical and associated geological and development work at the Albert Mines oil shale deposit concentrated, until recently, on its hydrocarbon content. Recent interest in coal-oil shale circulating fluidized bed combustion necessitated additional evaluation of the deposit's inorganic geochemistry and in particular, the distribution of calcium in the deposit. Until now, however, a deficient inorganic geochemical data base for the deposit made that evaluation difficult. Four of the core holes drilled in 1976 and previously only analyzed for shale oil yield were resampled. A total of 686 drill core samples were analyzed for the calcium content of the carbonate minerals present. The resampling program duplicated the 1976 sampling to permit direct comparison of calcium content and shale oil yields on a sample by sample basis.

Ce document d'orientation pour le développement du secteur 'Alimentation, hôtellerie et restauration' trace un portrait de ce secteur. On y constate que chacun des métiers de base a sensiblement évolué au cours de la dernière décennie. Toutefois, il ne s'agit pas d'une évolution technologique mais d'une évolution de la nature même de ces métiers. Au même titre que le programme Cuisine d'établissement, le programme Services de la restauration est un important programme du secteur. Cette étude préliminaire a pour but de valider l'hypothèse formulée dans le document d'orientation selon laquelle il serait souhaitable d'élaborer un nouveau programme d'une durée de 900 heures.

### Alkali activated ground granulated blast-furnace slag concrete : preliminary investigation

by E. Douglas...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1989. ii, 11 p. *Bibliogr.* (Report ; MSL 89-135(IR)) MICROLOG 90-02558 1 fiche

Ground granulated blast-furnace slags possess some hydraulic properties; therefore when slag mortars are made according to current standards, strength development occurs but at a lower rate than in portland cement mortars. It has been established that ground granulated blast-furnace slag mortars and concretes can be activated with alkaline reagents (NaOH, Ca(OH)<sub>2</sub>, sodium or potassium silicates), yielding compressive strengths comparable to or higher than those made with portland cement alone. This opens the possibility of formulating slag concretes without portland cement and possibly with improved properties such as higher resistance to chemical attack. This preliminary study presents the proportioning and the properties of 5 slag concrete mixtures activated with sodium silicate

### Alley Farming in the Humid and Subhumid Tropics : proceedings

editors B.T. Kang and L. Reynolds. Ottawa : International Development Research Centre, 1989. x, 251 p. : ill. Bibliogr. (Proceedings series ; IDRC-271e) ISBN 0-88936-540-7  
MICROLOG 90-01190 3 fiche (Available on fiche only)

An urgent challenge facing scientists working on upland food-crop production in many parts of the humid and subhumid African tropics is the need to find viable, sustainable, and environmentally sound alternatives to the ancient shifting cultivation and bush-fallow, slash-and-burn cultivation systems. As a food cropping and livestock-production technology, alley farming requires a low level of inputs and helps conserve soil resources while sustaining long-term farm productivity. This book reviews the present state of alley farming research and its application, discusses the use of woody species in tropical farming systems, highlights training and research needs, and proposes the establishment of channels for collaborative research

### Alloys of titanium and refractory compounds

by C.F. Dixon and H.M. Skelly. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1971. i, 15 p. : ill. Bibliogr. (Report ; PM-M 71-15)  
MICROLOG 90-04513 1 fiche

Previous work has shown that it is possible to produce arc melted zirconium alloys containing finely dispersed refractory compounds. Certain oxide refractories dissolve in molten zirconium during arc melting and subsequently precipitate as a dispersed phase on cooling. In this investigation, the possibility of dispersion strengthening titanium by this method was

examined. Thorium oxide (ThO<sub>2</sub>) and cerium zirconate (Ce<sub>2</sub>O<sub>3</sub>.2ZrO<sub>2</sub>) additions were made to titanium and to 2 high-temperature titanium alloys. Attempts to incorporate yttrium oxide (Y<sub>2</sub>O<sub>3</sub>) by this technique were not successful.

### Alternative electrical energy systems : a comparison of the risks of occupational and public fatalities

Canada. Advisory Committee on Nuclear Safety. Ottawa : The Committee, 1989. xx, 72 p. : ill. Bibliogr.  
MICROLOG 90-01129 2 fiche

The occupational and public health risks of different electrical energy production systems have been the subject of many studies in recent years. The Committee decided that an evaluation of these studies would be useful in judging the risks of nuclear-electric energy in the broader context of the risks of electrical energy from other sources. This report concentrates on the comparative risks of large coal, nuclear and hydraulic plants. Brief summaries of risk estimates for oil- and gas-fired electric power plants are appended. The report deals mainly with the risks of fatalities, whether by accident or disease, arising from normal operation but includes a discussion of the risks of catastrophic accidents. A literature search was conducted for objective critical evaluations or recent risk studies of electrical energy systems, 3 of which are used as the basis for this report. The report first describes and summarizes international data, then describes risk estimates for the Canadian situation.

### Alternative peeling method for shrimps : Kroborg peeling machine and peeling of raw shrimps

by H. Viggosson. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 50 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences, no. 5451) Originally published in Norwegian, by Fiskeriteknologisk Forskningsinstitutt at Tromsø, Norway. ISSN 0704-3716  
MICROLOG 90-00581 1 fiche

When compared with filleting plants, shrimp plants have a very small spectrum of products. It is therefore desirable to investigate whether alternative products could be manufactured with

deepwater shrimp (prawn) and whether this might result in increased profitability. The principle on which peeling machines used in Norway are based was developed before World War II in the U.S. Originally the machines were developed to peel raw shrimps, with a cooking unit added later. This report investigates the possibilities for peeling of raw shrimps with a conventional peeling machine, or using a Kronberg peeling machine to peel shrimp cooked at sea, fresh ice-covered shrimps (landed raw) and thawed shrimps frozen at sea.

#### Aluminum-silicon alloys produced by powder metallurgy methods

by H.M. Skelly and C.F. Dixon. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1967. i, 10 p. : ill. (Report ; PM-M 67-24)  
MICROLOG 90-04650 1 fiche

Description of powder metallurgy techniques used to prepare aluminum-silicon alloys containing up to 45% silicon in which the primary silicon is refined to a degree not previously accomplished. Three hypereutectic aluminum-silicon alloy powders with nominal silicon contents of 25%, 35% and 45% were made. Alloy melts were prepared by conventional means, first treated with phosphorus and magnesium. The powders were consolidated by cold compacting at 60,000 psi and then hot pressed at 700F with the same pressure; or isostatically cold compacted at 10,000 psi to give compacts of 1 15/16 inches diameter. The compacts were then hot pressed, using 750F and 38,000 psi, 1020F and 38,000 psi, and 1020F and 81,000 psi. pr

#### Aluminum-silicon powder metallurgy alloys

by H.M. Skelly and C.F. Dixon. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1970. i, 10 p. (Report ; PM-M 70-21)  
MICROLOG 90-04512 1 fiche

Previous work has shown that refined hypereutectic aluminum-silicon alloys containing up to 45% Si can be produced by powder metallurgy techniques. Pre-alloyed powders, produced by atomizing molten alloys to which phosphorus and magnesium were added as nucleating catalysts were consolidated by cold pressing, followed by hot pressing and then extruding. This investigation examines the possibility of producing hypereutectic aluminum-silicon powder metallurgy alloys with a fine dispersion of primary silicon without addition of nucleating catalysts. The feasibility of consolidating the resulting powders by hot pressing alone is also investigated and the effect of alloying additions of copper and magnesium on the properties of the Al-35% Si composition is determined.

#### Aluminum-tin alloys produced by powder metallurgy

by C.F. Dixon and H.M. Skelly. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1973. i, 10 p. : ill. Bibliogr. (Report ; PM-M 73-9)  
MICROLOG 90-04665 1 fiche

Aluminum alloys containing 20% and 30% Sn with 1% and 3% Cu are attractive for use as bearing materials to replace white metal alloys (tin-base and lead-base) and are being used extensively in the automotive industry as liners for main and connecting rod bearings. A problem in casting aluminum-tin alloys is that a deterioration in mechanical properties occurs when the tin content is increased above 10%.

An alternate method of producing aluminum high-tin alloys with a finely dispersed tin phase is by powder metallurgy (P/M) techniques using pre-alloyed atomized powder. This work examined the feasibility of producing aluminum-tin bearing alloys by the P/M route. Tensile, fatigue and hardness tests are used to compare the P/M alloys with the cast material.

#### L'Analphabétisme au Canada

par H. McKenzie. Ottawa : Bibliothèque du Parlement, Service de recherche, 1988. 34 p. Bibliogr. (Etude générale : BP-189F) L'éd. anglaise (Illiteracy in Canada) sur la même fiche. ISBN 0-660-92694-6  
MICROLOG 90-01913 1 fiche

Un degré d'alphabétisation élevé est l'une des caractéristiques des sociétés modernes et civilisées parmi lesquelles on range habituellement le Canada et dans lesquelles la scolarité gratuite et obligatoire des enfants est depuis longtemps la norme. Ces dernières années, cependant, des doutes troublants sont venus ébranler les certitudes de naguère concernant le niveau d'alphabétisation au Canada. Si l'on veut évaluer l'étendue et les conséquences de l'analphabétisme, il faut commencer par définir clairement le problème, et c'est ce que ce document entend faire.

#### Analyse de l'industrie de la construction au Québec en 1988

Québec : Commission de la construction du Québec, Service recherche et organisation, 1989. 96 p. CSI 67148.003. ISSN 0317-5901 ISBN 2-551-08480-6  
MICROLOG 90-01305 2 fiche

L'analyse de ces informations permet de tracer un portrait de l'activité sur les chantiers et de la population qui y oeuvre. Ainsi, les données contenues dans ce document posent un diagnostic sur l'état général de l'industrie de la construction en 1988, dans l'ensemble du Québec et chacune des régions. Il présente d'abord les principaux indicateurs économiques de l'industrie ainsi que les faits saillants survenus au cours de 1988 en matière de relations du travail; il étudie les principales caractéristiques des employeurs; et, se penche sur la question des salariés assujettis au Décret de la construction. Finalement, les quatre annexes qui complètent ce document fournissent, non seulement certaines définitions nécessaires à son interprétation, mais aussi près de quarante (40) tableaux statistiques complémentaires à ceux inclus dans le texte.

#### Analyses of selected physical and chemical characteristics of Dauphin Lake, Manitoba

by J.A. Babaluk and M.K. Friesen. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region. 1990. iv, 48 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences : no. 2081) This is the 16th manuscript report from the Central and Arctic Region, Winnipeg ISSN 0706-6473  
MICROLOG 90-06734 1 fiche

In 1982, a cooperative fisheries rehabilitation research program was initiated on Dauphin Lake by the federal and provincial governments to develop and test new biological and

hydrological techniques for the rehabilitation of fisheries in the fresh waters of Canada. Emphasis was on the rehabilitation of the walleye. Collection of baseline data included surveys of some physical and chemical characteristics of the lake. This report presents and discusses the findings of the 1982 water sampling survey and compares some Dauphin Lake data with data from the south basin of Lake Manitoba and Lake Winnipeg. Data and analysis of Dauphin Lake sediments collected during 1983 and 1984 are also presented and discussed.

#### An Analysis of flow data from Sentinel Creek, British Columbia, part 1

by S. Fogarasi and O. Mokievsky-Zubok. Saskatoon, Sask. : Environment Canada, Surface Water Division, National Hydrology Research Institute, 1986. 43 p. : ill. Bibliogr. (NHRI contribution ; no. 87012) ISSN 0838-1992  
MICROLOG 90-05376 1 fiche

In 1964, the Government of Canada identified 5 glacier basins in western Canada for intensive study during the 10 years of the International Hydrological Decade. Initial studies of the hydrological data collected at Sentinel Glacier indicated that the length of record was insufficient for frequency analysis. This report presents an analysis and assessment of Sentinel Glacier run-off data collected over 18 years. Although the record is still too short to provide conclusive results, plotting positions, empirical probabilities, return periods and ranked flows were calculated and missing values were estimated using elementary statistical methods. The log Pearson type III test and the Wakeby distribution test were used for descriptions of the annual maxima of daily flows.

#### Analysis of marine poisons and the applications

by T. Yasumoto. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 19 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5491) Originally published in Japanese. ISSN 0704-3716  
MICROLOG 90-01687 1 fiche

Numerous fish and shellfish accumulate poisons produced by bacteria and microalgae, which have in some cases been the cause of food poisoning. There is concern that some of these compounds may, if ingested for a long time below acute levels, lead to toxic conditions of the internal organs or accelerate the occurrence of cancer. Since it is increasingly difficult to use animals to test for toxins, it is therefore urgent to develop quantitative determination methods combining fluorescent reaction and high-speed liquid chromatography (HPLC). This paper presents information on fish and shellfish poisons and provides explanations on typical fluorescence - HPLC analysis methods usable for the analysis of these poisons. Actual examples such as the study of the food chain and the discovery of homologues are also given.

#### An Analysis of production-related key figures in the Norwegian fishing fleet, 1975-80 -- Rev.

by H. Erstad. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. vi, 171 p. (Canadian translation of fisheries and aquatic sciences ; no. 5262) Originally published in Norwegian, by the Institute of Fishery Technology Research at Norway. ISSN 0704-3716  
MICROLOG 90-02717 2 fiche

Report on the development of productivity in the Norwegian fishing fleet from 1975-80, based on financial statements of the Budget Committee for the Fishing Industry for vessels of 13 m (40 feet) length overall and above. Financial data is based on 1978 NKr values; price indexes were calculated based on average prices from fishery statistics and differentiated according to type of operation; and the wholesale price index, wage statistics and official statistics were used in the deflation calculations. Productivity is measured as catches or processed value per man-week, by type of vessel and year. Value created by a vessel is measured as a percentage of the capital invested in the vessel. The report demonstrates how the capital and labour factors are distributed in the different branches of the Norwegian fishery and how conditions have developed between the two.

#### Analysis of quality control tests done by the Canadian power utilities on their external dosimetry systems

by G.S. Poirer. Ottawa : Atomic Energy Control Board, 1989. 14 p. (Report ; INFO-0301)  
MICROLOG 90-00457 1 fiche

The Canadian nuclear power utilities (Hydro Quebec, New Brunswick Electric Power Commission, Ontario Hydro) use thermoluminescent dosimetry systems to perform their own external beta/gamma dosimetry. To help ensure that these systems perform satisfactorily, they are subject to routine quality control testing by their parent organizations. This report presents the test results for June 1985-May 1988 as analyzed by the Atomic Energy Control Board, using the pass criterion which was originally agreed upon by the organizations involved. This analysis

offers a comparison of the performance of the different sites which operate such a service. Recommendations are made to help the organizations in refining their dosimetry.

# **An Analysis of some factors affecting catch rates of sub-65' groundfish fishing vessels in 4X/sub-area 5 of southwest Nova Scotia**

by R. Shotton. Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region, Program Coordination and Economics Branch, 1989. vi, 129 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1707) ISSN 0706-6457  
MICROLOG 90-00691 2 fiche

The initiative for this analysis was the requirement to resolve problems arising from excess fishing capacity in the 4X/sub-area 5 demersal fishery. The report examines the relations between vessel dimensions and their catch success for sub-65' groundfish fleet operating in the NAFO areas 4X and 5 of southwest Nova Scotia. Vessel dimensions examined include length overall, gross tonnage, brake horse power, and cubic number. Catch success is measured at catch (either weight or value) per day fished, and per year. The interrelationship of the vessel dimensions and the trends in these dimensions as a function of vessel age are also examined. Regression analyses were done on data for 1984 and 1985 with all data sets aggregated, and when disaggregated by year and gear class - mobile gear and longlines. Regressions were further done with the data disaggregated on a stock and seasonal (quarter) basis. The amount of time spent fishing per year, and the fraction of time at sea spent fishing, was examined as a function of gear type and vessel dimensions.

# **An Analysis of wheat supply response under risk and uncertainty**

by R.A. Schoney. Ottawa : Agriculture Canada, Policy Branch, 1990. xii, 158 p. : ill. Bibliogr. (Working paper ; 1/90)  
MICROLOG 90-03919 2 fiche

Study to appraise typical Saskatchewan grain producer supply response to price induced risk and to quantify the major sources of farm income risk, price and yield, faced by typical wheat farmers on brown soils. A representative study approach is used to evaluate producer response to alternative generic price stabilization policies. Producer response to risk is evaluated at the whole farm level, not at the enterprise level. Supply response is based on the fallow/seed FLEXCROP decision rule, which is based on the critical soil moisture threshold and actual spring soil moistures. A bio-economic accumulator is constructed incorporating stochastic May soil moisture and yield relationships and deterministic farm costs. Three price scenarios and 4 price policies are examined.

### Annapolis Basin soft-shell clam *Mya arenaria* mortality study : a summary of field and laboratory investigations

by N.J. Prouse...et al. Dartmouth, N.S. Bedford Institute of Oceanography, 1987. vii, 19 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1987) ISSN 0706-6493 MICROLOG 90-06592 1 fiche

In April 1987, soft-shell clams in a small intertidal area of the Annapolis Basin, N.S. were found dead. Since live and apparently healthy clams were still found in the higher beach region at this location, it was decided to set up experimental plots in the area of dead clams to determine if mortality factors were still acting. A 100% mortality of transplanted experimental clams within 2 months indicated that this was the case. Although there is evidence from preliminary laboratory studies that predation by the ribbon worm may have occurred, this is believed not to be the cause of the mortality. As part of an investigation to determine the cause of this mortality, sediment and clams were collected in October, 1987 from the dead clam area and a nearby tidal flat as a control. In the laboratory, sediments, half of which were autoclaved to remove microorganisms, were placed into running seawater tanks into which healthy clams were transplanted. The clams were observed for 3 months and the sediment was tested for pesticides, heavy metals, and PCBs.

#### Annual and geographical variations in sealworm *Pseudoterranova decipiens* larvae in rainbow smelt *Osmerus mordax* from the Gulf of St. Lawrence

by T. Landry. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1990. viii, 11 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1734) ISSN 0706-6457  
MICROLOG 90-06634 1 fiche

The use of rainbow smelt as a host indicator of sealworm abundance offers an accurate temporal and geographical index for inshore areas. The smelt sealworm survey was initiated in 1984 with 4 locations sampled along the New Brunswick coast, and has increased to 9 locations from the Gulf of St. Lawrence in 1989. This inshore survey is complementary to the American plaice sealworm survey for offshore areas. The data collected from 1989 are analyzed with those from past collections (1984-88) to evaluate variations in sealworm abundance over a 5-year period.

#### Annual design competition 1990 : award winning housing for Nova Scotia, no. 5

Halifax : Dept. of Housing ; Canadian Home Builders' Association of Nova Scotia ; Ottawa : Canada Mortgage and Housing Corporation, 1990. 14 p. : ill. CSI 51109.002.  
MICROLOG 90-07181 1 fiche

The Nova Scotia Dept. of Housing, in conjunction with Canada Mortgage and Housing Corporation and the Canadian Home Builders' Association of Nova Scotia sponsors this competition annually to encourage architectural students to create workable housing designs that will effectively solve a problem posed by the sponsors. The project was to design one single (475 sq ft) and one double (500 sq ft) occupancy garden suite, defined as small, self-contained units which are usually placed on the same lot as the home of close family members and are easily moveable. The suites should accommodate living, dining, cooking, sleeping and storage. This report presents the problem, gives information on the sponsors and the jury, and presents the first, second and third prize awards.

#### Annual progress report : snow management and meltwater enhancement, 1987-88

by W. Nicholaichuk, D.M. Gray and B. McConkey. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. 32 p. : ill. (NHRI contribution ; no. 89015) CSI 21148.003. ISSN 0838-1992  
MICROLOG 90-06490 1 fiche

Based on the action plan submitted in the first annual progress report of February 1987, this report summarizes the results from the 1987-88 field season, based on studies at field sites established at Kerrobert, Richlea, Swift Current and Saskatoon. The project studied the effect on meltwater enhancement of spiking, paraplowing and subsoiling or deep ripping under the stubble management treatments of tall stubble and trap strips; established the potential of managing snow by stubble management practices for meltwater augmentation on severely cracked soils; evaluated the application of subsoiling practices for establishing and increasing the productivity of hill tops; evaluated the effects on yield of increased water additions obtained with the

practices listed; examined the effects of different tillage and snow in surface runoff and groundwater recharge; studied the effects of the depth and spacing of different subsoiling treatments in the root zone and the energy requirements for installation and to establish criteria for system design.

Rapport annuel portant sur l'application de la Loi sur le multiculturalisme canadien. Il se penche particulièrement sur les points suivants: une description des activités similaires à celles appuyées par le ministère pendant l'année; des renseignements ayant pour but de compléter plutôt que de reproduire les informations contenues dans le Rapport annuel du ministère et dans la Partie III des prévisions budgétaires du Secrétariat d'Etat pour 1988-89. Il expose également les points saillants des programmes énoncés dans ces rapports. Finalement, le document se penche sur les principaux développements, les activités du programme de multiculturalisme, et l'engagement à l'échelle de l'ensemble du gouvernement.

#### Application of Rheological Element Method (REM) model for open-pit design optimization

Serata Geomechanics, Inc. Richmond, CA : The Corporation, 1989. ii, 49 p. : ill. Bibliogr. CANMET contract: 79048-01-SQ.  
MICROLOG 90-03389 1 fiche

Documentation of a computer simulation study which focused on field calibration of the site-specific computer model constructed for a certain area of Pit 03 of Highvale Mine. The model was calibrated against ground deformation data collected in field monitoring programs. Three pit designs with different excavation geometries are evaluated by finite element computer simulation. The computer projected results are examined and compared with those obtained in a previous project.

#### The Application of roller compacted concrete to pavements for heavy truck routes in Ontario

by D.F.E. Stolle and A. Kluge. Toronto : Ministry of Transportation, Research and Development Branch, 1989. iii, 59 p. : ill. Bibliogr.  
MICROLOG 90-04892 1 fiche

Roller compacted concrete (RCC) refers to the technique of using a zero slump Portland cement concrete, placed by common asphalt paving equipment, and compacted by a vibratory roller to form a high strength concrete. This study evaluated the potential of RCC composite pavements as a cost-effective means for reducing pavement rutting. A literature review assessed the current state-of-the-art on RCC and identified differences between RCC, conventional Portland cement concrete (PCC) and lean concrete base (LCB) pavements. An experimental research program compared the strength and durability properties of conventional concrete (slump) and RCC (zero slump) using various Ontario aggregates, as well as thickness design and material specifications for RCC and plain concrete pavements.

#### Application of the pseudoadiabatic reactor to the conversion of synthesis gas into blending stocks : final report

by H. De Lasa...et al. London, Ont. : University of Western Ontario, Faculty of Engineering Science, Chemical Reactor Engineering Centre, 1989. x, 422 p. : ill. Bibliogr. CANMET contract: 69192-01-ST.  
MICROLOG 90-03960 5 fiche

A bi-functional catalyst was successfully developed at the Chemical Reactor Engineering Centre of the University of Western Ontario with the dual function of methanol synthesis and methanol conversion. Based on tests carried out in a Berty reactor, the following catalyst composition was chosen: 63% Zn/Cr(25/75 atomic ratio), 27% H-ZSM-5 and 10% Versal 950 Al<sub>2</sub>O<sub>3</sub> binder. A kinetic model for the conversion of synthesis gas was also developed and tested with experimental data obtained in a Berty well-mixed reactor. A pilot plant used extensively for the conversion of methanol in a previous project was modified and adapted for the conversion of synthesis gas. A number of runs were developed to confirm the possible application of the pseudoadiabatic reactor concept for the selective conversion of synthesis gas into hydrocarbons (gasoline range).

#### Applications of radar in highway design, construction and maintenance

by C.R. Carter and T. Chung. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1988. v, 51 p. : ill. Bibliogr.  
MICROLOG 90-00366 1 fiche

Recent studies to identify methods of determining the condition of asphalt-covered bridge docks have shown ground penetrating radar to be a powerful investigative tool. A project in 1983 led to the computer processing of the impulse radar data, and a follow-on project in 1984 led to the development of DART, a system combining the impulse radar, a 5th wheel for measuring distance and a microcomputer-based data acquisition system for processing. This report examines geophysical site conditions, pre-engineering quality assurance and maintenance, weather monitoring and road surface conditions, and traffic characteristics in detail to determine how radar can be applied to the problem, whether there are any obvious problems in the implementation, and what the probability of success is likely to be. The report also identifies the benefits which may accrue from reduced costs or from technical improvements in the quality of data or speed of data collection.

#### Aquaculture wastewater treatment : wastewater characterization and development of appropriate treatment technologies for the New Brunswick smolt production industry : final report

by D. Stechey and Y. Trudell. Windsor, Ont. : Canadian Aquaculture Systems Bioengineering Technologies & Business Management Services, 1990. iii, 101 p. : ill., fold. ill. Bibliogr. This study was developed and implemented through the co-operative efforts of the New Brunswick Dept. of Fisheries and Aquaculture and the Dept. of the Environment.  
MICROLOG 90-06024 2 fiche

The environmental impact of intensive fish culture has been discussed for a long time, but an industry-wide implementation of economically feasible and effective technologies for effluent treatments remains minimal. This field study examines commercial fish production practices, culture facilities design, suspended solids settling behaviour, and critical design parameters of existing effluent treatment operations to identify those factors which most significantly affect effluent quality and management. An emphasis was placed upon commercial culture of Atlantic salmon smolts in New Brunswick; however, data from a similar study conducted at intensive rainbow trout culture operations in Ontario were included for comparison.

#### Aquatic sensitivity to acidic inputs : Manitoba

by M. Morelli. Winnipeg : Manitoba Environment and Workplace Safety and Health, 1989. iv, 29 p. : maps. Bibliogr. (Water Standards and Studies report ; no. 89-4) Fold. maps not filmed.  
MICROLOG 90-02350 1 fiche

The province of Manitoba together with British Columbia, Alberta, Saskatchewan, the Northwest Territories and Canada made a commitment in December 1982 to coordinate research

activities related to the long range transport of air pollutants (LRTAP) in western Canada. The objectives of this coordinated effort included the identification of current conditions in western Canada, and the gathering of necessary information to develop appropriate management strategies to address LRTAP issues. This report deals with the mapping of aquatic sensitivity to acidic deposition. Water quality data collected between 1977 and 1986 were used to prepare Manitoba's aquatic sensitivity maps and used data for alkalinity, calcium and pH.

### Artificial circulation in British Columbia : review and evaluation

by K.I. Ashley. Victoria : Ministry of Environment and Parks, 1987. ii, 34 p. Bibliogr. (Fisheries technical circular ; no. 78) ISSN 0319-9436 ISBN 0-7726-0697-8  
MICROLOG 90-00634 1 fiche

Artificial circulation has become an important management technique in B.C. for improving over-winter trout survival in interior winterkill lakes and providing adequate summer refugia in eutrophic coastal lakes. Most of the easily accessible lakes are now being circulated and future projects will require considerable expenditures of capital and labour. This paper documents the historical development of artificial circulation in B.C.; reviews the individual projects and examines common problem areas; provides a benefit-cost analysis on a sub-sample of 10 lakes; and provides recommendations on future research and application of artificial circulation.

MICROLOG 90-01628 13 fiche

Bilingual vocabulary in the field of artificial intelligence containing about 12,000 terms, of which 3,700 are accompanied by definitions. Most of the terms are related to knowledge representation, theorem proving, pattern recognition, cognitive psychology, informatics, natural language processing, automatic program generation, problem solving, image processing, expert systems, speech recognition, modelling, artificial vision, machine translation, computer-assisted translation, learning, man-machine dialogue, and logic and linguistics applied to artificial intelligence. Although robotics is often considered a subfield of artificial intelligence, it has been excluded from this vocabulary.

### Artificial rearing of young lambs -- 2d rev.

by A.D.L. Gorrill...et al. Ottawa : Agriculture Canada, 1990. 26 p. : ill. Bibliogr. *French ed (Elevage artificiel des agneaux) on the*

same fiche. ISBN 0-662-17341-4  
MICROLOG 90-05749 1 fiche

Artificial rearing is the practice of removing very young lambs from their mothers and raising them on milk replacer, a practice which is increasing because of the use of more prolific breeds. This publication summarizes the findings of a number of studies into practical guidelines for successful artificial-rearing operations. The publication includes selecting and preparing lambs, artificial rearing management, the choice of milk replacer, feeding systems, sanitation and cleaning, lamb diseases and digestive upsets, and the performance of lambs raised on milk replacer. ### Aspects of employment on P.E.I. during the 70's

Charlottetown : Dept. of Finance, Economics, Statistics and Fiscal Analysis Division, 1984. 16 p. : ill. (Economic trends ; no. 21)  
MICROLOG 90-04874 1 fiche

The major concern that has plagued P.E.I. throughout this century has been that of unemployment, and particularly the question of youth unemployment. The 1983 Trends suggested that the parallel increase in unemployment, labour force participation, employment itself, and unemployment insurance dependence, were likely the result of a general expansion of work of a short term nature, relative to year round employment. This document examines this aspect of employment on P.E.I. with the help of new releases from the 1981 Census. AP CO LA PR

### Assessing cold hardness in conifers : a problem analysis and discussion paper

by S.E. Keates. S.I. : Forest Resource Development Agreement, 1990. 20 p. Bibliogr. (FRDA report ; 106) This is a joint publication of Forestry Canada and the British Columbia Ministry of Forests. ISSN 0835-0752 ISBN 0-7726-1080-0  
MICROLOG 90-05856 1 fiche

This report presents a problem analysis of the major cold hardness tests, methods of evaluating cold injury, and means of expressing cold hardness in forest seedlings. Potential methods for measuring cold hardness are assessed according to quantitative measures of cold injury to determine the practicality of each testing program. The report describes testing methods, including freeze testing and tissue preconditioning; methods of evaluating injury, including morphological, physiological, chemical, physical, and electrical assessment; and methods of expressing hardness, including LT50 estimates, visual injury indices and logistic regression models. • BC CA FO SC

### Assessment of Arctic grayling populations in northern Saskatchewan

by J.J. Merkowsky. Saskatoon, Sask. : Dept. of Parks and Renewable Resources, Saskatchewan Fisheries Laboratory, 1989. xii, 117 p. : ill., maps. Bibliogr. (Fisheries technical report ; 89-4)  
MICROLOG 90-05892 2 fiche

Grayling are distributed in the northern third of Saskatchewan as far south as the 56th parallel, occurring in localized pockets, a tendency which makes them particularly susceptible to overfishing. Concern over the status of such grayling populations prompted a 2-year study in 1987-88. The study investigated the biology of the grayling and assessed population levels before introducing a new management strategy. Grayling were investigated at the areas of Wollaston Lake, Fond du Lac and Clearwater River. Several waterbodies within each of these locations were examined. A mark-recapture experiment was carried out, using barbless hooks and flies. FI LS MS PR SC

### Assessment of Atlantic salmon *Salmo salar* L. habitat in the Sackville River, N.S., 1986

by J.D. Cameron. Halifax : Dept. of Fisheries and Oceans, Biological Sciences Branch, Freshwater and Anadromous Division, 1990. vii, 39 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2059) ISSN 0706-6473  
MICROLOG 90-04782 1 fiche

In 1986, the main stem of the Sackville River and the Little Sackville River were surveyed to measure and evaluate potential Atlantic salmon habitat. Data on obstruction, water temperatures, water chemistry and other factors affecting fish life were collected. This information, in conjunction with that of previous bio-assay and electrofishing surveys, was used to estimate the potential of the Sackville River system for natural production and the possible enhancement with hatchery stocks. • AP CA CF FI LS SC

### An Assessment of client services and data publications

RBG-H20 Co Ltd. Regina : Environment Canada, Water Resources Branch, Saskatchewan District, 1989. 30 p. Bibliogr. MICROLOG 90-02435 1 fiche

This report evaluates client satisfaction with the data and information services provided by the Water Resource Branch (WRB), Saskatchewan District. The evaluation includes a subjective look at the value of WRB's data publication series, how new technologies for distributing WRB's data are being accepted, what additional data and information would be useful, and how clients rate the quality of the service being provided by the WRB, Saskatchewan District. ### Assessment of cost effectiveness of R-2000 energy measures in the Prairies

by W.J. Mayhew. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1989. ix, 92 p. : ill. Bibliogr. ISBN 0-88654-251-0  
MICROLOG 90-01164 2 fiche

Report which gives the results of an analysis of the actual costs of energy conservation measures and related building components used under the R-2000 program, determines the cost effectiveness of energy conservation measures, assesses the results and describes the differences in construction practices and incremental costs for local conditions, and makes recommendations, on a regional basis, on appropriate energy conservation techniques. The actual costs of R-2000 energy conservation measures and related building components were determined by examining recent costs reported by experienced R-2000 builders in Alberta, Saskatchewan, and Manitoba on a selected

sample of R-2000 houses. Energy consumption values were predicted using the HOT-2000 Energy Analysis Program. In addition, the actual R-2000 house designs were optimized using the HOT-2000 computer program to minimize incremental costs and maximize cost effectiveness. The resulting data were tabulated, assessed and used to develop recommendations.

### Assessment of errors in airflow measuring instruments

by J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. viii, 125 p. : ill. (Report : MRL 90-055(TR))  
MICROLOG 90-07127 2 fiche

Comprehensive tests on the behaviour of several air sampling pumps were conducted, with extensive measurements of the pumps' airflow rates under a variety of experimental conditions using a number of airflow rate measuring devices. Pumps were tested using glass fibre filters and Millipore filters, both commonly used in radon (and thoron) progeny air sampling. The effect of the length of plastic tubing used to connect the filter/filter holder system to the intake port of the sampling pump, and the effect of attaching a length of plastic tubing to the exhaust port of the pump were also investigated. The investigation was partly prompted by previous experimental observations regarding 'abnormal' flowrate effects during the technical evaluation of an instant working level meter.

### An Assessment of five upper Fraser River chinook salmon sport fisheries, 1988

by N.D. Schubert. New Westminster, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1990. xii, 58 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2051) ISSN 0706-6473  
MICROLOG 90-04975 1 fiche

The escapement of chinook salmon to the Fraser River system has improved since the early 1980s to an extent which permitted the reopening of sport fisheries in selected terminal areas beginning in 1986. In 1988, sport fisheries were opened in the Bowron, Bridge, Clearwater, Quesnel, Shuswap and South Thompson Rivers, with fishing time expanded over 1987 in the Shuswap and South Thompson Rivers. This report describes the study design and field procedures and documents the results of the 1988 sport fishery assessment studies in the Bowron, Bridge, upper Quesnel, lower Shuswap and Thompson Rivers. The report presents estimates of angler effort, harvest and release by species, and angler attributes in each fishery. It concludes with a discussion of results and recommendations for the management and assessment of future fisheries.

### An Assessment of induced investments resulting from the purchases of goods and services made by the Canadian Parks Services, fiscal year 1988-89

Thompson Economic Consulting Services. Ottawa : Dept. of the Environment, Canadian Parks Service, Socio-Economic Branch, 1989. iii, 56 p.  
MICROLOG 90-03139 1 fiche

The purpose of this study is to examine the question of private-sector induced expenditures as they relate to spending by the Canadian Parks Service and to assess the economic impacts generated by these investment expenditures. It includes a review of recent projects, and a description of the methodology that can be used to assess the relationship between Canadian Parks Service expenditures and investment in the private sector. It then uses the recommended methodology to quantify the economic impacts resulting from induced private-sector investment in the 1988/89 fiscal year arising from the mix of goods and services purchased by the Canadian Parks Service. Finally, it provides a summary of findings about the nature of economic impacts attributable to private-sector investment induced by Canadian Parks Service spending.

### Assessment of performance and cost effectiveness of wind energy conversion systems

by M.S. Chappell and R.J. Templin. Ottawa : National Research Council Canada, Division of Energy, Wind Energy Program, 1984. vi, 22 p. : ill. (Technical memorandum ; TM-WE-010)  
MICROLOG 90-02328 1 fiche (Available on fiche only)

The cost-effectiveness of a wind energy conversion system (WECS) installation depends on many parameters and there are many different methodologies used to calculate it. This report outlines a simple procedure which takes account of most significant parameters that affect cost-effectiveness, and presents some discussion and illustrations of their relative importance and sensitivities. The 4 major factors which govern the economics of wind energy installations are the wind regime at the site, the performance of the WECS, its installed cost, and the projected operational/economic scenario. These factors and their interrelations are discussed. Introduction of simplifying yet realistic approximations allows a convenient assessment technique for WECS cost-effectiveness to be developed and presented as a multi-parameter nomograph, which illustrates the sensitivities of most major parameters. Example cases are cited to demonstrate the techniques.

**An Assessment of rainbow trout  
*Salmon gairdneri* population in the  
Upper Nechako River and the effects  
of a sportfishery closure**

by P.A. Slaney. Victoria : Ministry of  
Environment and Parks, 1986. ii, 37 p. : ill.  
Bibliogr. (Fisheries management report ; no.  
89) ISSN 0705-5390 ISBN 0-7726-0635-8  
MICROLOG 90-00632 1 fiche

The Nechako River, near Prince George in the  
central interior, has had a sport fishery active  
for rainbow trout, char and whitefish for  
several decades. In 1983 rainbow trout were  
enumerated in the upper 5 km of the river,  
along with several other streams, leading to  
restrictive regulations and rotating closures.  
Because little was known on the effect of such  
closures, population studies and sampling were  
conducted from 1983-86 to determine the  
abundance of rainbow trout in the river, the  
effects of the fishery closure, which was  
restricted to the Upper Nechako River, and the  
effectiveness of stocking 2 strains (lake and  
stream) of juvenile trout to augment the  
population.

**An Assessment of stocked fish  
populations in Smuts Lake**

by W.K. Liaw. Saskatoon, Sask. : Dept. of  
Parks and Renewable Resources,  
Saskatchewan Fisheries Laboratory, 1989. xi,  
41 p. : ill. Bibliogr. (Fisheries technical report  
; 89-2)  
MICROLOG 90-05893 1 fiche

Stocking of walleye in Saskatchewan has  
traditionally been done with newly hatched fry.  
However, lack of success with previous  
stocking has shifted the focus in recent years  
from stocking with fry to fingerlings. In 1988  
Smuts Lake was chosen as an experimental  
lake to compare the success of walleye fry vs.  
fingerling stocking. In May 1988, 100,000  
walleye fry were stocked in Smuts Lake, and  
in August, 4,160 pond-reared fingerlings were  
released. In 1982, the lake was stocked with  
adult yellow perch, which have successfully  
reproduced. Samples of walleye and yellow  
perch were obtained regularly from Smuts  
Lake during open water seasons in 1988 and  
1989 for growth and stomach content analyses,  
as well as for population estimates. This  
report documents the results of the walleye  
stocking and the current status of the yellow  
perch population in the lake.

**An Assessment of the fall Vedder-  
Chilliwack River sport fishery, 1988**

by I.W. Whyte and N.D. Schubert. New  
Westminster, B.C. : Dept. of Fisheries and  
Oceans, Fisheries Branch, 1990. ix, 24 p.  
Bibliogr. (Canadian manuscript report of  
fisheries and aquatic sciences ; no. 2050)  
ISSN 0706-6473  
MICROLOG 90-04976 1 fiche

The Vedder-Chilliwack River supports one of  
B.C.'s largest nontidal sport fisheries. During  
the fall, the fishery targets on coho salmon,  
although some effort has been directed towards  
chinook salmon since the river was reopened  
to the harvest of the species in 1984. Both  
populations are supplemented by releases of  
marked and unmarked hatchery reared smolts.  
This study assessed the angler effort, harvest  
and release in the Vedder-Chilliwack River from  
August 1-November 30, 1988.

**An Assessment of the feeding habits  
of harbour seals *Phocia vitulina* in the  
Strait of Georgia, British Columbia,  
based on scat analysis**

by P.F. Olesiuk, et al. Nanaimo, B.C. : Dept.  
of Fisheries and Oceans, Biological Sciences  
Branch, Pacific Biological Station, 1990. vii,  
135 p. : ill. Bibliogr. (Canadian technical  
report of fisheries and aquatic sciences ; no.  
1730) ISSN 0706-6457  
MICROLOG 90-05015 2 fiche

In B.C., recent concern over marine mammal-  
fishery conflicts focused mainly on the harbour  
seal. Accurate assessments of pinniped-prey  
interactions were generally precluded by the  
lack of information on their feeding habits. This  
report describes the seasonal and regional  
variations in the diet of harbour seals in the  
Strait of Georgia based on 2,841 scat samples  
collected from 58 sites (11 estuaries and 47  
non-estuary haulouts) in all months, and the  
diet compared with the diet in other regions of  
the province based on 159 samples. Prey  
remnants were separated from other fecal  
matter using an elutriator and prey identified  
using a wide variety of structures including  
otoliths, teeth, vertebrae, cranial, appendicular  
and caudal elements, and scutes and spines.  
A new index, called the split-sample index, was  
used to assess the relative importance of prey  
and the validity of the assumptions underlying  
the index, and scat analysis in general, were  
addressed. Annual prey consumption was  
estimated by combining dietary information with  
data on the abundance and distribution of seals  
and estimates of their daily food requirements.

**Assessment of the iron-based,  
stressed-shell container**

by B. Teper and S.A. Reid. Toronto : Ontario  
Hydro, Research Division, 1989. v, 118 p. :  
ill. Bibliogr. (Report ; no. 89-214-K)  
MICROLOG 90-03534 2 fiche

An iron-based, stressed-shell container is  
proposed for the immobilization and disposal of  
used CANDU fuel bundles in an up-to-1000-m  
deep underground vault. The container is  
designed to hold 72 used fuel bundles and  
includes a 19-tube basket, a steel cask that  
provides the required structural strength and a  
thin titanium shell placed over the steel cask  
for corrosion protection. An alternative design  
is proposed having a thick steel shell that  
includes a corrosion allowance. A press-fit,  
self-locking closure is being developed to  
facilitate easy and reliable remote assembly.  
Performance of the design was assessed  
through finite element analysis of stresses,  
buckling deformations and the long term creep.  
The analysis was supported by test programs  
on closure strength, sealing capability and  
creep in steel at up to 150C.

**Assessment of the Takla Landing  
contour trench wastewater disposal  
system : a report**

to Canada Mortgage and Housing  
Corporation...et al. Vancouver, B.C.  
NovaTec Consultants Inc., 1989. 64 p. : ill.,  
maps. Bibliogr.  
MICROLOG 90-06835 1 fiche

The community of Takla Landing is located on  
Takla Lake Band Reserves No. 7 and 7A on  
the east shore of Takla Lake, approximately  
120 km north of the Village of Fort St. James.  
A 2-year monitoring study of the disposal  
system was carried out to evaluate the effect  
of synthetic geotextile, the insitu material (a  
moderate to high permeable sand/gravel) and a  
specified sand trench bottom surface infiltrative  
media for their ability to enhance the formation  
of a biomat, or biological/organic material layer.  
Wastewater samples were collected using  
sampling devices located directly underneath the  
trench bottom and analyzed for BOD/COD,  
nutrients and bacterial quality. Groundwater  
samples were collected from monitoring walls  
positioned downslope of the test section of the  
contour trench and the analytical data  
compared with the background groundwater  
quality for nutrient and bacterial concentrations.  
Biomat samples were collected and analyzed  
for microbial activity and subjected to scanning  
electron microscopy.

# **Assessment of Waterloo flash pyrolysis process to obtain liquid fuels from Canadian peat**

by D.S. Scott. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, Waterloo, Ont. : University of Waterloo, Waterloo Research Institute, 1988. xv, 142 p. : ill. Bibliogr.  
MICROLOG 90-00386 2 fiche

Description of the first study of the pyrolysis of a Canadian peat to obtain a maximum yield of liquids by an economical and low capital cost process. The Waterloo fast pyrolysis process (WFPP), an atmospheric pressure fluidized bed thermal pyrolysis process, was chosen for evaluation because of its success in achieving high liquid yields when biomass was used as a feedstock. A series of pyrolysis tests at different process conditions were carried out in the small WFPP pilot plant at feed rates of 1-2 kg/h to establish optimal process conditions for maximum liquid yields, and to produce sufficient quantities of pyrolysis oil to allow an evaluation of the composition of the oil. In addition, a series of tests on various grades of peat were carried out to evaluate the fluidized bed as a dryer for milled peat.

# **An Assessment (1987) of wood protection (anti-sapstain) facilities in the British Columbia Lower Mainland area**

by R.D. Glue and P.K. Krahn. West Vancouver, B.C. : Environment Canada, Conservation and Protection, Environmental Protection, Pacific and Yukon Region, 1988. v, 35 p. Bibliogr. (Regional program report ; 87-20)  
MICROLOG 90-03133 1 fiche

In 1984, a mailout survey was conducted of wood protection operations at sawmills and lumber-export terminals to measure the degree of implementation of recommendations made in a Code jointly published and distributed by the federal and provincial governments in

December 1983. The mailout was repeated in 1986. This report is based on an audit of 26 B.C. Lower Mainland mills which were previously surveyed by the 1984 and 1986 questionnaires. The 1987 audit increased the number of criteria against which a mill could be scored from 14 to 22 and assessed each criteria on a weighted scale of risk to the environment. Descriptions are given of the weighted criteria, along with mill scores for implementation of environmental design criteria, including risk of contamination of storm water runoff.

# **The Assimilation number and its variations in the cultures and natural populations of marine phytoplankton**

by V.I. Vederikov. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1984. 35 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5122) Originally published in Russian, in the USSR. ISSN 0704-3716  
MICROLOG 90-00052 1 fiche

The pigments of plastids encountered in marine phytoplankton are classified into 4 main groups on the basis of their chemical structure: chlorophylls 'a', 'b' and 'c', and carotenes. This paper calculates the mean chlorophyll ratios in various groups of algae which are characteristic of marine phytoplankton, and describes the role of chlorophyll 'a' in photosynthesis.

# **L'Asthme des travailleurs des conserveries de crabe : un résumé des risques sur le plan professionnel**

par R. Bertolini. Hamilton, Ont. : Centre canadien d'hygiène et de sécurité au travail, 1989. i, 6 p. Bibliogr. ISBN 0-660-92681-4  
MICROLOG 90-02166 1 fiche

L'asthme des travailleurs des conserveries de crabe désigne l'asthme dû à l'inhalation des poussières, des aérosols ou des vapeurs qui

se dégagent durant la transformation du crabe. Cet asthme est attribuable à une réaction anormale de l'organisme à certaines substances chimiques se trouvant dans la chair ou dans la carapace du crabe. Cette réaction anormale, appelée sensibilisation, se produit après des périodes variables d'exposition en milieu de travail. Ce document fait la lumière sur cette maladie respiratoire qui cause l'obstruction des voies respiratoires, rendant la respiration difficile.

#### Atikokan TGS aquatic studies, 1981 to 1988, I : physical characteristics

by G.T. Haymes. Toronto : Ontario Hydro, Research Division, 1989. vi, 40 p. : ill. Bibliogr. (Report ; no. 89-292-K) MICROLOG 90-03993 1 fiche

Atikokan Thermal Generating Station consists of one 200 MW lignite-fired unit. The condenser-

cooling-water for the station is drawn from the 10-m depth of Moose Lake and discharged at the surface into Snow Lake, circulating through Snow, Icy, Abie and Marmion Lakes before returning to Moose Lake. Aquatic studies were conducted for 3 years before commissioning and for 3 years following commissioning. Less intensive studies were also conducted during the commissioning of the station. These studies identify changes in components of the aquatic environment which may be attributed to the construction or operation of the generating station. Pre- and post-operational aquatic studies were initiated in 1981 and were completed in 1988. This report integrates the physical data (temperature, dissolved oxygen, substrates, currents and water clarity) collected during the course of the study and evaluates the effects of the station on these physical parameters.

Cet atlas se veut une étude de l'histologie de la morue franche, *Gadus morhua*, servant à évaluer l'incidence de certains facteurs comme les maladies, les parasites et les polluants. Il sert aussi d'ouvrage de référence pour des études de lissus semblables chez d'autres espèces. L'atlas comprend des micrographies prises au microscope optique et au microscope électronique à transmission, de l'appareil digestif et des organes associés (vésicule biliaire, foie, pancréas et vessie natale). Sont aussi incluses des micrographies de l'appareil digestif et de la vessie natale, prises au microscope électronique à balayage.

#### Atlas of anatomy and histology of larvae and early juvenile stages of the Japanese scallop *Patinopecten yessoensis*

by S.M. Bower and G.R. Meyer. Ottawa : Dept. of Fisheries and Oceans, 1990. iv, 51 p. : ill. Bibliogr. (Canadian special publication of fisheries and aquatic sciences ; 111) *Bilingue* (*Atlas of anatomy...*). ISSN 0706-6481 ISBN 0-660-55697-9  
MICROLOG 90-04810 1 fiche

The advances made during experimental mariculture of the Japanese scallop in B.C. resulted in the initiation of a commercial operation in this region. In support of this new industry, the morphology of larval and early juvenile stages of the scallop were examined to provide baseline information against which the health status of mass reared scallops could be assessed during the early life stages. Published information on the histology of early life stages of any member of the family Pectinidae is limited. This pictorial atlas

presents examples of morphological structures observed during early developmental stages of the scallop *Patinopecten yessoensis* and is intended as a basic reference source.

#### Atlas of physical oceanographic data for current surge studies near the Gully, Scotian Shelf, 1984

by H. Sandstrom and J.A. Elliott. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. iv, 304 p. : ill. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 117) ISSN 0711-6774  
MICROLOG 90-05149 4 fiche

This is the third in a series of atlases prepared for a program to study the incidence of large amplitude tidally generated internal waves along east coast continental shelves. It covers CSS DAWSON cruise 84-034, which collected field data in the vicinity of the Gully east of and adjacent to Sable Island near 59W from August 15-September 1, 1984. Two moorings were deployed for the duration of the cruise. The bulk of the data reported were collected with a CTD, BATFISH and 12 kHz Raytheon Sounder. The site was chosen to provide detailed observations of soliton-like features present in SLAR images of the area. Also this region has been the site of numerous exploratory wells and therefore of special interest to the oil industry.

#### Atlas of physical oceanographic data for current surge studies on the Grand Banks of Newfoundland, 1985

by H. Sandstrom and J.A. Elliott. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. iv, 472 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 121) ISSN 0711-6774  
MICROLOG 90-02160 5 fiche

This is the fourth in a series of atlases prepared to study the incidence of tidally generated large amplitude internal waves and associated current surges along east coast continental shelves. This atlas covers CSS DAWSON cruise 85-024 to the edge of the Grand Banks in the vicinity and to the east of the Hibernia exploration area. The field data were collected near the shelf edge and extending into Flemish Pass centered on 47 N latitude from August 13-28, 1985. Two moorings were deployed and recovered. CTD, BATFISH, Ametek Straza Acoustic Doppler Current Profiler, and 12 kHz Raytheon Sounder equipment were operated from the ship. This cruise studied the nature of the internal tide and the short waves and compared the process to that in the Scotian Gully and near the Gully.

#### Atlas of physical oceanographic data for current surge studies on the Scotian Shelf, 1983

by H. Sandstrom and J.A. Elliott. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. iv, 379 p. : ill. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 114) ISSN 0711-6774  
MICROLOG 90-05150 4 fiche

Second in a series of atlases prepared for a program to study the incidence of large amplitude tidally generated internal waves along east coast continental shelves. It covers CSS DAWSON cruise 83-024, during which field data was collected in the vicinity of the shelf edge of the Scotian Gulf centered on 63.30W. The program was conducted from August 19-30, 1983. Two moorings were deployed and recovered. CTD, BATFISH, Ametek Straza Doppler current profiler, and 12 kHz Raytheon Sounder equipment were operated from the ship. This cruise collected data that would show the mechanism whereby energy flows

from the surface tide to the internal waves and then supposedly to mixing and dissipation, and compared the process with a summer time density profile with the previous data collected with a winter time density profile.

#### Atlas sur l'état de l'environnement du fleuve Saint-Laurent

Service canadien de la faune. Stratégies et méthodes scientifiques. Ottawa : la Division, 1989. 169 p. : cartes géogr. Bibliogr. (Rapport technique ; no 12)  
MICROLOG 90-06273 2 fiche

L'environnement est un système complexe de composantes interreliées peu commode à évaluer et dont il est difficile de faire la synthèse. L'approche traditionnelle souvent utilisée pour étudier un système complexe comme l'environnement, consiste à le diviser en composantes spécifiques plus maniables telles que l'air, la terre, l'eau, la flore. Pour bien comprendre l'état de l'environnement, il est nécessaire d'adopter une approche holistique pour étudier les interrelations entre les activités humaines et les conditions environnementales. Le but visé par ce document est de permettre une meilleure lecture de quelques éléments interdépendants dans le cadre de ces interrelations, plus précisément sur les relations intersectorielles entre les activités humaines d'une part, et de la qualité de l'environnement du fleuve d'autre part.

#### Atmospheric change : human ecology in disequilibrium

by W.E. Rees. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1989. 23 p. Bibliogr. (Discussion paper ; no. 17) ISSN 0828-2439  
MICROLOG 90-05493 1 fiche (Available on fiche only)

Modern society treats atmospheric and potential climatic change as an unfortunate but necessary by-product of material economic progress. By contrast, this paper considers atmospheric change to be a central problem of human ecological dysfunction. The paper's purpose is to make the case that economic activity is already in serious disequilibrium with the ecosphere and to contrast the policy implications of this interpretation with the policy responses currently being generated in the sociopolitical mainstream.

#### Atmospheric corrosion of transmission line conductors : literature review

by A. Kalvins. Toronto : Ontario Hydro, Research Division, 1989. 14 p. : ill. Bibliogr. (Report ; no. 89-252-K)  
MICROLOG 90-03520 1 fiche

Transmission line conductors consist of strands of aluminum wound around a core of galvanized steel. Many atmospheric pollutants such as SO<sub>2</sub>, NO<sub>x</sub>, and Cl<sup>-</sup> in the presence of proper meteorological conditions, high relative humidity, precipitation, fog or dew, will cause significant rates of corrosion of aluminum and zinc (galvanized steel). This report presents a brief review of the atmospheric pollutants, their reactions and the meteorological conditions

responsible for the corrosion of aluminum and galvanized steel in the atmosphere. The information is related to transmission line conductors and identifies the pollutants and meteorological conditions which might affect the life of the conductors

#### Attendance patterns, hatching chronology and breeding population of common murrens on Triangle Island, British Columbia following the Nestucca oil spill

by M.S. Rodway. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1990. iii, 46 p. : ill. Bibliogr. (Technical report series ; no. 87) ISSN 0831-6481 ISBN 0-662-17407-0  
MICROLOG 90-06312 1 fiche

While breeding populations of common murrens have been extensively studied on the Atlantic coasts of Canada and Europe, little is known about those of the Pacific coast. The Nestucca oil spill in 1988 killed a large number of the birds, exceeding the estimated breeding population, 95% of which are concentrated on Triangle Island. This report presents the results of a study of common murrens on Triangle Island conducted between July 27 and August 17, 1989 to assess the impact of the Nestucca oil spill on breeding populations. The island was explored for dead birds, and live birds were examined for signs of oiling. Populations were estimated and results were compared to previous counts to detect possible declines. Breeding performance was evaluated by comparing timing of breeding and ratio of

breeding birds to total birds with past, anecdotal data, and known chronology and ratios in other parts of the species range.

**Automated water quality measurements : Red River at Emerson, Manitoba, 1971-84**

by V.T. Chacko and H. Vaughan. Ottawa  
Environment Canada, Inland Waters  
Directorate, Western and Northern Region,  
Water Quality Branch, 1989. v, 81 p. : ill.  
Bibliogr.  
MICROLOG 90-02393 1 fiche

The Garrison Diversion Unit project is a multifaceted water development scheme which, if fully implemented, would transfer water from the Missouri River to the Souris and Red Rivers and subsequently to Lake Winnipeg. The Government of Canada has maintained that water flowing from the project into Canada would cause injury to health and property in Canada and would contravene Article IV of the 1909 Boundary Water Treaty. The International Joint Commission (IJC) was requested to investigate the potential pollution of waters crossing the international boundary in the Red River, and established a continuous robot water quality monitor at the international boundary near Emerson, Manitoba which measures pH, dissolved oxygen, conductivity, chloride and temperature. This report assesses the reliability of the data collected by the continuous water quality monitor; evaluates the extent of compliance with the IJC water quality objectives; and examines the usefulness of the monitor data in determining the water quality trends in the Red River.

**Aviation occurrence reports, issue 8**

Canadian Aviation Safety Board. Ottawa : The  
Board, 1990. viii, 258 p.  
MICROLOG 90-03857 3 fiche

Report of aviation occurrences, grouped by  
broad category of aircraft type and by type of  
operation within each group, then chronologically  
within each subgroup. For fixed-wing  
conventional aircraft, the first subgroup is public  
transportation, which includes scheduled, other

unit toll, and charter operations, divided by  
size. The second subgroup is commercial  
training, including licensed flying clubs and  
commercial specialty training (commercial licence  
classes 6 and 7). The private aircraft  
subgroup includes all privately registered  
aircraft, both personal and corporate,  
subdivided according to type of landing gear.  
The last group includes state aircraft. Rotary  
winged aircraft are grouped by commercial,  
private and state. Each report includes the  
type of aircraft involved; the total number of  
hours the pilot had acquired on all types of  
aircraft, the total number of hours on type,  
and the number of hours flown in the last 90  
days; injuries sustained by the crew,  
passengers, or others; a summary report; and  
findings.

This publication contains reports of aviation  
occurrences, in Canada, involving Canadian or  
foreign-registered aircraft. Reports are grouped  
by broad category of aircraft type (fixed-wing  
conventional aircraft, rotary-wing aircraft, and  
other types) and by type of operation (public  
transportation, commercial training, other  
commercial operations, private, state) within  
each group, then chronologically. Reports are  
also listed by aircraft manufacturer and type,  
and by province/territory of occurrence. In  
each investigation, information is given on the  
aircraft, pilot hours, injuries, summary  
narrative, reported circumstances, findings, and  
safety actions.

**Avis du Conseil de la famille à la  
ministre de la Santé et des Services  
sociaux et responsable de la famille  
relativement aux Services de  
médiation familiale**

Québec (Province). Conseil de la famille.  
Québec : le Conseil, 1989. 8 p. (Avis ; no  
89.1) ISBN 0-550-19668-6  
MICROLOG 90-02813 1 fiche

L'avis du Conseil de la famille sur les services  
de médiation familiale comporte quatre parties.  
La première traite de la pertinence d'établir  
des services de médiation familiale en fonction  
de certains éléments fondamentaux contenus  
dans l'Énoncé de politique familiale adopté par  
le gouvernement du Québec, en décembre  
1987. La seconde permet d'effectuer le lien  
entre la nécessité de fournir de tels services  
et certains principes d'une approche familiale  
que le Conseil a adoptée et dont il se sert,  
entre autres, pour analyser les orientations, les  
politiques et les programmes publics et privés  
qui ont une incidence sur les familles  
québécoises. La troisième partie porte sur les  
organismes et les personnes qui doivent

assurer les services de médiation à la famille. Enfin, dans la dernière partie, le Conseil se prononce sur l'accessibilité des familles québécoises aux services de médiation à la famille.

#### Avis sur la régionalisation de l'immigration

avis à la Ministre des communautés culturelles et de l'immigration. Montréal : Conseil des communautés culturelles et de l'immigration du Québec, 1989. vii, 55 p. *Titre de la couv.: Quelques arpents de neige -- à partager : la régionalisation de l'immigration.* CSI 67245.201 ISBN 2-550-19767-4 MICROLOG 90-01393 1 fiche

Cet avis fait suite à une demande que la ministre des Communautés culturelles et de l'immigration adressait au Conseil, en novembre 1987, quant à l'opportunité que son ministère se donne une politique à cet égard et quant aux objectifs et mesures concrètes que cette politique devrait mettre de l'avant. L'avis recommande que le Ministère se donne une politique de régionalisation de l'immigration et qu'il fasse en sorte qu'elle devienne un élément de la politique de développement régional du gouvernement du Québec. Le document présente aussi les principales mesures qui devraient être mises en oeuvre pour en assurer le succès, notamment la concertation des intervenants régionaux, la sensibilisation de la population et la diffusion d'une information adéquate aux personnes concernées.

#### B.C. Hydro electric load forecast, 1989/90-2009/10

B.C. Hydro. Load Forecast Dept. Vancouver, B.C. : The Dept., 1990. iv, 52 p. : ill. CSI 38100.005 ISSN 0835-5991 MICROLOG 90-05522 1 fiche

Details of B.C. Hydro's 1989 forecast of gross electric requirements through 2009/10. The report provides the lifestyle, economic, population and energy price assumptions that drive the electric forecasts and describes how the probable (most likely) electric forecast is built up from sales projections of the residential, industrial, commercial and other sectors. Consideration of the interruptible marketing and demand side management (Power Smart) programs is excluded. The projections are done in detail for the first 10 years, with the second 10 years based on economic trend projections. The report also discusses the present status and effect of marketing and demand side management (called Power Smart) programs on actual load growth and load shape. Details are also included on the forecast process and methodology, along with a description of the method used to disaggregate the probable forecast by rate categories.

### Background discussion document on energy in New Brunswick, 1990-2000

Fredericton : Dept. of Natural Resources and Energy, 1990. iii, 54 p. : ill. MICROLOG 90-03314 1 fiche

Outline of the role of governments and the private sector in energy development and detailed discussion of energy supply and demand, including indigenous and imported energy supplies and projections of electrical energy demand to 2000. Energy efficiency and conservation is presented as a cornerstone and major initiative to help meet the expected energy needs of the future. A number of major projects being considered in the electrical energy development area are outlined for the 1990s. Details are given on environmental effects and the need for sustainable development. The report concludes with a discussion of transportation and the need for R&D. This document is the initial step in the development of a provincial energy policy and is intended to serve as a background discussion paper for the public consultation process.

### Background report and recommendations

Alberta Beekeeping Industry Advisory Committee. Edmonton : The Committee, 1990. vii, 28 p. : ill. MICROLOG 90-07278 1 fiche

Alberta's beekeeping industry has experienced great financial and economic difficulties in the last several years, due both to the low prices for honey and the ban on the importation of U.S. stock to reduce the chance of infestation by the varroa mite. In September 1989, the Advisory Committee was established to make recommendations concerning problems now affecting the economic viability of the beekeeping industry and to formulate recommendations to address the long-term objectives of the industry in the domestic and international honey markets. Public hearings were held in 3 key beekeeping areas in the southern, central and northern portions of the province. This report covers issues relating to production, economics and marketing and makes recommendations in each area, as well as detailing the 3 initial actions taken by the Committee. A summary of each of the public meetings is also given.

# Barbourisia rufa Parr (Barbourisiidae, Cetomimiformes) and Aphyonius gelatinosus Gunther (Aphyonidae, Ophidiiformes) in the Indian Ocean

by Y.N. Shcherbachev. Ottawa : National  
 Research Council, Canada Institute for  
 Scientific and Technical Information, 1988  
 3 p. Bibliogr. (Canadian translation of  
 fisheries and aquatic sciences ; no. 5250)  
 Originally published in Russian, in the USSR.  
 ISSN 0704-3716  
 MICROLOG 90-02720 1 fiche

The cetomimiform fish *Barbourisia rufa* Parr  
 and the viviparous ophidiiform fish *Aphyonius*  
*gelatinosus* Gunther, 1978 occur extremely  
 rarely. Research in recent years by Soviet  
 ichthyologists in the thalassobathyal zone of the  
 Indian Ocean shows *B. rufa* to be quite  
 common in this region. *A. gelatinosus* has also  
 been found for the first time in the Indian  
 Ocean. This paper describes *B. rufa* on the  
 basis of specimens kept in the Zoological  
 Museum of Moscow University.

# Baseline growth performance levels and assessment procedures for commercial tree species in Alberta's mountains and foothills

W.R. Dempster and Associates Ltd.  
 Edmonton : Alberta Land Conservation and  
 Reclamation Council, Reclamation Research  
 Technical Advisory Committee ; Coal  
 Association of Canada, 1988. xxi, 60 p. : ill.  
 Bibliogr. (Report : RRTAC 88-7)  
 MICROLOG 90-02882 1 fiche

Field work was undertaken during the summer  
 of 1986 to determine tree-seedling growth rates  
 in coal-bearing areas of the eastern slopes and  
 to define reasonable expectations of juvenile  
 growth performance under prevailing  
 environmental conditions, as a baseline for  
 evaluating the success of reforestation following  
 coal mining. The project specified the  
 development of tables and curves relating  
 height and height growth to age; procedures  
 and timing for the measurement of total height  
 and leader growth, adjustment procedures  
 accommodating variation in local site conditions  
 and cultural practices, the provision of  
 procedures for assessing stocking standards;  
 and the integration of evaluation procedures  
 with those used by the Alberta Forest Service  
 for assessing reforestation after logging.

### Battle River soil reconstruction project : five year summary

by L.A. Leskiw. Edmonton : Alberta Land Conservation and Reclamation Council, Plains Coal Reclamation Research Program, 1989 xxiv, 226 p. : ill. Bibliogr. (Report ; RRTAC 89-5)  
MICROLOG 90-05208 3 fiche

The Battle River soil reconstruction project involved establishment, soil and crop management, and research monitoring of 4 experiments designed to assess methods of reconstructing soil profiles following surface mining of coal in order to ameliorate the problems caused by the saline and sodic nature of the subsoils and bedrock in the Plains region of Alberta. Experimental plots were constructed in 1980 on levelled mine spoil using mine machinery simulating the 'take and put' system of mine reclamation. The plan for the first phase of the project was to manage the plots in a consistent, scientific manner for 5 years. Plot work was initiated in 1981, but due to unsuccessful establishment of forages on most plots it was necessary to start again in 1982 and continue through to 1986. This report presents the research findings, interpretations, discussion, conclusions and recommendations based on data obtained from 1982-86.

### BC Rail Train Control System (TCS) : test bed system development, phase II

prepared for Transportation Development Centre, Transport Canada ; by G.D. Taylor, D. Klitch and W.R. Tracey. S.I. : British Columbia Railway, 1987. xxi, 79 p. : ill.  
MICROLOG 90-04098 2 fiche

Second phase of a 4-phase project to develop and implement a form of advanced train control using data communication between dispatchers, trains and track forces. The second phase upgraded the host computer subsystem, provided a data communication subsystem including radio base stations and on-board train equipment, and tested the system on 2 test beds (normal diesel-engine territory and electric-engine territory involving a 50,000-volt catenary). More than 100 hours of operation in diesel territory and 15 hours in electric territory were the basis for the data.

### Beach seine data from the Fraser River downstream from Port Mann during 1988

by T.R. Whitehouse and C.D. Levings. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, West Vancouver Laboratory, 1990. iii, 63 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 780) ISSN 0706-6465  
MICROLOG 90-05148 1 fiche

A beach seine sampling program to assess the species composition, abundance and distribution of the nearshore fish community was initiated on the Lower Fraser River in March 1988. Sampling was carried out in conjunction with a surface trawling program under way to assess the distribution and abundance of fish in the surface waters of the mid-channel portions of the mainstem Lower Fraser River. This report presents the catch by species of fish at 7 sites on the Fraser River below Port Mann. Data on the length and weight of the juvenile salmon captured are given.

#### **The Behaviour of soluble petroleum product derived hydrocarbons in groundwater, phase I**

by G.C. Patrick...et al. Ottawa : Petroleum Association for Conservation of the Canadian Environment, 1985. vii, 70 p. : ill. Bibliogr. (PACE report ; no. 85-3)  
MICROLOG 90-02792 1 fiche

The specific objectives of this 3-phase research program are to critically evaluate small-scale methods for measuring the retardation via sorption of the aromatic hydrocarbons benzene, toluene and xylenes (BTX) as they move in groundwater; to determine the effects of both retardation by sorption and biodegradation on the migration of BTX in groundwaters, and to assess the potential for biochemical remediation or clean-up of groundwaters contaminated by BTX. This phase I report describes the progress from April to December 1984. It describes the design, and implementation and initial results of a field experiment where BTX dissolved in groundwater was injected below the water table into a shallow sand aquifer and the migration of BTX was monitored as it moved under natural hydrogeological gradients through a dense network of monitoring piezometers or wells. Calculations, laboratory tests and small-scale in situ field tests were conducted to predict the retardation by sorption. A glossary of contaminant hydrogeology terms is included.

### Benthic infaunal survey of Alice Arm and Hastings Arm, British Columbia, October 1989

by B.J. Burd and R.O. Brinkhurst. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1990. iv, 23 p. : ill. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 82) ISSN 0711-6721  
MICROLOG 90-06185 1 fiche

Outline of the results of the 4th benthic infaunal survey of Alice Arm and Hastings Arm, conducted in October of 1982, 1983, 1986 and 1989. The study was initiated to examine the long-term effects of mine tailings discharges on the benthic invertebrate fauna of Alice Arm after the AMAX Kitsault molybdenum mine discharged tailings into the head of Alice Arm for 18 months, ending in November 1982, when the mine closed indefinitely. For the 1989 sample, a Bray-Curtis cluster analysis was carried out first to show groupings of individual replicate samples, followed by the same analysis averaging replicates for each station, with significance testing for the validity of cluster grouping. The null hypothesis that a given grouping was homogeneous was tested for each linkage. A similar cluster analysis was carried out including depth, percent silt/clay and percent sand for each replicate.

### Bérylliose : résumé des risques sur le plan professionnel

par R. Bertolini. Hamilton, Ont. : Centre canadien d'hygiène et de sécurité au travail, 1989. i, 6 p. Bibliogr. L'éd anglaise (Beryllium disease : summary...) : 90-03624/1 ISBN 0-660-92834-5  
MICROLOG 90-02163 1 fiche

Le béryllium est un métal dont l'usage industriel est très répandu à cause de ses caractéristiques importantes, notamment son poids léger, son point de fusion élevé, sa grande résistance et sa bonne conductivité électrique. L'exposition aux vapeurs et aux poussières de béryllium et de ses composés ou alliages provoque diverses maladies qui touchent plusieurs organes du corps. L'inhalation des vapeurs ou des poussières de composés de béryllium peut endommager les poumons. Ce document fait la lumière sur les maladies causées par ce métal.

### Beryllium disease : a summary of the occupational health concern

by R. Bertolini. Hamilton, Ont. : Canadian Centre for Occupational Health and Safety, 1989. i, 5 p. Bibliogr. French ed. (Bérylliose : résumé...) : 90-02163/1 ISBN 0-660-13358-X  
MICROLOG 90-03624 1 fiche

Beryllium is a metal widely used in industry because of its light weight, high melting point, high strength, and good electrical conductivity. Exposure to the fumes and dusts of beryllium and its compounds or alloys causes various diseases that affect several organs of the body. This report describes the industrial uses of beryllium, the acute and chronic phases of the disease, diagnosis and treatment; and prevention.

### Besoins futurs du Canada en personnel scientifique et technique hautement qualifié : conférences présentées dans le cadre du séminaire

Besoins futurs du Canada en personnel

scientifique et technique hautement qualifié : rencontre (1989 : Ottawa, Ont.). Ottawa : Conseil de recherches en sciences naturelles et en génie du Canada, 1989. x, 193 p. : ill. Les rapports sont dans la langue de présentation, français ou anglais (Canada's future requirements...).  
MICROLOG 90-00956 3 fiche

L'éventuelle pénurie de scientifiques et d'ingénieurs hautement qualifiés risque d'avoir des conséquences graves pour l'avenir du Canada à titre de pays industrialisé. Compte tenu de l'importance qu'il attache à cette question, le Conseil de recherches en sciences naturelles et en génie (CRSNG) a tenu un séminaire d'une journée afin de discuter des répercussions d'une telle pénurie sur l'économie canadienne et d'explorer des solutions possibles aux problèmes. Ce séminaire a permis de tenir une discussion ouverte, d'obtenir des conseils et de favoriser des échanges de vues entre des représentants du milieu des affaires, des universités et des gouvernements. Ce document présente les conclusions de ces discussions.

### Better beginnings, better futures : an integrated model of primary prevention of emotional and behavioural problems

Toronto : Ministry of Community and Social Services, 1989. x, 185 p. Bibliogr. French ed. (Partir d'un bon pas...) : 90-04387/3. ISBN 0-7729-6148-4  
MICROLOG 90-04230 3 fiche

This document reviews the literature, summarizes key findings, documents limitations to the research, describes the components of a good program and recommends future directions for research and programming for each age-level subgroup. It also examines the limitations to research in primary prevention for young children in general, and presents guidelines important for the success of any primary prevention research demonstration project. It finally summarizes the themes common to primary prevention programs for young children across the three age groups: infants, preschoolers, and primary school-age children, and concludes by proposing an integrated model for research demonstration projects.

# **Beyond the Golden Mountain : Chinese cultural traditions in Canada**

by B.S. Hoe. Hull, Quebec : Canadian Museum of Civilization, 1989. 47 p. : ill. French ed. (*Au delà de la Montagne...*) : 90-04928/1 ISBN 0-660-90291-5 MICROLOG 90-04929 1 fiche

For more than a century, the Chinese in Canada have developed a heritage that blends many aspects of Canadian life with their ancestral traditions. This document focuses on some of these cultural traditions, which, rooted in China, found new expression in Canada. • CA CU SA

# **Bi-level III ride quality improvement program : final report**

prepared by UTDC Inc. ; for the Transportation Technology and Energy Branch. Downsview, Ont. : Ministry of Transportation, Transportation Technology and Energy Branch, Rail and Advanced Transportation Systems Office, 1990. 235 p. : ill. Contents: Vol. 1 : Simulation report -- vol. 2 : Test report. MICROLOG 90-05200 3 fiche

Results of a program to improve the vertical ride quality of the GO transit bi-level passenger car upper deck. A series of 9 vertical dynamic models were developed to represent the car and possible low-cost methods to improve the ride. Each model was run to predict the natural frequencies and modes, and the response to random vertical and cross-level track impact. As well, a 1/4 car ANSYS-based finite element model was derived and used to assess the effect upon model frequencies and relative acceleration (pseudo-acceleration) of the various methods proposed to improve the vertical ride quality. # **Biaxial tests of some overcored samples from AECL's Underground Research Laboratory, Lac du Bonnet, Manitoba**

by J.S.O. Lau. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. iv, 64 p. : ill. Bibliogr. (Report ; MRL 89-55(TR)) MICROLOG 90-00170 1 fiche

Atomic Energy of Canada Ltd. has constructed an underground research laboratory (URL) in the Lac du Bonnet batholith, located 100 km northeast of Winnipeg, Manitoba. The URL will be used to investigate some of the issues associated with the safe design, construction and operation of a vault for the disposal of high-level nuclear waste deep in plutonic rock. One of the issues is whether the in situ stress condition in a plutonic rock body and the stresses induced around an excavation in such a body can be understood. This report gives the results of biaxial tests and biaxial tests with axial load to examine the effect of axial and side loads on the strains measured on the inside and on the outside of overcored rock samples obtained in the URL and the elastic constants derived from them. The rock is a massive, grey, medium to coarse grained prophyritic granite. • CA CM MS PS SC

# **Bibliographia invertebratorum aquaticorum Canadensium, vol. 1 : index generum**

by D.R. Laubitz...et al. Ottawa : National Museum of Natural Sciences, Invertebrate Zoology Division, 1983. v, 56 p. ISBN 0-662-11272-5 MICROLOG 90-02234 1 fiche

This bibliography was begun in 1973 to document as many as possible of the scientific names applied by Canadian marine and freshwater invertebrates, to establish a list of currently recognized species, and to compile

relevant published data, such as records of distribution and categories of studies for each species. All recent free living and ectoparasitic species are included but all insects, protozoans, and endoparasites are excluded. The document deals with all marine and freshwater environments in Canada, but in order to present a complete synopsis of the aquatic invertebrate fauna of northern North America, Alaska, Puget Sound, Lake Champlain and the whole of the Great Lakes, except Lake Michigan, are included. The document lists alphabetically all generic names applied to aquatic invertebrates of the area and notes the major taxon (usually phylum) and usually one or two minor taxa (class, order, etc.) to which they belong. It also lists genera alphabetically within the respective minor taxa, which are in turn listed within major taxa. CA LS SC

# **Bibliographia invertebratorum aquaticorum Canadensium, vol. 2 : index bibliographicus**

by N. Sharma...et al. Ottawa : National Museum of Natural Sciences, Invertebrate Zoology Division, 1983. v, 238 p. ISBN 0-662-11272-5 MICROLOG 90-02231 3 fiche

This bibliography was begun in 1973 to document as many as possible of the scientific names applied to Canadian marine and freshwater invertebrates, to establish a list of currently recognized species, and to compile relevant published data, such as records of distribution and categories of studies for each species. All recent free living and ectoparasitic species are included but all insects, protozoans and endoparasites are excluded. # **Bibliographia invertebratorum aquaticorum Canadensium, vol. 8 : synopsis specierum. Mollusca : cephalopoda**

by S.J. Stephen and D.R. Laubitz. Ottawa : National Museums of Canada, National Museum of Natural Science, 1988. v, 61 p. : maps. Bibliogr. ISBN 0-662-11272-5 MICROLOG 90-02215 1 fiche

The class Cephalopoda comprises a group of bilaterally symmetrical molluscs which are among the most specialized and highly developed invertebrates, well adapted to their predatory life. They occur in all marine habitats in Canada: benthic, epibenthic, neritic and pelagic. In Canada, the class is represented by 77 species in 23 families and 3 orders. This publication lists all of the references retrieved to date pertaining to Cephalopoda including those that are recorded in Index Bibliographicus. Genera and species are arranged alphabetically by their currently accepted names within their respective families, which are also in alphabetical order. Below each species heading is a list of the names applied. Where possible, synonymies have been brought up to date. • CA FI LS SC

# **Bibliographie de la Rive-Sud de Québec : Lévis-Lotbinière**

par F. De Montigny-Pelletier et A. Raiche-Dussault. Québec : Institut québécois de recherche sur la culture, 1989. 263 p. (Documents de recherche ; no 19) ISSN 0823-0447 ISBN 2-89224-122-7 MICROLOG 90-01983 3 fiche

Ce document aborde les domaines suivants: le territoire; la vie économique; les aspects sociaux, les aspects politiques et militaires, la culture; la religion, les monographies paroissiales, les biographies; la généalogie; les instruments de travail, la presse régionale; et, la documentation audiovisuelle. ### A Bibliography of NMR applications for forestry research

by C.M. Preston and A.C.M. Rusk. Victoria Canadian Forestry Service, Pacific Forestry Centre, 1990. vii, 42 p. (Information report ; BC-X-322) ISSN 0830-0453 ISBN 0-662-17942-0  
MICROLOG 90-05905 1 fiche

More widespread application of nuclear magnetic resonance (NMR) spectroscopy to forestry research could have many benefits. This bibliography lists over 450 references to the end of 1989, with a few publications which were available early in 1990. These are arranged in subject categories relevant to forestry problems, including general reviews of biological NMR, applications to bacteria, fungi, algae and higher plants; distribution and physical properties of water in plants; physiology and polymer chemistry of insects, and applications to wood, soil, glyphosate, and analytical biochemistry. The NMR techniques cover a wide range of applications, including solutions and solids, conventional spectroscopy, and imaging. An author index and a brief introduction to some basic NMR concepts are provided.

Le bilan socio-économique de Montréal contient des informations sur deux régions administratives, soit celles de Montréal et de Laval. En fait, il présente la réalité socio-économique à la fois de la ville de Montréal et de sa région métropolitaine. Les statistiques contenues dans le document se rapportent principalement aux années 1985 à 1988. En plus des renseignements sur les secteurs socio-économiques habituels, le bilan consacre une partie spécifique aux interventions publiques de développement, et la relance de l'Est de Montréal fait l'objet d'une présentation particulière.  
CO LA MU PR QU

**Bilans d'acidité des tourbières et effets des retombées acides**

par J.A. Wood. Ottawa : Environnement Canada, Service canadien de la faune, Direction du développement durable, 1989. vi, 36 p. : ill. Bibliogr. (Document de discussion ; no 5). L'éd. anglaise (Peatland acidity...) sur la même fiche. ISBN 0-662-95670-2  
MICROLOG 90-06357 1 fiche

L'acidité des tourbières a plusieurs origines, les principales étant: les acides organiques produits sur place par la décomposition de la matière organique ainsi que les acides minéraux dus aux polluants atmosphériques d'origine anthropique. Sauf dans le cas des tourbières gravement polluées, les acides organiques sont les principaux agents de l'acidité totale, les acides minéraux d'origine atmosphérique contribuant peu à cette dernière. Ce rapport revoit les facteurs de l'acidité des tourbières ainsi que les effets potentiels du dépôt acide sur le bilan de ces milieux humides.  
CA EV SC

**Bilans ioniques et changements dans la qualité de l'eau au bassin calibré du lac Laflamme de 1981 à 1988**

par M. Papineau. Sainte Foy, Québec : Environnement Canada, Région du Québec, Conservation et protection, Direction des eaux intérieures, 1989. xiv, 156 p. : ill., cartes géogr. Bibliogr.  
MICROLOG 90-06309 2 fiche

En plus des informations sur le site lui-même, le rapport fournit de l'information sur la méthodologie, les précipitations, le bassin principal, l'eau du lac et de l'exutoire et les bilans hydriques et ioniques. Deux blocs importants ont été ajoutés dont le premier portant sur la détection de tendances temporelles dans les séries de concentrations et de charges à l'aide de tests non paramétriques, nécessaire au suivi à long terme des changements dans le milieu aquatique et l'évaluation des conséquences des programmes de contrôle des émissions d'anhydride sulfureux. L'autre bloc porte sur cinq lacs situés près du bassin calibré et permet d'étudier les effets des charges atmosphériques sur des lacs de sensibilités différentes.

MICROLOG 90-01505 1 fiche

Poor binding ability in feed used in salmon fish farms can lead to wasted feed, lowered oxygen holding capacity of the water, lower growth potential of the fish, and the buildup of food waste and excrement under the pens leading to gas production by bacteria. A much lower waste of feed with moist feeds and moist pellets can be achieved with the addition of suitable commercial binders. The consistency of the feed will thus be better and a larger part of the diet will be utilized by the fish. Experiments were performed with a number of binders, with the emphasis on consistency (texture) with penetrometer, digestibility, and growth. The experiments also included a separate part for trials with binders for acid silage feeds.

**Biochemical genetic stock identification of chum salmon in southern British Columbia, 1986**

by M.C. Vreeling...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1987. iv, 19 p. : maps. (Canadian data report of fisheries and aquatic sciences ; no. 634). ISSN 0706-6465  
MICROLOG 90-00768 1 fiche

Chum salmon returning to spawn in rivers tributary to Johnstone and Georgia Straits migrate primarily from the north through Johnstone Strait, although in some years there can be a component of the run returning from the south through Juan de Fuca Strait. The identification of the origins of chum salmon in these fisheries has become an increasing problem for management. This report describes a method of testing for genetic variability among chum salmon stocks. Samples were collected in the fishing areas on the northwest coast of Vancouver Island, Johnstone Strait, mid-Vancouver Island, San Juan, and Nitinat to determine the stock composition in these mixed fisheries. In general, 150 chum salmon were sampled per week or, in the case of commercial fisheries, per fishing period. Tissue samples of heart, liver and muscle were collected within 24 hours of catch, frozen, and sent for electrophoretic analysis. Chum salmon from the troll fishery off the northwest coast of Vancouver Island were randomly selected from day trollers returning to Winter Harbour. Stock composition was then estimated.

### Biological and species interaction survey of Pacific hake, sablefish, spiny dogfish and Pacific herring off the southwest coast of Vancouver Island, August 1987

by W. Shaw...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. vi, 149 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2027) ISSN 0706-6473 MICROLOG 90-01068 2 fiche

The La Pérouse project is a multi-species, multi-disciplinary study designed to evaluate the influence of variations in physical and biological oceanographic factors on fish populations utilizing the lower west coast of Vancouver Island. Every August since the project's inception in 1985, a fisheries survey has been conducted to determine the distribution, abundance and trophic interactions of the dominant fish species in the La Pérouse Bank area. The 1987 survey sampled major concentrations of hake, dogfish, sablefish and herring of the southwest coast of Vancouver Island, mapped their distribution, and determined their diets; delineated the northern limit of hake distribution; and collected physical oceanographic data (temperature, salinity, density at depth) and biological data (zooplankton sampling) from the survey area. This report presents the biological and oceanographic data collected during the survey.

### Biological bases for the management of *Lessonia nigrescens phaeophyta, laminariales* in central Chile

by B. Santelices. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 33 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5172) Originally published in *Spanish*, by J.C. Castilla, ed in *Santiago, Chile*. ISSN 0704-3716 MICROLOG 90-00682 1 fiche

*Lessonia nigrescens* is the most important brown alga in the intertidal zone of the Chilean coast from Callao in central Peru to Cabo de Hornos at the southernmost tip of Chile. Since 1975, the algae has taken on a growing economic importance as a source of alginates. This paper describes the optimal harvesting season, based on periodicity of growth, reproduction, juvenile settlement and gel production, determination of size of plant to be harvested, based on size of reproductive plants, changes in invertebrate community structure over time and weight accumulated by the plant, and harvesting methods of the plant, determined by spatial distribution patterns of gels in the plant, its post-pruning regeneration capacity, and the effect of its removal on other intertidal organisms and particularly on juvenile recruitment.

### Biological characteristics of Great Lakes alewife *Alosa pseudoharengus* : implications for the effects of impingement

by D.W. Rodgers, P.E. Hsien and G.W. Martin. Toronto : Ontario Hydro, Research Division, 1989. iv, 15 p. : ill. Bibliogr. (Report ; no. 89-125-K) MICROLOG 90-00415 1 fiche

This study investigates some of the biological characteristics of alewife from Lakes Ontario and Huron. The genetic structure among Great Lakes alewife and additional alewife collected from the Maritime provinces was determined by comparing allelic frequencies of 25 protein-coding loci which were quantified using electrophoretic techniques. For Great Lakes alewife, several morphological characteristics (measurements of body parts) and meristic parameters (counts of hard bony structures such as fin rays) were also determined. Additional alewife were collected from the cooling water intake of Pickering NGS and the other adjacent open lake to evaluate their pathological and parasitological condition.

### A Biological inventory and evaluation of Short Hills Provincial Park

by J. Gould. Toronto : Ministry of Natural Resources, 1989. vii, 56 p. : fold. maps. Bibliogr. (Open file ecological report ; 8910) ISBN 0-7729-5917-X MICROLOG 90-01989 2 fiche

A biological inventory of Short Hills Provincial Park was conducted to identify the vegetation, flora and fauna occurring within its boundaries and to identify and map the significant features. Background information was compiled and plant communities delineated on aerial photographs prior to fieldwork. All habitat types were visited at least once over the course of the field season (June, July, August 1988). The vegetation of each plant community was described and a species list compiled for each. Environmental parameters such as soil type and moisture, microclimate and degree of disturbance were noted. Breeding birds were assessed and incidental observations of herpetiles, butterflies and mammals were noted.

### A Biological inventory and evaluation of the Oriskany Sandstone and Woodlands area of natural and scientific interest

by I.D. Macdonald. Toronto : Ministry of Natural Resources, 1989. x, 193 p. : maps. Bibliogr. Fold maps not filmed. ISBN 0-7729-5910-2 MICROLOG 90-03551 3 fiche

The Oriskany Sandstone and Woodlands area of natural and scientific interest (ANSI) is located in the Regional Municipality of Haldimand-Norfolk, Town of Haldimand, about 3 km north northeast of the hamlet of Nelles Corners, or 7 km west of Cayuga. The area covers approximately 306 ha and consists of a single large woodland with a southern arm that connects it to a wetland and pond, and includes outcrops of sandstone and limestone bedrocks. It is entirely under private ownership by about 8 landowners. This report gives the background of its designation as ANSI, then provides a detailed description of the vegetation, flora, and fauna. Planning and management considerations are included.

#### Biomonitoring forests near two sour gas processing plants

by D.G. Maynard. Edmonton : Forestry Canada, Northwest Region, Northern Forestry Centre, 1990. vi, 30 p. : maps. Bibliogr. (Information report ; NOR-X-311) ISSN 0704-7673 ISBN 0-662-17509-3  
MICROLOG 90-05784 1 fiche

In 1981, a 5-year study was initiated to study the effects of sour gas processing on forest ecosystems in west-central Alberta. A biomonitoring network of 26 sites was established in a 30 X 30 km area surrounding the Strachan and Ram River sour gas processing plants. In 1985 the biomonitoring sites were re-examined to determine if additional impact to the forest ecosystem had occurred in the vicinity of the plants in the 4 years since the initial survey. Re-examination of plots also provided additional information for assessing potential pollutant effects on the forest ecosystems. This report summarizes the results from both surveys.

#### La Biotechnologie en Ontario : une croissance en toute sécurité

Toronto : la Province, 1989. 55 p. Bibliogr. L'éd. anglaise (*Biotechnology in Ontario...*) 90-02182/1. ISBN 0-7729-6104-2  
MICROLOG 90-02183 1 fiche

Nous connaissons tous divers procédés classiques de biotechnologie, par exemple ceux qui entrent dans la fabrication de la bière ou du vin. Mais les applications récentes de la biotechnologie ont ouvert de nouveaux horizons en présentant des méthodes inédites permettant de synthétiser des produits chimiques, de préparer des réactifs nouveaux pour le diagnostic et le traitement de la maladie, d'éliminer les déchets, de récupérer les minéraux et d'hybrider les plantes et les animaux. Ce document présente une définition de la biotechnologie et certaines de ses possibilités d'exploitation commerciale. Il examine ensuite l'importance qui revêt la définition des risques possibles au moment où l'on ne dispose que de très peu de données factuelles. De plus, on souligne les principales questions et les principes qui sous-tendent l'ensemble des applications de la biotechnologie. Finalement, on y trouve deux approches possibles pour l'élaboration d'un cadre juridique de réglementation de la biotechnologie.

Toronto : The Province, 1989. 52 p. Bibliogr. French ed. (*La Biotechnologie en Ontario...*) : 90-02183/1 ISBN 0-7729-6074-7  
MICROLOG 90-02182 1 fiche

This Green Paper was issued to give the public a chance to participate in the development of regulatory policy relating to the new advances in biotechnology. The main objectives of the paper were to develop policy that assures protection of human health and the environment; to define an appropriate regulatory framework that sets out the requirements for all biotechnological work in Ontario; and to seek consistency with requirements in other jurisdictions. The paper describes biotechnology and some of the opportunities for commercial exploitation; the need to identify potential risks when there is little factual information, the current state of biotechnology in Canada and Ontario and the jurisdictional issues, current approaches to legislation and control, major issues and matters of principle common to all applications of biotechnology, and concludes with 2 possible approaches for providing a legal framework for regulation.

### Bleeding of cod on board factory trawlers

by W. Fletchenmacher. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 16 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5363) Originally published in German. ISSN 0704-3716  
MICROLOG 90-01495 1 fiche

In a competitive market, the fish-processing industry strives to produce light-coloured, deep-frozen fish products. The use of fish well-drained of blood is also necessary to preserve the quality, since residual blood in the flesh causes changes in colour and odour, oxidation, and deterioration during storage periods. This paper examines whether exsanguination could be effected with freshly caught fish on board a factory trawler, before the fish is deep-frozen. Preliminary tests were carried out in 1971 and 1972 on a factory trawler to determine the bleeding effect in cod by collecting the blood exuded when the fish were bled and calculating its ratio to the total weight of the fish. The main tests were carried out in the laboratory and evaluated the bleeding effect in relation to time elapsed since removal of the fish from the tank and a constant exsanguination time of 30 minutes.

**Body composition and skin temperature variation**

by J. Frim...et al. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1989. 4 p. : ill. Bibliogr. (DCIEM report ; 89-P-55)  
MICROLOG 90-06460 1 fiche

Because mean skin temperature is commonly used as an indicator of thermal stress in studies of the effects of adverse environments on humans, it is important to know the extent of the variation and the potential error it may cause in determining mean skin temperature. This study was undertaken to examine the relationships among body composition, skinfold thickness, and skin surface temperature variations. Thermistors were used to measure skin temperatures at 4 standard torso sites, and skinfold thicknesses were measured at these same sites. Subjects were selected to provide a sample with a wide range of body fat content, and the experiments were carried out at three different ambient temperatures to determine the effect of environmental conditions on the observed relationships.

**Bombardier single-cylinder medium-speed research engine and test facility, phase IV : development of L.O.E. engine and turbocharger rig**

prepared for the Transportation Development Centre, by M.L. Payne and L. Propetto. Montreal : Bombardier Inc., Rail and Diesel Products Division, 1989. x, 236 p. : ill. Bibliogr.  
MICROLOG 90-01746 3 fiche

The need for continued research and development to enhance diesel engines is approaching the critical stage. Current and pending North American environmental regulations are placing efficiency and usage restrictions on the diesel which can only be overcome by understanding the interactions of the whole system. The lub oil evaluation (LOE) version of the Bombardier single-cylinder research engine (BSCRE) was designed and developed as an aid in understanding lubricating oils and their performances. This report describes the development of the BSCRE/LOE version, and the development of a turbocharger test rig. Both are requisite to medium-speed diesel engine research. Additional tasks completed included a comprehensive BSCRE users' documentation package and the addition

of an atomic absorption spectrophotometer to the fuels and lubricants laboratory.

**Borderlands reflections : the United States and Canada**

by L. McKinsey and V. Konrad. Orono, ME : Canadian-American Center, 1989. v, 37 p. Bibliogr. (Borderlands monograph series ; no. 1) ISSN 1040-3264  
MICROLOG 90-02312 1 fiche (Available on fiche only)

This essay introduces a methodology for studying the complex American-Canadian relationship from a borderlands perspective. It is the first in a series of monographs to be published on the subject. The documents are meant to promote greater recognition and understanding of the status of the United States and Canada as border neighbors. It is a comprehensive study of transborder attributes undertaken by a multidisciplinary team of social science and humanities scholars from both sides of the border.

**Le Braconnage du saumon : une réalité économique dont la collectivité fait les frais**

Québec : Ministère du loisir, de la chasse et de la pêche, 1989. 8 p. : ill. Bibliogr. ISBN 2-550-19481-0  
MICROLOG 90-01806 1 fiche

Au Québec, le saumon atlantique a de tout temps constitué une ressource hautement convoitée, que ce soit à des fins récréatives, commerciales ou de subsistance. Ainsi, l'attribution de cette ressource renouvelable soulève toujours beaucoup de passions puisqu'elle confronte le mode de vie ancestral des autochtones, le gagne-pain des pêcheurs côtiers et la pratique récréative des adeptes de la pêche au saumon. Ce document a pour objectif de faire connaître un outil de sensibilisation susceptible de contribuer à l'élimination du braconnage. Elle consiste à mesurer l'ampleur des préjudices causés à la collectivité lors de la perpétration d'actes de braconnage et à élaborer une charte-type des compensations exigibles, conformément à la gravité du geste posé.

**A Branch-and-bound approach for the multicommodity location problem with balancing requirements**

by T.G. Crainic, L. Delorme and P. Dejax. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 34 p. Bibliogr. (Publication ; no. 652)  
MICROLOG 90-01617 1 fiche

One of the major logistics issues faced by transportation firms concerns the strategic/tactical aspect of the fleet management problem: the location of the depots for the rolling stock and the forecast management of empty movements. A version of this problem is faced by maritime container transportation companies in the planning of their land operations. The general problem is to locate the empty container depots so as to collect from clients the supply of empty containers and to satisfy client demands for empty containers, while minimizing the total operation cost the cost of opening and operating the depots, plus the transportation costs of the empty movements between depots and between clients and depots. This paper presents a branch-and-bound algorithm for the multicommodity location-allocation problem with balancing requirements and develops and analyses various branching criteria aimed toward tailoring the most efficient branch-and-bound procedure. The experimentation was conducted on several randomly generated problems and on a large scale application.

**The Breeding bird survey in Canada 1966-83 : analysis of trends in breeding bird populations**

by B.T. Collins and J.S. Wendt. Ottawa : Canadian Wildlife Service, 1989. 81 p.

Bibliogr. (Technical report series ; no. 75)  
ISSN 0831-6481 ISBN 0-662-17277-9  
MICROLOG 90-02388 1 fiche

The breeding bird survey was begun in 1966 in the United States east of the Mississippi River and in the Canadian Maritime provinces. In subsequent years it was expanded to cover all of the 48 states and all 10 provinces and the Yukon Territory. The survey has been conducted every year since, entirely by volunteer observers. This report uses a modification of the Geissler and Noon approach to measure the long-term trends in populations in Canada. This was done to report results of the Canadian portion of the study separately from the continental estimates. The full analysis provides separate estimates of trends for selected species from 6 geographic regions. The methodology is included also.

**Breeding waterfowl, wetlands acidity and food resources in the Lepreau River watershed of southern New Brunswick**

by G.R. Parker, M. Petrie and D. Sears.  
Ottawa : Canadian Wildlife Service, Atlantic Region, 1989. vi, 37 p. : ill. (Technical report series ; no. 84) ISSN 0831-6481 ISBN 0-662-17389-9  
MICROLOG 90-02440 1 fiche

No previous studies in Atlantic Canada had examined distribution of breeding waterfowl and broods relative to water acidity even though much of the region was identified as having been affected by, or as being highly sensitive to, the effects of acid rain. This study documented the distribution and productivity of waterfowl in a region of the Maritimes geologically sensitive to the impact of acid rain and measured the relationship that might exist between waterfowl populations, water acidity and aquatic invertebrate resources.

**British Columbia seabird colony inventory, report no. 4 : Scott Islands : census results from 1982 to 1989 with reference to the Nestucca oil spill**

by M.S. Rodway, M.J.F. Lemon and K.R. Summers. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1990. ix, 109 p. : maps, fold. maps. Bibliogr. (Technical report series ; no. 86) ISSN 0831-6481 ISBN 0-662-17406-2  
MICROLOG 90-06320 2 fiche

The Scott Islands house the largest concentrations of breeding seabirds in the eastern North Pacific south of Alaska, making them very vulnerable to local marine contamination. Oil from the barge Nestucca, damaged off the Washington coast in late December 1988, spread along the length of the west coast of Vancouver Island in January and February 1989. The condition of the Scott Islands was a major concern, and the islands were monitored for the presence of oil at that time. This report covers population studies conducted on the Scott Islands during the summer of 1989 to assess the impact on local breeding populations. Studies focused on common murrelets and Cassin's Auklets, but information was gathered on other breeding species. Data from all recent surveys by the Canadian Wildlife Service were included to provide comprehensive coverage for all species. Results were compared with those from studies conducted in previous years.

Edmonton : Alberta Forestry, Lands and Wildlife, Fish and Wildlife, 1990. 8 p. : ill. CSI 35151.001 MICROLOG 90-06716 1 fiche

This program was introduced in 1973 to conserve and enhance habitat through habitat improvement projects proposed by individuals, clubs, private organizations and government agencies. This publication describes the program, its funding, and representative projects such as streambank fencing, fish barrier placements, lake stabilization, reservoir rehabilitation, prescribed burns, instream enhancement, lake aeration, wetland enhancement, and the landowner habitat program. A summary of expenditures is included.

#### Bucket wheel applicability study : Plains Coal Mines

Toronto : North American Mining Consultants Ltd. ; Geocon Ltd., 1981. 141 p. : ill., fold. maps. Bibliogr. CANMET contract: OSQ80-00065. MICROLOG 90-00174 2 fiche

Study to identify the characteristics of overburden in Alberta and Saskatchewan plains coal fields which would limit the application of bucket wheel excavators. The report begins with a listing of the major equipment in use in larger operating plains coal mines, including basic bucket wheel operating methods and a summary of the geological conditions in mines in which bucket wheel excavators are operated in North America, Europe, Asia and Australia. The report also covers the types of bucket wheel excavators and the necessary support equipment employed in each mine. Mines visited in the plains area included the Whitewood Mine, the Highvale Mine, the Diplomat Mine, and the Roselyn Mine in Alberta, and the Poplar River Mine, and the Souris Valley Mine in Saskatchewan.

Québec (Province). Conseil du trésor. Québec : le Conseil, 1989. 97 p. : ill. *CSI 66100.008*. ISSN 0706-0327 ISBN 2-550-19554-X  
MICROLOG 90-03876 1 fiche

Ce document fournit des éléments supplémentaires d'information sur le budget des dépenses. A ce titre, les montants qui s'y retrouvent excluent les crédits de la catégorie 'Prêts, Placements et avances', laquelle fait partie des opérations non budgétaires. La première partie présente la prévision des dépenses 1989-90 et la compare à la dépense probable 1988-89. L'évolution historique des dépenses y est analysée en relation avec le taux d'inflation (IPC) et la croissance du produit intérieur brut (PIB). La troisième partie donne la répartition des crédits 1989-90 par mission et catégorie de dépenses ainsi qu'un aperçu des priorités gouvernementales pour la prochaine année. La dernière section de cette partie porte sur les effets gouvernementaux. La quatrième partie présente un tableau sommaire des enveloppes ministérielles et les faits saillants des crédits 1989-90 par ministère et par programme.

### Buffalo Pound taste and odour control facilities : final report

Regina : G.A.C. Management Committee, 1989. 35 p.  
MICROLOG 90-06376 1 fiche

Regina and Moose Jaw share a common water treatment plant which draws its water from the shallow Buffalo Pound Lake, in the Qu'Appelle River system about 5 km northwest of Regina. In summer and autumn the Regina and Moose Jaw water supply suffered from a severe taste and odour problem because of weed and algae growth in the lake. The construction of a granular activated carbon water treatment

system was proposed as an immediate solution to the problem. This report describes the background to federal and provincial government involvement and the agreement signed; the treatment plant, the taste and odour control facilities; and operational experience. CA EV MS SC

# **Building a strong positive image for New Brunswick : final report**

Lippincott and Margulies. Fredericton : Dept. of Tourism, Recreation and Heritage, 1990. 232 p. : ill. *Bilingual Action Plan* (3, 3 p.) laid in. French ed. (Création d'une image...) : 90-05559/3.  
MICROLOG 90-06467 3 fiche

Research was conducted between July and September 1989 on New Brunswick's image among key audiences. The research involved discussion with individuals and groups within the province and in adjacent regions. Over 50 citizens from all region and major population centres were interviewed. Focus groups involving about 60 people were held in six locations within the province and in Boston, Toronto, and Montreal. Mall intercepts of about 120 people were conducted in Fredericton and Moncton. Findings fall under these five headings and are discussed in the text: verbal message, visual message, provincial pride and loyalty, public perceptions in Canada, awareness outside Canada.

# **Bulletin : initial assessment decisions -- 5th ed.**

Ottawa : Federal Environmental Assessment Review Office, 1989. 41, 42 p. *Bilingual (Bulletin des décisions...)*.  
MICROLOG 90-03920 1 fiche

Initial assessment is part of the federal environmental assessment and review process (EARP) which is used to implement government policy on environmental assessment. Initial assessment helps determine the potential environmental and directly related social implications of proposals for which the government has a decision-making responsibility. This bulletin contains summaries of decisions about proposals made as a result of initial assessment. Proposed projects are listed alphabetically by province or territory and by location. Interprovincial projects and offshore projects are listed under Canada. Each description includes the location, the federal board, department, agency or corporation responsible, the document number, a brief description of the project, and the decision.

#### Bunch yarding with radio-controlled chokers in coastal British Columbia second-growth timber

by A.J. MacDonald. S.I. : Forest Resource Development Agreement, 1990. v, 20 p. : ill. Bibliogr. (FRDA report ; 108) ISSN 0835-0752 ISBN 0-662-17559-X  
MICROLOG 90-04429 1 fiche

Examination of a yarding crane using radio-controlled, self-releasing chokers to yard mechanically felled and bunched timber. The report is one in a series on yarding techniques used in logging B.C. coastal second-growth timber. The study determined the system costs and productivity; determined the effect of turn volume and hookup times on productivity; compared choker-yarding costs and productivities with those of grapple yarding; and determined the marginal log volume for profitable yarding while using chokers. Two Madill 044 yarding cranes, rigged in different yarding configurations, were monitored at a detailed-timing level for 3 weeks in 1989 in a second-growth Douglas-fir stand near Port Alberni, B.C.

#### Cadmium uptake rates in euryhaline amphipods of the Elbe Estuary experiments with *Corophium volutator* (Pallas) (Amphipoda, Corophiidae)

by R. Bias. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 33 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5147) Originally published in German, at Stuttgart. ISSN 0704-3716  
MICROLOG 90-00088 1 fiche

In numerous experiments published in recent years, the high toxicity of the element cadmium and its bioconcentration in aquatic organisms has been demonstrated. In addition, it is unusually persistent in the environment. Therefore, increased use of this element in industrial processes presents a risk of unknown magnitude for the environment. This report presents the results of experiments with *Corophium* collected at Otterndorf, using 5 cadmium concentrations for a constant salinity (16‰ S) or at different salinities (4-28‰ S) for one concentration of the toxic heavy metal. For all of the experiments with sediments, the ratio of the volume of water to the volume of sediment was 3.6:1.0. Monitoring was done for temperature, oxygen content, pH value, salinity, and loss of water as well as spot checks for alkalinity.

### Caisse de métro de type grand gabarit : étude conceptuelle

André G. Fontaine ; préparé par Bombardier inc., Québec : Gouvernement du Québec, Ministère des transports ; Ottawa : Transports Canada, 1989. xxiii, 55 p. : ill. (Etudes et recherches en transports) (Technologie et instrumentation) ISBN 2-550-19825-5  
MICROLOG 90-02828 1 fiche

Ce rapport résume le travail accompli au cours de la phase I du projet. Il s'agit d'une étude conceptuelle qui vise à déterminer l'intérêt et la faisabilité d'une caisse, c'est-à-dire de l'ensemble structural monocoque qui forme l'essentiel d'une voiture de métro. Les objectifs du projet sont: développer un design de caisse de métro grand gabarit, en acier inoxydable, qui sera en mesure de répondre adéquatement aux besoins du marché; contribuer au développement des fournisseurs locaux pour le matériel spécialisé; et, maîtriser la technologie de caisse de type grand gabarit. Dans la première partie, on passe en revue les concepts existant. On établit les caractéristiques des voitures en utilisation dans plusieurs villes et on retient les caractéristiques les plus intéressantes. Ensuite, on établit les objectifs de conception, on fournit une description de la caisse prototype et des paramètres de conception et on fait l'analyse structurale, la présentation des régions critiques et une discussion des résultats.

### Caisse des réclamations de la pollution maritime (Canada) : Rapport annuel 1988-89

Ottawa : Transports Canada, 1990. 7 p.  
Bilingue. CSI 21123.012. ISBN 0-662-57246-7  
MICROLOG 90-03290 1 fiche

Ce document présente un exposé sur l'évolution de la Caisse des réclamations de la pollution maritime au cours de l'exercice allant du 1er avril 1988 au 31 mars 1989. Il porte principalement sur les thèmes suivants: le problème; le déversement d'hydrocarbures sur la côte ouest; le déversement d'hydrocarbures par le chaland *Pointe Levy* près de Matane (Québec); le déversement d'hydrocarbures d'origine inconnue dans le lac Supérieur; le déversement d'hydrocarbures par le navire de charge *South Angela* à Come By Chance (Terre-Neuve); les réclamations non-réglées; les modifications à la Loi sur la marine marchande du Canada; et, la situation de la Caisse.

### Caisses populaires du Nouveau-Brunswick : Rapport annuel 1988

Fredericton : Ministère de la justice, 1989. 22, 22 p. : ill. Bilingue (New Brunswick credit

unions...). CSI 46117.001.  
MICROLOG 90-00718 1 fiche

La responsabilité majeure du Service des caisses populaires et coopératives est celle de surveiller les caisses populaires et les 'credit unions' au Nouveau-Brunswick. Le Service a comme principal objectif de veiller à l'application de la 'Loi sur les caisses populaires' et de ses règlements ainsi que de la 'Loi sur les fédérations de caisses populaires' dans le but de protéger l'épargne des membres. A cette fin, le Service effectue périodiquement des inspections des caisses populaires et de 'credit unions' dont en voici le rapport annuel.

### Calcium magnesium acetate (CMA) production : an assessment of process technology

Sheridan Technical Associates Inc. Toronto : Ministry of Transportation, Research and Development Branch, 1990. vii, 110 p. : ill. Bibliogr.  
MICROLOG 90-05796 2 fiche

Calcium magnesium acetate (CMA) has been identified as the most promising, non-corrosive, environmentally benign alternative to rock salt as a de-icing chemical. Unfortunately, CMA presently costs at least 25 times as much as salt on the basis of small scale pilot production. This technology review evaluated present and possible chemical and biotechnical processes to determine if opportunity exists for Ontario industry to produce CMA to the existing specifications for use as a de-icer at a cost less than \$35/tonne (1988 prices). As a guideline, production costs will be based on a plant producing 10-6 tonnes/a which approximates to the potential Ontario requirements. The report examines the options available for the economic production of CMA and assumes that new capital construction will be required to achieve this. The possibility of export sales is not considered. This technology review is divided into sections dealing with proven commercial processes for acetic acid manufacture, conversion of acetic acid to CMA, possible routes from renewable resources, and newer chemical routes to acetic acid/CMA.

### Calgary 2020 : Calgarians choosing their future today

Calgary, Alta. : Calgary Public Information Dept., 1989. 39 p. : ill.  
MICROLOG 90-03636 1 fiche

In October 1988, the Minister of Municipal Affairs commissioned Alberta's local governments to prepare "preferred vision" statements to help shape their futures. This document contains Calgary's response to this inquiry. Thirty three groups comprised of 300 individuals contributed. Twenty of these groups offered special perspectives from different age groups including children, teens, post-secondary students, and seniors; particular themes such as business, labour, urban planning, heritage, environment, health, and the disabled; and various backgrounds including native, and ethno-cultural groups.

### Cambridge District fisheries management plan, 1989-2000

Toronto : Ministry of Natural Resources, 1989.  
iv, 106 p. : maps. Bibliogr. ISBN  
0-7729-5747-9  
MICROLOG 90-01992 2 fiche

This fisheries management plan was prepared  
to outline the direction for fisheries management  
in the Cambridge District to 2000 and to  
identify specific activities required to manage  
local fisheries resources over the next 5  
years. The report covers the purpose and  
planning process, including existing policy and  
technical direction; the current and projected  
resource use for sport fishermen, commercial  
food and bait fishermen, private fish farms,  
native fisheries, and fish viewing; general and  
specific management direction for the sport  
fisheries, bait fisheries, provincially rare and  
endangered species, and non-consumptive  
fisheries; and implementation.

### Le Camionnage pour compte d'autrui au Québec

par G. Gonthier. Québec : Gouvernement du  
Québec, Ministère des transports, 1989. xvi,  
105 p. : ill. Bibliogr. (Etudes et recherches  
en transports) (Socio-économie des  
transports) ISBN 2-550-19984-7  
MICROLOG 90-02888 2 fiche

Sur la base du partage des compétences  
fédérale et provinciale, un bref historique  
présente les principales étapes législatives de la  
réforme du camionnage, ceci à l'aide des  
données statistiques disponibles, notamment  
celles de Statistique Canada, des tableaux et  
des figures illustrant l'importance économique du  
camionnage pour le Québec. Les objectifs, les  
principes et les orientations guidant la réforme  
sont également passés en revue. Ensuite,  
l'analyse des principales dispositions de la Loi  
de 1987 sur les transports et de la Loi sur le  
camionnage permet de comprendre l'étendue de  
la réforme et son effet sur l'accès au marché  
du camionnage. En ce qui concerne le  
système des permis adopté par le Règlement  
sur le camionnage, l'approche présentée fournit  
une plus grande liberté de commerce pour  
stimuler la concurrence. Enfin, une description  
des pouvoirs d'enquête et d'inspection, de  
même que des dispositions pénales applicables  
respectivement aux entreprises de camionnage  
extraprovinciales et locales, complète ce tour  
d'horizon des règles du jeu en vigueur au  
Québec.

### Can jack pine site productivity in north central Ontario be predicted using multiple regression soil-site equations?

by P.A. LeBlanc and W.D. Towill. Thunder  
Bay, Ont. : Ministry of Natural Resources,  
Northwestern Ontario Forest Technology  
Development Unit, 1989. iv, 14 p. Bibliogr.  
(Technical report ; no. 33)  
MICROLOG 90-01573 1 fiche

Examination of the application of Schmidt and  
Carmean's (1988) multiple regression equations  
describing jack pine soil-site relationships for  
the Thunder Bay District and the B.8 Central  
Plateau and B.11 English River forest sections.  
Soils and jack pine site index data from 84  
forest ecosystem classification plots located on  
various site conditions across the B.8 and B.11  
forest sections were used to test the  
hypothesis that these soil-site relationships could  
be applied across north central Ontario.

### Can we use the northern prime land classification to identify the productivity of jack pine site in north central Ontario?

by P.A. LeBlanc and W.D. Towill. Thunder  
Bay, Ont. : Ministry of Natural Resources,  
Northwestern Ontario Forest Technology  
Development Unit, 1989. iii, 21 p. : ill.  
Bibliogr. (Technical report ; no. 34)  
MICROLOG 90-01574 1 fiche

In 1985, the Northern Region developed a  
classification and key for assigning various soil-  
site conditions to relative site productivity  
classes. This key was developed using selected  
soil site variables considered to be critical in  
influencing individual tree and stand growth.  
This investigation tested the accuracy of the  
Northern region prime land key in predicting  
jack pine site productivity in north central  
Ontario. An extensive data base consisting of  
84 plots established by the forest ecosystem  
classification, and 99 plots from Schmidt's soil-  
site study for jack pine in the north central  
region was used. Site productivity was  
described using site index (height of dominant  
trees at breast height age of 50 years).

MICROLOG 90-00721 1 fiche

La Loi sur le soutien des prix des produits de la pêche, entrée en vigueur en 1947, confère à l'Office des prix des produits de la pêche les pouvoirs officiels d'une société d'État. L'Office a pour tâche d'enquêter sur les prix des produits de la pêche et, s'il y a lieu, de recommander des mesures déjà prévues par

la Loi en cas de chute des prix. Essentiellement, les mesures législatives servent à protéger les pêcheurs de baisses trop rapides de prix et des pertes de revenus qui s'ensuivent, baisses dont les causes échappent au contrôle des pêcheurs ou des producteurs. Sous réserve d'une approbation du Gouverneur en conseil, l'Office a le pouvoir d'acheter les produits de la pêche à des prix prescrits, de les vendre ou d'en disposer autrement, ou de verser aux producteurs des montants compensatoires équivalant à la différence qui existe entre le prix prescrit et le prix moyen auquel ces produits sont vendus. Ce document donne des renseignements sur l'industrie canadienne de la pêche en 1988, la transformation et la commercialisation et les activités de l'Office des prix des produits de la pêche.

Ottawa : The Commissioner, 1990. iv, 278, iv, 304 p. : ill. *Bilingual.* CSI 22164.001. ISBN 0-662-57215-7  
MICROLOG 90-03905 7 fiche

Describe the three main goals of the Commission in incorporating both French and English into the cultural identity of Canada. These goals are: the equality that is proclaimed by the Constitution and the Official Languages Act; the quality of service, education and financial management all citizens are entitled to receive from government; and continuity of programs as well as consistency of motivations to ensuring the existence of these programs. The report discusses official languages from a national agenda perspective, with a look at affairs of state, language rights, government policies and programs, and the work of the Standing Joint Committee. Analyses equality of services to the public, and the right to work in the language of one's choice. The report also evaluates equality of language rights in federal institutions and gives an overview and a province-by-province review of minorities. Also discusses the promotion of second-language

instruction in public schools and post-secondary educational institutions. Appendices include a review of activities for the year and plans for the coming year; complaints, statistics, audit reports and publications list; and, new linguistic profiles from the census.

Ottawa : le Ministère, 1989. 87 p. : ill. *Bilingue. CSI 21114.001.* ISBN 0-662-57256-1  
MICROLOG 90-02256 1 fiche

Cette revue annuelle marque les deux décennies de l'engagement de Travail Canada envers le principe qui veut que la sécurité doit régner dans les lieux de travail de compétence fédérale. Le mandat du Ministère porte sur les questions du travail dans des entreprises d'envergure interprovinciale ou internationale,

dans une quarantaine de sociétés d'Etat et dans des industries désignées d'intérêt public par le Parlement du Canada. Le champ total de sa compétence comprend le transport par air, chemin de fer, route ou pipeline, l'exploitation des canaux, des ponts et des tunnels; le transport maritime et les entreprises connexes; les industries de service telles la radiodiffusion et les banques; enfin, la manutention du grain et les mines d'uranium. Le document se divise en trois parties: les relations du travail, la sécurité et la santé au travail, et les normes du travail.

**Canada and international peace and security : a bibliography, covering materials from January 1985 through December 1989**

Ottawa : Canadian Institute for International Peace and Security, 1990. v, 434 p. Bilingual (Le Canada, la paix...). ISSN 1180-3797 ISBN 0-660-55772-X  
MICROLOG 90-07051 5 fiche

The aim of this bibliography is to increase access to Canadian information on international peace and security issues, in both the French and the English languages. Peace and security issues focus primarily on arms control, disarmament, defence, and conflict resolution. The sources used are drawn principally from initial lists of Canadian periodicals compiled by Information Services and its Consultative Group. All non-Canadian periodicals received at the Institute are also indexed for articles covering Canadian interests, or written by Canadians.

**Canada and the Pacific Basin**

by G. Hervouet. Ottawa : Dept. of the Secretary of State of Canada, Canadian Studies Directorate, 1988. 34, 36 p. : ill. Bibliogr. (About Canada) Bilingual (Le

Canada et le bassin...). ISBN 0-662-56298-4  
MICROLOG 90-00859 1 fiche

One of a series of booklets on Canada and its people. This booklet provides an explanation for the growing interest in the Pacific region and the proliferation of government and private-sector initiatives in the area. The booklet gives a short outline of Canada's history of involvement in the Pacific Basin, but does not deal with such problems as foreign aid, Canada's political stand on Vietnam or the political changes in the Philippines. Coverage includes traditional objectives and new initiatives, renewed activity and priority in the Pacific Basin, priority to Japan and renewed interest in China, the newly industrialized countries, ASEAN and Pacific partners, and the obstacles to development.

**Canada and the U.S.-Mexico free trade negotiations**

by R.J. Wonnacott. Toronto : C.D. Howe Institute, 1990. 8 p. Bibliogr. (Commentary ; no. 21) ISSN 0824-8001 ISBN 0-88806-265-6  
MICROLOG 90-06724 1 fiche

This paper addresses some of the issues that arise in any Canadian decision to participate in a North American free trade agreement. It focuses on two questions: Should Canada participate with the objective of expanding the existing Agreement to include Mexico? Or should Canada allow the United States and Mexico to go ahead and create a bilateral agreement on their own?

**Canada as a borderlands society**

by R. Gibbins. Orono, ME : Canadian-American Center, 1989. v, 18 p. Bibliogr. (Borderlands monograph series ; no. 2) ISSN 1040-3264 ISBN 0-9625055-0-1  
MICROLOG 90-02311 1 fiche (Available on fiche only)

The international border which Canada and the United States share is commonly used as a symbol for the relationship between the two countries. Hence the phrase 'the world's longest undefended border' is thought to capture the friendship that exists between the two countries, and to reflect the extensive north-south flow of people, resources, and culture which the border does little to impede. The point of this essay is not to challenge the mythology of the undefended border but, rather, to argue that while Americans and Canadians may share the same border, they share it in very different ways.

**Canada Brick Quarry ground water survey : eighth annual report, 1988-89**

by D.H. Barber and A.Z. Mlynarczyk. Toronto : Ontario Hydro, Research Division, 1989. i, 186 p. : ill. Bibliogr. (Report ; no. 89-309-K)  
MICROLOG 90-03996 2 fiche

Between December 1981 and December 1986 Lakeview Thermal Generating Station fly ash was disposed of as fill in the Canada Brick Quarry, Mississauga, Ontario. As a condition of issuance of an environmental provisional certificate, an annual program of ground water monitoring is required. For the 1988/89 sampling year, ground water samples were collected from the up-gradient wells, the underdrain collection sump, and the down-gradient wells. Seven new wells were installed, 4 south of the railway and 3 in the ash fill to provide samples of ash leachate. This report covers the chemical analyses and piezometric head measurements of ground water samples from October 1988 to September 1989. The analytical data reported includes previous ground water surveys as well as that for the current sampling year.

**Canada Brick Quarry surface water survey : eighth annual report, 1988-89**

by D.H. Barber and A.Z. Mlynarczyk. Toronto : Ontario Hydro, Research Division, 1989. i, 47 p. : ill. Bibliogr. (Report ; no. 89-310-K)  
MICROLOG 90-03995 1 fiche

Lakeview Thermal Generating Station fly ash was disposed of at Canada Brick Quarry in Mississauga, Ontario, between December 1981 and December 1986. As a condition of environmental approval, an annual surface water survey is required. This year's report contains the historical data from the 7 previous surveys as well as results of analyses of samples collected on October 27, 1988 and April 22, 1989. The 1987-89 survey identified reasons to suspect that the Creek may have been contaminated or mixed with ash leachate during the monitoring period. This mixing was examined again this year.

### Canada's forest inventory, 1986 : technical supplement

by S.L. Gray and K. Neitman. Chalk River, Ont. : Canadian Forestry Service, Petawawa National Forestry Institute, 1989. ix, 164 p. : ill. Bibliogr. (Information report : PI-X-86) ISSN 0706-1854 ISBN 0-662-16826-7 MICROLOG 90-00227 2 fiche

Canada's forest inventory is renewed periodically to collect the best data available from source inventories of agencies responsible for managing the forest. This report describes source data for the 1986 forest inventory, how they were compiled, and gives precautions for proper use. The information is up to 40 years old (1946) and on average is 10 years old (1976). The data consists of area and volume statistics by up to 12 classifiers. The volume data are available for up to 19 species groups for pulpwood and sawwood utilization specifications. Age class, predominant genus, sawwood volumes, cull factors to give net volumes, policy constraint, productivity, and tree size-volume relations are new since the last inventory in 1981.

MICROLOG 90-03865 1 fiche

On July 5, 1985, the governments of Canada and Québec signed a \$100 million subsidiary agreement on mineral development within the framework of the Canada-Québec economic and regional development agreement (ERDA) of December 1984. The 5-year agreement (1985-1990) promotes cooperation and coordination between the Government of Canada and the gouvernement du Québec for the implementation of measures to stimulate mineral development and increase the economic impact of the mineral industry in Québec. This report describes the objectives and management of the agreement, the programs established, and gives a review of the activities by program, including a financial summary. Programs are described in detail and cover geoscientific activities, asbestos R&D, mineral development infrastructures, public information, technical and economic studies and experimentation work, production and distribution of documentation,

defence and promotion of asbestos, and assistance to mineral exploration.

by J.T. Jockel. Orono, Maine : University of Maine, Canadian-American Center, 1990. 28 p. Bibliogr. (Canadian-American public policy ; no. 1) ISSN 1047-1073 ISBN 0-89101-075-0  
MICROLOG 90-06516 1 fiche (Available on fiche only)

This essay surveys Canada-U.S. relations today and their prospects for the 1990s. It begins in Canada, with first, the joint approach towards management of the relationship and, second, the current, common Canada-U.S. consensus on the elements of the relationship, upon which the recent approaches to management rest. It then turns to global affairs and the disquieting domestic possibilities which could affect the foreign policies of both countries. It ends with an assessment of the potential impact of international trends on the bilateral relationship.

### Canada/NB MDA project on mine shaft rope testing : stranded ropes with artificial defects

by L.B. Geller, G. Rousseau and D. Poffenroth. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. v, 122 p. : ill. Bibliogr. (Report ; MRL 90-015(TR))  
MICROLOG 90-07123 2 fiche

An investigation was begun in July 1988 to comparatively evaluate, on a properly controlled experimental basis, the performance of a range of commercially available electro-magnetic (EM) wire-rope test instruments, including Canadian, American, and West German testers. Both in situ and shop-floor testing was performed, on rope-sizes and constructions that are representative of the full range used in Canadian mines. Results were obtained in close cooperation with Canadian regulatory authorities, research organizations, and industry. This report describes and analyses results obtained with the reel-to-reel testing of two specially designed and manufactured 1 3/4 in., 6x27, flattened strand, wire-ropes, with artificial defects.

### The Canadian aids to navigation system

Ottawa : Canadian Coast Guard, Aids and Waterways Directorate, 1990. 36 p. : ill. French ed. (Le Système canadien...) on the same fiche. Fold. ill. not filmed. ISBN 0-662-17804-1  
MICROLOG 90-04818 1 fiche

Aids to navigation are devices or systems, external to a vessel, which are provided to help a mariner determine position and course, to warn of dangers or obstructions or to advise on the location of the best or preferred route. The Canadian Coast Guard is responsible for the provision of aids to navigation in Canadian waters, with the exception of the Trent-Severn and Rideau waterways. The Canadian aids to navigation system, a combined Lateral-Cardinal system, is described. The publication also covers fixed aids (lightstations, daybeacons, fog signals, sector lights, and ranges); buoys for navigation and special uses, and their daytime and nighttime identification characteristics; radio aids such as radar reflectors and radar beacons, radiobeacons, and Loran-C; and related publications and sources in Canada and the U.S.

### Canadian environmental policy : why process is almost everything

by G.B. Doern. Toronto : C.D. Howe Institute, 1990. 12 p. Bibliogr. (Commentary ; no. 19) ISSN 0824-8001 ISBN 0-88806-262-1  
MICROLOG 90-06448 1 fiche

To shed light on the realities of environmental decision making processes, this report proceeds through three stages of analysis.

The first is to appreciate where the impetus for change is coming from; the second is to understand the dynamics of decision making for policies versus projects versus standards setting; and the final stage deals with the influences on decision making of the concepts of democratic legitimacy, concerns about efficiency and international competitiveness, and the dynamics of the scientific, technological, and analytical controversy.

### Canadian Environmental Protection Act : reporting for the domestic substances list -- Rev.

Ottawa : Environment Canada, 1988. 113 p. : ill. ISBN 0-662-16534-9  
MICROLOG 90-03096 2 fiche

The Canadian Environmental Protection Act (CEPA) provides the legislative basis for addressing pollution problems on land, in water and through all layers of the atmosphere. It establishes a comprehensive framework to manage toxic substances through their life cycle, from development and manufacture, through transport, distribution, use and storage, to safe disposal as waste. This guide gives information on the CEPA, the domestic and non-domestic substances list and amendments to it; criteria for reporting; how to report; guidelines to substance reporting; confidentiality; and problem letters. The guide also includes relevant sections of CEPA and definitions of terms.

### Canadian Forces flight trial of individually molded fibreglass lumbar supports

by J.R. Poplow and L.L.M. Bossi. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. 29 p. : ill. Bibliogr. (DCIEM research report ; no. 88-RR-12)  
MICROLOG 90-06978 1 fiche

Individually molded fibreglass lumbar supports may be useful in alleviating backache in aircrew members. This paper concludes a two-year flying trial of 13 FW and 25 RW aircrew. Each aircrew member had been referred with a complaint of recurrent backache in their particular flying environment. Thirty-eight aircrew members (36 pilots, one navigator and one AESO) were individually fitted, flew from 5-300 hours wearing the lumbar support, then completed a pre- and post-support subjective evaluation.

#### Canadian regional development : the urban dimension

by A.F.J. Artibise and M.J. Kiernan. Ottawa : Economic Council of Canada, 1989. ix, 99 p. Bibliogr. (Local development paper ; no. 12) ISSN 0225-8013  
MICROLOG 90-04063 2 fiche (Available on fiche only)

This document proposes a model of regional economic development which is explicitly urban-based. In formulating this model, it examines the realities of the contemporary Canadian situation. It also reviews some of the current thinking in Europe and the United States about economic development, most of which places an increased emphasis on local, urban-based approaches. In addition, it sketches the outlines of the institutional, economic and political environment with which they would have to contend. Finally, it concludes by suggesting a number of criteria by which future urban economic development initiatives might be judged

#### The Canadian residential duct and chimney survey : final report

Shellair Scientific Ltd. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1989. iii, 62 p. Bibliogr.  
MICROLOG 90-06838 1 fiche

This report describes the results of a project to better understand the nature and extent of problems with the installed flow and thermal performances of ducts and chimneys in housing. The project began in September 1988, using a duct test rig, a device for measuring air flows and heat losses in ducts and chimneys. The report covers the survey design, the test protocol design, test results and a description of the computer data base developed.

#### Canadian science policy : developments and trends

by R. Fawcett. Ottawa : Library of Parliament, Research Branch, 1989. 22 p. Bibliogr. (Backgrounder : BP-222E) *French ed. (La Politique scientifique...)* on the same fiche ISBN 0-660-13499-3  
MICROLOG 90-05371 1 fiche

Examination of the debate over science policy in Canada, whose main players are the universities, government and industry. This report examines the growth of science in this country and the policy measures which guided it, including the Glassco Commission of 1963, the Lamontagne Committee in 1970, Liberal initiatives in the 1970s, Conservative initiatives since 1984 and the present situation. Other areas of discussion involve the funding of basic research, the Centres of Excellence concept, research consortia, and federal actions in the

field of high technology.

**Cancer among former employees of the Johns-Manville asbestos-cement factory in West Hill, Ontario : an updated analysis and assessment of risk**

by M.M. Finkelstein. Toronto : Ministry of Labour, Health Studies Service, 1988. 33 p. : ill. Bibliogr.  
MICROLOG 90-03248 1 fiche

From 1947-80, the Johns-Manville Co. operated a plant in West Hill, Ontario for the manufacture of asbestos-cement pipe, and at times, asbestos-cement construction board, and asbestos insulation materials using three different kinds of asbestos, chrysotile, crocidolite and amosite. The employees experienced a high incidence of lung scarring from the disease asbestosis, and have been at a higher risk of developing the asbestos-associated cancers mesothelioma, lung cancer, and gastrointestinal cancer. This report updates the investigation of the health experience of the 4,729 workers in this population and presents an analysis of risk factors of asbestos-associated cancers. The report also updates the analysis of the cancer experience of the workforce to the end of 1985. Case-control methodology was used to investigate the association between the risk of developing lung or gastrointestinal cancers and a number of potential risk factors, including asbestos exposure, age at hire, and year of hire.

**Cancer experience at Maple Biological Research Facility**

by J.N. Nearing. Toronto : Ministry of Labour, 1988. 78 p. Bibliogr.  
MICROLOG 90-01270 1 fiche

Maple Fish and Wildlife Research Centre is a research facility of the Ontario Ministry of Natural Resources, located in Maple, Ontario at the Southern Research station. In October 1985, the Centre's joint health and safety committee noted the concern of the staff over the number of cancer cases said to have occurred in past and present employees. Since 1970, 10 employees were known to have developed cancer and by October 1985, 6 had died. This report addresses the concerns and examines the occurrence of cancer in workers currently or previously employed at the Centre. Past employment in the main laboratory research building was of particular concern because of the nature of the work performed there and the history of potential occupational exposures. The results of an extensive literature review of health-related effects associated with employment in the biological sciences or related occupations are also presented.

**Capability of kittiwake and thick-billed murre to utilize the energy in capelin and Arctic cod**

by B. Brekke. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 66 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5478) Originally published in Norwegian, by the Biological Institute, the University in Oslo, Blindern at Blindern, Oslo, Norway. ISSN 0704-3716  
MICROLOG 90-00589 1 fiche

This study is part of the Pro Mare seabird project on seabirds in the Arctic to gain knowledge about how much energy seabirds take out of the Barents Sea and how much energy they re-distribute. The report deals with the energy utilization of capelin and Arctic (Polar) cod by black-legged kittiwake and thick-billed murre on Svalbard. Ten birds of each species were held in captivity in individual

cages and were fed for 20 days with capelin and Arctic cod. The energy utilization of the different feeds was found by calculating the difference in energy between the feed intake and energy in guano for each bird per day. The calculations were based on analyses of feed and guano, corrected for positive-negative nitrogen balance.

### Carrying capacity of coho salmon streams

by D.E. Marshall and E.W. Britton. Vancouver, B.C. : Dept. of Fisheries and Oceans, Salmonid Enhancement Program, 1990. vi, 32 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2058) ISSN 0706-6473  
MICROLOG 90-04823 1 fiche

Analysis of stream carrying capacity for coho salmon based on a comparison of coho salmon

smolt yields with rearing space. The 4 variables used to describe this relationship were smolt numbers and biomass, and length and area of stream accessible to spawners. Other factors that might influence carrying capacity, such as nutrient level, stream gradient, temperature and flow, were not examined. The relationships between smolt yield (expressed as numbers and biomass) and rearing space (expressed as length and area of stream) were examined by plotting each smolt yield variable against each rearing space variable for a number of streams. The goodness of fit of data points, obtained using a linear relationship, was then compared with that using a curvilinear or parabolic relationship.

En 1985, le Service de l'inventaire forestier a réuni un groupe de travail pour le développement d'outils à caractère écologique pour l'aménagement forestier. Le mandat confié à l'équipe, était la réalisation d'un cadre écologique forestier pour la région écologique des basses et moyennes Appalaches. En cours de production, elle a publié certains documents normatifs et méthodologiques, particulièrement pour la prise de données, et pour la cartographie des districts écologiques. Ce document présente les méthodes retenues pour la réalisation des cartes écologiques à l'échelle 1:20 000.

### The Case for the parallel runway at Vancouver International Airport

prepared for the Cabinet Committee on Vancouver International Airport, Vancouver, B.C. : Sypher Mueller International, 1989. v. 64 p. : ill. Bibliogr.  
MICROLOG 90-00757 1 fiche

This study examines the situation at the airport to determine if the operational requirements for the provision of additional capacity through the development of a new runway have been fully analyzed and documented, and to estimate the economic losses to British Columbia as a result of failure to address the current capacity problems. It examines the operational requirements, the environmental issues, the economic case and the business case for the new runway, and proposes a federal and provincial action plan to ensure that the capacity issue is fully addressed as soon as possible.

### A Case study of the Kitsaki Development Corporation, La Ronge Indian Band, La Ronge, Saskatchewan

by M.B. Decker and J.A. Kowall. Ottawa : Economic Council of Canada, 1989. vi, 61 p. : ill. Bibliogr. (Local development paper ; no. 5) ISSN 0225-8013  
MICROLOG 90-04062 1 fiche (Available on fiche only)

The Economic Council's project on directions for regional development looked at situations in which local communities had assumed more responsibility for their own development, and considered the lessons to be learned from these experiences. The Kitsaki Development Corporation (KDC) provides a case study of an Indian economic development project at the community level. It was initiated by the La Ronge Indian Band as a vehicle for creating economic development on the La Ronge reserve in northern Saskatchewan and used joint ventures as a business approach, with stress on capacity building. This report describes KDC's activities and analyzes its approach to economic development. Where possible, material on impacts is included, although the Corporation's relative newness

precluded a thorough review. Descriptions are given of the history of the project and the various ventures undertaken, as well as the impacts on the labour force, the quality of life, sustainability, replicability, and competition with existing business.

### A Catalogue of crude oil and oil product properties, 1989 version

by M.A. Bobra. Ottawa : Environment Canada, Environmental Protection Directorate, River Road Environmental Technology Centre, 1989. vi, 420 p. Bibliogr. (Report : EE-114)  
MICROLOG 90-05733 5 fiche

Compilation of available data on crude oils and petroleum products, emphasizing oils which could potentially impact the environment. Properties listed for each oil are those which will provide an indication of a spilled oil's environmental behaviour and effects. The oils are arranged in alphabetical order and the names used are those given by the authors of the original data or by the suppliers of the samples. For each sample, data is given on type, API gravity, density, viscosity, interfacial tensions, pour point, flash point, vapour pressure, distillation data, emulsion formation tendency and stability, weathering, dispersibility, hydrocarbon group analysis, aqueous solubility, toxicity, and sulphur.

### Catalogue of data on thorium intake, organ burden and excretion

SENEC Consultants Limited. Ottawa : Atomic Energy Control Board, 1989. 60 p. Bibliogr. (Research report : INFO-0330)  
MICROLOG 90-04388 1 fiche

The Board is initiating the critical evaluation of current biokinetic and dosimetric models applicable to estimating exposure to the common chemical and physical forms of thorium encountered. The identification and location of the relevant sets of data are the first steps of this project. This report describes the collection methods and presents catalogues of the data on human and animal studies resulting from exposures under controlled experimental conditions, chronic occupational or environmental situations and actual accidental conditions. The data was identified through the use of computerized literature searches, library research and telephone contact with currently active researchers in the field.

### Catch rates by index fishermen in the 4T herring fishery, 1986-87

by D.K. Cairns. E.M.P. Chadwick and C. Bourque. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1988. v. 19 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1660) ISSN 0706-6457  
MICROLOG 90-01777 1 fiche

Assessment of herring stocks in the southern Gulf of St. Lawrence (NAFO Division 4T) requires a reliable indicator of trends in stock abundance. Recent assessments have used abundance indices based on gillnet catch rates, estimated from landings data from purchase slips and effort data obtained through telephone surveys. Because of difficulties in interpreting catch rates derived from purchase slips, alternate methods are being developed and tested, including acoustic surveys, spawning bed surveys, subjective evaluations by fishermen, and the index fisherman program. In the index fishermen program, catch rates are obtained directly from selected gillnet fishermen through telephone interviews conducted during the fishing season. This paper presents results of the first 2 years of index fishermen data, and evaluates the program's usefulness as an indicator of herring abundance.

### Cathodic protection of concrete highway bridges

by D.G. Manning. Toronto : Ministry of Transportation and Communications, Research and Development Branch, 1990. 12 p. Bibliogr.  
MICROLOG 90-04591 1 fiche

Overview of the cathodic protection of concrete highway bridges with particular reference to the work of the Ontario Ministry of Transportation. The report includes both bridge decks and substructure components as well as the implications of applying cathodic protection to prestressed concrete members. Results of research studies and operational experience with cathodic protection over 15 years are summarized. The principles of cathodic protection, the materials and components which are used and protection criteria to ensure that corrosion is arrested are described. The need for a monitoring system to ensure effective long-term operation is emphasized and future research activities identified.

**Cedar Lake fish stock assessment program, 1979**

by W. Lysack. Winnipeg: Manitoba Natural Resources, Fisheries Branch, 1980. v. 45 p. ill. Bibliogr. (Manuscript report ; no. 80-17)  
MICROLOG 90-05594 1 fiche

A year-to-year fish stock assessment program on the Cedar Lake populations of walleye and whitefish was initiated in 1979 in response to continuing requests for quota increases from Cedar Lake commercial fishermen. This report presents the 1979 results in age composition, mortality and survival rate, maturity, growth, fish ages determined by examination of scales and of otoliths, and age composition, mean length and weight, mean age and mortality rate of commercially caught fish. This data is related to the present status of fish stocks to that described by earlier workers and discusses their management implications. Due to manpower restraints, experimental sampling was restricted to one period during early autumn. Commercial catches were sampled once in spring and once in fall. Only 3 experimental gangs were set.

**Cellulose insulation as an air barrier**

by K. Manning. Edmonton: Alberta Municipal Affairs, Innovative Housing Grants Program, 1989. iv, 46 p. : ill. ISBN 0-88654-260-X  
MICROLOG 90-05712 1 fiche

Can-Cell Industries Inc. has been producing loose-fill and spray applied cellulose insulation for over 15 years. Recent research work conducted by the firm has concentrated on development of a technique for spray applying moistened insulation into the exterior wall cavities of houses. The study determined if the wet sprayed cellulose wall insulation system would function satisfactorily without the use of a polyethylene air/vapour barrier, as well as the influence of interior alkylid paint on the vapour diffusion performance of the wall system. Field work involved construction of a conventional duplex housing unit which was insulated with wet sprayed cellulose in the exterior walls and dry loose-fill cellulose in the attic areas. One half of the unit did not have a polyethylene

air/vapour barrier installed. Air leakage and exterior wall moisture levels were monitored for 12 months after construction.

#### Centres and office areas : a background document in the review of the Official Plan for the Urban Structure, Metropolitan Toronto

Metropolitan Toronto (Ont.). Planning Dept. Policy Development Division. Toronto : The Division, 1989. xxix, 118 p. : ill., maps.  
Bibliogr. (Metropolitan plan review : report ; no. 9)  
MICROLOG 90-05714 2 fiche

This report reviews the implementation of a multi-centred concept and the development of office concentrations in Metro Toronto, namely Centres, Office Parks and Foci. It highlights emerging issues in the development of these office concentrations and the implementation of the multi-centre concept; determines the Metropolitan interests in the development of centres; presents options to change existing policy and suggests directions to achieve the Metropolitan interests; and suggests possible locations for the designation of new centres

#### CFCs and Halons in Nova Scotia : a use analysis study with recommendations for control options

prepared by John R. Gordon, for the Nova Scotia Department of the Environment.  
Halifax : Dept. of the Environment, 1989. 41 p.  
MICROLOG 90-04595 1 fiche

The Nova Scotia Ozone Layer Protection Act is one of a number of statutory responses by provincial and municipal governments in Canada initiated and designed to help implement Canada's obligations to the 1987 Montreal Protocol on Substances that Deplete the Ozone Layer. Nova Scotia passed enabling legislation to undertake a broad range of measures to protect the global atmospheric commons from abuses by Nova Scotians. However, the Act depends upon the development and implementation of regulations to achieve its full potential. This study was commissioned to develop the necessary background information needed for the preparation of regulations for the control of the chlorofluorocarbon (CFC) and bromofluorocarbon (Halon) groups of substances, and to suggest other appropriate mechanisms or control strategies. The report gives a detailed summary of the result of a survey of industrial and commercial users of CFCs and Halons in Nova Scotia, assesses their potential impact on the industrial sector of restricting their use, and makes recommendations on available control options.

#### Challenges for a contemporary statement of the livable region strategy : a working paper

Greater Vancouver (B.C.). Technical Advisory Committee. Vancouver, B.C. : GRVD Development Services, Technical Advisory Committee, 1987. 58 p.  
MICROLOG 90-05166 1 fiche

This paper reviews the historical sources of regional development concepts for Greater Vancouver, and describes the nature of a contemporary strategy. It also reviews the goals expressed in the Official Regional Plan and Livable Region Strategy. In addition, it identifies the public purposes of existing regional development policy, and evaluates the current challenges for that policy. It addresses the topic areas of housing, employment, transportation, the environment, and centres. Finally, it summarizes the main themes which could form the basis of a contemporary strategy.

#### Changeable message signs : a driver preference survey

by A. Smiley and R. Dewar. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1988. x, 170 p.  
Bibliogr.  
MICROLOG 90-00156 2 fiche

The Ministry of Transportation of Ontario is in the process of implementing a freeway traffic management system on Highway 401 in Toronto that includes a changeable message sign system. This report involves a project to discover the type of messages drivers preferred for describing traffic incidents on the highway. As part of the project, a literature review was used to develop a questionnaire on driver preference. The main survey was carried out at Scarborough, Downsview, and Brampton licensing offices in and around

Toronto. Questions were asked on types of information wanted, distance in advance, driver interpretation of phrases, and driver response to various diversionary and advisory messages. This report gives the results of the questionnaire.

### Changement structurel et adaptation : croissance des entreprises et rotation de la main-d'oeuvre

par J.R. Baldwin et P.K. Gorecki. Ottawa Statistique Canada ; Conseil économique du Canada, 1990. xxii, 241 p. : ill. Bibliogr. *L'éd anglaise (Structural change and the adjustment...)* : 90-06766/3. CSI 2215.217F ISBN 0-660-92946-5  
MICROLOG 90-06767 3 fiche

L'objet de cette étude est d'arriver à une estimation des caractéristiques et de l'ampleur de la réaffectation de la main-d'oeuvre et de l'emploi, à court comme à long terme, qui s'inscrit dans la dynamique de l'économie de marché. Entre autres choses, elle cherche à répondre aux questions suivantes: l'importance relative des divers secteurs et industries a-t-elle changé? Comment les taux d'entrées et de sorties influent-ils sur l'embauchage et sur le licenciement des travailleurs? Quelle est l'ampleur de la croissance et de la contraction de l'emploi dans les entreprises établies? Dans quelle mesure la taille de l'entreprise est-elle un facteur dans la création et la perte d'emploi? Quelle est l'importance des cessations d'emploi? Et finalement, les variations de l'emploi dans les industries sensibles aux échanges internationaux sont-elles moins ou plus grandes que dans les autres industries?

### Changes in intracellular free amino acids (FAA) in gill, mantle and adductor muscle tissue of the caged mussel *Elliptio Complanata* exposed to contaminated environments

by K.E. Day, J.L. Metcalfe and S.P. Batchelor Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 50 p. Bibliogr. (NWRI contribution ; 89-104)  
MICROLOG 90-02443 1 fiche

The detection of biochemical changes at the molecular and cellular level of organization in organisms exposed to chemical contaminants may be the earliest and most sensitive indication of a toxic response. One such biochemical tool is the measurement of changes in intracellular tissue concentrations of free amino acids (FAA) in molluscs. This paper presents the results of the monitoring of intracellular tissue concentrations of FAA in caged mussels exposed in situ for 27-29 days and 77-79 days to various point and non-point sources of pollution in the Yamaska River watershed in Quebec. The Yamaska River watershed is known to be contaminated with a number of chemical pollutants including metals, nutrients from both municipal sewage outfalls and agricultural runoff, pesticides and various industrial pollutants.

### Changes in the decline status of hardwood forests in Ontario, 1986 to 1987

Ecological and Resources Consultants Limited. Toronto Environment Ontario, Air Resources Branch, 1989. vii, 199 p. : maps. Bibliogr. ISBN 0-7729-6254-5  
MICROLOG 90-04736 3 fiche

In recent years some of the damage observed in forest ecosystems has been attributed to anthropogenic air pollutants, referring to the entire range of common airborne pollutants including acid rain. Concern has recently been expressed regarding the possible role of atmospheric pollutants in the decline of hardwood forests in Ontario. In response, a series of projects were initiated to examine this problem within the Acidic Precipitation in Ontario Study. One component study established under this program, the Hardwood Decline Survey, was intended to assess the degree and extent of existing damage to selected hardwood forest sites in the Great Lakes-St. Lawrence and deciduous forest regions of Ontario. This report documents the results of the reassessment of the province-wide plots in 1987.

### Changes in the distribution of the 'Yezo scallop' (*Pecten yessoensis*) and starfishes after mass planting of the scallop on the bottom of Vityaz Bay (Sea of Japan)

by Y.P. Volkov, et al. Ottawa National Research Council, Canada Institute for Scientific and Technical Information, 1985. 13 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 516b) *Originally published in Russian, in the USSR.* ISSN 0704-3716  
MICROLOG 90-00108 1 fiche

The Yezo scallop is a very important part of the fishery in the Far Eastern seas of the Soviet Union but stocks have been greatly reduced in recent years, and artificial culture has been suggested. The main problem in such culture is the low survival rate of young molluscs after planting due to predatory marine organisms, particularly starfish. This report presents the results of a study to observe the behaviour of the Yezo scallop after transplanting the bottom in conditions close to real conditions at marine farms. Vityaz Bay in the Sea of Japan met the conditions of permanent areas suitable for scallop, with natural populations of those starfishes most often present in bottom culture, and technically suited to prolonged detailed diving operations. Scallops were planted with a very high density to facilitate the study of spatial structure and changes in population density. Studies were done from June to October 1980 using standard light diving gear.

### The Characterization of ash from the BNPD radioactive incinerator

by J.P. Krasznai. Toronto Ontario Hydro, Research Division, 1989. 15 p. Bibliogr. (Report ; no. 89-186-K)  
MICROLOG 90-00406 1 fiche

Incineration of radioactive wastes is one important volume reduction process being utilized at the Bruce Nuclear Power Development Site. The radioactive ash generated as a secondary waste is packaged in galvanized steel containers which are then stored in the low level storage buildings. Currently all of Ontario Hydro's low level radioactive waste is retrievably stored, where it could remain until the radiological hazard has diminished to acceptable levels and then be disposed of in conventional facilities. This report provides information on the levels of radiotoxic, conventional hazardous constituents in radioactive incinerator ash as well as those parameters which will influence solidification selection.

### Characterization of estradiol-specific receptors : induction of the synthesis of vitellogenin and its mRNA in the liver of rainbow trout *Salmo gairdneri*

by J.L. Maitre...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 23 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5236) Originally published in French. ISSN 0704-

3716  
MICROLOG 90-02673 1 fiche

In oviparous vertebrates, the vitellus proteins are synthesized in the liver as a large precursor molecule, vitellogenin, which breaks down into phospholipids and lipovitelline after its incorporation into the oocytes. The synthesis and utilization of vitellogenin are phenomena that are closely linked to reproduction and are controlled directly by the estragens estradiol and estrone. This study demonstrates the presence of the different stages of the molecular mechanism for activating the vitellogenin genes in rainbow trout by the binding of estradiol to a specific receptor and induction or modification of the expression of the genes involved in the synthesis of mRNA and vitellogenin.

### Charcoal production in Tanzania using improved traditional earth kilns

by B.T. Kimario and K.I. Ngereza. Ottawa : International Development Research Centre, 1989. 27 p. : ill. Bibliogr. (Manuscript report ; 216e)  
MICROLOG 90-00253 1 fiche (Available on fiche only)

Charcoal is an important fuel in urban areas, and its production forms an important source of income to rural dwellers. The project to study charcoal production in Tanzania was initiated in March 1984 and was intended to increase the efficiency of charcoal production using traditional earth kilns, reduce wood waste, improve forest utilization, and meet national energy needs at reasonable prices. This project surveyed the various types of earth kilns used and evaluated the effect of their designs on charcoal yield and quality; measured the technical and economic performance of some improved models of earth kilns; and determined the acceptability of the most appropriate earth kiln model for use by rural charcoal producers.

### Charitable gaming : putting the charities back in the driver's seat

Toronto : Ministry of Consumer and Commercial Relations, 1990. 17 p. Bilingue (Jeux de bienfaisance...). At head of title: Draft for Consultation.  
MICROLOG 90-04292 1 fiche

More money is being raised by charitable organizations through gaming than ever before. In 1985, approximately 20 percent of monies wagered in a bingo game were retained by the charitable organization. It is becoming evident, however, that the percentage of proceeds going to the charities is declining. It has become harder for some charities to raise gaming proceeds for their charitable activities because more organizations are competing and saturating local markets. In short, the primary

purpose of fund raising for worthwhile charitable projects has been submerged and lost. This paper outlines the government's concerns regarding charitable gaming and offers possible solutions in order to solicit your written comments

### Chemical and biological data summary for Lake 222 outflow acidification experiments : Experimental Lakes Area

by J.G. Findeis, R.J. Hall and M. Coleman Taylor. Dorset, Ont. : Ministry of the Environment, Water Resources Branch, 1988. vii, 103 p. : ill. Bibliogr. (Data report ; DR 88/3) ISBN 0-7729-4798-8  
MICROLOG 90-01030 2 fiche

The effects of short-term pH depressions on aquatic biota are poorly documented. This report presents the physical, chemical, and biological data from an acidification experiment conducted on the outflow of Lake 222 in the Experimental Lakes Area of Northwestern Ontario, an area not normally exposed to such pH depressions. Samples were also collected from a lake outflow that has experienced long-term artificial pH depression (Lake 223) and one that has not been impacted in any way (Lake 224). A detailed description of the methods for the collection of the biotic data is

also included.

### Chemical and geotechnical testing of combustion solid wastes for their commercial application

Dearborn Environmental Consulting Group. Mississauga, Ont. : The Group, 1989. iv, 41 p. : ill. Bibliogr. *CANMET contract: 89242-01-SQ.*  
MICROLOG 90-02538 1 fiche

It appears that compared to full-scale combustors, residues from pilot-scale equipment have less desirable geotechnical properties for waste disposal and can contain high quantities of sulphides. In a recent study conducted at the University of British Columbia (UBC), wastes were generated during a combustion trial with Minto coal and a mixture of Elmtree and Texlime limestones as a sulphur sorbent. Analysis of the wastes indicated that residues from the pilot-scale unit had much less desirable geotechnical properties for both waste disposal and utilization than those from the Chatham unit. Subsequently, the UBC pilot-scale unit was modified to improve the combustion performance. This investigation characterized residues produced at the modified UBC pilot-scale combustor and compared them with the results of the previous testing. Samples from the combustion loop were also analyzed for reduced sulphur forms.

### Chemical properties of O-antigenic lipopolysaccharides isolated from O2 and O9, in particular, the separation and identification of 2-keto-3-deoxy-phosphoryl-octonate found in their strong acid-hydrolysates

by B. Tsai...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 12 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5306) *Originally published in Japanese, by the Japanese Journal of Bacteriology.* ISSN 0704-3716  
MICROLOG 90-02085 1 fiche

*Vibrio parahaemolyticus* (Vp) is a bacterium which causes food poisoning through such marine products as fresh fish and shellfish. On the basis of agglutination reactions and agglutinin absorption tests, Vp was serologically divided into 11 or 12 O-serum types. This study researches the chemical properties and molecular structure of the lipopolysaccharides (LPS) of Vp O2 and O9. The study also separated the lipids A which are the centers of the endotoxin activity of both LPS and elucidated the composition and presence system of their structural fatty acids, separated from the strong acid-hydrolysates (4N-HCl, 100 C, 45 min.) of both LPS the periodate-thiobarbituric acid reaction-positive substance X, and identified it for the first time. On the basis of the obtained information, the structural background of the LPS molecules is discussed in relation to the LPS of Vp other than O6.

**Chemical use and distribution in the Regina aquifer region**

Regina : Saskatchewan Environment and Public Safety, Air and Land Protection Branch, 1989. 2 v. : maps. *Contents: Vol. I : Executive summary -- vol. II : Report and appendices* MICROLOG 90-03579 2 fiche

Evaluation of the management and distribution of hazardous chemicals in the Regina aquifer region, as part of an ongoing program to develop a protection plan for the Regina aquifer system. The study involved classifying and estimating the total volume of hazardous chemicals in storage and use, estimating the volume of hazardous chemicals being produced as waste from business and industry, and documenting disposal methods. The survey area included the rural municipalities of Lumsden, Edenwold, Pense, Sherwood and the City of Regina. A total of 169 businesses and institutions participated in completing a questionnaire and conducting a tour of the sites. Estimates of volumes of hazardous chemicals used on-site were provided by the owner or operator representative. EV MS PR SC

**Chemicals and fuels from biomass flash pyrolysis : part of the Bioenergy Development Program (BDP)**

by D.S. Scott. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch ; Waterloo, Ont. : University of Waterloo, Waterloo Research Institute, 1988. xvii, 154 p. : ill. Bibliogr. MICROLOG 90-00387 2 fiche

This report is a logical extension of studies reported previously describing the development of the Waterloo fast pyrolysis process (WFPP), and optimization studies carried out in a 3 kg/h small pilot plant unit. Analysis of the liquid product earlier produced showed that high yields of some unique chemicals were also obtained and that an easy separation of the crude oil into lignin-derived and carbohydrate-derived fractions was possible. Further work was then carried out to assess this separation method and to devise methods of recovery for specific chemicals from the crude fractions. Past pilot plant experience as well as a previously reported economic feasibility study both suggested that scale-up of the WFPP to a process demonstration unit was warranted. The report describes the initial efforts to produce chemicals from the cure pyrolysis oils, and presents a design for a mobile 5 t/day PDU for the WFPP.

**Childhood leukaemia around Canadian nuclear facilities, phase 1 : final report**

by E.A. Clarke, J. McLaughlin and T.W. Anderson. Ottawa : Atomic Energy Control Board, 1989. vii, 58 p. : maps. Bibliogr. (Report ; INFO-0300) MICROLOG 90-00454 1 fiche

Recent studies in the U.K. have demonstrated an increased occurrence of childhood leukaemia in the vicinity of nuclear facilities involved in fuel reprocessing and weapons manufacturing. This study investigated whether or not there existed clusters of leukaemia among children born to mothers resident in the vicinity of nuclear facilities (research facilities; uranium mining, milling and refining, nuclear power generating stations) in Ontario. Seven hundred and ninety-five children from 0-4 years who died of leukaemia from 1950-86, and 951 children who were diagnosed with leukaemia from 1964-85, were identified from the Ontario Cancer registry. Residence at birth was obtained from birth certificates and residence at death was obtained from Ontario Cancer Registry records or death certificates. Analyses were performed separately for each type of facility, and for county and a 25-km radius. Relative risk estimates were calculated for each facility and each geographic area as the ratio of the observed over the expected number of events for each area. For the calculation of mortality ratios by residence at death, the expected values referred to the number of deaths that would be expected, on the basis of provincial rates, in a given population of children aged 0-4 years. For the calculation of mortality and incidence ratios by residence at birth, the expected values referred to the number of events that would be expected for a given number of live births. **Classification and measurement of aspen decay and stain in Alberta**

by Y. Hiratsuka, et al. Edmonton : Forestry Canada, Northwest Region, Northern Forestry Centre, 1990. vi, 29 p. : ill. Bibliogr. (Information report ; NOR-X-314). ISSN 0704-7673. ISBN 0-662-17634-0. MICROLOG 90-05781 1 fiche

One of the largest concerns affecting the utilization of aspen is the common presence of wood decay and stain, even in relatively young and small trees. Field recognition of types of decay and stain and standard methods to measure and record these defects are important for accurate assessment of aspen resources. Wood defects of aspen were usually classified into the categories of advanced decay, incipient decay, and stain, but that system created problems in measuring and recording defects consistently and objectively.

This manual was compiled to describe and illustrate the common types of aspen decay and stain that occur in Alberta, to present a new system of classifying defects into 5 categories, and to present methods of sampling and measuring these defects.

**Climate Change, Global Security and International Governance : a summary of proceedings of a conference on climate change and global security**

by K. Bush. Ottawa : Canadian Institute for International Peace and Security, 1990. 59 p. (Working paper ; no. 23) *French ed (Les Changements climatiques, la sécurité...)* : 90-07057-1. ISBN 0-662-17410-0  
MICROLOG 90-07058 1 fiche

Environmental issues are now in the spotlight of public attention, although there has been little discussion, in practical policy terms, of what can or should be done to address environmental problems within the context of global security and international governance. This conference assembled a wide range of decision makers and experts to discuss the nature of climate change, its ecological, social, political and economic consequences, and possible policy responses at regional, national and international levels. This report presents an overview of the major issues addressed organized by theme.

**Closing the gap : disarmament and development, the international debate**

by S. Lee. Ottawa : Canadian Institute for International Peace and Security, 1990. 38 p. Bibliogr. (Working paper ; no. 22) ISBN 0-662-17626-X  
MICROLOG 90-04815 1 fiche

This paper reviews the origins of disarmament-development advocacy, examines some of the efforts to establish a link, including UN studies, and reviews the debate at the 1987 International Conference on the Relationship between Disarmament and Development. This look at the 1987 UN Conference reveals the various national points of view about this relationship, and provides a window on the larger international tensions that are at the root of much of international relations today. The examination ends with a look at Canada's position in the debate.

**CMHC Kitchener townhouse study of soil gas ventilation as a remedial measure for methane entry into basements**

CH2M Hill. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1989. 2 v. : ill. Bibliogr. *Contents. Vol. 1 : The Study -- vol. 2 : Appendices*  
MICROLOG 90-05766 2 fiche

The migration of methane from either natural or man-made sources through soils into housing structures is a wide-spread problem. Canada Mortgage and Housing Corporation owns properties and houses which have existing or potential methane gas problems, such as a site of 81 townhouses in Kitchener, Ontario. This study investigated the current conditions of the soil gas venting system in 3 townhouse blocks, and the generation and entry of soil gas pollutants, installed and monitored the effectiveness of an active venting system, investigated and analyzed options to the active system, and analyzed the effectiveness of the systems designed, and their applicability to the entire townhouse project.

by R.P. Sinha and R.L. Duncan. Ottawa : Canada Mortgage and Housing Corporation, 1989. 12 p.  
MICROLOG 90-03779 1 fiche

In 1987, Canada Mortgage and Housing Corporation (CMHC) and Energy, Mines and Resources Canada (EMR) established a joint venture to provide technical housing support to the Northwest Territories Housing Corporation. This joint venture terminated on March 31, 1989. This represents the final report summarizing the activities completed to that date. These activities include the record of North meetings and recommendations, the development of a priority list of research initiatives, status reports on findings from field testing and demonstration projects; compendium of Northern building problems and scientific solutions; assessment of integrated low power ventilation strategies, level B algorithms; and reports on the Dawson City demonstration project, the Aklavik passive ventilation demonstration status and the moisture pin demonstration project.

**Co-operative housing as a new life style option for seniors**

by B. Sanford. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1989. xii, 119 p. : ill. Bibliogr.  
MICROLOG 90-03809 2 fiche

This study examines three co-ops located in different parts of Metropolitan Toronto. Two are high-rise buildings, designed and constructed specifically as seniors' co-ops, while the third is a cluster of low-rise buildings which were converted into a seniors' co-op following the threat of eviction and demolition by its former owner. The report focuses on how well the co-ops are meeting the needs of their elderly members. It examines the physical design, location of the buildings and access to shops, services and transit, the demographic characteristics of co-op members, the distribution of ages and sexes and their socio-economic and ethnic backgrounds, and the self-management structure of co-op housing boards and committees. It concludes with a series of comments and suggestions made by the seniors' co-op members themselves.

**CO2 refrigeration for long-haul transport : concept viability study and testing of prototypes to assess and demonstrate CO2 refrigeration freight vehicles : final report**

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada. St. Lambert, Que. Frédev Refrigeration Systems Inc., 1989. xix, 85 p. : ill.  
MICROLOG 90-05201 2 fiche

CO2 refrigeration is based on the injection technique (Coldspray) or the vaporization technique (Coldsink). The combination of these two techniques will create a refrigeration system which will be better adapted than mechanical refrigeration units to the long-haul transport of some perishable products. The essential differences between cryogenic CO2 refrigeration and mechanical refrigeration are investigated, including the factors to be taken into consideration to ensure good refrigerated transport. This report describes the various approaches tried and tested to ensure stable temperature and steady operation when equipment is unattended for a long time, including the control system. The system was tested on the transport of fresh beef carcasses and costed out.

**CO2 refrigeration for long-haul transport : concept viability study and testing of prototypes to assess and demonstrate CO2 refrigeration on long-haul highway refrigerated freight vehicles : final report**

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada, by Bernard C. De Langavant. Montreal : Frédev Concool, 1989. xix, 85 p. : ill.  
MICROLOG 90-01739 2 fiche

Mechanical refrigeration is now the standard for refrigerated transport, although this method is contrary to the basic principles of refrigeration. CO<sub>2</sub> refrigeration is based on the injection technique (Coldspray) or the vaporization technique (Coldsink). The combination of these 2 techniques will create a refrigeration system which will be better adapted than mechanical refrigeration units to the long-haul transport of some perishable products. The essential differences between CO<sub>2</sub> and mechanical refrigeration are investigated, including the factors to be taken into consideration to ensure good refrigerated transport. Various approaches were tried and tested to ensure stable temperature and steady operation when equipment is unattended for a long period of time. A new 'heart and lung' concept was developed permitting a regular 'breathing rhythm' and an appropriate 'blood pressure' to achieve this result.

### Coal devolatilization in an entrained flow reactor : final report

by L. Gibbs and W. Hallett. Ottawa : University of Ottawa, Faculty of Engineering, 1989. xxii, 212 p. : ill. Bibliogr. CANMET contract: 69050-01-ST.  
MICROLOG 90-03957 3 fiche

Thermal decomposition, or devolatilization, occurs when coal is heated to elevated temperatures. The moisture present evolves early and as the temperature increases, gases and heavy tarry substances are emitted. This report derives the reaction rate constants for coal devolatilization from data obtained in a laminar flow test reactor. The devolatilization models presented in the literature were critically evaluated and a competitive 2 reaction model was selected due to its flexibility and ability to predict the temperature variation of the ultimate yield. A finite difference model of the flow, heat transfer, and particle motion used to predict conditions in the reactor is expanded to include the effects of particle reaction and mass transfer. The endothermic heat of pyrolysis is also added to the particle energy balance. A procedure is developed for fitting the reaction constants of the model to the experimental data. As a test, this routine was used to fit the reaction constants of the 2 reaction model to the experimental data of Kobayashi.

### Coal water fuel conversion of an industrial oil-designed package boiler in a pulp and paper plant, Hantsport, N.S.

by G. Landry and A. Todd. Sydney, N.S. : Cape Breton Development Corporation, 1989. 3 v. : ill. Contents: Vol. 1 : Final report -- vol. 2 : Appendix A-D -- vol. 3 : Appendix E-O. CANMET contract: 79014-01-SQ  
MICROLOG 90-02561 7 fiche

In early 1987 a contract was signed between the Cape Breton Development Corp. (CBDC) and Minas Basin Pulp & Paper (MBP&P) for a 2-year commercial demonstration using coal-water fuel (CWF) as the primary fuel source in a steam generating boiler. As part of this program, MBP&P installed a 60,000 lb/hr oil-designed package boiler to replace older vintage boilers and provide process steam to their own plant plus the neighbouring Canada Keys Fibre plant. The boiler installation can burn CWF produced by CBDC in Cape Breton and employs the CWF burner technology. This final report presents an overview of the activities undertaken and outlines the boiler installation through to operation, with detailed discussion of various technical aspects.

### Coastal marinas, an assessment of fuel handling facilities : methodology development and study results

by M.W. Dunn, M. McGrath and T. Ito. Hull, Que. : Environment Canada, Conservation and Protection, Environmental Protection, 1989. iii,

52 p. : ill. Bibliogr. (Regional manuscript report ; MS 90-01)  
MICROLOG 90-06318 1 fiche

This study was conducted to assess the implementation of the B.C. Petroleum Association's guidelines for consumer bulk petroleum product storing and handling facilities by coastal marinas and the degree to which the guidelines were adopted. An assessment was made of proposals which were submitted to Environmental Protection's referral system between January 1984 and June 1988. Seventy-five marina applications were reviewed and 6 of them included fuel handling facilities. Assessment methodologies included a telephone survey, a site inspection and a sediment survey. Inspections of 22 additional marinas were also undertaken.

### Coastally trapped waves on the Labrador Shelf

by J.F. Middleton and D.G. Wright. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. vi, 76 p. : ill. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 116) ISSN 0711-6774  
MICROLOG 90-05225 1 fiche

Examination of data from an array of bottom pressure gauges deployed over the Labrador Shelf in the summer of 1985 and left in place for one year. Estimates of the buoyancy frequency were used to determine the cross-shelf structure of the first 3 coastally trapped wave (CTW) modes at Saglé and Nain Banks. The first 3 CTW mode structures were also computed for Hamilton Bank. Using an idealised topographic representation of the complex shelf bathymetry, both the stratified and barotropic mode 1 and 2 amplitudes were determined from the data. The fitting technique was also extended so as to determine the gain and phase of each mode with respect to forcing by Hudson Bay atmospheric pressure.

#### A Coded wire tag assessment of Salmon River (Langley) coho salmon : 1986 tag application and 1987 spawner enumeration

by N.D. Schubert and L.W. Kalnin. New Westminster, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1990. viii, 43 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2053) ISSN 0706-6473  
MICROLOG 90-04973 1 fiche

In 1986, a plan was implemented to improve the assessment data base for coho salmon through the long-term evaluation of key stocks. The Salmon River (Langley) was selected for the evaluation of annual escapement, marine survival, harvest distribution and exploitation rate. This report documents, for the 1984 brood, the 1986 coho smolt trapping and coded wire tag application and 1987 coho adult escapement estimation studies. The report describes field methodologies, analytic techniques and study results, including smolt timing, age and size and adult age, length, sex, adipose fin clip incidence and estimates of escapement and long term coded wire tag loss. The study did not estimate the escapement of precocious males (jacks). The report concludes with a discussion of data limitations and recommendations for future studies.

#### Coho salmon enhancement in British Columbia using improved groundwater-fed side channels

by M.D. Sheno, M. Foy and A.Y. Fedorenko. Vancouver, B.C. : Dept. of Fisheries and Oceans, Salmonid Enhancement Program, 1990. vi, 81 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2071) ISSN 0706-6473  
MICROLOG 90-05314 1 fiche

Improved groundwater-fed side channels, which were originally built for increasing chum salmon production in B.C., show promise as a viable enhancement technique for coho salmon. The study sites were mainly limited to channels in Worth Creek, Upper Paradise, Mamquam and Deadman. The first 3 are coastal channels, while the Deadman Channel is located in the interior of the province. Numbers of coho salmon were estimated primarily from visual counts made weekly or every second week throughout the spawning period. In addition, incidental coho counts made by field workers during the chum salmon carcass recovery at Worth, Upper Paradise and Mamquam channels were used where possible. The study also involved volitional spawner recruitment to a newly developed channel from the parent river system, surplus coho fry outmigrations, and seasonal patterns in distribution, diet and growth of juvenile coho.

# **Coliphage and bacteriophage as indicators of groundwater quality in Canada**

by B.J. Dutka...et al. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 7 p. (NWRI contribution ; 89-149)  
MICROLOG 90-02441 1 fiche

With increasing worldwide industrialization and urbanization over the past 30 years, and with the concomitant higher demand for chemicals and water supplies, both developed and developing nations face increasing ecological problems from the release of domestic and industrial wastes to the environment. As the technology for the testing of coliphages and bacteriophages has advanced to the stage where it can be easily performed, it was decided to use this technology to evaluate the virus-free nature of representative ground water supplies in the province of Ontario. Twenty-two water samples were collected from raw ground waters and treated ground water, drinking waters from 3 different urban areas, over 2 months. Twelve samples were taken from distribution lines after treatment. The remaining 10 samples were raw waters taken immediately after they were pumped out of the wells and prior to any disinfection treatment. This report describes the results of the preliminary survey.

# **Coliphages and bacteriophages in Canadian drinking waters**

by G.A. Palmateer...et al. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 8 p. Bibliogr. (NWRI contribution ; 89-148)  
MICROLOG 90-02451 1 fiche

There is evidence that viral contamination of water systems throughout the world is increasing and that bacteriological indicators of water viral quality are completely inadequate in protecting the public. Recent studies in Canada have shown the presence of coliphage and bacteriophage in coliform free, treated drinking water. This paper presents examples of results obtained from water distribution lines of 3 cities whose raw water came from 3 different sources. Eighteen water samples were collected from taps in public buildings in 3 different cities in the province of Ontario over 2 months. For 2 of the cities, the source waters were 2 different lakes in the Canadian Great Lakes system and for the 3d city, the water source was a small river. This report presents the results of the tests.

# **Colloque sur la production cunicole : bilan et perspectives en production cunicole**

Colloque sur la production cunicole (1988 : Saint-Hyacinthe, Québec). Québec : Gouvernement du Québec, Ministère de l'agriculture, des pêcheries et de l'alimentation, Conseil des productions animales du Québec, 1988. 139 p. : ill. *En tête du titre: Cahier de conférences.* ISBN 2-551-12073-X  
MICROLOG 90-02197 2 fiche

Les cuniculteurs qui veulent intensifier le rythme de reproduction de leur élevage afin d'accroître leur productivité se heurtent à un problème sévère, la lapine peut, parfois pendant de très longues périodes particulièrement à l'automne, ne démontrer aucun signe d'oestrus, et par conséquent refuser de façon systématique de s'accoupler. L'injection de benzoate d'oestradiol, une hormone de synthèse, permettrait de provoquer l'apparition d'un oestrus chez la lapine et par conséquent de stimuler sa réceptivité à l'accouplement. Ce document présente les résultats de cette expérimentation qui a été réalisée chez un cuniculteur de St-Marc sur le Richelieu pendant une année complète dans le cadre d'un projet d'introduction de production et de technique nouvelle

### Colorimetric determination of sulfur dioxide in frozen shrimp

by M. Nakamura...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 13 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5355) Originally published in Japanese. ISSN 0704-3716  
MICROLOG 90-01487 1 fiche

The volume of frozen shrimp imported by Japan from Southeast Asia and South America has increased sharply in recent years. Since shrimp rapidly turns black after catching as a result of the action of oxygen, sulfites are widely used in numerous countries such as the U.S., Canada and South America to prevent blackening and therefore to prevent a drop in commercial value. This study compares the micro-diffusion-standard method of detecting residual sulfurous acid to the micro-diffusion-official method, then reports on results obtained using the simpler, direct colorimetric method.

### Combination of biological water treatment and ozonization in a closed sea-water recycling system

by H. Rosenthal and G. Krüner. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 128 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5164) Originally published in German, by Fachinformationszentrum at Karlsruhe. ISSN 0704-3716  
MICROLOG 90-00001 2 fiche

The development of intensive warm water fish culture in temperate latitudes is based on a positive assessment of the possible use of waste heat from different industrial processes. To become largely independent of the water quality of waste-heat suppliers and of the site and to minimize the discharge of organically contaminated water into receiving waters, it is necessary to use suitable recycling systems with the appropriate mechanical, biological and chemical treatment methods. This project focused on evening out the fluctuations in water quality throughout the daily cycle; optimizing essential system components, like fish tanks, biological filters, ozonization and denitrification; and applying the knowledge obtained up to now through planned study of, and advising of, commercial operations. Most of the studies were carried out in the recycling installations of the new building of the Zentrale of the Biologische Anstalt Helgoland, with further studies conducted in practical operations.

### Comments on the sensitivity of salmonids to reduced levels of dissolved oxygen and to pulp mill pollution in Neroutsos Inlet, British Columbia

by I.K. Birtwell. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, West Vancouver Laboratory, 1989. vii, 27 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1695) ISSN 0706-6457  
MICROLOG 90-00147 1 fiche

The capacity of the 20-km long Neroutsos Inlet to assimilate effluent from the Port Alice pulp mill has been exceeded for many years, producing a sub-optimal environment for many aquatic organisms. Severely depressed dissolved oxygen levels persisted in summer and early autumn 1985 during the initial stages of adult salmon migrations. These deteriorated water quality conditions were considered to hinder or block the first-run fish from entering their natal streams at the head of the inlet. This report reviews some current information on the effects of hypoxic conditions on salmonids and focusses upon the conditions necessary to ensure their successful migrations and the well-being of aquatic organisms in the Inlet. Emphasis is placed upon dissolved oxygen levels which permit fish to function

normally in contrast to levels which may be tolerated for brief periods.

### Commercial cod farming operations Newfoundland, 1988

by E.M. Lee. St. John's : Dept. of Fisheries and Oceans, Newfoundland Region, Fisheries and Habitat Management, Fisheries Development Division, 1988. vii, 52 p. : ill. Bibliogr. (Canadian industry report of fisheries and aquatic sciences ; no. 201) ISSN 0704-3694  
MICROLOG 90-06733 1 fiche

The farming of Atlantic cod was undertaken by Sea Forest Plantation Ltd. during the 1988/89 season at 4 locations in Newfoundland. Three locations were in the North Peninsula area (Griquet, St. Lunaire, and Crouse) and the fourth was located at Bay Bulls. Live fish were collected from cod traps, transferred to holding pens (June-September), fed capelin to satiation for 1-5 months, and harvested when market conditions and prices were favourable (October-January). Data was collected from all phases of the operation including collection, transport, feeding, and harvesting. Biological parameters examined consisted of growth (from tagging studies and farm records), mortalities, parasites, disease, stress, water temperatures, food conversion ratios, and condition factors. General observations and recommendations dealing with farm husbandry and logistical problems are also presented.

### A Comminution study for reduction of grinding energy cost for granulated copper slag : final report

by M. Kaya and R.E. McIvor. Montreal Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1989. ii, 64 p. : ill. Bibliogr. CANMET

contract: 89259-01-SQ  
MICROLOG 90-02539 1 fiche

Investigation of the potential for reducing the total energy required to grind Kidd Creek Mines granulated copper slag to approximately 3000 Blaine fineness for use in cemented backfill. The effect of high pressure roll crushing prior to ball milling was considered as the primary alternative to ball mill grinding alone. Closed versus open circuit ball milling was also considered. Samples of granulated copper slag were sent to KHD in Cologne, Germany, where they underwent roll crushing at 60 and 80 bar pressures. The original 'as received' and roll crushed products were also tested for their ball milling grindability characteristics in their Zeisel grindability tests. Bond ball mill work index tests were also conducted at McGill University, Montreal.

**Commission de la santé et de la sécurité du travail du Québec. Direction de l'indemnisation des victimes d'actes criminels : Rapport annuel 1988**

Montréal : la Direction, 1989. 38 p.  
CSI 67137.003. ISSN 0837-600X ISBN 2-550-19729-1  
MICROLOG 90-01400 1 fiche

Le 1er décembre 1971, l'Assemblée nationale du Québec sanctionnait la Loi sur l'indemnisation des victimes d'actes criminels. Entrée en vigueur le 1er mars 1972, cette loi faisait du Québec la huitième province à se donner une telle loi. En adoptant cette loi, l'Assemblée nationale responsabilisait l'Etat face au problème social posé par l'accroissement de la criminalité et du nombre des victimes de violence qui ne peuvent obtenir réparation des dommages qu'elles subissent, leur agresseur étant insolvable ou introuvable. Elle assure ainsi à toute personne blessée au Québec par suite d'un acte criminel des avantages prévus à la loi. Si la victime décède, ses personnes à charge peuvent devenir bénéficiaires. Ce document présente le rapport annuel de la Commission de la santé et de la sécurité du travail concernant l'application de la Loi sur

l'indemnisation des victimes d'actes criminels et de la Loi visant à favoriser le civisme.

Fredericton : la Commission, 1988. 10, 10 p. : ill.  
Bilingue. CSI 46102 001.  
MICROLOG 90-05617 1 fiche

La Commission est chargée de deux grands domaines. D'une part, elle définit la ligne de conduite de la province en ce qui concerne les loteries et représente les intérêts de cette dernière en la matière, surtout en ce qui a trait aux loteries exploitées par l'Etat. D'autre part, elle est chargée de la réglementation de tous les jeux de hasard privés, comme les bingos et les tombolas. Ce document présente le onzième rapport annuel de la Commission des loteries du Nouveau-Brunswick, pour l'exercice 1986-1987.

Bilingue. CSI 22360 001. ISBN 0-662-56886-9  
MICROLOG 90-01064 1 fiche

Le Réseau de rivières du patrimoine canadien (RRPC) est un programme conjoint du gouvernement du Canada et, jusqu'à maintenant,

de huit provinces et des deux territoires. Les objectifs du RRPC sont de faire connaître, à l'échelle du pays, les rivières importantes du Canada et de veiller à ce qu'elles soient, à longue échéance, gérées de façon à conserver leurs valeurs naturelles, historiques et récréatives, pour le plaisir des générations actuelles et futures de Canadiens. Le document aborde la naissance du programme, le Réseau de rivières du patrimoine canadien, les rivières du Réseau, les rivières mises en candidature, les rivières désignées ainsi que leurs situations, et finalement, les défis des années 1990.

DPA Group Inc. Vancouver, B.C. : The Corporation ; Winnipeg : Canada-Manitoba Subsidiary Agreement on Communications and Cultural Enterprises, 1988. 164 p. CSI/32133.200.  
MICROLOG 90-06258 2 fiche

This study is one of 4 evaluating the Canada-Manitoba Subsidiary Agreement on Communication and Cultural Enterprises, signed on June 11, 1984 and expiring on March 31, 1989. The study concentrates on the economic impacts on the communications and information technology sector, covered by Component 1 of the Agreement. The study developed an industry profile, identified major industry problems; assessed the effects of the Agreement on the industry; determined if the program will solve the industry problems identified; and suggested any changes to the program if required. Information was obtained through personal interviews with project beneficiaries for 18 of the 21 projects receiving funds, with 11 firms which did not receive funding, with 5 program managers and with representatives of 3 industry associations; a review of project files, Steering Committee minutes and progress reports; a review of documentary sources of industry data; and a focus group meeting with 4 senior representatives from industry to discuss qualitative issues and the focus required of any future programs.

0The report lists the institutions whose graduates were surveyed, and summarizes the general findings of the survey regarding all respondents. It also provides employment and unemployment rates for each program in order to facilitate comparison to unemployment rates which are reported monthly by Statistics Canada, and contains a user's guide with information on the outcomes of respondents for each program. Finally, it outlines the major occupational groups of the Canadian Classification and Dictionary of Occupations, outlines the standard industrial classification industry divisions also used for coding purposes in the survey, presents a copy of the questionnaire used to survey 1988 community college graduates, and discusses the calculation and use of confidence intervals.

### Community development policy, 1987-90 capital plan

Vancouver, B.C. : Vancouver Planning Dept., 1986. 66 p. : maps.  
MICROLOG 90-03101 1 fiche

This document is made up of two reports prepared for use in the city's planning process. Part 1 provides information on population, dwellings, employment, existing zoning capacity, and areas in which city initiated change is anticipated. Part 2 focuses on adapting elements of the City's strategy for managing change to the task of setting priorities among and within service areas. It stresses the need to ensure that projects in the Capital Plan act in concert with the strategy.

### Community wastewater and solid waste practices on Saskatchewan Indian Reserves : an environmental evaluation

by J.T. Harrison, D.T. Waite and T. Bonish. Ottawa : Environmental Protection Service, Western and Northern Region, 1989. ii, 21 p. Bibliogr. (Report, CPEP) WNR 88/89-7)  
MICROLOG 90-06369 1 fiche

This report presents the environmental evaluations from 90 community wastewater facilities on 76 reserves. Solid waste practices on 74 reserves are also evaluated and reported. Sewage systems most applicable for Indian Reserves are discussed to guide Indian and Northern Affairs and Bands in their future selection of sewage systems, and recommendations are provided to improve community wastewater and solid waste practices.

### Community-based resource management in Canada : an inventory of research and projects

Fay G. Cohen and Arthur J. Hanson, editors ; prepared by the Unesco Canada/MAB Working Group on the Human Ecology of Coastal Areas. Ottawa : Canada/MAB, Canadian Commission for Unesco, 1989. 190, 11 p. : maps. Bibliogr. (Report ; 21)  
*Bilingual (La Gestion communautaire des ressources...)*. ISSN 0317-5693  
MICROLOG 90-00362 3 fiche (Available on fiche only)

The issue of human-environment interactions is a central concern of the UNESCO Man and the Biosphere (MAB) program, established in 1971 as a worldwide program of international scientific cooperation. In 1983 the UNESCO/Canada MAB committee established a working group on the human ecology of coastal areas to explore the human dimension of resource use and to gain a better understanding of how local communities and resource users can influence resource management activities. This report compiles information about community-based resource management research projects for Nova Scotia, Coastal Quebec, James Bay, Great Lakes/Ontario, Coastal British Columbia, and Denendeh (Western Arctic). Each section gives an overview of key resource issues, a descriptive inventory of studies and projects, a bibliography, and a list of scholars, institutes, organizations and periodicals. The descriptive inventory is arranged by category (regional development planning, resource/environmental enhancement and conservation, resource allocation, conflict resolution, local-level resource use and management).

### Commuter Rail Coast Advice System, phase I and II

by G.W. English...et al. Toronto : Ministry of Transportation, Transportation Technology and Energy Branch, 1990. v, 48 p. : ill. *Contents. Phase I : Report on the testing of a train driver advice system for fuel conservation ; P.J. Pudney, B.R. Benjamin, G.W. English -- phase II : Reassessment of the economics of a coast advice system for GO Transit ; G.W. English, T.W. Moynihan, H. Boumeester*  
MICROLOG 90-04819 1 fiche

A fuel conservation system, consisting of software and hardware developed by the South Australian Institute of Technology for use on commuter rail trains, was tested on a 4-car GO Transit commuter train. The device advises the engine driver to apply power, coast, or brake in order to operate the train in a fuel-efficient manner while maintaining the prescribed schedule. The test was conducted on a train operating in revenue service on the Lakeshore line, which is 60 km in length.

### The Comparative toxicity of crude and refined oils to *Daphnia magna* and *Artemia*

by M.M. MacLean and K.G. Doe. Ottawa : Environment Canada, Environmental Protection Directorate, River Road Environmental Technology Centre, 1989. v, 66 p. Bibliogr. (Report, EE-111)  
MICROLOG 90-05731 1 fiche

Acute toxicity tests were performed on the water soluble fractions (WSFs) of 22 oils, 8 pure hydrocarbons and 2 reference toxicants using *Daphnia magna* in freshwater and *Artemia* in seawater. The oils tested were frequently or potentially transported in Canada. Test concentrations were confirmed by fluorescence spectroscopy. Exposure responses range from a 48-hour EC50 of 1.3% of the WSF, to those for which the oils were neither lethal nor immobilized the animals at 100% concentration. Toxicity results are summarized by ranking the oils from most to least toxic.

### Comparison and validation of two shallow water spectral wave models

by D.O. Hodgins, C.T. Niwinski and D.T. Resio. Ottawa : Environmental Studies Research Funds, 1989. xvii, 143 p. : ill., maps. Bibliogr. (Environmental Studies Research Funds report ; no. 103) ISBN 0-921652-06-2  
MICROLOG 90-01182 2 fiche

Design wave criteria are needed in offshore areas that feature water depths sufficiently shallow to modify wave conditions from deep water, including Sable Island Bank, the Beaufort Sea and parts of Queen Charlotte Strait in B.C. This study compared the performance of a first-generation model (SPECREF) developed and tested by Seaconsult Marine Research Ltd., and a second-generation model (WAVAD) developed by Offshore and Coastal Technologies Inc. to determine their suitability for application in Canadian waters. New directional wave data were collected to the south of Sable Island in 22 m and 12 m of water, concurrently with non-directional deep water measurements. The directional data was processed to yield estimates of significant wave height, peak period, peak direction, the energy

spectrum, and the wave direction and exponent as functions of frequency. Data was collected over 36 days from December 1984-January 1985 for 4 winter storms with winds and waves from the south and southwest. Models were used to hindcast the storms, and 2 idealized tests for wind-sea and swell incident were also compared.

#### Comparison of Goretex laminated and Dermoflex coated fabrics

by P.A. Dolhan. Ottawa : Defence Research Establishment Ottawa, 1989. vii, 16 p.  
Bibliogr. (Technical note ; no. 90-1)  
MICROLOG 90-03247 1 fiche

A new prototype Arctic clothing system was proposed for the Canadian forces which must protect the soldier in a variety of weather and work conditions and be breathable. Two fabrics, a polyester/cotton fabric laminated with Goretex, and a nylon fabric coated with Dermoflex, were proposed. Samples of each fabric were subjected to various physical tests, both before and after laundering 20 times, at room temperature and at -40C to determine the durability of the fabrics. Prototype garments made of the nylon fabric were laundered to determine the durability and effects of laundering on the construction. Donning and doffing of the prototype system was performed at 0 and at -40C and timed.

#### Comparison of heat and hydrostatic pressure shocks to induce triploidy in steelhead trout *Oncorhynchus mykiss*

by C. Guoxiong, I.I. Solar and E.M. Donaldson. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, West Vancouver Laboratory, 1989. iv, 11 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1718)  
ISSN 0706-6457  
MICROLOG 90-03428 1 fiche

Triploid female salmonids are known to be sterile and thus may offer certain advantages for aquaculture. This study was conducted to compare various temperature and pressure shocks for the induction of triploidy in steelhead trout, an anadromous form of *Oncorhynchus mykiss*. Thermal or hydrostatic pressure shocks were administered 25 min post-fertilization to groups of steelhead trout eggs. Thermal shocks ranged from 26C-36C, lasting from 1.25-20.0 min. Pressure shocks ranged from 5.5 to 8.3 x 10-4 kPa, lasting from 2-6 min. Triploid induction was evaluated by measurement of the major axis of erythrocyte nuclei.

#### Comparison of Meyer and Morton evaporation techniques from open water surfaces

by G.Z. Feng, G.S. Strong and W. Nicholaichuk. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. viii, 88 p. : ill. Bibliogr. (NHRI contribution ; no. 89010) ISSN 0838-1992  
MICROLOG 90-02456 2 fiche

Accurate estimates of evaporation from lakes, reservoirs and other open water bodies is important for practical applications and scientific studies in hydrology, water resources development and management, and many related fields on the semiarid Canadian prairies. This report presents results from the first of a series of studies comparing various techniques used to estimate open-water evaporation. The report presents the results of tests comparing the consistency of the Meyer and Morton techniques for estimating both pan-size and lake-size open water evaporation using climatological data from 11 stations on the Canadian Prairies and 9 stations in Shaanxi, China. The two

methods were evaluated using evaporation pan data from the above stations as control data, and interpolated values of evaporation obtained from the mean annual lake evaporation map provided by Fisheries and Environment Canada (1978).

#### A Comparison of precociousness in three graded size classes of hatchery-reared rainbow trout *Salmo gairdneri*

by K. Tsumura and J.M.B. Hume. Victoria : Ministry of Environment and Parks, 1986. i, 10 p. Bibliogr. (Fisheries technical circular ; no. 75) ISSN 0229-1150 ISBN 0-7726-7079-X  
MICROLOG 90-06968 1 fiche

Rainbow trout, as in most other salmon species, produce males which mature early and spawn as two year olds. Rapid growth rates in the first year are regulated by both environmental and genetic factors, and affect sexual maturation rates. With the onset of sexual maturity, growth rate is reduced and the fish becomes unattractive to a sport fishery. This study was conducted to determine the feasibility of grading out faster growing juvenile rainbow trout in a hatchery population to reduce the number of precocious males in the lake stocking program in B.C.

#### Comparison of the behavior of hardwood packing tested under controlled conditions with in situ observations

by W.D. Gallant and D. Payne. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1989. vi, 20 p. : ill. Bibliogr. (Report ; CRL 89-98(TR))  
MICROLOG 90-03365 1 fiche

The Cape Breton Development Corp. and the Cape Breton Coal Research Laboratory have been examining the behaviour of gateroads behind advancing longwall faces. Hardwood packing is an integral part of the gateroad support. To enable a better understanding of the behaviour of the gateroad, a series of 9 full scale tests were performed on typical pack configurations used in the Sydney coalfield. The testing was uniaxial compressive with loading normal to the packs. The mine roof simulator of the Pittsburgh Research Centre, USBM undertook the testing. Results produced are to be used in back analysis of field data, hardwood pack design and as a reference for pack design using alternative materials.

### Competent scour velocity of cohesive soils

by J.W. Kamphuis. Toronto : Ministry of Transportation, Research and Development Branch, 1988. iii, 67 p. : ill. Bibliogr.  
MICROLOG 90-02322 1 fiche

Little information is available for calculating the scour resistance of cohesive soils. While the erodibility of granular soils such as sand and gravel has been studied extensively, the competent velocity of cohesive soils is approximated from very descriptive soil classifications such as soft, firm, stiff, etc. This study relates scour resistance of cohesive soils to quantifiable soil parameters such as soil strength, plasticity, liquid limit, type of clay, percent clay, and silt. Although the initial scope of the problem was to determine the fluid shear stress which causes initiation of scour and to translate these results into competent velocity, the scope was later extended to investigate scour depth and the time element of erosion.

### Competing in the new global economy, volume II : industrial policy studies

Ontario. Premier's Council. Toronto : The Council, 1988. 195 p. CSI 56238.202.  
MICROLOG 90-00305 3 fiche

This volume summarizes current Ontario and federal industrial policies, comparing them to the most successful policies identified abroad. It reviews domestic policies for high-growth and emerging industries and compares them to what is best practice abroad, and assesses Canadian approaches to aiding entrepreneurs, contrasting these efforts with what has happened elsewhere. It also discusses the inadequacy of Canadian science and technology policies in light of the aggressive and successful mobilizations underway abroad. Finally it presents a comparison of Ontario and Canadian training strategies and the approaches of other countries.

### A Competition process driven growth model for red pine

by S. Magnussen and D.G. Brand. Chalk River, Ont. : Canadian Forestry Service, Petawawa National Forestry Institute, 1989. v, 38 p. : ill. Bibliogr. (Information report ; PI-X-89) ISSN 0706-1854 ISBN 0-662-17013-X  
MICROLOG 90-00224 1 fiche

Description of a simulation model, predicting individual tree growth and mortality using data from a red pine spacing trial. Central elements of the model are changes in relative growth rates as related to changes in tree size, the size of the individual tree relative to the median population size, and the overall stand density. The model parameters are

biologically interpretable as measures of the process of competition. Data from 6 spacings were used to develop the model whereas a different data set from 8 spacings served to validate the model. Inclusion of random but correlated error components provided the basis for stochastic simulations. Based on individual stem volume and stand area at age 10 as input, the model was used to predict trends in tree volume distributions until age 35. A detailed graphical representation of model output (summary statistics of stem volume distributions) is presented and compared with observed data.

### Compilation of submissions received prior to and during final public hearings held to discuss the Northumberland Strait Crossing Project

Ottawa Environmental Assessment Panel, 1990 3 v  
MICROLOG 90-05929 10 fiche

Three volumes of submissions to the Environmental Assessment Review panel reviewing the Northumberland Strait crossing project (bridge or tunnel from P.E.I. to N.B.). Submissions were received from individuals, MLAs, organizations of fishermen, and others concerned with the effects of a fixed link between the two provinces. The main issues covered were the environmental effects, the effects on the employees working on the ferries, compensation to fishermen for losses incurred during and after construction of the project, and the economic impacts on both provinces.

### Computational experiments with exchange procedures for the multiple traveling salesman problem with time windows

by J.-Y. Potvin and J.-M. Rousseau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 15 p. : ill. Bibliogr. (Publication ; no. 695)

MICROLOG 90-06643 1 fiche

Routing and scheduling problems are a very important part of any distribution system and those with time windows must be addressed with the additional complexity of allowable delivery times or time windows at each customer. This paper is mainly concerned with problems where the capacity constraint is replaced by a scheduling horizon. The paper introduces general considerations about iterative route improvement procedures; explains why classical K-opt exchange procedures are not well adapted to problems with time windows and explains how to modify the 2-opt procedure in order to get the so-called 2-opt procedure; briefly describes the OR-opt and OR-opt-1 exchange procedures; suggests a hybrid OR-opt and 2-opt approach, and reports computational results on a set of randomly generated problems with tight and large windows.

### Computer analysis of the factors influencing groundwater flow and mass transport in a system disturbed by strip mining

by F.W. Schwartz and A.S. Crowe ; under contract to Alberta Research Council ; for

the Plains Coal Reclamation Research Program. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1988. xxvii, 78 p. : ill. Bibliogr. (Report : RRTAC 88-9)  
MICROLOG 90-02885 2 fiche

Study demonstrating how a groundwater flow model can be used to study a variety of mining-related problems. At the regional scale, where the area of the mine is relatively small in relation to the size of the flow domain, the model illustrates the role of various hydrogeological parameters that influence the magnitude, timing and extent of water level changes during and following mining. At the mine-scale, where the mine becomes a significant component of the total setting, the objective is to look at the spoil resaturation process with emphasis on the controls exerted by hydraulic conductivity and recharge rates. The smallest scale comprises the individual hills that are formed in spoil during reclamation. The sensitivity analysis carried out at this scale shows how hydraulic conductivity of the spoil, recharge rates and the presence of drains together with hill morphology control the steady state configuration of the water table.

#### Computer programs for calculating in situ phytoplankton photosynthesis

by E.J. Fee. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1990. v, 27 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1740)  
*This is the 26th technical report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6457  
MICROLOG 90-06735 1 fiche

This report describes computer programs used to estimate in situ phytoplankton photosynthesis and mean PAR in the water columns of lakes and oceans. The versions described incorporate estimations of daily and annual photosynthesis rates; cloudless solar PAR; separate estimates of photosynthesis in the mixed layer and below the thermocline; daily mean PAR in the mixed layer and below the thermocline; and the total mass of carbon fixed in the waterbody. The report describes FITSOLAR, PSPARMS, YPHOTO, YTOTAL, DPHOTO, and DTOTAL. The programs are written in Turbo Pascal and run on IBM compatible personal computers controlled by the DOS operating system. The theory of the programs is presented in detail along with instructions for use. Example data sets and resulting output are shown for each of the programs.

### Confection d'itinéraires pour le transport adapté

par Y. Dumas. Montréal : Université de Montréal, Centre de recherche sur les transports, 1989. xx, 179 p. : ill. Bibliogr. (Publication ; no. 671)

MICROLOG 90-03009 3 fiche

Cette thèse présente un ensemble d'algorithmes permettant de confectionner les itinéraires et l'horaire de véhicules en vue du transport de personnes handicapées. Le problème à résoudre est celui de satisfaire, aux moindres coûts, un ensemble de requêtes de déplacement dont chacune d'elle exige l'embarquement à un lieu spécifique et le débarquement à un autre lieu spécifique. Le scénario d'opération suppose, les requêtes connues à l'avance; un service porte à porte, des fenêtres de temps pour les embarquements et les débarquements afin d'assurer un niveau de service acceptable; des requêtes pouvant consommer des ressources différentes (exigeant ainsi des véhicules des capacités multidimensionnelles) et finalement des véhicules de caractéristiques différentes.

### Conférence nationale 1988 sur les arts populaires : les actes du colloque

Conférence nationale 1988 sur les arts populaires (1988 : Winnipeg, Man.). Ottawa : Conférence canadienne des arts : Multiculturalisme et citoyenneté Canada, 1988. i, 203 p. : ill. *L'édition anglaise (1988 National Folk...) sur la même fiche*. ISBN 0-662-57228-9

MICROLOG 90-07019 5 fiche

C'est à Winnipeg, en juillet 1987, que le Secrétaire d'Etat et ministre chargé du Multiculturalisme, l'honorable David Crombie, a annoncé la tenue d'une conférence nationale sur les arts populaires organisée par la Conférence canadienne des arts (CCA). Le mandat de cette conférence était le suivant: examiner les réalisations du milieu des arts populaires au Canada; explorer les questions qui s'y posent actuellement; discuter des orientations futures; et, cerner les occasions pour le gouvernement fédéral et ses organismes nationaux d'en favoriser le développement. Ce document présente le résumé et les points saillants de cette conférence.

### Conifer susceptibility to glyphosate in Nova Scotia

Truro, N.S. Dept. of Lands and Forests, 1989. 6 p. : ill. Bibliogr. (Forest research report ; no. 10)

MICROLOG 90-02219 1 fiche

Vision is currently registered in Canada for both site preparation and conifer release. Ideally, herbicides used to release planted seedlings or natural regeneration from competing weed species should not impair the growth of crop trees. However, conifer seedlings can be susceptible to herbicide damage depending on when the herbicide is applied and the rate of application. This report summarizes the result of experimental trials established during 1985 to determine the susceptibility of black spruce, red pine, red spruce, and balsam fir to injury by Vision. ### Connaissance de l'écriture et droit de savoir : atelier

Connaissance de l'écriture et droit de savoir (1989 : Hamilton, Ont.). Hamilton, Ont. : Centre canadien d'hygiène et de sécurité au travail, 1989. 32 p. ISBN 0-660-92682-2 MICROLOG 90-02186 1 fiche

Les stratégies en matière d'hygiène et de sécurité au travail se fondent de plus en plus sur le droit de savoir. Mais qu'arrive-t-il si l'analphabétisme ou d'autres difficultés linguistiques empêchent un travailleur d'assimiler l'information sur les dangers reliés au travail? C'est sur cette question et sur d'autres sujets connexes que se penche ce document.

### Conseil consultatif de la recherche forestière du Canada : Rapport annuel 1988

Ottawa : Forêts Canada, 1989. 9, 8 p. Bilingue. CSI 22189.002. ISSN 0844-9007 ISBN 0-662-56869-9 MICROLOG 90-02134 1 fiche

Le Conseil consultatif de la recherche forestière du Canada (CCRFC) a été créé en 1983 pour conseiller Forêts Canada au niveau national, sur les priorités et les politiques concernant la recherche forestière. En 1987, son rôle a été élargi pour inclure la rédaction annuelle d'un aperçu national des priorités et des sujets de préoccupation concernant la recherche à l'intention du Conseil canadien des ministres des Forêts (CCMF). Ce rapport porte sur l'année civile 1988. Durant cette année, le Conseil a tenu trois réunions et a fourni des commentaires et des conseils au sous-ministre de Forêts Canada au sujet de plusieurs questions relées à la recherche. Ces commentaires sont intégrés dans les recommandations de ce rapport. CA FO SC

### Conseil consultatif des relations civiques et multiculturelles de l'Ontario : Rapport annuel 1988-89

Toronto : le Conseil, 1989. 10, 10 p.  
Bilingue. CSI 56107.001. ISSN 0710-8990  
MICROLOG 90-03476 1 fiche

Le multiculturalisme n'est pas un simple reflet de la réalité démographique, mais plutôt un principe directeur intervenant dans la définition de la qualité de la vie et de la société canadienne. Le concept du multiculturalisme et sa mise en œuvre doivent se développer et s'adapter parallèlement au Canada dans le contexte d'un monde en perpétuel changement. Ce rapport souligne les initiatives du Conseil axées sur la question du multiculturalisme en Ontario et le développement des affaires civiques au Canada.

90-01313/1. CSI 22215.001F. ISSN 0706-7941  
MICROLOG 90-01312 2 fiche

Au Canada, les artisans de la politique économique font aujourd'hui face à plusieurs types de décisions. Ils doivent en effet s'attaquer d'urgence à des problèmes comme le déficit du gouvernement fédéral, mais aussi à une foule d'autres questions qui influent sur le bien-être des générations futures. Cet exposé porte principalement sur les points suivants: le patrimoine canadien; le Canada et l'économie mondiale, le rééquilibrage de la situation financière, la situation des générations actuelles; et, les besoins des générations futures.

**Conseil national de commercialisation  
des produits agricoles (Canada) :  
Rapport annuel 1988-89**

Ottawa : le Conseil, 1989. 46, 44 p. *Bilingue.*  
CSI 22254.001  
MICROLOG 90-00308 1 fiche

Le Conseil national de commercialisation des produits agricoles a été créé en 1972 aux termes de la Loi sur les offices de commercialisation des produits de ferme, son mandat consiste à superviser les offices chargés d'appliquer les plans nationaux et régionaux de commercialisation. La Loi autorise les producteurs agricoles à élaborer des plans nationaux ou régionaux de commercialisation. Le rapport se penche particulièrement sur les activités de l'Office canadien de commercialisation des oeufs, du dindon, du poulet et des oeufs d'incubation de poulet à chair. Finalement, il présente les propositions visant la création de nouveaux offices canadiens de commercialisation.

Le Conseil national de recherches aide les entreprises canadiennes à accroître leur productivité, à mettre au point de nouveaux produits et à résoudre des problèmes de nature technique. Le rapport porte particulièrement sur les sciences; la technologie, l'information; les programmes internes; le Conseil, les distinctions; et la revue financière. CA PS SC ST

### Conseil ontarien des affaires collégiales : Rapport annuel 1987-88 : en transition

Toronto : le Conseil, 1988. 30 p.  
CSI 56114 001F.  
MICROLOG 90-03342 1 fiche

Ce rapport souligne quelques-unes des nouvelles formules du Conseil. Il insiste plus fortement sur la coopération non seulement avec les parties responsables du système mais aussi avec d'autres groupes tout aussi importants comme les universités et les groupes qui les représentent, y compris le Conseil ontarien des affaires universitaires. Il examine également l'élaboration d'un nouveau protocole d'entente entre le ministre et le Conseil des affaires collégiales; la recherche de nouvelles méthodes de collaboration; la négociation collective; le développement de la capacité de recherche de politiques, les autres questions et activités, les visites des collèges, les réunions du Conseil, et, les conclusions. ### Conservation and Protection Sustainable Development : progress and plans

produced for the Conservation and Protection Sustainable Development Steering Committee.  
Ottawa : Canadian Wildlife Service, Sustainable Development Branch, 1989. i, 23 p. *French ed. (Conservation et Protection réalisations...)* on the same fiche

MICROLOG 90-06289 1 fiche

This report focuses on the progress made by the Branch in 1988-89 in adopting a sustainable development approach in its programs and activities, and on the actions that the Branch is taking in 1989-90 in implementing such an approach at the operational level. The report first gives background information on the concept of sustainable development, then puts this into the federal departmental context. The Branch's role, its progress, and its plans are listed according to 6 identified directions, covering commitment, expansion of the science/knowledge base, optimizing economic benefits, support of partners, strategies, and communication and education.

### La Conservation des sols agricoles : politique fédérale -- Rev.

par S. Dakers. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 15 p. Bibliogr. (Bulletin d'actualité : 87-8F) *L'éd. anglaise (Agricultural soil conservation. J.)* ISBN 0-660-92914-7  
MICROLOG 90-05634 1 fiche

La dégradation des sols suscite un intérêt croissant chez un grand nombre de Canadiens. Selon des estimations d'Agriculture Canada, il en coûte 1,3 milliard de dollars par an aux agriculteurs et il pourrait bien leur en coûter plus de 2 milliards par année d'ici la fin du siècle. Les principaux agents de dégradation sont l'érosion par le vent et l'eau, la salinité, l'acidité, le compactage et la perte de matières organiques. Ce document se penche sur la question et donne les points saillants en ce qui a trait à la dégradation des sols.

### Conservation et protection réalisation et projets en matière de développement durable

préparé pour le Comité directeur du développement durable de Conservation et protection. Ottawa : Service canadien de la faune, Direction du développement durable, 1989. i, 25 p. *L'éd. anglaise (Conservation and Protection Sustainable...)* sur la même fiche.  
MICROLOG 90-06289 1 fiche

Ce rapport porte sur les réalisations de Conservation et protection (C et P) dans l'adoption de l'approche du développement durable pour ses programmes et ses activités ainsi que sur les mesures qu'elle entreprend pour inculquer cette approche au niveau opérationnel. Un bref historique du développement durable est d'abord donné pour situer dans son contexte l'adhésion fédérale aux objectifs de l'approche. Les efforts de C et P en matière de développement durable sont ensuite présentés dans le contexte de la position du Ministère, le rôle de C et P dans le développement durable est analysé et un aperçu de l'orientation stratégique du MDE est donné. Les réalisations et les projets de C et P en ce qui concerne l'orientation stratégique du MDE sont ensuite énumérés en fonction des six volets de rapports annuels de C et P et de ses plans opérationnels et plans de travail à long terme.

### Conservation strategies, sustainable development and climate change

by E.W. Manning, B. Rizzo and E. Wiken. Ottawa : Environment Canada, Sustainable Development, 1989. 8, iii p. : ill. Bibliogr.  
MICROLOG 90-06316 1 fiche

Sustainable development implies development which respects the constraints of the environment while taking full advantage of environmental opportunities. This paper

discusses a way of looking at sustainable development so that such major alterations in the system as climate change can be seen in the light of their impact on the environment and economy. This permits analysis of how conservation and sustainable development strategies relate to promoting long-term system sustainability in the face of human impact on the environment. A broad conceptual model of environment/economy relationships is used to show the relationships, with the environment representing the supply side of a supply/demand relationship. A discussion of both the static and dynamic states of the model illustrates the human/biosphere interactions and identifies potential points for active intervention.

#### Conserving Our Future : a draft recycling strategy for the 90's

Winnipeg : Manitoba Environment, 1990. 72 p.  
MICROLOG 90-04990 1 fiche

In June 1989, the Manitoba Recycling Action Committee was established to advise on how the province should meet the goal of a 50% reduction in solid waste generated by 2000. This draft action plan has been released to gain comment by members of the public and other stakeholders. The draft plan presents information on the waste reduction goal and targets; the principles underlying the waste minimization strategy; the policy framework for waste minimization; the need for education and information; market and system development; residual management; and options for discussion. A series of recommendations are also included. A draft list of Manitoba recyclers is included.

#### La Consommation d'énergie des véhicules routiers lourds : mesure directe sur route des paramètres et étude de leurs interrelations

par D.A. Ljubic, J. Nader et Y. Provencher. Montréal : Transports Canada, Groupe des politiques et de la coordination, Centre de développement des transports, 1989. 1ix, 302 p. : ill., cartes géogr. Bibliogr.  
MICROLOG 90-06784 4 fiche

Le but principal de ce projet est d'étudier les relations chauffeur-machine-environnement-route directement en marche en se servant d'une remorque et d'un camion expérimentaux. Les variables les plus significatives ont été enregistrées automatiquement et simultanément sur route, permettant soit des études de différences globales de consommation énergétique, soit des mesures instantanées des diverses variables. Les buts secondaires sont d'étudier les techniques de conduite à partir de l'examen de 35 chauffeurs sur la même route et avec le même ensemble routier,

de trouver les relations entre la consommation énergétique, les virages, les pentes et les surfaces des routes, et finalement d'étudier l'influence de certaines composantes du train roulant de la remorque expérimentales sur la consommation énergétique.

#### Construction and sea trials of a Contrawl containerization system prototype, part I

Bond Architects and Engineers Ltd. St John's : Dept. of Fisheries and Oceans, Newfoundland Region, Fisheries and Habitat Management, Fisheries Development Division, 1988. 2 v. (Canadian industry report of fisheries and aquatic sciences ; no. 195A) (Canadian industry report of fisheries and aquatic sciences ; no. 195B) Fished with: Contrawl project, part II / Fishery Products International. ISSN 0704-3694  
MICROLOG 90-02240 1 fiche

It has long been recognized that the current Canadian practice of sloring fish on offshore wet fish trawlers in a penboard and stanton system results in a high percentage of less than top quality fish and significant loss of product, largely due to the difficulty of off-loading bulk or pen-stowed fish. In 1985 Contrawl Ltd. constructed a prototype trawler containerization system and demonstrated its operation. At the same time, a computer system was developed which could be used to automate the Contrawl system loading and discharge operations. This report provides details of the further development of the Contrawl system, utilizing a significant modification to the in-hold mechanical system but otherwise using the original Contrawl concept. The report covers the utilization and effectiveness of the mechanical systems during the 5 months of sea trials.

### Construction details of a large forage plot harvester for cleanup and harvest of test plots

by R. Drapeau and U. Dallaire. Ottawa : Agriculture Canada, Research Branch, 1984. iv, 14 p. : ill. (Technical bulletin ; 1984-3E) French ed. (*Détails de construction d'une...*) on the same fiche. ISBN 0-662-13032-4  
MICROLOG 90-05438 1 fiche

To conduct forage experiments, whether they involve cultivar evaluation or management studies, test plots have to be planted and tended for several years. Replication of seedings over 2 or 3 consecutive years increases the number of plots that must be cut and the area that must be restored to an identical condition after removal of the samples used to determine yields or other agronomic characteristics. Cleanup of the test area after sampling takes a relatively long time with small forage plot harvesters, but large machines are very inconvenient to use for this work. For these reasons, it was decided to construct a large forage plot harvester that was compact, easy to operate, and labour efficient. There are no plans for the forage plot harvester, but this bulletin provides a reasonably detailed description of the main components and their operation.

### Containers for the inshore fishery : Denmark's first fishing vessel fitted for container cargo

by K. Fischer. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 10 p. (Canadian translation of fisheries and aquatic sciences ; no. 5234) Originally published in Danish. ISSN 0704-3716  
MICROLOG 90-02675 1 fiche

From 1960-82, the number of full-time fishermen in the inshore fishery decreased by 36%, due to an increase in algae in coastal waters. This increase in algae makes coastal net almost impossible during the summer months, impacting heavily upon small harbours and docks. This paper describes the construction of a fishing vessel which could carry insulated containers to improve the handling of the fish catch in inshore areas. The vessel also changed its fishing method from net fishing to trawling. The paper describes the construction of the vessel, the cleaning and rinsing facilities, the cooling of the containers, the quality of the cooled fish, and the handling during loading and unloading.

### Contaminant hydrogeology of toxic organic chemicals at a disposal site, Gloucester, Ont., 2 : remedial investigation

by R.E. Jackson...et al. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 130 p. : ill.

Bibliogr. (NWRI contribution ; 89-154)  
MICROLOG 90-02453 2 fiche

Hydrogeological research from 1986-89 has shown that a large plume of organic chemicals has continued to migrate through an outwash aquifer following disposal at the special waste compound (SWC) at the Gloucester landfill, near Ottawa, Ontario. The leading edge of the plume, characterized by high concentrations of chloride and aliphatic ethers, has moved off site. Most of the halogenated hydrocarbons have not been transported so far and remain directly below the SWC in the outwash aquifer and the overlying aquitard. In this zone there is considerable evidence of dehalogenation reaction, which are probably microbially catalyzed. Field and laboratory experiments were undertaken to determine the mobility of the aliphatic ethers and some halogenated hydrocarbons in the outwash aquifer. The remedial alternatives considered for the site are reviewed and preliminary remedial measures taken on behalf of the site owner, Transport Canada, are described.

#### Contaminants in the prey of the peregrine falcon in Canada

by A. Baril, et al. Ottawa : Canadian Wildlife Service, 1989. vii, 89 p. Bibliogr. (Technical report series ; no. 62) ISSN 0831-6481 ISBN 0-662-16844-5  
MICROLOG 90-06690 2 fiche

This report discusses contamination of the avian prey of the peregrine falcon in Canada and its significance for the recovery of the population. The contaminants of concern are the organochlorine compounds DDE, dieldrin, oxychlorane, heptachlor epoxide, alpha-HCH, mirex, hexachlorobenzene and PCBs, and mercury. The data reviewed were obtained mainly from the National Registry of Toxic Chemical Residues of the Canadian Wildlife Service and were averaged by region (11 across the country) and by time (1975-79 and 1980-85). More recent data were made available for prey collected in B.C., Alberta, N.B., and N.S.

#### Continental natural gas market : Canadian export capacity in the 90s

by L.A. Coad and D.H. Maerz. Calgary, Alta. : Canadian Energy Research Institute, 1989. xv, 163 p. : ill. Bibliogr. (Study ; 34) ISBN 0-920522-60-2  
MICROLOG 90-01034 2 fiche (Available on fiche only)

Report on the level and timing of pipeline capacity additions that will best serve long-term requirements for natural gas trade between Canada and the U.S. A fundamental determinant in the analysis is the resource base believed to exist within the various supply regions in North America. The findings are divided into those affecting markets in California, the U.S. Midwest, and the U.S. Northeast, and the impacts of alternative resource base assumptions.

#### Continental shelf wave propagation on the Labrador Shelf

by S. Narayanan and I. Webster. St. John's : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1989. v, 22 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1699) ISSN 0706-6457  
MICROLOG 90-04322 1 fiche

A barotropic shelf wave model was developed to analyze the low frequency response of a continental shelf to external forces such as wind stress and forces at the boundaries of the domain resulting from energy propagating into the region. This report investigates the sensitivity of the model to conditions at the open boundaries and to the friction

parametrization, and outlines a method of decomposing the response into dominant shelf wave modes. The model is then applied to the Labrador Shelf with wind forcing and forcing at the coastal boundary representing the Hudson Strait pumping.

#### Continuous analyses of gases, dust and flame during and after blasting in Canadian sulphide ore deposits : research report

by J.-P. Sandon. Pointe Claire, Que. : Noranda Research Centre, 1989. iv, 237 p. ill. Bibliogr. CANMET contract: 79140-01-SQ  
MICROLOG 90-02548 3 fiche

Results of a project to collect data regarding dust and flame emissions generated by development blasts and to measure SO<sub>2</sub> emissions produced by secondary ignitions. Dust and flame emissions were characterized by measuring these parameters along with blast vibration traces in both waste and sulphide rock over a period of 2 weeks. An SO<sub>2</sub> sensor was designed and built to measure SO<sub>2</sub> emissions generated by development and production emissions. The sensors were evaluated by the University of British Columbia at Westmin mine.

#### Continuous records of DO contents by cruising in the coastal culture farms, I : relation between DO content and fish density in cages

by S. Kadowaki, T. Kasado and T. Nakazono. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 11 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5189) Originally published in Japanese, in Japan ISSN 0704-3716  
MICROLOG 90-00072 1 fiche

Since the degree of auto-pollution accompanying fish culture has been rising in recent years, more active and rapid control of the fish culture environment is needed. This paper examines the oxygen consumption within the clusters of fish cages in the coastal fish culture farms in the sea area of the marine experimental station in Nagashima, at the northern tip of the Kagoshima Prefecture. A small boat, with recording machines in the bottom, cruised 2.5 m away from fish cages upstream and downstream. The DO variation was recorded as the boat cruised from offshore into the fish cages.

#### The Contribution of science and technology in the mining processing and utilization of minerals in assuring an adequate resource base for Canada

compiled by D.W. White and W.A. Gow. Ottawa : Canada Centre for Mineral and Energy Technology, Minerals Research Program, 1975. iv, 74 p. (Report ; MRP75-22)  
MICROLOG 90-01330 1 fiche

The evaluation of Canada's mineral resource base involves the estimation of not only the size, quality and distribution of mineral deposits, but also of the proportion of these deposits that are economically recoverable now and in the future. This publication identifies major technological problems in mining, the processing of ores, concentrates and metals, and the utilization of mineral-based materials. The various technological gaps in the total system are summarized to illustrate the impact on mineral policy development of science and technology deficiencies.

#### A Contribution to the systematics of the genus Svetloviova *Oligochaeta*, *Lubificidae* from Lake Baikal

by L.N. Snimshchikova. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986.

14 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no 5242) Originally published in Russian, by the Academy of Sciences of the USSR, at Moscow, USSR ISSN 0704-3716 MICROLOG 90-02713 1 fiche

Description of a new species of the endemic genus *Svetlovina* from the Northern Baikal, along with information on the distribution of 2 other species of this genus in the same area. Cases are considered of the displacement of the genital system by several segments, forwards or backwards, in the 'lower' Tubificidae. In connection with this it is proposed that the diagnosis of the genus *Rhyacodrilus* Bretscher, 1901, be defined more precisely with respect to the arrangement of the organs of the reproductive system. A diagnosis of the genus *Svetlovina* Cekanovskaja, 1975, and a key to the species of this genus are presented

### Control of hardwood competition by injection of glyphosate or girdling

Truro, N.S. : Dept. of Lands and Forests, 1989. 7 p. : ill. Bibliogr. (Forest research report ; no. 15) MICROLOG 90-02235 1 fiche

Residual trees left on cutovers following harvesting (usually hardwoods) suppress and damage younger trees, create hazards for low-

flying aircraft applying pesticides, act as a seed source, and interfere with future harvesting. This study was established in 1984 at Alpena, Annapolis County to determine the ability of Vision to control vegetative reproduction of hardwoods, both before and after harvesting, when injected into the parent tree prior to cutting and to develop alternative methods of killing unwanted residual hardwood trees. Residual trees were either girdled or injected with the herbicide Vision (active ingredient glyphosate) using the hack and squirt method of application, then harvested 1-2 years later.

### Control of raspberry and grass with liquid hexazinone in Nova Scotia

Truro, N.S. : Dept. of Lands and Forests, 1989. 7 p. : ill. Bibliogr. (Forest research report ; no. 9) MICROLOG 90-02220 1 fiche

Velpar L (active ingredient: Hexazinone 240 gr/l) is a herbicide currently registered in Canada for site preparation by broadcast ground application and conifer release with undiluted spot treatments. This herbicide provides both pre- and post-emergent control of various weed species. It can be absorbed through foliage but since translocation is primarily upward through the xylem, root absorption is more effective. In the spring of 1984, 2 trials were established to determine the efficacy of 3 different rates of Velpar L in controlling raspberry and grass under Nova Scotia conditions. One trial was located at Delaney Settlement, Colchester County on a site dominated by raspberry; the other at Mount Thom, Pictou County on a site dominated by grass.

### Controlling competing vegetation with lower than recommended rates of glyphosate

Truro, N.S. : Dept. of Lands and Forests, 1989. 7 p. : ill. Bibliogr. (Forest research report ; no. 8) MICROLOG 90-02238 1 fiche

Glyphosate (given the trade name Vision by Monsanto Co. Ltd.) is a herbicide that will provide control of a variety of broadleaf species. Currently, Vision is registered in Canada for site preparation and conifer release by ground and aerial application. Previous trials carried out in Nova Scotia indicated that various target species could be controlled at lower than recommended rates of Vision. To determine the minimum rate of Vision (as well as other herbicides) required to adequately control various species of competition, a series of aerial and ground experiments were established over the past 10 years at various locations in Nova Scotia. This report summarizes the interim results of one such experiment established in the fall of 1984.

**Conventional arms control and disarmament in Europe : Canadian objectives**

by D. Hamlin. Ottawa : Canadian Institute for International Peace and Security, 1990. 52 p. Bibliogr. (Working paper ; no. 20) ISBN 0-662-17498-4 MICROLOG 90-04225 1 fiche

This paper sets out the issue of conventional force reductions in Europe as seen by a Canadian diplomat with long involvement in arms control. In a careful and balanced fashion, it outlines the key factors governing the West's policies, and indicates how they evolved, especially during the Mutual and Balanced Force Reductions negotiations. The paper focuses on the problems of surprise attack and geostrategic disparities between the two alliances, and then sets out Western thinking on such questions as verification and the long-term future of security in Europe. Canada's particular interests in this field are mentioned, and the paper concludes with an outline of the objectives that this country ought to pursue in the new, Conventional Armed Forces in Europe negotiations.

### Coordinating healthy public policy : an analytic literature review and bibliography

by A.P. Pederson...et al. Ottawa : Health and Welfare Canada, Health Services and Promotion Branch, 1988. vi, 71 p. Bibliogr. (Health Services and Promotion Branch working paper ; HSPB 88-1) ISBN 0-662-17415-1. MICROLOG 90-01927 1 fiche

Provides an overview of the conceptual domain of healthy public policy, and addresses the processes by which healthy public policy can be achieved. It reviews the process of implementing healthy public policy and discussed the environmental context in which healthy public policy is formulated. It also focuses on mechanisms of coordination. It provides a general outline of issues important to the coordination process and reviews theoretical material on inter-organizational conflict. Finally it examines the research implications of the issues discussed.

### Les Coordonnateurs à l'énergie dans les municipalités : des ressources humaines rentables et souhaitables

par G. Forques et G. Latour. Québec : Gouvernement du Québec, Bureau des économies d'énergie, 1987. iv, 72 p. Bibliogr. ISBN 2-550-18171-9. MICROLOG 90-04351 1 fiche

Les municipalités du Québec dépensent plus de 240 millions de dollars par année pour l'énergie utilisée par les véhicules et les édifices qui leur appartiennent en propre.

Elles pourraient réduire cette consommation et réaliser des économies annuelles pouvant atteindre 10 \$ par habitant. Ce document porte principalement sur les thèmes suivants: la problématique, la solution au problème; les objectifs du rapport; le contexte organisationnel des municipalités; la coordination des activités reliées à l'efficacité énergétique; la coordination et la rentabilité des économies d'énergie; et, l'évaluation de la rentabilité d'un coordonnateur à Saint-Léonard.

### Copper-mate plumbing machine : pre-production development

by W. Romanuk. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1989. vi, 55 p. ISBN 0-88654-256-1. MICROLOG 90-02185 1 fiche

Results of a project to complete the development of a machine for use in the plumbing industry which could cut, ream, and clean copper pipe and fittings, as well as cut plastic and aluminium pipe. To be effective, the plumbing machine would have to accomplish these tasks more cheaply than traditional methods through labour savings realized by productivity improvements. A second prototype was designed and constructed based on design criteria taken from the first prototype, and recommendations and comments from a recognized industrial designer and a senior engineer from the Canadian Standards Association are given. Further improvements were incorporated following testing on a construction project, and the machine was submitted to CSA for approval. The potential market was also analysed by examining data on the plumbing industry in Canada. Finally, production plans were developed.

### CORD : a software package for creating circular orientation diagrams

by D. Nesbitt and J. Schnute. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. v, 19 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1706) ISSN 0706-6457. MICROLOG 90-01929 1 fiche

This report documents a microcomputer software package that produces circular orientation diagrams for a series of animal orientation experiments. The software (CORD, for Circular ORientation Diagram) allows for the possibility that animals may orient bimodally, with a second direction opposite to the first. CORD reads data from an ordinary text file, produces diagrams for arbitrary subsets of the

data, and produces output both on the screen and the printer, with support provided for common dot matrix and laser printers.

### Cornwall District fisheries management plan

Toronto : Ministry of Natural Resources, 1989. iii, 104 p. : map. Bibliogr. *Fold. map not filmed.* ISBN 0-7729-5580-8 MICROLOG 90-01358 2 fiche

This management plan outlines the long-term direction of fisheries management efforts in the Cornwall District from 1987-2000 and provides a way to measure the accomplishments of the district fisheries management program by both the managers and the public. The document briefly describes the planning framework followed and provides an overview of the fisheries resources (sport, commercial, baitfish, Akwesasne food fishery, tourism industry) of the Cornwall District, including significant information affecting their management. Fisheries management objectives and targets are stated and strategies and tactics to meet them are identified. An implementation schedule describes in detail how, when and where fisheries management activities in the 5 years between 1987 and 1991 are planned to be carried out.

### Corrosion protection of underground storage tanks : final report

G.I. Russell and Company Ltd. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1990. vi, 279 p. : ill. Bibliogr. CANMET contract: 89180-01-SQ MICROLOG 90-07112 4 fiche

Three identical laboratory model tanks were assembled from a section of 10 inch diameter, uncoated, oxygen concentration cell corroded, steel pipe. The soil bed was chosen to simulate a typical well-aerated topside surface and a wetted bottom with drainage to occur through both the compacted sand on one-half the tank length and granulated crushed stone screenings on the other half of its length. Appropriate reference carbon and zinc electrodes were positioned during backfilling and the potentials of these electrodes were monitored regularly by standard surface electrodes. During phase II of the program, an investigation was carried out on the effect of stray a.c. current up to a very few volts at the soil/metal interface on a cathodically protected coated steel structure. The layout for the series of tests was arranged in a soil-box to simulate the environmental exposure conditions for a typical underground storage tank piping system.

# **Cost effectiveness of mobile-source pollution control systems**

MacLaren Plansearch Inc. Toronto Environment Ontario, Air Resources Branch, 1990. 100 p. : ill. Bibliogr. ISBN 0-7729-6209-X MICROLOG 90-04744 2 fiche

To determine the most effective way to regulate air emissions of all sources in Ontario, the cost and the cost-effectiveness of vehicle emission controls must be evaluated. The study identified the total motor vehicle population of light and heavy duty gasoline and diesel vehicles as well as other miscellaneous mobile pollution sources such as household facilities, farm equipment and other transportation sources to determine their contribution. Automotive and pollution control systems and devices installed on light and heavy duty gasoline and diesel vehicles, and the effects of tampering with the pollution control systems on the vehicle's operation were examined. Possible future pollution control systems and alternative fuel systems; the influence of market penetration on the availability of vehicle models in Canada, manufacturers' and consumers' capital costs of the pollution control systems being used, and any variation in operating costs due to the pollution control system were also added. Finally, the study estimated the cost of vehicle pollution control in Ontario and Canada for the last 5 years. CO EV ON PR SC

# **Cost model for hydraulic generation**

by T. Olivares. Toronto : Ontario Hydro, Research Division, 1990. i, 77 p. : ill. (Report ; no. 89-320-K) MICROLOG 90-06026 1 fiche

It is widely assumed that spending requirements of a hydraulic generating plant depend on its past and current performance and age. In an attempt to establish these relationships, simple correlations were calculated between maintenance cost, operating cost, and the cost of capital modifications on one side and performance and age on the other. Mathematical models were established based on the linear regression technique. The cost data was compiled from information from the U.S. Energy Information Administration and the performance data was provided by the North American Electric Reliability Council. EN ON PR SC

**Countdown acid rain : summary and analysis of the seventh progress reports, July 31, 1989, by Ontario's four major sources of sulphur dioxide**

Toronto : Ministry of the Environment, 1990. 19 p. French ed. (Les Pluies acides...la septième...) : 90-05977/1.  
MICROLOG 90-04332 1 fiche

Ontario's Countdown Acid Rain program was formulated in 1985 and placed an annual SO<sub>2</sub> emissions cap of 885 kilotonnes over the province from 1994. To meet this emissions limit, regulations were passed December 1985, requiring specific reductions in SO<sub>2</sub> emissions at Ontario Hydro fossil fuel power plants, the Inco nickel/copper smelter in Sudbury, the Falconbridge nickel/copper smelter in Sudbury, and the Algoma iron ore sintering plant in Wawa beginning in 1986 and culminating in a cap totalling 665 kilotonnes in 1994. In the case of Ontario Hydro, a limit was also placed on the total of SO<sub>2</sub> plus nitric oxide and interim reductions are required for 1990. Semi-annual progress reports are required of the companies. This report summarizes the contents of the 7th set of the company reports (or the first set in the implementation phase) and the government responses.

MICROLOG 90-02528 2 fiche

L'étude des coûts du SIDA a été réalisée en février 1988, à la demande de madame Denise Laberge-Ferron, sous ministre adjointe à la Direction générale de la prévention et des services communautaires. Elle vise à estimer les coûts engendrés par le SIDA, spécifiquement pour le Québec en 1987 et, afin d'éclairer la prise de décision, en projeter les coûts dans les années futures si aucune autre mesure que celles qui existaient en 1987 n'était mise de l'avant, c'est-à-dire si les modes actuels d'intervention et de prise en charge restaient inchangés dans le futur.

**CPA/ERAC rotary kiln incineration study : a study of rotary kiln incineration of oily sand wastes**

Hardy BBT Limited. Calgary, Alta. : Canadian Petroleum Association, Environmental Research Advisory Council, 1986. iii, 68 p. : ill.  
MICROLOG 90-04400 1 fiche (Available on fiche only)

Assessment of the disposal of oily wastes using rotary kiln incineration. In cooperation with Esso Resources Canada Ltd., a test burn of oily waste using Esso's rotary kiln incinerator and wastes generated from their Cold Lake facility was investigated on October 31, 1986. The report determined the source emissions resulting from the incineration process, provided chemical analysis of composite waste, collected particulate emissions, composite incinerator ash, and ash leachate, and evaluated the environmental acceptability of rotary kiln incineration. The emission surveys were performed for particulates, sulphur dioxide, oxides of nitrogen, hydrogen chloride, chlorine, and hydrocarbons for Alberta Environment compliance. Carbon dioxide, oxygen, carbon monoxide, nitrogen and moisture were monitored in the exhaust gases and velocity and temperature profiles generated. An EPA leachate toxicity test was performed to determine the acceptability of the material for landfill disposal.

**Crack propagation in tough ductile materials : phase II**

by R.D. Venter, A.N. Sinclair and D.

McCammond. Ottawa : Atomic Energy Control Board, 1989. 173 p. : ill. Bibliogr. (Research report ; INFO-0254-2)  
MICROLOG 90-06865 2 fiche

This report presents phase II of an investigation into the J material resistance and stress-strain data published and applicable to the understanding of crack propagation in ductile steels, particularly SA 106 Grade B pipe steel. Data was assembled from PIFRAC, AECB and Ontario Hydro sources and gives an evaluation of the influence of temperature, specimen thickness and specimen orientation to be made for the experimental J-R curves so determined. Comparison of the stress-strain within the Ramberg-Osgood formulation are also considered. The report also addresses the development of the required software to utilize the engineering approach to elasto-plastic analysis to investigate the load carrying capacity of selected cracked pipe geometries which are representative of applied crack propagation studies associated with piping systems in the nuclear industry. Three specific geometries and loading situations were evaluated and results are given as a function of an initial and final crack extension leading to instability

### Création d'un environnement pour le développement de projet en électrotechnique, 1987-88

par J. Rouillard. Ste-Thérèse, Québec  
Collège Lionel-Groulx, 1989. ix, 137 p. : ill. Bibliogr. Recherche subventionnée par la Direction générale de l'enseignement collégial.  
ISBN 2-920900-12-9  
MICROLOG 90-04345 2 fiche

Ce document renferme de l'information technique. Il comprend deux parties distinctes. La première présente la démarche à suivre lors de la réalisation d'un projet. Elle identifie les étapes importantes tout en illustrant certains procédés expérimentés. Pour bien visualiser le concept, on propose un cas concret qui consiste à réaliser un produit pour une compagnie fictive. Le but de cette stratégie est d'appliquer chaque étape du projet à une situation réelle. Dans l'autre section on trouve sous forme d'un manuel d'utilisation, la méthode utilisée pour la fabrication de circuits imprimés avec métallisation des trous. Dans le but de suivre la démarche, on y a inclut un petit lexique permettant de mieux comprendre le sens de certains mots techniques.

**Criteria for identifying freshwater age from scales of chinook salmon *Oncorhynchus tshawytscha* captured in mixed-stock fisheries of British Columbia**

by F.Y.E. Yole. Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1989. viii, 46 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences, no. 1628) ISSN 0706-6457 MICROLOG 90-01672 1 fiche

Description of a new procedure based on scale characters to identify freshwater age of chinook salmon captured in mixed-stock fisheries of B.C. With the exception of recent uses of dorsal fin rays, scales are used almost exclusively to age chinook salmon, although identifying age through such means is particularly difficult due to complex life histories. The investigation was undertaken to develop a standard and reliable procedure to be used by a management-oriented scale laboratory in which large numbers of scales are read. The report describes each of the 16 scale characters observed during the last 10 years, examines the rate of occurrence of the characters on subscale of 280 scales from ocean and stream fish of known age, assesses the ability of 5 scale readers to identify the 16 scale characters, and tests the accuracy of the scale character procedure to correctly identify freshwater age.

**Critical issues in electric power planning in the 1990s, vol. 1**

by K.M. MacRae. Calgary, Alta. : Canadian Energy Research Institute, 1989. xx, 313 p. : ill. Bibliogr. (Study, 33) Executive summary (44 p.) laid in. ISBN 0-920522-59-9 MICROLOG 90-01745 4 fiche (Available on fiche only)

Canada's electric power industry is going through some important changes in its regulatory and business environment, the effects of which will fully appear in the 1990s. This study examines those general factors which will influence its development, focusing on the critical or fundamental electric power planning issues for the next decade, the point at which major decision points occur, and how the industry will respond. The critical issues facing the industry are in the areas of trade, non-

utility generation and demand-side management, with the environment the cornerstone of the drive to increase efficiency. An electricity generation planning model of the electricity sector in Canada and the northern U.S., incorporating various generation technologies including hydro, nuclear, coal and gas was developed which gives a good indication of the comparative costs and benefits of greater electricity trade.

**Crop rotation studies on the Canadian prairies**

by C.A. Campbell...et al. Ottawa : Agriculture Canada, Research Branch, 1990. x, 133 p.

ill. Bibliogr. ISBN 0-660-13422-5 MICROLOG 90-04224 2 fiche

A crop rotation is a planned sequence of crops grown in recurring succession on the same area of land. The producer's choice of crop rotations is influenced by physical factors, economic considerations, and the decision-making and managerial abilities of farm managers. Long-term crop rotation studies require tremendous commitment of resources (money, land, personnel, and equipment) and are often difficult to terminate. This report summarizes the findings of Agriculture Canada's recent rotation studies in the prairies, and makes recommendations so that intelligent decisions regarding the fate of those studies can be made. Only dryland studies are discussed.

**Crown land for agriculture : a review**

Inquiry into Agricultural Development on Crown Land in British Columbia. Kamloops, B.C. : The Inquiry, 1989. ii, 99 p. Bibliogr. Mr. David W. Gillespie, commissioner. MICROLOG 90-03060 2 fiche

Since 1963, the Ministry of Crown Lands has administered a program to provide Crown land to the public for 'extensive agriculture', defined as the use of Crown land for soil bound cultivation, production and harvest of livestock, cereal and forage crops, vegetables or fruit. Individuals receive a lease tenure containing a purchase option and after a specified amount of agricultural development, the land may be purchased by the leaseholder. In June 1989, an inquiry was begun into the program to identify issues associated with existing agricultural development of Crown land, to determine if additional Crown land should be made available for agricultural development, and if so to identify the most effective methods for agricultural Crown land disputes. This report presents the findings of the inquiry, including a history of the program, narrowing access, the question of resource rents, determination of the suitability of Crown land for agriculture, and intensified land management. #### Current meter, CTD and meteorological observations on the northern Grand Banks (47N, 48W) for April-October, 1986

by B. De Young and C.L. Tang. Dartmouth, N.S. : Bedford Institute of Oceanography, 1988. iv, 94 p. : ill. (Canadian data report of hydrography and ocean sciences ; no. 63) ISSN 0711-6721 MICROLOG 90-06588 2 fiche

Report presenting data collected during approximately 174 days from April to October 1986 from 3 current meter and thermistor chain moorings deployed on the northern Grand Banks. In support of this mooring program, cruises were conducted in the area from April 15-28 and October 8-21, using Batfish, CTD and Doppler current profiles. This report presents both cruise and mooring data, as well as meteorological data from a nearby oil rig.

#### Current meter, meteorological, and sea-level observations for Browns Bank, Nova Scotia, April 1983 to May 1985

by R.R. Lively. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. v, 304 p. : ill. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 113) ISSN 0711-6774 MICROLOG 90-05158 4 fiche

Investigation of the structure and dynamics of the Browns Bank gyre, particularly the cross-isobath component of the circulation, while monitoring input to the region from the Scotian Shelf and slope water via Northeast Channel. Turbulent dispersion in the surface layers between Browns Bank and surrounding waters was also investigated. These experiments are extensions of those undertaken at Cape Sable from November 1978-April 1983. This report presents Browns Bank current meter and tide gauge data in tables and graphs for April 1983-May 1985. Auxiliary data on wind velocity and barometric pressure from the meteorological stations at Yarmouth, Shearwater and Sable Island, as well as sea levels for Halifax, Shelburne, Yarmouth and Clark's Harbour are given.

#### Current statistics of the Gulf of St. Lawrence and Estuary

by D.N. Gregory, O.C. Nadeau and D. Lefavre. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. vi, 178 p. : maps. (Canadian technical report of hydrography and ocean sciences ; no. 120) ISSN 0711-6774 MICROLOG 90-02757 2 fiche

Summary of all of the moored current data for the Gulf of St. Lawrence and Estuary available from the Bedford Institute of Oceanography and

the Maurice Lamontagne Institute from 1963-88. The report includes tables of the maximum observed speed, magnitude and direction of the vector mean current, and the magnitude and orientation of the maximum and minimum axes of variability. The variability is reported in both the tidal and sub-tidal (low frequency) ranges. The same information is also presented in a series of maps subdivided into 3 layers. The primary maps separate the St. Lawrence system into the Gulf and Estuary. Secondary maps describe specific regions such as the Gaspé Current, Strait of Belle Isle and Cabot Strait.

#### The Custom milling of industrial minerals in B.C. : a study of commercial feasibility

by B. Ainsworth. Vancouver, B.C. : Ainsworth-Jenkins Holdings Inc., 1989. i, 24 p. : ill. Bibliogr. Funded under: The Canada-British Columbia Mineral Development Agreement. MICROLOG 90-00189 1 fiche

The custom processing of industrial minerals involves simple size reduction, classification, storage and packaging. No beneficiation and therefore virtually no waste disposal is undertaken. Site location is usually at a transportation nexus, where water, rail and highway systems join. This review looks at the potential sources of supply and markets for industrial minerals in the province to identify what might become feed material for such a plant. Three custom processing sites were visited in Britain and Holland to assess the physical requirements and to obtain opinions of operators as to the potential for success in similar operations in a B.C. location, as well as to their level of interest in participating in a start-up operation in B.C. The report outlines the similarities and differences of structure between the European operations and describes the limitations and potential for custom processing in B.C. Recommendations are made as to the types of minerals/products that would be reasonable to consider for processing and the markets that have potential for access.

**Cyprus crustal study project : initial report, hole CY-4**

edited by I.L. Gibson...et al. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. 393 p. : ill., fold. map. Bibliogr. (Paper ; 88-9) ISSN 0668-7650 ISBN 0-660-13279-6  
MICROLOG 90-02361 5 fiche

A 2 km drill hole was planned as part of the Cyprus crustal study project to sample the lower part of the Troodos ophiolite. The hole was spudded in near the base of the sheeted dyke complex to determine the intrusive and compositional relationships within the dyke complex; the nature of the dyke gabbro transition; the age relationships of the spatially associated dykes, gabbros, and plagiogranites, the chemical and mineralogical variation within the plutonic section and hence whether the intrusives are a single magnetic sequence or a number of discrete plutons; and the nature and extent of hydrothermal alteration within the dykes and gabbros. It was anticipated that the drilling results, combined with field studies of the plutonic rocks and sheeted dykes, would provide a 3-dimensional model for the lower part of the ophiolite. This report details studies of the core material and the field relationships.

**Darlington larval fish and egg incubation studies, 1985 to 1988**

by J.S. Griffiths. Toronto : Ontario Hydro, Research Division, 1990. vii, 88 p. : ill. Bibliogr. (Report ; no. 90-19-K)  
MICROLOG 90-06096 1 fiche

Studies to assess the effects of Darlington Nuclear Generating Station on the reproduction of cold-water fish, particularly round whitefish, have been an important component of preoperational aquatic studies from 1984-88. Spring sampling for round whitefish larvae was conducted in the vicinity of the discharge diffuser and the condenser cooling water intake from 1985-88. Sampling with paired 0.5 m tow nets (surface and mid-depth) and the benthic sled was conducted from mid-April to late May. Larval drift nets were operated during 1987 at the intake locations at 5 m and 7 m from April 23-May 22. Assessment of larval fish entrainment is also part of the Darlington aquatic study. During the preoperational phase, larval fish samples were collected twice per week from mid-April to mid-August 1986 in the vicinity of the intake. During 1986 entrainment sampling, alewife larvae were collected from July 22-August 14. During the winter of 1986-87, field incubation studies were conducted with round whitefish eggs at 4 locations. The study will be repeated at 2-unit and 4-unit levels of operation to assess effects of the station on round whitefish hatch times and egg survival.

**A Data acquisition system for residential magnetic field source characterization**

by K.E. Donnelly. Toronto : Ontario Hydro, Research Division, 1989. 46 p. : ill. (Report ; no. 89-173-K)  
MICROLOG 90-03517 1 fiche

Ontario Hydro's electric and magnetic field risk assessment program includes an investigation of the sources of magnetic fields in Ontario residences to establish the factors which determine the level of magnetic field exposure and their prevalence, contribute to the development of improved surrogate measures for epidemiological investigations and suggest methods of reducing high values of field

exposure, if required, by changes in grounding and distribution. This report describes the designing and building of a data acquisition system for a project to characterize the sources of residential magnetic fields. The instrument is portable computer based, and has 3 current monitoring channels, a 3-axis magnetic field probe, and an auxiliary magnetic field coil to monitor fields from inaccessible currents. Data on harmonics and phases are obtained and it is capable of recording unattended for extended periods of time.

**Data analysis of 1986 and 1987**

**Hecate Strait juvenile salmon surveys**

by B.J. Waddell, M.C. Healey and J.F.T. Morris. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. xi, 65 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1719) ISSN 0706-6457  
MICROLOG 90-03426 1 fiche

Analysis of juvenile salmon data collected during surveys in Hecate Strait in the summers of 1986 and 1987 to gather information on the abundance, species composition, size composition, and diet for validation of a migration model. The model predicts juvenile salmon abundance, size, and food resources requirements in Hecate Strait, based on assumptions about smolt production, growth rates, mortality rates, run timing, migration speed, and the migration route, for each species from 6 B.C. coastal regions. If the model is validated, it will assist in evaluating how Hecate Strait is used as a migration corridor and rearing area by juvenile salmon. Juvenile salmon sex ratios, size composition, length-weight relationships, and interspecific correlations of size and catch rate among purse seine sets are all discussed in the report.

**Data on seal distribution in the Greenland Sea depending on the position of the ice edge**

by O.C. Mikhnevich and V.A. Potelov. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 9 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences, no. 5205) Originally published in Russian, in the USSR. ISSN 0704-3716  
MICROLOG 90-02704 1 fiche

Both harp (Greenland) and hooded seals are typical pagophiles, needing a hard substrate in the form of ice for rest, parturition, nursing their young, and moulting. Observations have shown that seals in both their postpartum (hood and harp seals) and moulting (harp seals) periods lie on top of ice of different origin, thickness and density. The open pack ice on the boundary of the East Greenland current and in the stream of the Jan Mayen current are favoured for the nursing of pups. This paper reports on a rookery on Arctic ice directly in the stream of the East Greenland current. Observations were conducted from March 16-18, 1962.

**Data security in office automation : an exploratory study of issues and concerns arising out of the Office Communications Systems (OCS) program**

by J.V.T. Knoppers. Laval, Que. : Dept. of Communications, Canadian Workplace Automation Research Centre, 1987. 46 p. Bibliogr. French ed. (Sécurité des données...) : 90-05466/1. Revised and reissued for the International Electronic Information Forum.  
MICROLOG 90-05470 1 fiche

Report identifying data security issues arising from office automation in the federal government and identifying, in a preliminary fashion, parallel or ensuing issues in the

private sector. The report does not address national security information, nor does it address other security issues relating to the increased use of high technology. The study involved an analysis of existing field trials in application, information content and discussion/interviews with field trial participants. Existing, new and draft legislation, government security and information management policies and related materials pertinent to office automation and data security issues and concerns are reviewed. Since the purpose of the field trials is to assist Canadian suppliers in providing services, a preliminary discussion on the links between data security requirements of the federal government and those of the private sector was undertaken.

**Dauphin Lake : opportunities for restoration**

Winnipeg : Manitoba Natural Resources, 1989. 17 p. : ill., maps. On cover: For Advisory Board consideration.  
MICROLOG 90-02364 1 fiche

The health of the Dauphin Lake Basin is in jeopardy because of unchecked runoff and siltation of the lake and its spawning streams. As a result of these problems, an important fishery is threatened and tourism, fisheries, wildlife and other economic opportunities have suffered declines. This report describes the basin; discusses the key issues of lake regulation, siltation, water quality, and fisheries; gives some suggestions of both present and future actions; and identifies those municipalities and committees concerned.

MICROLOG 90-02366 1 fiche

This report describes major projects undertaken during the last 10 years, including programs on all aspects of the environmental impact of exploring, operating and extracting petroleum reserves from the Western Basin, including the recycling of water used in the in situ heavy oil extraction process, and land treatment disposal of oilfield wastes. Programs dealing with the safe design of offshore oil and gas facilities include wind and wave hindcasting in the Beaufort Sea, icing on offshore structures, understanding ocean storms, and a remote-sensing monitor for spills. Programs in sustainable energy development include the

appointment of a central carbon dioxide coordinator and flux measurement of gases in the atmosphere. Renewable energy programs concentrated on solar radiation data analysis, the development of the R-2000 home, a computer generated analysis of wind flow over a hill, and a Darrieus wind turbine at Cap-Chat. Demonstrations of resource and energy conservation include reuse of sewage sludge and of municipal solid waste, as well as research in the pulp and paper industry to increase internal energy production and decrease the total discharge of pollutants. #### A Decision-support system for pavement management at the network level

by M. Gendreau and L.-P. Duclos. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 17 p. Bibliogr. (Publication ; no. 692) *This paper was presented at the 69th Transportation Research Board Meeting* MICROLOG 90-06642 1 fiche

To improve the planning mechanisms of highway maintenance and rehabilitation, many agencies have resorted to pavement management systems built as simple optimization models. These models are generally inadequate because they are too inflexible. The core of the proposed system is a general Markov decision process structure in which administrative divisions of the highway network (regions, districts) are explicitly taken into account. This basic structure is stated in an equivalent linear programming format which then allows for the addition to the model of various linear constraints. The other fundamental element of the system is a formal descriptive framework which is made up of a network language and a scenario language. This paper describes both languages, the general Markov decision process structure, and the current computer implementation of the system. Planned future developments are also outlined. Le 3 février 1989, le Ministre adressait une lettre au président du Conseil des collèges pour demander un avis sur un projet visant à retirer au cégep de l'Abitibi-Témiscamingue l'autorisation de dispenser le programme de Techniques de la documentation. Cette demande d'avis faisait suite à la volonté exprimée par le cégep de l'Abitibi-Témiscamingue de ne plus offrir ce programme aux élèves de la région. Ce document donne les résultats de cette demande.

**Demographic concerns in belles-lettres : insights from the writings of Gunter Grass and Margaret Atwood**

by K.J. Krótki and G.C. Germain. Edmonton : University of Alberta, Dept. of Sociology, 1990. 12 p. Bibliogr. (Research discussion paper ; no. 61) ISSN 0317-2473  
MICROLOG 90-06443 1 fiche

When a social reality becomes first perceived by a sizeable proportion of that society's population, a question which naturally arises is whether this observation is initially confirmed by the statistics of the scientist and then spread via subsequent popular artistic forms, or whether the fact at hand is introduced by artists through their work and diffused throughout the society to be subsequently supported by the statistician. This paper exposes two novels substantively and a few other referentially to demographic analysis. The question considered is to what extent these two novels, one by Gunter Grass and the other by Margaret Atwood, recognize population decline as a veritable social concern and dire social ill in need of redress. It examines the kind and form of references to this 'social reality,' along with the differences between the male and female vantage points.

### Démographie et productivité

par E. Lapiere-Acamyck, P. Lasserre et P. Ouellette. Montréal : Université de Montréal, 1989. 53 p. : ill. Bibliogr.  
MICROLOG 90-01570 1 fiche

Les relations entre l'évolution démographique et la croissance économique restent encore mal connues et ni les économistes, ni les démographes ne peuvent répondre de façon certaine à la question suivante: la stagnation démographique, voire la décroissance, peut-elle entraîner la stagnation économique? En d'autres termes, peut-on croire que le niveau de vie d'une population peut se maintenir au moment où elle s'engage dans un processus qui réduit ses effectifs? Pour mieux comprendre les relations entre l'économie et l'évolution démographique, il semble opportun de centrer l'attention sur des questions plus limitées et de tenter de les approfondir. C'est ce que ce document présente dans ce projet qui vise à examiner les mécanismes sous-jacents aux variations de la productivité.

### Demography and school enrolment : a case study

by P. Michaud, M. Heller and P. Quirouette.  
Toronto : Ministry of Education, 1988. iv, 114 p. : maps. Bibliogr. French ed. (*La Démographie et les...*) : 90-06412/2. CSI 55108 206. ISBN 0-7729-4528-4  
MICROLOG 90-06411 2 fiche

In the past few years, political, economic, and social conditions in Ontario have changed rapidly, producing, in some regions, unexpected shifts in population, adversely affecting school organization. This study develops a methodology that will enable Ontario school boards to make demographic projections in support of educational planning, especially in regard to language of instruction, denominational character, and the educational needs of various socio-economic groups. It also applies the methodology specifically to the Stormont, Dundas, and Glengarry County Roman Catholic Separate School Board.

### Demonstration, monitoring and evaluation of practical ventilation systems for new Alberta houses

prepared by Howell-Mayhew Engineering, Inc. and Sunton Engineering, Ltd. ; for the Edmonton Home Builders' Association.  
Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1989. viii, 114 p. : ill. Bibliogr. ISBN 0-88654-256-0  
MICROLOG 90-05708 2 fiche

Project to develop and to undertake a field trial of a practical combustion air supply and ventilation systems suitable for use in typical new housing in Alberta, and to identify those that are most promising on the basis of cost-effectiveness, ease of understanding and operation, achievability using available hardware and reliability. Following a review and analysis of various code requirements, 8 potential methods of providing combustion air and ventilation air were developed (an economizer system, a sealed furnace room, a blower-assisted air supply, an induced draft fan, the Alberta Building Standards "Standata" system multiple air intakes and dampers, uncoupled appliances, and a heat recovery ventilator system). The systems were installed and tested in 4 nearly identical split level houses in the Edmonton area and computerized data acquisition systems were installed to collect operating and performance data on 3 of the 4 demonstration systems. The collected data was analyzed, and further special tests were carried out to evaluate resistance to backdrafting.

### A Demonstrative impact analysis of the concrete integrated container

by H.P. Lee. Toronto : Ontario Hydro, Research Division, 1990. i, 65 p. : ill. Bibliogr. (Report ; no. 89-286-K)  
MICROLOG 90-06030 1 fiche

The use of a reinforced concrete integrated container (CIC) for the dry storage, transportation and possible final disposal of irradiated fuel is currently being investigated. One major consideration is the assurance of its structural integrity in the event of an accidental drop of the container during transportation. Such an investigation can be carried out using an analytical approach where the historical response of the container during its impact onto the ground can be recorded and studied. This report demonstrates a bench mark analysis of such a drop and illustrates its response during and after impact. The investigations provided detailed information to support the design of the container; explored the capability of using an analytical approach to investigate the container; and served as a tool to support experimental drop tests such as drop orientation study and parametric study.

### Depth, velocity and substrate measurements of Pacific salmon habitat at three streamflows in Kloiya Creek, B.C., 1984-85

by B.A. Bravender and C.S. Shirvell. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. vii, 67 p. : maps. (Canadian data report of fisheries and aquatic sciences ; no. 758) ISSN 0706-6465  
MICROLOG 90-01117 1 fiche

The availability of juvenile coho and chinook salmon habitat was studied in Kloiya Creek under 3 experimentally controlled streamflows (low, medium, high). Hydrological data, commonly used in fish habitat models, was collected along 20 transects in 5 pools of the study area. The area of streambed characterized by intervals of water depth and velocity at 6/10 depth and 8 cm from the bottom was calculated. Substrate type was classified into 15 categories and the area of each category was calculated. The data for each streamflow is reported.

### La Déréglementation du transport aérien au Canada

par J. Christopher. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 17 p. Bibliogr. (Bulletin d'actualité ; 89-2F) *L'éd. anglaise (Airline deregulation in Canada)* sur la même fiche. ISBN 0-660-92722-5  
MICROLOG 90-01845 1 fiche

Le 10 mai 1984, le ministre des Transports a publié un énoncé de principe qui libéralisait, dans le cadre réglementaire existant, la politique du transport aérien. Ainsi, les transporteurs aériens qui étaient limités jusque-là dans leurs opérations par la politique visant les transporteurs régionaux étaient autorisés à offrir des services n'importe où au Canada. Les restrictions quant aux permis étaient éliminées, le processus d'établissement des prix étaient assoupli et les modalités administratives de la Commission canadienne des transports étaient simplifiées. Ce document examine les étapes de ce processus et décrit certaines des garanties prévues dans la loi afin de tenir compte des réserves exprimées par ceux qui s'opposaient à ce changement.

### Design and development of a blasthole depth measurement test set

W.R. Davis Engineering. Ottawa : The Corporation, 1987. 45 p. : ill. Bibliogr. *CANMET contract: 69068-01-SQ*  
MICROLOG 90-00176 1 fiche

In underground hardrock mining methods such as vertical retreat stoping, it is essential that the depth of each blasthole and the height of the muck pile are known to estimate the volume and weight of blasted muck, to plan the next blast and for drawpoint mucking control. The current method of measuring is to lower a rope or tape down the hole, an accurate but time-consuming technique, leading to the design and development of an electronic measurement device. This report explains the theoretical and practical considerations in acoustically measuring blastholes and muck pile height in a vertical crater retreat mining process. The report explains basic acoustic theory as well as such

factors as frequency, power level requirement, attenuation, and accuracy. The results of field trials and laboratory experiments are given, along with conclusions and recommendations.

**The Design and operation of a pilot plant on uranium biosorption : final report**

by M. Tsezos. Toronto : Biometrics Engineering Inc., 1990. 79 p. : ill. CANMET contract: 89156-01-SQ  
MICROLOG 90-05677 1 fiche

Denison Mines is conducting in situ bioleaching of uranium ore underground, but the volumes of leachate in bioleaching are large and low in uranium concentration. In the past 10 years, a proprietary process for immobilization of microbial biomass was developed at McMaster University. In 1987, a continuous mini pilot plant using 32 g of immobilized *Rhizopus arrhizus* biomass in an upflow column was operated, yielding uranium concentrations corresponding to a 30-fold concentration of the initial uranium present in the Denison Mines bioleach solutions. Following these encouraging results, additional immobilized biomass was produced at McMaster University and it was decided to operate a larger pilot plant to test further this new technology. This report focuses on the operation of this larger pilot plant, covering the materials and methods, the uranium sequestering results, and the behaviour of aluminum, iron, thorium and yttrium. Appendices detail the uranium biosorption and the uranium elution results.

**Design of a bounded wave EMP simulator : intended as second stage simulator for DREO**

by P.A.A. Sevat. Ottawa : Defence Research Establishment Ottawa, 1989. ix, 100 p. : ill. Bibliogr. (Report ; no. 1006)  
MICROLOG 90-00435 2 fiche

Electromagnetic pulse (EMP) simulators are used to simulate the EMP generated by a nuclear weapon and to harden equipment against the effects of EMP. At present, DREO has a 1 m EMP simulator for testing computer terminal size equipment. To develop the R&D capability for testing larger objects such as a helicopter, a much bigger threat level facility is required. This report concerns the design of a bounded wave EMP simulator suitable for testing large size equipment. Different types of simulators are described and their advantages and disadvantages are discussed. Detailed designs are given for 6 m and 10 m parallel plate type wire grid simulators, electromagnetic fields inside and outside the simulators are computed, preliminary specifications for a pulse generator required for the simulator are given, and the electromagnetic fields radiated from the simulator are computed and discussed.

**Design of regular intercity driver routes for the LTL motor-carrier industry**

by T.G. Crainic and J. Roy. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 36 p. : ill. Bibliogr. (Publication ; no. 689)  
MICROLOG 90-06645 1 fiche

The load plan of a less-than-truckload (LTL) motor carrier determines the services it operates and the frequencies it offers. To satisfy the stable part of the demand for transportation, regular driver routes have to be built which must cover the planned services and abide by the laws, regulations and conventions that regulate the drivers' workload, while guaranteeing the timely delivery of goods at the destination terminal. The objective is to minimize costs and to ensure an efficient fleet utilization. This paper examines the problem characteristics and proposes a modelling and algorithmic approach, based on set covering ideas. Results of an actual application are also presented.

**Designing money collection routes through bank branches**

by V. Lambert, G. Laporte and F. Louveaux. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 17 p. Bibliogr. (Publication ; no. 703)  
MICROLOG 90-06636 1 fiche

Most banks must send out vehicles to their branches to collect money left by depositors on a regular basis. This problem is modeled as a vehicle routing problem with constraints and objective terms specific to the particular banking context, such as penalties for lost interest. Two versions of the problem are studied: the deterministic case and the stochastic case in which travel times are random. These two versions are modeled as integer mathematical programs, and solved by means of an heuristic procedure. Problems derived from a real situation (a Belgian bank network) are solved under different scenarios.

**Détermination des niveaux d'immigration pour le Québec en 1990 : antécédents et considérations**

Québec : Communautés culturelles et immigration, 1989. 35 p. : ill. (Consultation sur les niveaux d'immigration) ISSN 0831-0335  
ISBN 2-550-19885-9  
MICROLOG 90-02626 1 fiche

Ce document décrit dans sa première partie l'orientation d'ouverture soutenue et progressive du programme d'immigration depuis 1985. Il rappelle les travaux de la Commission de la culture pour l'exercice de détermination des niveaux d'immigration pour les années 1988 et 1989 et présente la décision du Conseil des ministres qui s'en est suivi. Dans la seconde partie, quelques considérations pour l'exercice de détermination des niveaux pour l'année 1990 sont brièvement énoncées à la lumière d'une mise en situation par rapport à la poursuite des objectifs actuellement poursuivis par le programme d'immigration. Finalement, une dernière section aborde la situation particulière des revendicateurs du statut de réfugié.

**Determination of activity parameters in *Thiobacillus ferrooxidans* strains as criteria for mineral leaching efficiency (UP-M-589) : final report**

by I. Suzuki...et al. Winnipeg : University of Manitoba, Dept. of Microbiology, 1989. 112 p. : ill. Bibliogr. CANMET contract: 69126-01-ST.  
MICROLOG 90-05854 2 fiche

Bacterial leaching of sulfide ores using *Thiobacillus ferrooxidans* is an important process for the extraction of economically valuable metals from ores not amenable to traditional methods, with the advantage of not releasing the oxidized sulfur into the atmosphere. In spite of its great potential, the use of bacterial leaching has been limited, mainly because of the relatively slow rate and low concentration of metals extracted into solution. This report presents the results of tests using a number of strains of *T. ferrooxidans* and *T. thiooxidans* on growth and activity, including the effects of metals (Cu, Zn and other inhibitory metals often released from sulfide ores), to establish criteria essential for the selection of strains best suited for effective leaching.

**Determination of carbon in coal combustion residues**

by A. Iribane. Toronto : University of Toronto, Dept. of Chemical Engineering and Applied Chemistry, 1989. 67 p. : ill. Bibliogr. CANMET contract: 89172-01-SS  
MICROLOG 90-02536 1 fiche

A new method was developed at CANMET for the analysis of carbon in combustion residues. In this method, the sample is first dried and ground to a fine powder, and then digested in a mixture of acids. The insoluble residue is then separated by filtration and its weight determined by difference. The filtrate is kept for the analysis of elements by induction coupled plasma spectrometry. This report contains a detailed description of this method, the tests performed to evaluate the method and clarify the meaning of its results, and a critical review of the methods for determining the different kinds of carbon (total, elementary, inorganic and organic).

**Determination of major and minor elements in fused coal ash samples with energy dispersive X-ray spectrometry using a fundamental parameter approach**

by L. Janke...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1979. 28 p. ill. Bibliogr. (Report ; ERP/ERL 79-38(TR))  
MICROLOG 90-04503 1 fiche

The rapid quantitative determination of the major and minor elements in coal ash is essential to the efficient utilization of coal in industrial processes, such as power generation, industrial heating and the production of metallurgical coke for the steel industry. Present day energy dispersive X-ray fluorescence (XRF) spectrometers are well suited to this approach as they can be used for the simultaneous determination of a large number of analytes. However, before a coal ash may be subjected to analysis by XRF, the ash itself must be prepared by standard procedures for presentation to the spectrometer. Ideally, a method of preparation which is both precise and accurate is required. This report discusses the use of lithium tetraborate flux in the preparation of samples of coal ash. As certified reference standards are not currently available for the analysis of coal ash, it was decided to use synthetic standards for calibration.

#### Determination of the feasibility of directly dating quartz by electron spin resonance : a research report

by A.L. Odom. Ottawa : Atomic Energy Control Board, 1988. 41 p. : ill. Bibliogr. (Research report ; INFO-0345)  
 MICROLOG 90-05697 1 fiche

The ability to directly date faults and fractures is important in trying to establish the stability or instability of an area being considered for the construction of engineered structures such as nuclear power plants, radioactive waste repositories and dams. Quartz is a common fault- and fracture-filling mineral, appearing both in a massive habit or as slender, acicular crystals. If amenable to direct dating, it could contribute substantially to overcoming the problems of assessing the tectonic stability of an area. This investigation determined whether or not quartz of any age might be datable by the use of electron spin resonance (ESR) using natural quartz samples ranging in age from 100 ka to 1.4 Ga

#### Detroit incinerator monitoring program : Windsor air sampling site, 1987-88, Walpole Island air sampling site, 1988

Ottawa : Environment Canada, River Road Environmental Technology Centre, 1989. v. 225 p. : ill. Bibliogr. (Data report ; no. 3)  
 MICROLOG 90-02377 3 fiche

Late in 1986, the Greater Detroit Resource Recovery Authority (GDRRA) announced that a 4,000 ton/day municipal waste incinerator would be constructed in downtown Detroit, 6 km from the Canada-U.S. border, fitted with electrostatic precipitators as pollution control equipment. Concern for the impact of emissions from the incinerator on the air quality in Windsor led to the establishment of 2 monitoring sites, one in downtown Windsor and the other on Walpole Island. This phase of the program is designed to gather background data prior to the startup of the incinerators in the summer of 1989. The program includes ambient air measurements of polychlorinated dibenzo-p-dioxins (PCDD), polychlorinated dibenzofurans (PCDF), polychlorinated biphenyls (PCB), chlorobenzenes (CB), chlorophenols (CP), polycyclic aromatic hydrocarbons (PAH), volatile organic compounds (VOC), inhalable particulate (IP) matter and metals. This report discusses the available monitoring data from the Windsor monitoring site from July 1987-September 1988 and from the Walpole Island site from January-September 1988.

#### Developing herbicide efficacy tables for the southern interior

by C.F. Thompson. S.I. Forest Resource Development Agreement : Victoria : Ministry of Forests, 1989. iii, 9 p. Bibliogr. (FRDA report ; 096) ISSN 0835-0752 ISBN 0-7726-1030-4  
 MICROLOG 90-04750 1 fiche

Species-treatment efficacy tables for forest-use herbicides are available in the U.S. but are not suitable for the Nelson Forest Region because of the different ecological environment and because species of concern are not included in the tables. In the absence of comprehensive controlled herbicide rate and timing trials, this project examined the utility of operational herbicide applications as a starting point for creating efficacy tables for the region. The study assessed the impact of herbicide treatment on target vegetation species in available operational applications, and used these assessments to construct a first run table of chemical treatments against target species showing treatment efficacy. Fourteen blocks were selected which were stratified ecologically, topographically, and according to application rate or method, yielding 27 acres. Within each stratum, 20 plots were located systematically on a randomly originating grid designed to sample the whole stratum. Up to 4 species were selected for assessment, with individuals selected closest to the plot centre.

# **Development and demonstration of new process standards for upgraded biogas energy utilization of municipal anaerobic digestion facilities in Canada : interim report**

Canviro Consultants Ltd. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1988. vi, 90 p. : ill. Bibliogr.  
MICROLOG 90-00385 1 fiche

To date, a comprehensive investigation of the alternative strategies available, or to be developed, for the effective recovery and utilization of biogas produced at municipal anaerobic digestion systems in Canada has not been performed and little information is available identifying or verifying the actual quantities of biogas produced. This project developed these strategies by first assessing the current practices and technologies in use in Canada and then comparing the technical aspects and economics of retrofitting existing systems or providing new systems with technologies to upgrade biogas utilization efficiency. An extensive literature review was conducted to determine the number of municipal anaerobic digestion systems currently operating in Canada. A questionnaire, designed to collect specific system operating data, was forwarded to contact personnel at each plant, with 70% responding. The database information will be used to develop the optimum biogas utilization strategies for municipal wastewater treatment

# **Development indices : a Quebec regional comparison**

by F. Lamontagne and C. Tremblay. Ottawa : Economic Council of Canada, 1989. viii, 72 p. Bibliogr. (Local development paper ; no 14) ISSN 0225-8013  
MICROLOG 90-04061 1 fiche (Available on fiche only)

Recent research on the problem of persistent socio-economic disparities has established the importance of examining disparities within the major regions of Canada. The purpose of this paper is to develop the analytical method and tools needed to study these differences at the level of small regions. In order to do so, it focuses on the administrative regions of the province of Quebec and constructs for them a series of development indices that include both social and economic indicators. The paper groups together the development indices that describe the performance, capacity, vitality, and institutional character of regions. These indices are then standardized and the regions are rated using an approach recently developed for assessing small regions.

# **Development of a habitat assessment and planning tool : a problem reference and project working plan**

by M.A. Eng and R.S. McNay. Victoria

Ministry of Environment and Parks, Wildlife Branch ; Ministry of Forests, 1989. iv, 41 p. Bibliogr. (Wildlife bulletin ; no. B-64) ISSN 0829-9560

MICROLOG 90-03841 1 fiche

Habitat management is a commonly used method to achieve management objectives for wildlife populations. In B.C., however, wildlife managers do not have direct control over the timing and placement of habitat manipulations that result from extensive forestry. While foresters do have control, they often do not have the necessary knowledge. This project was begun because of the long-standing indecision on the fate of old-growth forest deferrals set aside for black-tailed deer and Roosevelt elk. This report describes previous approaches to planning and alternatives to current methods. It covers the institutional framework for habitat assessment and planning, the general structure of the plan, and a specific working plan.

**Development of a procedure for predicting propeller-ice interaction forces**

prepared for the Transportation Development Centre ; by M.W. Chernuka...et al. Halifax : MARTEC Limited, 1989. xxx, 233 p. : ill. Bibliogr.

MICROLOG 90-01749 3 fiche

The propeller of an ice transiting ship must be designed to withstand the dynamic loads imposed by ice and, as well, have an efficient form for open water travel. Thus the compromise in design between strength and form requires that propeller loading be reliably established to assist in more optimum propeller

design. The report addresses the problem of establishing, in a more quantitative manner than before, the detailed loading in a propeller-ice interaction process and the resultant stress levels in the propeller. Numerical modelling of both the propeller and the ice using the finite element method was carried out and a program developed to define the propeller-ice interaction pressure and allow for variations in the loading over the blade surface. The ice model is analyzed to more realistically determine the load.

MICROLOG 90-05709 1 fiche

This project undertook the design, development and testing of an accordion style folding door for closets and utility areas in both single family and multiple occupancy dwellings, manufactured from Alberta-produced polyvinyl chloride (PVC) materials, utilizing plastic extrusion techniques. The work included a literature search to determine the present state of the industry; a patent search to determine the patentability of the product; an investigation into the certification and testing requirements for PVC folding doors; a market analysis to determine the demand and the current industry pricing; consideration of the PVC extrusion process and its effect on design, cost, and performance; development of a working design of the folding door which included the design of extrusion dies for several of the PVC components; construction, testing and fine-tuning of the dies; production and evaluation of prototypes for performance and cost; and certification testing.

**Development of a research plan for full-scale testing, data analysis and modeling of the propulsion train of a class IV icebreaker with nozzled propellers : final report**

by D.N. Bruce Cowper, for Transportation Development Centre, Transport Canada. Calgary, Alta. : Fleet Technology Limited, 1989. x, 34 p. : ill. Bibliogr.

MICROLOG 90-05799 1 fiche

Results of a project to organize and develop, in a joint effort with the U.S. Coast Guard, a research plan for the full-scale instrumentation and analysis of an Arctic Class IV vessel propulsion system having a ducted propeller arrangement. Field observations were conducted from October 16-24, 1988, in the Beaufort Sea, near a drilling site north east of Deadhorse, Alaska, and on a voyage from the drill site to Herschel Island, Yukon. This report describes in detail the field observations and the research plan for the conduct of these tests, including the cost estimate and a project schedule.

**Development of a standard interface concept for securing wheelchairs in accessible vehicles**

by L.A. Garland, S.L. Dorion, H.E. Vietinghoff ; with Heron Ergonomics, Centre for Studies on Aging, SypherMueller International ; prepared for the Transportation Development Centre. Ottawa : TES Ltd., 1989. x, 108 p. : ill. Bibliogr.

MICROLOG 90-01784 2 fiche

The continuing evolution of wheelchair design has resulted in a wide variety of sizes and shapes of wheelchair, thereby creating a problem for accessible transportation systems. No standardized method now exists for securing wheelchairs in accessible vehicles; thus the securement system may not be compatible with the wheelchair being transported, adversely affecting system accessibility. This report describes the development and evaluation of a concept for a standard interface in accessible vehicles. The report details technical feasibility, physical and performance requirements, an ergonomic evaluation and an economic impact evaluation of the standard interface.

**Development of a wheelchair securement system for vans and small buses**

by Laurin A. Garland and Suanne L. Dorion ; for the Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by TES Limited...et al. Ottawa : TES Limited, 1989. x, 149 p. : ill. Bibliogr.

MICROLOG 90-05802 2 fiche

To develop a safe wheelchair securement system for vans and small buses, extensive information was gathered on wheelchairs, specialized vehicles securement technology, standards and human factors. Based on an analysis of this data, evaluation criteria were developed upon which to evaluate available wheelchair securement systems. The results were used in the development of several new conceptual designs, which were then evaluated and a prototype was chosen, fabricated and again evaluated. The prototype, subjected to an in-house and in-service evaluation by operators of specialized transportation services, revealed several operational deficiencies. The prototype was then modified and re-evaluated.

**Development of an Al-Sn-Si powder metallurgy alloy**

by C.F. Dixon and H.M. Skelly. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1975. i, 8 p. Bibliogr. (Report ; MRP/PMRL 75-17(R))

MICROLOG 90-04676 1 fiche

Earlier work showed that Al-Si and Al-Sn alloys can be made by using powder metallurgy to give materials with microstructure and properties unobtainable by present conventional methods of melting and casting. Optimum properties are obtainable in both of the alloys when the microstructure is favourable, i.e., finely dispersed primary silicon and tin particles. This report describes the use of powder metallurgy to obtain a ternary alloy of Al-Sn-Si that would combine the favourable microstructures of the Al-Sn and Al-Si alloys.

**Development of an anti-jackknifing system for tractor semitrailers : feasibility study, phase 1**

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by Suanne L. Dorion, Henry E. Vietinghoff and James G. Pickard. Kanata, Ont. : TES Ltd., 1989. xx, 173 p. : ill. Bibliogr.

MICROLOG 90-07204 3 fiche

Report on a feasibility study of an anti-jackknifing system (AJS) for tractor semitrailers which would control articulation of the vehicle during jackknife and trailer swing, independent of any actions by the driver. The report includes a summary of statistical information on jackknife accidents, a review of the design and performance of existing AJS patents and products and a summary of the experiences of users of jackknife control devices. It also presents the results of computer simulation used to determine the characteristics of jackknife and trailer swing of 4 distinct vehicle configurations and the results of computer analysis of the performance of anti-jackknifing devices for vehicle stabilization and the effects of control parameter variations. Conclusions and recommendations are provided for the technical feasibility of an effective AJS for various tractor semitrailer configurations and trailer load conditions.

#### Development of an automobile simulator for the assessment and training of disabled drivers

prepared for Transportation Development Centre, Policy and Co-ordination Group, Transport Canada; prepared by J. Svoboda...et al. Montreal : Concordia University, Dept. of Mechanical Engineering, 1989. xi, 21 p. : ill.  
MICROLOG 90-04092 1 fiche

Description of the development of a prototype of a relatively low-cost, high-fidelity, microprocessor-based automobile simulator for the assessment and training of disabled and elderly drivers. The system, conceived as a modular one, consists of a cabin module, a computer module, a force-feel module and acoustic module. The cabin module is based on actual car hardware and has all the normal instrumentation and controls. The computer model includes computer hardware, system software and instructor facilities software. The vehicle model software module determines vehicle movements, as well as the engine parameters, in response to the driver control inputs. The fully interactive visual display module, including both hardware and software, generates the car simulator visual cues in response to the vehicle model position outputs. The force-feel and acoustic modules generate realistic control feel forces and acoustic cues in response to the vehicle model outputs.

#### Development of an economic large scale growth medium for *Rhizopus arrhizus*, a uranium adsorbing fungi : final report

submitted by V.I. Lakshmanan, Patrick Tackaberry. Mississauga, Ont. : ORTECH International, 1989. 50 p. : ill. Bibliogr.  
CANMET contract: 89198-01-SQ.  
MICROLOG 90-03969 1 fiche

Fungal biomass is capable of removing uranium from solution and as such has the potential to become incorporated into a processing flow sheet for recovering uranium from dilute mine waters. Producing the biomass for uranium-adsorption has usually depended on a commercially available growth medium, introducing the potential for increased processing costs. With the availability of a wide variety of industrial based food waste, the project investigated the possibility of maximizing the biomass harvest using food waste as the growth medium. This program uses the proven uranium-adsorbing fungus *Rhizopus arrhizus* to develop an economic alternative growth substrate that will support the maximum biomass harvest as well as maintain high uranium-adsorption values.

#### Development of an enforced stop algorithm for train applications, phase 1 : results

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada; by G.W. English; with development support from H. Boumeester and T.W. Moynihan. Kingston, Ont. : Queen's University, Canadian Institute of Guided Ground Transport, 1989. vii, 25 p. : ill. (CIGGT report ; no. 89-3)  
MICROLOG 90-04096 1 fiche

An enforced stop capability is a required component of level-30 advanced train control systems and will provide a major safety advance in railway signalling and control. This project is a first step in the development of a stop algorithm for a related application - a fixed-signal interface being developed by SignalCom Canada. This system will invoke a penalty brake application if a driver does not respond to a stop indication at a signal point in an existing centralized traffic control system. This first phase develops a conservative stop algorithm and its results are compared with the predictions of detailed simulation models for trains of known characteristics.

#### Development of an in-field automatic crack detection system for railroad wheels, phase 1 : final report : automatic wheel defect detection technologies assessment

prepared for the Transportation Development Centre, Policy and Coordination Group, Transport Canada; by J.L. Allard and F.W. Eyre. Montreal : SNC Inc., 1988. xxii, 158 p. : ill. Bibliogr.  
MICROLOG 90-07200 2 fiche

This report covers the first phase of a development program for an assessment of the suitability of acoustic frequency analysis techniques for the automatic detection of defects in railroad wheels in service. The first phase of the program established the basis for future design of a field inspection unit, which would likely be installed at the entrance/exit of a railroad yard to perform wheel inspections on moving trains. A literature review, telephone interviews and field visits to determine previous development work and the state of the art of wheel crack detection were undertaken. Surveys were made of suitable instrumentation and preliminary tests were conducted to assess the applicability of acoustic intensity analysis and to determine signal processing requirements. Finally, a preliminary cost estimate was developed for an inspection system based on a concept design to assess economic viability.

#### Development of CANMETCOAT digger teeth for oil sands bucket wheel reclaimer service

by K.G. Davis and J.-G. Magny. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1989. i, 7 p. : ill. Bibliogr. (Report ; MTL 89-70(TR))  
MICROLOG 90-05991 1 fiche

This project originated 10 years ago at a meeting between representatives of CANMET and the oil-sands industry to consider areas, such as the wear rate on digger teeth, which would benefit from research into coating a material with a layer of wear-resistant material. A process was developed using a vacuum to suck molten metal into the compact, removing any gas evolved and eliminating surface defects and blow-holes. This report describes the development of the CANMETCOAT process for the production of digger teeth with in-situ hardened surfaces. They have been field tested at the Syncrude oil sands plant.

#### Development of impactor size selective dust samplers at the Elliot Lake Laboratory

by G. Knight. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. i, 18 p. : ill. Bibliogr. (Report ; MRL 88-9(R))  
MICROLOG 90-01324 1 fiche

Size selective sampling to simulate the separation of airborne dust in human lungs into two or more fractions is now the usual procedure when assessing airborne dust with any relationship to the potential health hazard. This is followed by gravimetric or other analyses of the dust collected on the filter. In hard rock mines free silica is the component of the dust which is often the most significant potential health hazard. The Elliot Lake Laboratory has developed a sampling and analysis procedure for routine use in hard rock mines termed CAMPEDS. This report describes the development of the CAMPEDS 2 l/min flow rate sampling head, the CAMPEDS improved 4 l/min sampling head; the high flow rate sampling head, and the size distribution analysis run using 10 sampling heads with different cut-offs

#### Development of metal cluster catalysts for conversion of middle distillates fractions in synthetic fuels

by Geoffrey A. Ozin and J.P. Godber...et al. Toronto : University of Toronto, Lash Miller Chemical Laboratories, 1989. xiv, 241 p. : ill.

Bibliogr. CANMET contract: OST85-00183  
MICROLOG 90-05988 3 fiche

Liquid phase (rotary reactor) and condensation phase (rotary and static) metal vapor syntheses were used to produce subnanometre particles of Fe, Ru and Fe/Ru, as well as Ni, Pt and Ni/Pt on SiO<sub>2</sub> and Al<sub>2</sub>O<sub>3</sub>, through the intermediacy of labile bis-tuolene and tris-ethylene metal (0) precursors. These materials demonstrate unusual catalytic functions in the conversion of hydrocarbons and have many remarkable properties, which were examined. Intimate details of the spatial and electronic structures of these materials were determined. The catalytic results for the bimetallic samples are explained by a computer model of the structure of the supported particles.

#### Development of multivariate analysis procedures for Ontario air quality data : final report

by P.K. Hopke. Toronto : Environment Ontario, 1990. iv, 55 p. : ill., maps. Bibliogr.  
MICROLOG 90-05626 1 fiche

The Ontario Ministry of the Environment (MOE) has a large air quality monitoring program in place that produces substantial quantities of high quality data both locally and regionally. The development of improved automatic sampling and multiple species chemical analysis systems allows large multivariate data sets to be obtained which require careful statistical methods to extract the maximum amount of useful information. This report determines if multivariate data analysis methods can extract evidence for long range transport of acidic materials influencing the precipitation chemistry of samples collected by the APIOS network. A set of data analysis procedures to be applied to these data as they are accumulated is established and the ability of target transformation factor analysis for extraction of source information for urban scale aerosol is explored. Procedures are established to incorporate this methodology into the techniques available to MOE for local air quality management of particulate emissions sources.

#### Development of non-destructive testing methods for proving and re-testing low pressure, fibre reinforced plastic highway tankers

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada : by P. Ouellette, S.V. Hoa, and L. Li. Montreal : Concordia University, Faculty of Engineering and Computer Science, Dept. of Mechanical Engineering, 1989. ix, 46 p. : ill. Bibliogr.  
MICROLOG 90-04789 1 fiche

The use of fiberglass reinforced plastic (FRP) in the transportation of corrosive and waste

liquids is appealing to an increasing number of highway tanker operators. Because of the serious consequences of a failure of this type of equipment, appropriate methods of design as well as reliable quality control techniques are required. A method of acoustic emission (AE) testing FRP/BWC tankers was developed by observing AE activity trends upon repeated pressurization of the tankers. Twenty-five tanker tests were conducted; 8 of these were run to bursting pressure. A simple method of measuring AE activity trend was developed, and unambiguous acceptance/rejection criteria was proposed.

#### Developments in building products : opportunities for industrial minerals

by Institute for Research in Construction and

MATEX Consultants Inc. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, Mineral Development and Lands Branch, 1990. iv, 164 p. : ill. Bibliogr. (Industrial mineral background paper ; 13) ISSN 0228-7811 ISBN 0-7729-6581-1 MICROLOG 90-05900 2 fiche

This study assess opportunities for Ontario's industrial minerals producers to increase the use of their minerals in building products. The minerals discussed include stone and mineral aggregates, lime products, gypsum products, hydraulic cements, concrete and cement-based products, clay building products, glass building products, polymer-based building products and filler minerals, and alternatives to asbestos. The report identifies trends and new directions in construction practice and materials technology that are currently in use or at advanced levels of development, and that could substantially encourage increased use of industrial minerals. Issues were discussed with representatives of industry and government familiar with both construction and building materials. Other information was obtained from published sources and visits to building technology centres in Britain and Japan. • CA NR ON PL PR PS

#### Le Développement régional au Canada -- Rév.

par G. Beaumier. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 14 p. Bibliogr. (Bulletin d'actualité ; 88-13F) L'éd. anglaise (Regional development in Canada) sur la même fiche. ISBN 0-660-92717-9 MICROLOG 90-01840 1 fiche

Ce bulletin donne un aperçu de la politique de développement régional mise en oeuvre par le gouvernement fédéral depuis la Seconde Guerre mondiale, pendant cette période, les gouvernements fédéral et provinciaux ont consacré beaucoup de ressources à la réduction des inégalités régionales au Canada. CA CO PA

**Le Développement socio-économique régional : un choix à raffermir en éducation**

avis au Ministre de l'éducation et Ministre de l'enseignement supérieur et de la science. Québec : Conseil supérieur de l'éducation, 1989. 58 p. ISBN 2-550-14972-6  
MICROLOG 90-01999 1 fiche

Cet avis comprend trois chapitres. Le premier dégage de l'analyse de l'évolution de notre société une trajectoire qui se dessine assez nettement : celle du développement régional endogène, c'est-à-dire du développement du milieu par le milieu. La deuxième décrit et analyse la contribution actuelle du système et des établissements d'éducation au développement régional. La troisième propose des orientations et trace des voies d'action, dans le cadre d'une stratégie d'ensemble et d'une mise en oeuvre adaptée.

**Diagnostic characteristics of subfamilies of the Tubificidae family *Oligochaeta***

by N.P. Finogenova. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 18 p. Bibliogr. (Canadian translation of *Fisheries and aquatic sciences* ; no. 5245) Originally published in Russian, at Moscow, USSR. ISSN 0704-3716  
MICROLOG 90-02715 1 fiche

Key to the subfamilies of the Tubificidae compiled on the basis of the presence or absence of large coelomocytes in the body cavity, the mode of attachment, form and number of prostatic glands on each male gonoduct, the location of the spermathecal pores, and the nature of the male sexual cells. A new subfamily, *Nootkadriliinae*, was established for 2 marine genera. The composition, at the genus level, is given for all 7 subfamilies. The description of *Svetlovia maculata* Cekanovskaja was expanded following a review of the holotype of this species.

**Diarrhetic shellfish poison examination using monoclonal antibodies**

by T. Uda and T. Yasumoto. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 18 p. : ill. Bibliogr. (Canadian translation of *Fisheries and aquatic sciences* ; no. 5456) Originally published in Japanese ISSN 0704-3716  
MICROLOG 90-00609 1 fiche

Shell poisons are divided into paralytic shell poison and diarrhetic shell poison, both of which constitute a grave problem to health and the shellfish culture industry. The paper describes the manufacture of monoclonal antibodies for the diarrhetic shellfish poison and the development of an assay method which enables the detection of traces of shellfish poison in a short time.

**Diatomaceous earth occurrences in Nova Scotia**

by A.R. Anderson. Halifax : Dept. of Mines and Energy, 1990. v. 132 p. : maps. Bibliogr. (Economic geology series ; 90-1)  
MICROLOG 90-05911 2 fiche

Diatomaceous earth or diatomite is a siliceous sedimentary material formed by the accumulation of the skeletal remains of microscopic plants commonly known as diatoms. This report describes the physical properties and uses of diatomite, their origin and mode of occurrence, the history of production in Nova Scotia, current mining and processing, and the economics of production. Seventy-five occurrences were investigated and 35 were selected for sampling, based on potential for

future development, as determined by the extent of the reserves and the quality of the material reported to exist. Deposits that were worked in the past were also sampled to determine whether mineable reserves remain and provide a record of the quality of the material used in past markets.

**Differences in sauger growth regimes among three major areas of Lake Winnipeg**

by W. Lysack and L. Ebbeling. Winnipeg : Manitoba Natural Resources, Fisheries Branch, 1980. iv, 23 p. : ill. Bibliogr. (Manuscript report ; no. 80-15)  
MICROLOG 90-05593 1 fiche

Saugers and walleyes are known to hybridize in nature and may also be artificially propagated. This study was initiated in response to continuing reports of the occurrence of large saugers in the commercial catches of Berens River fishermen. The study determined if major differences exist between the sizes of sauger present in various areas of Lake Winnipeg; if sauger-walleye hybrids exist in Lake Winnipeg and if these hybrids are the large saugers that are reported by fishermen; and related size differences of saugers from various areas to growth of saugers and to fishery effects.

**A Digital simulation of moisture movement through a layered column of sand and AFBC solid waste : preliminary report, 1987**

by A. Vandenberg. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 43 p. Bibliogr. (NHRI contribution ; no. 88015) ISSN 0838-1992  
MICROLOG 90-05377 1 fiche

A large facility for indoor aquifer testing is being constructed to study moisture and contaminant movement in a ground-water system under controlled conditions. The model described in this report was constructed to simulate the vertical movement of soil moisture through an unsaturated bed of atmospheric fluidized bed combustion (AFBC) solid waste, underlain and overlain by sandy soil. The model is based on a finite difference solution to Richard's equation and features an iterative routine for the calculation of flow between adjacent elements, when the elements are soil-physically dissimilar, and a self-adjusting time step. The model and two examples of a simulation are discussed. Details on the use of the program, a FORTRAN source code listing, and an example of a data set are given also.

**Dimensional growth, difference-based equations and growth prediction**

by F.L. Raymond. Toronto : Ministry of Natural Resources, 1989. 19 p. : ill. Bibliogr. (Forest research report ; no. 123) ISSN 0361-3924  
ISBN 0-7729-5748-7  
MICROLOG 90-00137 1 fiche

Growth curves measured by the tree ring increment measurement (TRIM) system often reflect years or longer periods with rates that fluctuate about the general path. Preliminary examination of such curves suggested that a study of growth rates might prove more productive than one confined to growth increments. Eventually it became clear that the basic growth-rate equation, which was an integral solution of a 'differential' equation, or any elaboration of it, was unsuitable for situations in which the growth rate does not remain constant. This problem was resolved by replacing the differential-based equations with difference-based equations related to 'difference' equations capable of providing exact fits in situations involving rates that constantly increase or decrease and which track irregular growth fairly well even when the growth rates change nearly every year. This paper describes the materials and methods involved in developing the equations, and gives results with a discussion of them.

### Dioxin sampling and analysis of select municipal drinking water sources in the Athabasca River basins

Edmonton : Alberta Environment, Environmental Protection Services, 1990. 51 p. Bibliogr.  
MICROLOG 90-06684 1 fiche

Public awareness and concern for the presence of chlorinated dioxins and furans in bleached kraft mill effluent resulted in a concern by a number of municipalities downstream of existing and planned bleached kraft mill developments as to the impact of such wastewater discharges on drinking water supplies. A dioxin/furan sampling program was undertaken at select communities to address this issue. The program determined the levels of dioxins/furans in both raw and treated drinking water, and with this information assessed whether drinking water quality had been unduly impacted. The resulting data served as a baseline for possible future comparisons of river quality.

### Directives d'exposition concernant la qualité de l'air des résidences : rapport -- Rév.

Comité consultatif fédéral-provincial de l'hygiène du milieu et du travail (Canada). Ottawa :

Santé et bien-être social Canada, 1989. iii, 26 p. *L'éd. anglaise (Exposure guidelines...) sur la même fiche*. ISBN 0-662-96146-3  
MICROLOG 90-06861 1 fiche

On reconnaît maintenant que le milieu intérieur, en dehors des industries, peut contribuer de façon significative à l'exposition des personnes aux polluants atmosphériques. C'est particulièrement le cas dans les pays comme le Canada où les longs hivers froids et les étés chauds poussent les gens à passer de longues périodes dans des édifices à air climatisé. En juin 1980, le sous-ministre de la Santé de l'Ontario a demandé qu'une étude fédérale-provinciale soit entreprise afin d'établir des normes sur la qualité de l'air dans les nouvelles maisons. On a proposé de mettre sur pied un groupe de travail sur la qualité de l'air intérieur au cours de la réunion d'octobre 1980 du Comité consultatif fédéral-provincial de l'hygiène du milieu et du travail. Le document examine particulièrement le but et la portée de l'étude, l'élaboration de directives et de recommandations, les substances assujetties à des directives d'exposition, et les substances faisant l'objet de recommandations pour la limitation de l'exposition.

### Directives environnementales pour la prospection sismique dans le Nord canadien

Hardy BBT Limited. Ottawa : Programme des affaires du Nord, 1988. iv, 34 p. : ill., cartes géogr. Bibliogr. ISBN 0-662-95040-2  
MICROLOG 90-01150 1 fiche

La découverte de gisements naturels économiquement exploitables, tels que les métaux, les alcalino-terreux et les hydrocarbures, dépend énormément des techniques de détection à distance utilisées. D'une très haute précision, la méthode sismique donne une analyse détaillée du sous-sol et est devenue la technique la plus employée pour la recherche de nappes d'hydrocarbures à de très grandes profondeurs. Ce guide est conçu pour aider les prospecteurs à réduire au maximum les répercussions sur l'environnement pendant une campagne de prospection sismique dans le Nord canadien. Il aborde principalement les sujets suivants: le permis d'utilisation des terres et règlements connexes, le pergélisol et la prospection sismique dans le Nord; la planification; le défrichement; les travaux sur le terrain; et le nettoyage et remise en état des lieux.

# Discrimination against blacks in Nova Scotia : the criminal justice system

see Royal Commission on the Donald Marshall, Jr., Prosecution, vol. 4 : discrimination against blacks in Nova Scotia : the criminal justice system

# Discrimination in the Edmonton taxi industry

by W. Nichols and J. Gartrell. Edmonton : Human Rights Commission, 1989. vi, 55 p. : ill.  
MICROLOG 90-02291 1 fiche

This study addresses two issues: discrimination by taxi customers and within the industry, and the perception of discrimination in the work experiences of taxi drivers. It relies on information gathered by field observation, interviews with cab company personnel, and telephone interviews with 10 percent of Edmonton's taxi drivers.

# Discussion paper on compensation for chronic occupational stress

Toronto : Workers' Compensation Board, 1989. 36 p. Bibliogr.  
MICROLOG 90-02844 1 fiche

Presents an interactive model of stress, and discusses workplace stressors, high stress occupations, non-workplace stressors, and stress moderators. It also, examines using criteria from the scientific literature in adjudication, the use of psychiatric evidence in determining causation, the classification of psychological stress claims, the current board practice, legal authority for compensating stress-related claims, options for the legal test in mental-mental claims, and the need for consultation.

# Discussion paper on distress in commercial tenancies

Winnipeg : Law Reform Commission, 1990. ii, 69 p.  
MICROLOG 90-06255 1 fiche

The purpose of this paper is to examine the law of distress in commercial tenancies in Manitoba, to identify problem areas and to discuss the various options for reform. It also sets out the present state of the law in Manitoba and identifies some of its weaknesses and presents options for reforming these weaknesses. It concludes with a request for comments on the adequacy of the present law and the options for reform which is presented.

# Discussion paper on municipal conflict of interest

Toronto : Ministry of Municipal Affairs, 1990. 22, 23 p. Bilingual (*Document...sur les conflits d'intérêts...*). ISBN 0-7729-5620-0  
MICROLOG 90-05877 1 fiche

The purpose of this document is to provide a framework for dialogue on the subject by identifying some of the areas of concern and some of the alternatives for addressing these concerns. It begins with a brief overview of the purpose of conflict of interest laws and is followed by a history of municipal conflict of interest legislation in Ontario and an overview of the current legislation. It then discusses some areas of concern and some possible approaches for redress. It also gives consideration to legislation in other jurisdictions.

# Discussion paper on the establishment of an advisory committee on environmental standards and the development of environmental standards and guidelines

Toronto : Environment Ontario, 1988. 11, 11 p. : ill. Bilingual (*Formation du comité consultatif...*).  
MICROLOG 90-01200 1 fiche

This discussion paper is part of the public input prior to the establishment of an Advisory Committee on Environmental Standards. This Committee would provide recommendations on standards and guidelines for environmental contaminants following consideration of pertinent scientific, legal, economic and social issues and consultation with the public. The paper includes background information on the characteristics of standards and guidelines, the role of the public in setting standards and guidelines, and a description of the proposed public consultation process, including membership, and role.

# A Discussion paper towards a farm practices bill

Winnipeg : Dept. of Agriculture, 1989. iv, 22 p. : ill.  
MICROLOG 90-04956 1 fiche

Some practices carried out by farmers in the normal production of crops and livestock result in the generation of odour, noise, dust, etc., that may be considered nuisances to other people living or working nearby. Manitoba has a nuisance act, but it only applies to odour, has no provision for determination of acceptability of practices employed in the event of complaints, and is not readily identifiable with the agricultural community. Since Manitoba's agricultural areas are increasingly being encroached upon by non-farm uses, there is a need for nuisance legislation which would address other issues than that of odour. This discussion paper covers such areas and gives reasons why such an Act is needed.

#### Dispersion-strengthening of zirconium : progress report no. 3

by C.F. Dixon and H.M. Skelly. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1967. i, 14 p. : ill. (Report ; PM-R 67-25)  
MICROLOG 90-04651 1 fiche

The work described in this report is part of an investigation being conducted to determine the possibility of improving the high-temperature properties of zirconium for use in nuclear reactors by the addition of refractory compounds to the molten metal. This report examines a dispersed-phase present in the Zr-ThO<sub>2</sub> alloys for use as a strengthening medium. Its composition is analysed by X-ray diffraction and the effect of heat treatment on its solubility, size and distribution in a Zr-2.5% ThO<sub>2</sub> alloy is observed. In addition, high-temperature (650C, 1200F) tensile properties are determined for heat treated specimens containing 2.5% ThO<sub>2</sub> and the effect of increasing the ThO<sub>2</sub> from 0.7% to 7.0% is also investigated.

#### Disposal into new mined space brine cavern option : a discussion paper

Gartner Lee Associates. Toronto Ontario : Waste Management Corporation, 1987. 13 p.  
MICROLOG 90-02861 1 fiche

Preliminary review of data on the brine cavern option of waste disposal into new mined space, including a literature review of brine well design and regulations governing brine wells in Ontario, a review of current technology of brine well construction and brine cavern construction; and a general estimate of costs for construction of salt caverns in the B salt horizon of the Salina Formation in southern Ontario, excluding infrastructure requirements and the disposal of cavern washing brines. Assumptions included the B salt unit of the Salina Formation will be the host unit for the cavern(s) at a depth of 400-700 m from ground surface; the treated waste residue is assumed to be essentially inert inorganics mixed with a cement solidification agent and will be in a pumpable slurry or dry pelletized form; and the quantity of treated waste residue is 100,000 cu m/a in the initial stages of development, perhaps increasing to 200,000 cu m/a over a period of time.

#### Disposal of oilfield wastes by landtreatment : effects on the environment and implications for future land use, 1987 research project : a report

by R.M. Danielson, N. Okazawa and W.J. Cerocici. Calgary, Alta. : Canadian Petroleum Association ; Ottawa : Environment Canada, 1988. ix, 108 p. : ill. Bibliogr.  
MICROLOG 90-04410 2 fiche (Available on fiche only)

Landtreatment sites were established near Lloydminster, Grande Prairie, and Drayton Valley in 1982, and near Brooks in 1983 to study the feasibility of using this technique for the disposal of oil field wastes in Alberta. A variety of rates and types of oily wastes were applied from 1982-85 in combination with cultivation and fertilization treatments. This report assesses soil productivity quantitatively at Lloydminster and qualitatively at Brooks, Grande Prairie, and Drayton Valley; determines the critical oil content in the soil, below which crop growth is similar to untreated soil; determines if Cl is limiting crop growth at Lloydminster; determines if crops at Lloydminster contain undesirable organic compounds or heavy metals; determines if the oily wastes applied at Lloydminster have continued to degrade in 1986-87; monitors groundwater and surface water at Lloydminster for organic and inorganic contaminants; and degrades asphaltenes from Lloydminster and conducts an analysis for potentially mobile compounds.

#### Dispute resolution : a directory of methods, projects and resources

Edmonton : Alberta Law Reform Institute, 1990. iv, 66 p. (Research paper ; no. 19) ISSN 0838-0503 ISBN 0-8886-4161-3  
MICROLOG 90-06658 1 fiche

Two elements have led the Institute to take a look at activities relating to dispute resolution generally. The first is the longstanding interest of the Institute in seeking improvements in law. The second is the current interest in improving existing dispute resolution processes. As a first step in the Institute's education process, it undertook to identify and describe the dispute resolution methods attracting current attention and to compile a list of dispute resolution projects and resources of recent origin that represent efforts to improve upon or supplement traditional legal means. The information published in this document is the product of that study.

#### La Dissuasion : analyse des paramètres de réussite

par R.N. Lebow et J.G. Stein. Ottawa : Institut canadien pour la paix et la sécurité

internationales, 1990. 104 p. Bibliogr. (Les Cahiers de l'Institut ; no 8) L'éd. anglaise (When does deterrence...) : 90-04464/2 ISBN 0-662-95814-4  
MICROLOG 90-05432 2 fiche

Le but de la dissuasion est de prévenir un comportement indésirable en persuadant ceux qui seraient tentés de l'adopter qu'il leur en coûterait probablement plus cher que ce qu'ils comptent en retirer. Dans cette monographie, on étudie la sélection et la codification des données utilisées dans le cadre d'importantes études sur la dissuasion; puis, on relève les insuffisances conceptuelles et empiriques desdites études. Les auteurs s'inspirent des résultats de cette critique pour reformuler la théorie de la dissuasion et concevoir un programme de recherche visant à en vérifier les postulats.

#### Distribution and abundance of waterbirds in Barkley Sound and the Long Beach/Tofino/Grice Bay area in spring 1989 following the Nestucca oil spill

by M.S. Rodway. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1989. vi, 60 p. : maps. Bibliogr. (Technical report series ; no. 76) ISSN 0831-6481 ISBN 0-662-17278-7  
MICROLOG 90-06372 1 fiche

One of a number of surveys conducted as part of the impact assessment of the December 1988 Nestucca oil spill on the B.C. coast. This survey was conducted in March and April of 1989 to assess possible effects of oil on migrating waterbirds in Barkley Sound and the Long Beach/Tofino/Grice Bay area. Records of marine mammals were also kept. Eleven aerial surveys and 20 boat surveys of varying extent were conducted. Surveys in Barkley Sound focused on areas of waterbird concentrations. Other areas were explored periodically by boat and plane to detect changes in distribution.

#### Distribution and environmental impact of selected benthic contaminants in Vancouver Harbour, British Columbia, 1985 to 1987

by D. Goyette and J. Boyd. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection, Pacific and Yukon Region, 1989. 2 v. : maps. Bibliogr. (Regional program report ; 89-02) Contents: Vol. 1 : Report -- vol. 2 : Appendices.  
MICROLOG 90-02376 7 fiche

A study of selected contaminants in Vancouver Harbour sediments and biota was begun in May 1985 following a review of existing environmental information about the harbour. The study was begun to determine the distribution of specific organic and inorganic contaminants, potential industrial and urban sources, the health of the benthic environment, and the need for remedial measures. A total of 88 stations for sediment and 11 trawl stations for biota were sampled from Point Atkinson to Port Moody Arm from May 1985 to October 1987. Sediment studies focused on the concentration and distribution of trace metals, hydrocarbons, polychlorinated biphenyls (PCBs), chlorophenols, and polycyclic aromatic hydrocarbons (PAHs). The biological studies emphasized trace metal and PAH levels in tissue of benthic (bottom dwelling) species including sole, crab and shrimp. Further study of the prevalence of liver lesions in English sole, associated with chemical exposure, was also undertaken. Potential urban and industrial sources of contamination were identified.

# Distribution and status of the herpetofauna of Central Region

by S.A. Plourde...et al. Toronto : Ministry of Natural Resources, 1989. iv, 30 p. : maps. Bibliogr. ISBN 0-7729-5920-X MICROLOG 90-01141 1 fiche

Checklist providing ready reference to the herpetofauna of the central region of Ontario, especially the current knowledge of the distribution and status of species. For each species, the current status is given. For rare and uncommon species, a list of counties or regional municipalities where the species has been recorded post-1950 is included. LS ON PR SC

# Distribution and status of the vascular plants of Central Region

by J.L. Riley. Toronto : Ministry of Natural Resources, 1989. xix, 110 p. Bibliogr. (Open file ecological report : 8902) ISBN 0-7729-5919-6 MICROLOG 90-04871 2 fiche

Ready reference to the flora of Central Region. The report gives an overview of the major floristic themes of the native flora, then lists the species representative of the Carolinian Zone, the Niagara Escarpment, the Great Lakes shoreline, and the Canadian Shield. Species are also listed for such habitats as bog fens, and prairie/savannah. The status of native species in the region is given, along with a checklist of provincially rare native species, and the location(s) of each species. LS ON PR SC

# Distribution et biologie du pétoncle d'Islande *Chlamys islandica* de la Côte-Nord du Golfe du Saint-Laurent

par M. Giguère, A. Nadeau et B. Légaré. Mont-Joli, Québec : Ministère des pêches et des océans, Division de la recherche sur les pêches, Institut Maurice-Lamontagne, 1990. vi, 28 p. : ill., cartes géogr. Bibliogr. (Rapport technique canadien des sciences halieutiques et aquatiques ; no 1748) ISSN 0706-6570 MICROLOG 90-06528 1 fiche

On trouve deux espèces de pétoncle dans le golfe du Saint-Laurent, le pétoncle d'Islande et le pétoncle géant. Ces deux espèces se distinguent principalement par la taille, pour un même âge le pétoncle géant étant plus grand que le pétoncle d'Islande, et par la forme de la coquille. Ce document présente les résultats des campagnes de recherche de 1985 et de 1986. Il constitue une mise à jour de la distribution et de la biologie du pétoncle d'Islande sur la rive nord du golfe du Saint-Laurent. CF FI PR QU SC

# Distribution of American Black Duck and Mallard in northern Ontario

by R.K. Ross and D. Fillman. Ottawa : Canadian Wildlife Service, 1990. 5 p. : maps. Bibliogr. (Progress notes ; no. 189) ISSN 0069-0023 ISBN 0-662-17570-0 MICROLOG 90-04889 1 fiche

The province of Ontario contains the major zone of range overlap for the Mallard and the closely related American Black Duck. Both of these very important game species have, in recent years, undergone declines in numbers that are of considerable concern. This report presents information from an extensive survey of waterfowl breeding distribution started in northern Ontario in 1980. The survey employed helicopter-based counts of waterfowl found on fixed plots; initial coverage was completed in 1988. The report presents information on American Black Duck and Mallard distributions throughout northern Ontario, together with some initial results of the special American Black Duck survey currently under way in northeastern Ontario.

Comparisons are made with earlier information. • CA EV LS NO ON SC

# Distribution of birds in the intertidal portion of the Fraser River delta, British Columbia

by R.W. Butler and R.J. Cannings. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1989. iv, 58 p. Bibliogr. (Technical report series ; no. 93) ISSN 0831-6481 ISBN 0-662-17548-4 MICROLOG 90-06311 1 fiche

The Fraser River delta supports more birds than all other estuaries on the Pacific coast of Canada. Bird populations have been estimated for mostly large segments of the delta such as riverine marshes and Boundary Bay but there is no information on the numbers of all birds using the entire shorelines of the delta year round. This study compared the monthly use by all birds of small segments of the delta seaward of the dykes throughout the year. The study area included the intertidal lands seaward of the dikes from Iona Island in the north to White Rock in the south. Birds were counted from March 1988 to February 1989 at 17 stations in which 2 observers could count all the birds in 2-3 hours. • BC CA EV SC

# Distribution of chlorinated hydrocarbon pesticides and PCBs in the Arctic Ocean

by B.T. Hargrave...et al. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. ix, 224 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1644) ISSN 0706-6457 MICROLOG 90-02628 3 fiche

Organochlorine pesticides and PCBs were analyzed in air, snow, ice, seawater, sediment, plankton and benthic amphipods collected north of Axel Heiberg Island (81 degrees N). Sampling was carried out through first year ice adjacent to an ice island on which the polar Continental Shelf project had established a permanent camp. Samples were collected in May and late August and early September of 1986 and again in June 1987. • CA CF EV FI SC

# The Distribution of petroleum residues in near-shore sediments from Atlantic Canada

by E.M. Levy...et al. Dartmouth, N.S. : Bedford Institute of Oceanography, 1988. iv, 169 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1612) ISSN 0706-6457 MICROLOG 90-02285 2 fiche

Data from a survey of the concentrations of 'petroleum residues' in sediments from harbours in Atlantic Canada in 1978 were compiled. 'Petroleum residues' are defined as the mixture which remains after petroleum-derived oils are subjected to varying amounts of weathering in the marine environment in sediments from harbours in Atlantic Canada. The survey collected sediment samples from as many harbours in the region as possible, covering the entire range of geological environments, industrial areas (oil refining, shipping, fishing, fish processing, steel-making, manufacturing), and the populated rural settings to be found in the region. The sampling program was carried out in late 1978, prior to freeze-up and some samples were analyzed in early 1979, with the remainder analyzed in 1987. • AP CA CF EN EV SC

#### Divorce and family mediation research study in three Canadian cities

by C.J. Richardson. Ottawa : Dept. of Justice, Family Law Research, 1989. xiii, 191 p. Bibliogr. ISBN 0-662-16122-X  
MICROLOG 90-02959 3 fiche

The findings described in this report come from a two-year study of court-based divorce mediation and separation counselling in Saskatoon, Montreal, and Saint John's. This document reviews the issues of concern with respect to divorce and family mediation and some of the findings from social science research which underlie the rationale for non-adversarial approaches to marriage breakdown. It also describes the research design and data base for each of the research modules and sites. It provides a descriptive account of the three courts and their mediation service and approach. In addition, it looks at mediation in Canada more generally, and includes an analysis and evaluation of the outcomes of divorce mediation, with particular reference to the economic situation of couples and their children, to custody and access, to parenting generally, and the impact of mediation on various aspects of the court process.

MICROLOG 90-04209 1 fiche

Study to inventory what has been written on the reasons for non-use of computerized tools in the workplace and to outline a theoretical model that could integrate this knowledge and provide access to new avenues of research. The first part of the report presents the

cognitive evaluation theory, along with variables that may influence intrinsic motivation. It ends with a proposed model in which motivation mediates the impact of situational and individual variables on the use of computer tools. The second part is a review of the literature on the reasons for non-use of microcomputers in the workplace, dealing first with variables linked to the situation, and then to variables linked to the individual.

#### Docee River counting fence : 1988 operations

by I. Winther, S.K. Bachen and R.D. Goruk. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, 1989. iii, 17 p. : ill. (Canadian data report of fisheries and aquatic sciences ; no. 767) ISSN 0706-6465  
MICROLOG 90-00526 1 fiche

The Docee River is located in the Central Coast District of British Columbia, and is less than 1 km long, draining Long Lake into Wyclees Lagoon, which then empties north into Smith Inlet. The Docee River counting fence has been in operation since 1972 monitoring sockeye escapements into Long Lake to provide in season estimates to managers of the Smith Inlet fishery. The counting fence operates from late June to mid August. Fish were counted from June 29 to August 12 and dead fish caught in the fence were collected and sampled. Samples consisted of hypural length, sex and scales. Scales were collected onto scale books and sent to the Scale Lab in Vancouver. Comparisons of age and sex compositions at the beginning, middle and end of the run were made.

#### Document d'information sur la Loi et le règlement sur l'enregistrement des lobbyistes

Ottawa : Consommation et Corporations, Direction de l'enregistrement des lobbyistes, 1989. 18, 17 p. Bilingue (Information on the Lobbyists...). ISBN 0-662-56903-2  
MICROLOG 90-03236 1 fiche

Cette Loi a été adoptée en 1988, suite aux recommandations unanimement formulées par un comité parlementaire composé de représentants de tous les partis politiques. Par le truchement de cette Loi, le Parlement a reconnu que le lobbying est une activité légitime qui peut aider les titulaires d'une charge publique, tels que députés, sénateurs, ministres et responsables ministériels, à se sensibiliser aux points de vue et aux préoccupations des citoyens et des organismes. Le document indique principalement comment et quand s'enregistrer.

**Document de réflexion et de consultation sur la révision de la loi électorale**

Québec : Gouvernement du Québec, Réforme électorale, 1988. ix, 334 p.  
MICROLOG 90-03632 4 fiche

Ce document se penche sur cinq grands objectifs qui se traduisent par des propositions d'améliorations et de changements importants. Ces objectifs sont: évaluer l'opportunité d'encadrer la publicité gouvernementale en période électorale; examiner la possibilité d'étendre les règles de contrôle et de divulgation du financement des partis politiques à leurs campagnes au leadership, associer le soutien financier de l'Etat aux partis politiques davantage à l'appui populaire réel qu'ils reçoivent plutôt qu'au seul critère de leur représentation à l'Assemblée nationale; et, améliorer les règles de présentation des rapports financiers des partis politiques; PA PR QU

**Document de travail sur la Loi sur les conflits d'intérêts municipaux**

Toronto : Ministère des affaires municipales, 1990. 23, 22 p. *Bilingue* (Discussion paper on municipal...). ISBN 0-7729-5620-0  
MICROLOG 90-05877 1 fiche

Ce document a pour but de servir de cadre de discussion au sujet de la Loi de 1983 sur les conflits d'intérêts municipaux en déterminant les diverses questions qui peuvent se poser et les réponses qu'on peut leur apporter. Il fournit d'abord un bref aperçu de l'objectif visé par les lois sur les conflits d'intérêts, puis un historique du droit ontarien et, enfin, une vue d'ensemble de la loi actuelle. Plus loin, il traite de points qui posent des problèmes particuliers, ainsi que de leurs solutions possibles. Il jette également un coup d'oeil sur la législation dans d'autres territoires.

**Does consistent aggregation really matter?**

by R. Gagné. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 30 p. Bibliogr. (Publication ; no. 690)  
MICROLOG 90-06640 1 fiche

The problem of determining the existence of consistent input aggregates has been addressed in numerous papers, although the equivalent problem for output aggregates has not. This paper shows that existing aggregation tests, mainly developed for inputs, are not suitable for outputs. The paper proposes a more general test which is adequate for inputs and outputs and the proposed test is then applied to a sample of Canadian trucking firms in order to find a consistent structure of aggregation for outputs.

**Does short-term practice attenuate initial coding differences?**

by R.M.T. Jubis. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1990. 20 p. : ill. Bibliogr. (DCIEM research report ; no. 90-RR-25)  
MICROLOG 90-07089 1 fiche

Although the literature reporting the effectiveness of colour- vs shape-coding for visual displays is large, few studies have examined whether practice reduces initial differences in performance due to coding conditions. This study examined whether short-term practice would attenuate any initial differences among shape- and colour-coding conditions. Three experiments, using naive, paid volunteers with normal colour vision and normal or corrected visual acuity were conducted. The results of these experiments are given in this report.

**Domestic grain policy and the GATT**

by S. Dakers. Ottawa : Library of Parliament,

Research Branch, 1989. 20 p. Bibliogr. (Backgrounder ; BP-214E) *French ed. (La Politique céréalière...)* on the same fiche. ISBN 0-660-13491-8  
MICROLOG 90-05361 1 fiche

Most of Canada's grain policies were designed in the early 1970s to encourage production in response to world food shortages. Now Canada finds it must re-evaluate its domestic grain assistance policies in the light of the present global grain situation and GATT (General Agreement on Tariffs and Trade) proposals to reduce the overproduction. This report summarizes Canada's grain policy legacy, looks at the requirements coming out of the present GATT Round and examines changes in process to existing programs as well as proposals for new programs.

#### Données sur le développement des clupéidés

par S.G. Kryzhanovskij. Ottawa : Conseil national de recherches Canada, Institut canadien de l'information scientifique et technique, 1989. 176 p. : ill. Bibliogr. (Traduction canadienne des sciences halieutiques et aquatiques ; no 5472) *Publié d'abord en russe, par l'Académie des sciences de l'URSS à Moscou.* ISSN 0704-3716 MICROLOG 90-00595 2 fiche

Les poissons de l'ordre des clupéiformes - salmonidés, coréogones et clupéidés - sont plus utiles à l'homme que les poissons d'autres ordres. Très répandus dans les plans d'eau douce et les mers, formant d'immenses bancs à certaines périodes et migrant suivant un itinéraire précis, ils se prêtent mieux que d'autres espèces de poissons à l'exploitation industrielle. Ce travail fait l'analyse des périodes de vie embryonnaire et larvaire. Le document fait l'analyse du développement de l'aloise de la mer Noire, de l'aloise de la Volga, du hareng de la Baltique, du hareng du Golfe de Sakhaline, le développement parthénogénétique des clupéidés du Golfe de Sakhaline et du 'tjouika' de la mer Noire.

MICROLOG 90-06928 1 fiche

Cette publication contient des données annuelles sur les sédiments en suspensions pour 1988 et le sommaire des données chronologiques sur les sédiments, à la suite des études effectuées dans les cours d'eau du Manitoba par la Division des relevés hydrologiques du Canada. Les données recueillies sur la nature et l'importance de la charge solide dans les cours d'eau doivent servir aux études portant sur la qualité des eaux, les incidences environnementales, les processus fluviaux, le comportement des cours d'eau et la conception de projets.

**Dorchester Swamp : area of natural and scientific interest (A.N.S.I.) : a life science inventory**

by D. McLeod. Toronto : Ministry of Natural Resources, 1987. v, 182 p. : maps. Bibliogr. ISBN 0-7729-2950-5  
MICROLOG 90-01078 3 fiche

The Dorchester swamp area of natural and scientific interest (ANSI) is located in the SE corner of Middlesex County approximately 3 km south-east of the Village of Dorchester. This study conducted a detailed inventory of the vegetation of the area to provide baseline data on species composition, community structure, and significant vegetation features; summarized and where possible supplemented current knowledge of the fauna of the area; and provided, using ecological criteria, reasoned evaluations, recommendations and opinions on how well the vegetation-landform features of the site district are represented. A preliminary investigation of the site was done using aerial photography, then a field itinerary was planned for a reconnaissance survey to include all vegetation types delineated. A literature search was also conducted to provide additional information about the area and to determine if other records of flora and fauna existed for the study sites. The field work itself involved the on-site collection of both qualitative and quantitative data.

**Dorset Research Centre study lakes : sampling methodology (1986-89) and lake morphometry**

by R. Girard and R.A. Reid. Dorset, Ont. : Ministry of the Environment, Water Resources Branch, 1990 v, 243 p. : maps. Bibliogr. (Data report / DR 90/4) ISBN 0-7729-7021-1  
MICROLOG 90-06959 3 fiche

Summary of the water chemistry and zooplankton sampling methods routinely used from 1986-89 at the Dorset Research Centre study lakes. Sampling was done weekly, bi-weekly or monthly, depending on the location of the lakes. The various profile sampling protocols within specified study lakes include dissolved oxygen, pH and dissolved inorganic carbon and odd metre interval hypolimnion chemistry. Maps of the study area and of each lake or basin and its morphometry are also included.

by L. Carmel and G. Deschatelets. Laval, Que. : Dept. of Communications, Canadian Workplace Automation Research Centre, External Collaboration Directorate, 1988. v, 180 p. : ill. Bibliogr. French ed. (*Création d'une base de données...*) : 90-04203/2.  
MICROLOG 90-04208 2 fiche

A research project was conducted from 1986 to 1988 to design an integrated service of information resources which would allow the

Center's researchers and administrators to access, in a single system, all available information resources, including the catalog of the documentation center, a bibliographic database, the Center's archives, and the factual databases (directory of specialties, on-going research, grants). A feasibility study was conducted to determine the technical, economical and legal implications of creating such a bibliographic database by systematically downloading, from external databases, citations relevant to the topic of workplace automation (office automation), by converting and reformatting them, and by uploading them in the local information system (MINISIS). This paper presents the results of the study, the problems encountered and recommendations.

### Draft guidelines for an environmental impact assessment : 25 MW wood-fired generating station, Sussex, N.B.

issued by the Minister of the Environment ; to the New Brunswick Department of Natural Resources and Energy. Fredericton : Environment New Brunswick, 1990. 11 p. Bibliogr. French ed. (*Projet de directives pour...*) on the same fiche.  
MICROLOG 90-04559 1 fiche

Guidelines to provide a general framework to be used in the preparation of an Environmental Impact Assessment (EIA) of the proposal by the N.B. Dept. of Natural Resources and Energy to construct and operate a 25 MW wood-fired generating station in the Sussex area. The registered project is for a facility to be designed to produce electricity with a nominal capacity of 25 MW and to burn, as a primary fuel, whole tree chips from private woodlots, roadside tops and slash, and sawmill residue, as well as other non-merchantable timber. The guidelines identify the important environmental issues arising from the proposal and provide a general framework for conducting an EIA, including public participation.

### Draft guidelines for an environmental impact assessment : Alcell Developments Inc., expansion of the Alcell Pilot Plant

Fredericton : Environment New Brunswick, 1990. 6 p. Bilingual (*Projet de directives, relativement à...*)  
MICROLOG 90-06980 1 fiche

This document identifies important environmental issues arising from the proposal by Alcell Developments Inc. to expand the existing Alcell demonstration plant from a 33 tonne per day to a 300 tonne per day facility. The proposed plant will produce fully bleached hardwood pulp using a process of oxygen delignification followed by chlorine dioxide, caustic extraction with oxygen and a second chlorine dioxide stage. No elemental chlorine will be used in the proposed bleaching process. This assessment is limited to an examination of the impacts of gaseous emissions, liquid effluent and solid waste from the facility.

### Draft guidelines for an environmental impact assessment : N.B. Power, Millbank Generating Station

issued by the Minister of the Environment ; to New Brunswick Power. Fredericton : Environment New Brunswick, 1990. 9 p. French ed. (*Projet de directives relatives...*) on the same fiche.  
MICROLOG 90-03330 1 fiche

Document to identify important environmental issues arising from the proposal by the New Brunswick Electric Power Commission (N.B. Power) to construct and operate a combustion turbine generating station with a nominal capacity of 400 MW (4 x 100 MW turbines) at Millbank, New Brunswick. This proposed facility, which will burn low sulphur diesel oil (0.5%), is expected to operate for approximately 500 hr/yr to provide peaking capacity for both domestic use and for export. The guidelines provide a general framework for conducting an environmental impact assessment. This document gives guidelines on the conduct of the EIA and methods of report preparation. Significant issues are identified as the impact of gaseous emissions from the proposed plant, power transmission impacts, impacts of noise, social impacts, impacts of accidental spills, and impacts of groundwater consumption. Environmentally significant areas are also identified.

### Draft guidelines for the preparation of an environmental impact statement on air transportation proposals for the Toronto area

Toronto : Federal Environmental Assessment Review Panel, 1990. iii, 25 p.  
MICROLOG 90-04858 1 fiche

This document, prepared by the Environmental Assessment Panel reviewing air transportation proposals in the Toronto area, contains the draft guidelines for the preparation of an Environmental Impact Statement (EIS). The draft guidelines were prepared after holding 6 days of scoping meetings in April during which 104 oral presentations were made. It also received an additional 86 written submissions. The guidelines are intended to provide general guidance and instruction to Transport Canada, the initiating department, in its preparation of the EIS for the proposal of 2 additional runways at Pearson International Airport. The document covers project setting, project need, alternatives, project description, environmental impacts, socio-economic impacts, monitoring, mitigation and compensation measures, safety, and the public consultation program.

# **Dropouts in French-language schools : a study of the identification of potential dropouts in French-language secondary schools in Ontario**

by P. Quirouette, O. Saint-Denis and N. Huot.  
Toronto : Ministry of Education, 1989. 37 p. : ill. (Student retention and transition series) (Research brief) CSI 55108.205  
ISSN 0839-5039 ISBN 0-7729-6096-8  
MICROLOG 90-06332 1 fiche

This research paper summarizes the activities, various components and results of a project entitled 'Francophone Dropouts: A Study of the Identification of Potential Dropouts in French-Language Secondary Schools in Ontario,' Reports I, (1986), II (1987), and III (1988). The main objective is to develop a valid questionnaire to identify, upon their entry into the secondary school program, those students who are likely to drop out. It suggests various intervention strategies that the schools could implement with respect to the students identified, and provides the participating schools with documentation of the efficacy of the

various interventions.

# **Drought, agriculture and government action**

by J.-D. Fréchette. Ottawa : Library of Parliament, Research Branch, 1989. 15 p. Bibliogr. (Current issue review ; 89-3E)  
*French ed. (Les Sécheresses, l'agriculture...) on the same fiche. ISBN 0-660-13324-5*  
MICROLOG 90-01846 1 fiche

This analysis looks at the history of drought in the Canadian West and compares the various periods of drought to see if the lessons of the past have been assimilated. The paper also traces the evolution of government action. While listing 19th and 20th century experiences of drought, the paper concentrates on the most recent in 1988, including reasons for its severity and a comparison with the drought of the 1930s. Government action, beginning in the 1930s, is summarized and special programs are listed, along with the permanent safety net programs in place. A chronology is included

# **Dual-fired energy efficient boiler system : final report**

Bristol Aerospace Limited Winnipeg : Manitoba Energy and Mines ; Ottawa : Energy, Mines and Resources Canada, 1988. 48 p. : ill.  
MICROLOG 90-01241 1 fiche

As part of the Enerdemo Program, a program aimed at financing conservation and alternative energy demonstration projects, Bristol Aerospace received funds for a novel boiler system which was designed by Bristol Aerospace and Volcano, a boiler manufacturer. The boiler system is controlled by a computer which monitors electrical demand. At off-peak times the system operates on electricity but when demand reaches a predetermined point the system switches to natural gas. The gas train can operate outside the control system in the event of a failure. The system is suited for an operation which has a high peak usage of electricity but still requires heat during off-peak periods. This report describes the boiler and its performance during 1987

# **Ducks Unlimited Canada, Oak Hammock Marsh Conservation Centre/Office proposal : report of the hearing**

Manitoba, Clean Environment Commission Winnipeg : The Commission, 1990. 117 p. : maps.  
MICROLOG 90-07161 2 fiche

On December 8, 1989, Ducks Unlimited Canada filed a proposal to construct and operate a conservation centre, including a head office facility, within Oak Hammock Marsh Wildlife Management Area. The proposed conservation centre would focus heavily on wetland-associated environmental education from a continental perspective. Its location adjoining the Oak Hammock Marsh would provide first-hand observation of a world class wetland. Public hearings were held by the Clean Environment Commission in March 1990. This report provides a summary of the proposal, the submissions supporting and opposing it, and the views of the relevant provincial departments. Discussion is included on the issues of the use of the marsh, the environmental impact, considerations about the

office building, the interpretive centre, and jurisdiction and legal matters; wetland preservation; tourism and economic development; and urbanization and commuting. Recommendations are included.

### Dune formations associated with multiple redd construction by chinook salmon in the Upper Nechako River, British Columbia, Canada

by B.D. Tutty. Nanaimo, B.C. : Dept. of Fisheries and Oceans, South Coast Division, 1986. iv, 28 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1893) ISSN 0706-6473  
MICROLOG 90-00367 1 fiche

The Nechako River is tributary to the Fraser River at Prince George, B.C. During September 1974, observations were made on chinook salmon spawning in the Upper Nechako River. The spawning area in this part of the river is unusual in that it contains variably-sized dunes ranging from .75 m in height and 15 m in length and situated perpendicular to the river flow. This report describes how multiple dunes were formed within the wetted perimeter of the river and suggests they may be beneficial to the propagation of Nechako River chinook salmon stocks.

### Dust suppressant study

Acres International Limited. Toronto : Environment Ontario, Waste Management Branch, 1988. 205 p. : ill., maps. Bibliogr. ISBN 0-7729-4349-4  
MICROLOG 90-00129 3 fiche

Concerns have been expressed about the long-term environmental effects of using materials such as waste oil for dust control on unpaved roads. This report describes a study to examine the effectiveness and impact on the adjacent environment of a variety of substances that are used at present or might be appropriate in the future. The study reviewed the available information and regulations; selected particular suppressants to be evaluated in field tests and selected sites where these suppressants had been used exclusively for several years; monitored dustfall at the 6 sites; analyzed road surfaces, roadside soil and vegetation, background soil and the suppressants themselves to investigate the significance and fate of major components of the suppressants to the environment; and measured vehicle-generated dust using fixed and mobile samplers.

### Dynamic acoustic intensity scanning for the detection of fatigue in offshore structures : final report

by J. Guigné and G. Williams. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1989. ii, 167 p. : ill. Bibliogr. CANMET contract: 69208-01-SQ.  
MICROLOG 90-07109 2 fiche

Offshore developments around Newfoundland and Labrador are expected to utilize floating production systems, the majority of which would be constructed of welded steel plates, operating in a very hostile environment, and therefore subjected to considerable deterioration and damage. Techniques have been identified to accurately monitor the safety of these structures, but they are limited in application because they must operate in close proximity to the welded joints. This project focuses on an energy flow mapping approach called dynamic acoustic intensity scanning (DAIS), developed at C-CORE. This report details the research program and outlines the current research status; reviews the papers which have arisen from the project; and describes the equipment used in the project, including the limitations and resolutions of the equipment and the calibration techniques and standards used in establishing the DAIS methodology.

### Dynamic ion exchange chromatography for sensitive determination of rare earths in steel

by D.J. Barkley and L.A. Pokrajac. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1990. 13 p. Bibliogr. (Report ; MSL 90-56(IR))  
MICROLOG 90-07117 1 fiche

A high-performance liquid chromatographic procedure has been developed for the direct determination of rare-earth elements in steel. Optimization of the effective capacity of the dynamic ion exchanger and the increased sensitivity of a post column reaction with Arsenazo 111 permitted detection down to 0.1 ng g<sup>-1</sup>. The analysis of rare earth earths in N B S steel standards without pre-separation are shown. This paper describes the results of an investigation of chromatographic and post-column reaction conditions for the direct separation and determination of ppm concentrations of rare earths in steels and iron alloys.

### A Dynamic traffic assignment model and a solution algorithm

by O. Drissi-Kaitouni and A. Hameda-Benchekroun. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 20 p. : ill. Bibliogr.

(Publication ; no. 649)  
MICROLOG 90-01405 1 fiche

Paper proposing a dynamic traffic assignment model (DTAP) mainly based on the assumption that the time spent by a vehicle on a link may be decomposed into a fixed travel time plus a waiting time. The fixed travel time corresponds to the free or uncongested travel time over the link. Then the vehicle is put in an exit queue (which resides on the same link) until it becomes possible to enter a forward link; this decision is based on the link costs and their capacities. The paper shows that this model leads to a network structure (a temporal expansion of the base network, including the queues) and therefore the DTAP may be viewed as a 'simple' static traffic assignment problem (STAP) over the expanded network. Therefore all the theory developed during the past 40 years for the STAP may be used to solve the DTAP

### Dynamics of internal migration in Bangladesh

by A.K.M.N. Nabi. Edmonton : University of Alberta, Dept. of Sociology, 1990. 32 p. Bibliogr. (Research discussion paper ; no. 64) Paper presented at the Annual Meeting of the Canadian Population Society and at the Learned Society Meetings. ISSN 0317-2473  
MICROLOG 90-06453 1 fiche

Inter-regional net migration rates for Bangladesh have been estimated using the available data set from the 1974 and 1981 census reports. A multiple regression model of internal migration in Bangladesh has failed to support the argument that internal migratory flows are determined by high population density. The development of the agrarian social structure of this country is rooted in the historical evolution of the land tenure system. The analysis indicated a tentative support to the argument that the unequal hierarchical relations of people to the land in the country condition the process by which migration takes place.

### Dynamics of phosphorus in a chain of lakes : the Fishing Lakes

by B.C. Kenney. Saskatoon, Sask. : Inland Waters Directorate, National Hydrology Research Institute, 1990. vi, 18 p. : ill. Bibliogr. (NHRI paper ; no. 44) (Scientific series ; no. 176) French ed. (*Dynamique du phosphore...*) on the same fiche. ISBN 0-662-17581-6  
MICROLOG 90-06302 1 fiche

Saskatchewan's Fishing Lakes, the primary recreation lakes for residents of Regina, are plagued by immense blooms of algae throughout the summer. The algae thrive on high concentrations of nutrients, particularly phosphorus. The dynamics of phosphorus in lakes are normally controlled by water renewal rates and sedimentation. In this report, the theory of phosphorus dynamics was extended to include a chain of lakes like the Fishing Lakes. A model was developed based on the water renewal or outflow time scale, the sedimentation time scale, and the water inflow time scale. The dynamic variation of phosphorus in the Fishing Lakes from 1980-83 was then simulated using the phosphorus inflow concentrations measured every 3 days by WQB and the daily water flows as input data. A second simulation was run using the sparse data set that was available for phosphorus inflow from 1970-79. The calculated outputs were directly compared with the measured outflow concentrations.

### The Dynamics of the parasitic fauna of different forms of the Arctic char *Salvelinus alpinus* L. in the basin of Lake Azabach'e

by T.E. Butorina. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 21 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5135) *Originally published in Russian, at Leningrad, USSR.* ISSN 0704-3716  
MICROLOG 90-00112 1 fiche

The study of the age changes in parasitic fauna calls for thorough analysis of this fauna's dependence on the morphological and ecological changes characterizing the successive stages of fish development. The differences in the parasitic fauna of various intraspecific forms of Arctic char (lake predators and benthophages, and brook and diadromous forms) inhabiting Lake Azabach'e and the Kamchatka River were earlier established and described. This study determined the changes in the parasitic fauna of different aged Arctic char depending on their food habits, using chars collected from 1969-71 and in 1973.

### Dynamique du phosphore dans une chaîne de lacs : les lacs Fishing

par B.C. Kenney. Saskatoon, Sask. : Direction générale des eaux intérieures, Institut national de recherche en hydrologie, 1990. vi, 19 p. il. Bibliogr. (Rapport de l'INRH ; no 44) (Série scientifique, étude no 176) *L'éd. anglaise (Dynamics of phosphorus...) sur la même fiche.* ISBN 0-662-95977-8  
MICROLOG 90-06302 1 fiche

Les lacs Fishing en Saskatchewan, les principaux lacs de villégiature pour les résidents de Régina, sont infestés tout l'été par d'impressionnantes proliférations d'algues. Celles-ci tirent leur subsistance de fortes concentrations d'éléments nutritifs, particulièrement du phosphore. La dynamique du phosphore dans les lacs dépend habituellement du temps de renouvellement des eaux et de la sédimentation. Dans ce rapport, la théorie de la dynamique du phosphore a été étendue à une chaîne de lacs, les lacs Fishing. Si l'on en croit les résultats du modèle obtenus à partir de toutes les données disponibles depuis 1970, les lacs Fishing sont saturés de phosphore et il ne s'y produit pas de sédimentation nette. Ce document se penche principalement sur cette question.

### Early ontogenesis of the Yezo scallop : quantitative characteristics of metabolism in a laboratory culture

by L.G. Makarova...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 18 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5425) *Originally published in Russian, at Moscow, U.S.S.R.* ISSN 0704-3716  
MICROLOG 90-01521 1 fiche

Commercial exploitation of the Yezo scallop in southern Primor'ye, USSR, have been ongoing since 1919, with scallop cultivation beginning in 1962 when the natural fishing grounds were closed. The expansion of scallop plantations is mainly held back by organizational and material-technical reasons, as well as by instability of the spat harvests. This instability has led to the need to develop methods of obtaining hardy scallop spat in a fully controlled environment. This paper deals with the main physiological processes of the scallop at the juvenile stages, enabling the development of tentative standards for feed concentration, the rate of supplying feed, oxygen conditions and the density of stocking. The investigations were carried out from May-July in 1983 and 1984 using 3d and 4th year scallops.

### Early Ordovician trilobite faunas of the Boat Harbour and Catoche Formations (St. George Group) in the Boat Harbour-Cape Norman area, Great Northern Peninsula, western Newfoundland

by W.D. Boyce. St. John's : Government of Newfoundland and Labrador, Dept. of Mines and Energy, Geological Survey Branch, 1989. ix, 168 p. : ill. Bibliogr. (Report ; 89-2) ISSN 0843-8972 ISBN 0-920769-46-2  
MICROLOG 90-04119 2 fiche

This report presents a descriptive systematic paleontology presenting a taxonomic analysis of the trilobite faunas of the Boat Harbour and Catoche formations in the Boat Harbour-Cape Norman region, along with biostratigraphic aspects. The biostratigraphic aspects include the erection of a biostratigraphic zonation, the correlation of the trilobite faunas with those of the standard Ross (1951)-Hintze (1953) Ordovician trilobite zones of Utah-Nevada, and the classic deposits of the Canadian Series in New York-Vermont and Missouri-northern Arkansas; and the correlation of the Canadian stages proposed by Flower (1954) with the Ross-Hintze zones. Preliminary trilobite collections were obtained from the study area during the summer of 1976, with further collections obtained the following year. Simultaneously, a detailed bed-by-bed composite lithostratigraphic section was measured at Boat Harbour. During the summers of 1978, 1985 and 1987, the Boat Harbour section was revisited and certain problematical intervals were re-examined and sampled.

### Early results of a spacing trial in a precommercially thinned balsam fir stand in western Newfoundland

by M.B. Lavigne and J.G. Donnelly. St. John's : Canadian Forestry Service, Newfoundland Forestry Centre, 1989. vi, 23 p. : ill. Bibliogr. (Information report ; N-X-269) ISSN 0704-7657 ISBN 0-662-17228-0

MICROLOG 90-02518 1 fiche

Precommercial thinning of young balsam fir stands is a common practice in eastern Canada, although accurate predictions of the gains in yield have not yet been produced. Thinning always involves trading off complete occupancy by the stand for increased growth per tree, but no data are available to show which spacing strikes the best balance. Spacing trials were established in precommercially thinned stands in Newfoundland to address these needs. The first reporting was done in 1987 and the results of the 5th year remeasurement are presented in this report. Comparisons are made of unthinned, 1.2 m, 1.8 m, 2.4 m, and 3.0 m spacings.

**Ecological engineering for gold and base metal mining operations in the Northwest Territories : final report**

by M. Kalin. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1987. x, 64 p. : ill., maps. (Environmental studies ; no. 59) ISBN 0-662-16847-X

MICROLOG 90-03268 1 fiche

Evaluation of the long term environmental implications of active mining operations in the Northwest Territories to assess waste management strategies which could, at the termination of the mining operations, minimize potential environmental degradation. Field investigations of the Lupin gold mine and the lead zinc concentrator at Nanisivik primarily focused on the environmental conditions which might be encountered in the long term after the shut down of the operations. Emphasis was placed on the search within the waste management areas and at their boundaries to the environment for suitable components of ecosystems which could be utilized in ecological engineering methods and biological polishing processes.

**Ecological studies on the pomfret *Brama japonica* Hilgendorf, II : a north-south distribution of the pomfret along longitude 175°30'E in late July**

by S. Sasaki, S. Yamamoto and K. Shimazaki. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 18 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5177) Originally published in Japanese, at Hokkaido, Japan. ISSN 0704-3716

MICROLOG 90-00084 1 fiche

Since 1978 experimental fishing operations using surface gillnets have been carried out in the area 38 degrees to 48 degrees north along the longitude 175 degrees 30 minutes east using the training ship Hokusei Maru of Hokkaido University. Pomfret showed a large concentration of biomass during the experimental fishing operations but their detailed group structure has not been established. In particular, due to the use of gillnets, it is unclear whether the concentration of fish caught in the gillnets accurately represents the relative abundance in the fishing grounds. During the summer of 1980, 20 mesh sizes of gillnet were used by the ship and measurements were taken on all pomfret caught in the gillnet with 14 mesh sizes from 42-233 mm. The selectivity of mesh sizes for pomfret was studied, with results reported here.

**The Ecology of fishes in British Columbia kelp beds, I : Barkley Sound *Nereocystis* beds**

by B.M. Leaman. Victoria : Ministry of Environment, Marine Resources Branch, 1980. vii, 100 p. : ill., maps. Bibliogr. (Fisheries development report ; no. 22) ISSN 0228-5975

MICROLOG 90-04848 2 fiche

Interest in the potential of floating kelp beds in the coastal waters of B.C. for the extraction of phycocolloids and other plant products, or for the production of kelp meal as a dietary

supplement for humans and livestock has stimulated investigation of factors influencing the wise harvest of the plants. Fish species frequenting kelp beds are divided into resident, associated and transient. This project was conducted to examine the fish community of a bull kelp stand in Barkley Sound; to determine the relationships of the species in this community to each other and to the habitat; to examine the effect of experimental canopy removal on the diversity and abundance of the species in this community; and to relate these findings to the management of the kelp resource. The report describes the kelp bed studied, the ecology of the fish community in it, and the results and implications of canopy removal.

**Econometric models of accident distributions**

by M. Boyer, G. Dionne and C. Vanasse. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 62 p. Bibliogr. (Publication ; no. 672)

MICROLOG 90-03003 1 fiche

This paper deals with the econometrics of car accidents, that is the estimation of the relative importance or significance of the factors explaining the number of accidents in a given period of time on an individual basis. The study uses a data base consisting of the accident record and characteristics of individual drivers. Individual characteristics are considered exogenous or predetermined and may or may not be significant factors in explaining the number of accidents. Four categorical models (linear probability, probit, logit and multinomial logit) and 4 count data models (Poisson and negative binomial models with and without individual characteristics in the regression component) are estimated. The statistical results are then applied to a model of insurance rating in the presence of moral hazard.

### Economic assessment of proposed revisions to Regulation 308 : synthesis report

VHB Research & Consulting Inc. Toronto : Environment Ontario, Policy and Planning Branch, 1990. xii, 114 p. : ill. Bibliogr. ISBN 0-7729-6533-1  
MICROLOG 90-07011 2 fiche

Since 1971, one of the main statutory means of controlling air pollution in Ontario has been the Environmental Protection Act and the regulations pursuant to the Act, in particular Regulation 308, which specifies the maximum permitted concentration of numerous contaminants at a point of impingement from a source of contamination (other than a motor vehicle). A 1987 discussion paper identified several problems with the regulation, leading to a proposed strengthening of them. A series of consultations and public discussion was held and a number of studies were commissioned for an economic assessment of the proposed revisions. These studies estimated the benefits expected from the revised regulation; the additional costs for abatement, monitoring, administration and the impact of these costs on the provincial economy and the sectors most likely to be adversely affected by the higher costs. This report provides a synthesis of the entire economic assessment.

### An Economic assessment of the herring purse-seine fleet restructuring plan of 1983 : the ten-year management plan at mid-term

by D.A. MacFarlane. Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. vi, 49 p. Bibliogr. (Economic and commercial analysis report ; no. 31) French ed. (Le Plan de restructuration...) : 90-04753/1. ISSN 0843-5626 ISBN 0-662-1243-4  
MICROLOG 90-01593 1 fiche

The herring purse seine fleet is relatively new in Atlantic Canada, having its first commercial spurt as a distinct fishery during World War II. However, it has been subject to recurring boom and crisis brought about the variations in markets, herring stocks and quality. In 1983, the price paid for herring and the allowable catch were such that purse seiners were sustaining losses and the outlook was poor. A 10-year program was undertaken in which each purse seine licence holder was given a quasi-property right in a share of the allowable catch, which could be sold with the seller keeping the monetary reward. The buyer could accumulate extra quota which promised a greater measure of profitability. The fishery of 1988 marked the 5th season of the program. This study was undertaken to appraise the response of the fishery in an atmosphere of limited entry with transferable quotas, to what extent the objectives of the program were being achieved, and to clarify the determinants of the developments in the fleet.

**The Economic development role of the urban informal sector in developing countries : an inflow outflow analysis**

by E.U. Morah. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1988. 24 p. Bibliogr. (Comparative urban and regional studies ; no. 15) ISSN 0828-2412  
MICROLOG 90-05487 1 fiche (Available on fiche only)

In addition to having argued the rationale of informal sector economics in developing countries, this paper claims to have developed one of the very few comprehensive models on the sector. A classical-input output approach to urban economic development suggested two reasons why an urban community is poor: 1) inadequate inflow of money into the urban community, and 2) too much outflow of money from the urban community. Based upon this approach, this paper makes suggestions as to how the resources of the informal sector in developing countries can be mobilized to increase the inflow of money into an urban community, while simultaneously reducing the outflow of money from it. It illustrates the arguments and suggestions with examples from Nigeria.

**Economic impact analysis of the Salmonid Enhancement Program**

Marvin Shaffer and Associates. Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. iii, 142 p. (Economic and commercial analysis report ; no. 44) ISSN 0843-5626 ISBN 0-662-17465-8  
MICROLOG 90-03151 2 fiche

The salmonid enhancement program (SEP) was established in 1977 by the federal and provincial governments to double the population of salmonids in B.C. waters. Today, enhancement activities make a significant contribution to Canada's annual catch of Pacific salmonids. Income, employment, and government revenues are generated as a result of both SEP expenditures and the incremental spending from the commercial, Native, and recreational fishing associated with the harvest of enhanced production. This report estimates the magnitude and significance of the economic impacts generated from SEP funding.

**Economic potential of base metal and gold mining in Newfoundland : assessing the impact of regional development policy options**

by B. Mackenzie, M. Bilodeau and M.D. Doggett. Kingston, Ont. : Queen's University, Centre for Resource Studies, 1989. xiii, 188 p. : ill. Bibliogr. (Technical paper ; no. 10) ISSN 0821-0675 ISBN 0-88757-098-4 MICROLOG 90-04190 3 fiche (Available on fiche only)

The assessment of base metal and gold supply are based on the years 1946-85, subdivided into decades to examine time trends. Money values are expressed in constant 1987 Canadian dollars. Appraisals are made on a potential value, before-tax basis, including all direct costs and revenues associated with exploration and development, then on an after-tax basis considering the application of federal and Newfoundland income and mining taxation systems to the overall potential values. The level and components of mining taxation are compared to other provinces and territories and base metal and gold activities are compared to those in Canada and in the Appalachian Region. The capability developed to assess the economic potential in Newfoundland is applied to evaluate and compare the impact of regional development policy options, including geologic data base development, direct assistance for mineral exploration, support for new mine development, production stage incentives, and assistance for mines faced with temporary or permanent closure.

**Economic profile of the organic chemical manufacturing sector : summary report**

Toronto : Environment Ontario, Policy and Planning Branch, Socio-Economic Section, 1989. v, 35 p. : ill. Bibliogr. ISBN 0-7729-5124-1 MICROLOG 90-01195 1 fiche

The organic chemical manufacturing sector consists of firms involved in the manufacture and/or processing of petrochemicals, organic and specialty chemicals, and finished products. Most organic chemical products are derived from crude oil and natural gas, with a small proportion derived from animal fats, vegetable oils and other natural materials. About 70 firms operate 150 chemical production plants in Canada, of which about 60 plants or 40% are located in Ontario. Nineteen of these plants, owned by 17 firms (prior to the Nova purchase of Polysar) are direct effluent dischargers subject to the Municipal/Industrial Strategy of Abatement (MISA) regulations. This report summarizes the key features of the sector in Canada and in Ontario; provides background information on the financial and physical dimensions of the sector and of the

key firms within the sector; assesses its competitiveness in global and domestic contexts; and identifies and assesses factors which may have a bearing on the future outlook and long-term viability of the sector. EV ON PR PS SC

### The Economics of production and marketing of greenhouse crops in Alberta, 1988-89

by G.N. Chaudhary. Edmonton : Alberta Agriculture, Economic Services Division, Production Economics Branch, 1990. vii, 63 p. CSI 34101.022. MICROLOG 90-03737 1 fiche

Examination of the level of investment and production costs and returns for Alberta greenhouses by region, size, and crop. The report updates information contained in previous studies of 1978, 1979, 1982, 1983, 1987 and 1988, and reports on producer concerns. A questionnaire was sent to a selected sample of greenhouse operators across the province and 22 operators were interviewed to obtain production costs and returns information for the 1988-89 crop year. Each greenhouse operation was analyzed separately. The study was divided into 2 geographical groups, 3 size groups, and crop groups of cucumbers, tomatoes, bedding plants and combination crops.

### Les Economies d'énergie dans l'habitation existante : la ventilation

Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Bureau de l'efficacité énergétique, 1985. 24 p. : ill. ISBN 2-550-11745-X MICROLOG 90-04041 1 fiche

Il y a quelques années lorsque les maisons étaient mal isolées, mal cafeutrées, le problème de la ventilation ne se posait pas. Celle-ci se faisait naturellement, l'air s'échappant par les portes, les fenêtres, au travers du toit et des murs, entraînant avec lui l'humidité de la maison. Ces problèmes d'humidité et de pollution peuvent se résoudre de diverses façons. On le découvre en parcourant cette brochure. Les conseils qu'on y trouve aident et permettent de déterminer le genre de ventilation qui convient le mieux à vos besoins.

### Les Economies d'énergie dans l'habitation existante : les entretoits

Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Bureau de l'efficacité énergétique, 1985. 28 p. : ill. ISBN 2-550-11790-5 MICROLOG 90-04040 1 fiche

Autant il peut être simple et rentable à court terme d'isoler certains types de toit, autant il peut être complexe et coûteux d'en isoler d'autres. L'isolation de certains types de toit ne devient rentable que si elle est faite à l'occasion d'une réfection de la toiture. On trouve dans cette brochure les renseignements qui permettent de procéder à l'isolation de l'entretoit des maisons, quel que soit le type de toiture.  
PL PR QU SC

### Les Economies d'énergie dans l'habitation existante : les fondations

Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Bureau de l'efficacité énergétique, 1985. 24 p. : ill. ISBN 2-550-11676-3 MICROLOG 90-04039 1 fiche

Comment peut-on isoler un sous-sol? Il serait plus juste de se demander comment isoler une maison au niveau des fondations puisque toutes les maisons ne comportent pas ce qu'on désigne couramment comme étant un sous-sol. Certaines maisons n'ont qu'un vide sanitaire, d'autres une simple dalle posée sur le sol. Cette brochure présente les différentes méthodes d'isolation qui s'appliquent: aux murs de fondation en béton (béton coulé ou blocs de béton); aux murs de fondation en pierres; et aux murs de fondation en bois traité.

### Les Economies d'énergie dans l'habitation existante : les murs

Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Bureau de l'efficacité énergétique, 1985. 23 p. : ill. ISBN 2-550-11744-1 MICROLOG 90-04037 1 fiche

Malgré l'importance relative des pertes de chaleur à travers les murs d'une maison, il n'est pas conseillé de commencer les travaux d'amélioration énergétique par l'isolation des murs. Lors d'importants travaux de rénovation, l'isolation des murs est fortement recommandable et rentable. On trouve dans cette brochure tous les renseignements qui permettent d'améliorer le rendement énergétique des murs, qu'ils soient à ossature de bois légère, en madriers ou en maçonnerie.  
PL PR QU SC

### Les Economies d'énergie dans l'habitation existante : les portes et les fenêtres : l'étanchéité

Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Bureau de l'efficacité énergétique, 1985. 24 p. : ill. ISBN 2-550-11916-9

MICROLOG 90-04042 1 fiche

Dans une maison moyennement isolée, les pertes de chaleur dues aux fuites d'air peuvent représenter jusqu'à 40% des pertes totales, 25% sont causées par les fuites d'air proprement dites, principalement au niveau des ouvertures et des fentes, et 15% par la faiblesse thermique des matériaux composant les portes et les fenêtres. Or, ces pertes de chaleur sont celles qui se corrigent le plus facilement. D'une part les fuites d'air se colmatent aisément par le calfeutrage et la pose de coupe-froid, d'autres part la résistance thermique des matériaux peut être améliorée. Ces travaux sont très rentables compte tenu des économies qui en résultent. On trouve dans cette brochure des conseils et des techniques permettant de les réaliser.

### Ecophysiological studies on the acid tolerance of *Gammarus fossarum* (KÖCH)

by W. Meinel, U. Matthias and S. Zimmermann. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 33 p. (Canadian translation of fisheries and aquatic sciences ; no. 5219) Originally published in German, by E. Schweizerbart'sche Verlagsbuchhandlung at Stuttgart, Federal Republic of Germany

ISSN 0704-3716

MICROLOG 90-02690 1 fiche

The acidification of surface waters has become a problem of worldwide proportion. The introduction of acid from precipitation has a particularly significant effect in weakly buffered waters and results in a drastic reduction of the aquatic biocenosis. Gammarids, which are normally present in great quantity in the German highland streams and which occupy a key position in the ecology as destroyers of fallen leaves and as a basic source of food for many species of fish, exhibit particularly high sensitivity to pH levels. This study tests the influence of various ions (Na, K, Ca<sup>2+</sup>, Mg<sup>2+</sup> plus and Cl minus) on the survival rate of *Gammarus fossarum* in various pH ranges. The animals were removed from their natural habitat and kept in the laboratory in water from their native stream, whose ionic composition was variously modified by adding salt, as well as in synthetically produced salt solutions.

### Edmonton Brokerage Demonstration Project : final evaluation report

by the City of Edmonton Transportation Dept., Louis G. Grimbé Professional Engineer Ltd., in association with Manop Services Ltd. ; prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Edmonton : The Dept., 1987. xiii, 85 p. : ill.

MICROLOG 90-01811 2 fiche

This project was undertaken to evaluate the effectiveness of a brokerage management concept in a paratransit operation and to demonstrate the application of an off-the-shelf computerized scheduling aid and management assistance program. The report evaluates the performance of the project and the cost effectiveness achieved in 2 years of operation. The computer-aided scheduling and management assistance program is described and evaluated for its contribution to the management of the system. The experience gained in introducing and operating such a system is described, including dealing with the taxi industry, contracting to independent owner-operators, and optimizing the partnership between the private and public sectors in providing paratransit services.

### Effect of copper additions on sinterability of hypereutectic Al-Si powder metallurgy alloys

by C.F. Dixon and H.M. Skelly. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1974. i, 18 p. : ill. Bibliogr. (Report ; PM-R 74-4)  
MICROLOG 90-04661 1 fiche

Investigation to determine the effect of 1%-5% copper powder and 12% aluminum powder additions (by blending) on the sinterability of Al-35% Si and Al-40% Si pre-alloyed atomized powders. The powders were mixed by either blending in a twin-shelled blender or a Waring Blender or grinding in an attritor. To assess the degree of sintering, the tensile strength, density and electrical resistivity of sintered specimens were determined and the relationship between electrical resistivity and tensile strength as well as density for hypereutectic Al-Si alloys

was examined.

### The Effect of Cr, Co, and Sr additions on the ductility of hypereutectic Al-Si powder metallurgy alloys

by H.M. Skelly and C.F. Dixon. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1973. 8 p. Bibliogr. (Report ; PM-R 73-14)  
MICROLOG 90-04663 1 fiche

Hypereutectic Al-Si alloys with a refined primary silicon phase and containing up to 45% Si were produced using P/M techniques. These alloys have good machinability, good wear resistance, low coefficient of thermal expansion, and their tensile strength is comparable to Al-Si cast material. However, their elongation, 2%-3%, although better than that of the cast material, is still low and additions of Cu and Mg tend to reduce the ductility of these alloys. In this investigation, the effect of additions of 0.2%, 0.5% and 1.0% Cr, Co, and Sr on the ductility of an Al-35% Si P/M alloy is examined.

### The Effect of dispersant and stabilizer type and amount on the atomization of coal-water fuel

by N. Stover. Dartmouth, N.S. : Nova Scotia Research Foundation Corporation, 1989. vii, 66 p. : ill. Bibliogr. *CANMET contract: 79183-01-SQ*  
MICROLOG 90-05650 1 fiche

The Cape Breton Development Corp. has chosen to market some of its coal as coal-water fuel (CWF). The proper formulation of CWF requires the addition of a dispersant to allow the hydrophobic coal surface to be wetted and a stabilizer that prevents the settling of the coal. Besides affecting the economics of the CWF production, these chemicals affect the CWF atomization properties. This report presents the results of a project to examine the effect of the dispersant and stabilizer type and amount on the CWF atomization. A single CWF atomizer design was used to atomize the CWF with a constant coal feed stock and coal particle size distribution.

### The Effect of end-result specifications on bridge deck waterproofing in Ontario

by R.C. Evers and D.F. Lynch. Toronto : Ministry of Transportation, Engineering Materials Office, 1990. 25 p. : ill. Bibliogr. (Report ; EM-95) ISBN 0-7729-7197-8  
MICROLOG 90-05016 1 fiche

The use of a form-in-place membrane of hot-poured rubberized asphalt has been the almost exclusive method of bridge deck waterproofing in Ontario since 1972. Poor workmanship and inspection resulted in several sub-standard waterproofing projects, leading to the introduction in 1983 of an interim acceptance plan for membrane thickness based on random sampling of lots and sub-lots. The data gathered under the interim acceptance plan was analyzed and used to develop a full statistical end-result specification (ERS) for membrane thickness. This ERS was implemented in 1986 and in 1987 a material quality component was added. This paper presents data which demonstrates the impact of ERS on membrane thickness from 1983, and on membrane quality from 1986 to the end of the 1989 construction season.

### The Effect of environmental variables on the population dynamics of sea lamprey *Petromyzon marinus*

by R.J. Young...et al. Sault Ste. Marie, Ont. :

Dept. of Fisheries and Oceans, Great Lakes Laboratory for Fisheries and Aquatic Sciences, 1990. v, 33 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1736) ISSN 0706-6457 MICROLOG 90-06981 1 fiche

Reports of significant mortality to native fish stocks induced by parasitic sea lamprey in the St. Lawrence Great Lakes have appeared since the 1940s. This study was conducted to add to the knowledge of sea lamprey life history by quantitatively assessing some of the poorly documented relationships. It was assumed that the variation in physical/chemical environmental factors would affect sea lamprey throughout the Great Lakes basin in a similar manner. In that context, the relationship between physical/chemical factors and ammocoete presence/absence in streams, ammocoete relative abundance, ammocoete growth, and spawning run abundance was examined. In addition, changes in spawning lamprey size and sex ratio in relation to lamprey abundance was examined.

### The Effect of free fatty acids upon the mouse tests of diarrhetic shellfish poisons and the determination of the poison components

by A. Kogawa...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 20 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5485) Originally published in Japanese, by the Aomori Prefectural Institute of Public Health in Japan. ISSN 0704-3716 MICROLOG 90-01681 1 fiche

In the diarrhetic shellfish poison examinations based on the official method, the free fatty acids (FFA) present in the mudgut gland of scallops exhibit the same mouse toxicity as the shellfish poison. This may therefore become a factor of error in measurements at the low virulence period. Virulences were measured by the official method and by the liquid-liquid partition method. While evaluating the effect of the FFA, the concentration of FFA was measured as well as those of okadaic acid and of diisophystoxin -1 and -3, which are the poison components. This report presents the results of the experiment.

### The Effect of high-frequency ground motion on the Maple-X10 reactor

by S. Bhan and S. Dunbar. Ottawa : Atomic Energy Control Board, 1989. iii, 58 p. : ill. Bibliogr. (Research report ; INFO-0335) MICROLOG 90-04394 1 fiche

Atomic Energy of Canada Ltd. is planning to build the Maple-X10 research reactor at Chalk River, Ontario. The seismic design of the reactor is based on CSA Standard CAN3-N298.3-M81. The design response spectrum in the CSA standard is based on accelerometer records from western North America. However, recent observations suggest that accelerograms in eastern North America exhibit significantly higher frequencies than those in western North America. This report examines the effect of high-frequency ground motion on structures and equipment in nuclear reactors by subjecting simple linear models to selected recorded ground motions which exhibit low and high frequencies. Recommendations for a program of further research are given.

### The Effect of hypoxia on performance during 30 s or 45 s of supramaximal exercise

by T.M. McLellan, M.E. Kavanagh and I. Jacobs. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, Biosciences Division, Environmental Physiology Section,

1990. 7 p. : ill. Bibliogr. (DCIEM report ; 90-P-05) In European Journal of Applied Physiology and Occupational Physiology: no 60, 1990. MICROLOG 90-05429 1 fiche

Evaluation of the effect of hypoxia on performance of 30 s and 45 s of supramaximal dynamic exercise. Twelve males were randomly allocated to perform either a 30 s or a 45 s Wingate test (WT) on 2 occasions (hypoxia and room air) with a minimum of 1 week between tests. After a 5-min warm-up at 120 W subjects breathed the appropriate gas mixture from a wet spirometer during a 5-min rest period. Resting blood oxygen saturation was monitored with an ear oximeter. Following all WT trials, subjects breathed room air for a 10-min passive recovery period. Muscle biopsies from the vastus lateralis were taken prior to and immediately following WT. Arterialized blood samples, for lactate and blood gases, were taken before and after both the warm-up and the performance of WT, and throughout the recovery period. Open-circuit spirometry was used to calculate the total oxygen consumption, carbon dioxide production and expired ventilation during WT.

### Effect of isopropanol (IPA) preservation on industrial fish

by E. Sola and T. Odegard. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 31 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5380) Originally published in Norwegian, by Fiskeridirektoratet, Norway. ISSN 0704-3716 MICROLOG 90-01556 1 fiche

Preservation of fish raw material using isopropanol (IPA) is used in processes which produce fish protein concentrate (FPC) for food or for animal and fish feed by extraction using IPA. It is known that by using IPA preservation, the raw material can be stored for 4-6 months or maybe longer without noticeable reduction in the value or properties of the product. This report presents the results of a study on the relationship between bacterial decomposition, temperature and IPA concentration using bait-containing summer capelin as the raw material, since the content of bait strengthens the autolysis and the raw material is poorly suited to storage.

### Effect of manual treatment timing on red alder regrowth and conifer response

by F. Pendl and B. D'Anjou. S.I. : Forest Resource Development Agreement, 1990. vi, 21 p. : ill. Bibliogr. (FRDA report ; 112) This is a joint publication of Forestry Canada and the British Columbia Ministry of Forests. ISSN 0835-0752 ISBN 0-7726-1101-7 MICROLOG 90-05857 1 fiche

Red alder is capable of dominating a range of sites following harvesting of coastal forests, quickly overtopping slower growing conifers. Manual cutting is an alternative to herbicides for controlling it but the species can resprout after cutting and continue to compete with the conifers for light. This study was initiated to explore the effects of timing of cut on resprouting behaviour of red alder. Circular brush saws were used to cut a 4-year-old stand of red alder overtopping planted Douglas-fir and grand fir seedlings on a site near Powell River, B.C. Cutting treatments were applied at five different times between June 7 and September 1, 1983.

### Effect of parallel midbody on the resistance of ships in level ice

prepared for the Transportation Development Centre, by Melville Shipping Ltd. Ottawa : Melville Shipping Ltd., 1988. xiii, 231 p. : ill. Bibliogr. MICROLOG 90-01748 3 fiche

Investigation of the influence of parallel midbody length on resistance and how this is affected by friction coefficient and by the original ARCTIC bow and by the Melville bow. The model tests were conducted at the ice tank of the Institute for Marine Dynamics in St. John's, Newfoundland. The models were built up from 6 bows (3 Melville bows and 3 original bows), 4 midbodies (2 whole midbodies and 2 part midbodies), and one stern. The basic model is a 1:30 scale reproduction of the ARCTIC, and each part was prepared with a specific surface friction coefficient. The model tests consisted of 12 towed resistance tests in model EG/AD ice representative of 0.9 m, 1.2 m and 1.5 m, 570 kPa full scale ice. These ice thicknesses and strengths correspond to 30 mm, 40 mm and 50 mm, 19 kPa model ice. The model test program was conducted during January and February 1988, using standard model test procedures.

### Effect of pressure and temperature on the surface tension and viscosity : final report

by D.S. Scott, I.G. Reilly and D. Radlein. Waterloo, Ont. : University of Waterloo, Research Institute, 1988. i, 58 p. : ill. Bibliogr. CANMET contract: 79065-01-SS. MICROLOG 90-00179 1 fiche

This phase I report evaluated existing equipment and techniques for their suitability to measure the surface tension and viscosity of hydrocarbon oils at high pressure and temperature, placed more emphasis on the measurement of dynamic surface tension than on the measurement of static surface tension, evaluated the procedures, if suitable ones exist, which would allow the calculation of surface tension from other properties such as viscosity, density, and refractive index; and provided a recommendation for the best methods available for both viscosity and surface tension. Phase II of the report will actually undertake the measurements if they are deemed feasible in the light of the results of the Phase I study.

**The Effectiveness of feather hooks in longline fishing operations**

St. John's Dept of Fisheries and Oceans, Fisheries and Habitat Management, Fisheries Development Division, 1989. 4 p. (Project summary, no. 15)  
MICROLOG 90-00143 1 fiche

In an effort to offset significant decreases in fish catches by Newfoundland inshore fishermen in recent years, new technological innovations are being introduced. This project summary describes a study to determine the catch efficiency of feather hooks using moored, nonfilament longlines, tested in Portugal Cove South, Renewals and Lumsden. In all, 46,000 hooks were fished for 42 days with an equal number of feather hooks and baited hooks being used.

**Effectiveness of passing lanes on highway no. 1**

by M. Kealey, J. Wyatt and A. Popoff. Regina : Saskatchewan Highways and Transportation, Engineering Division, 1990. 62 p. : ill.  
MICROLOG 90-05330 1 fiche

In 1989, a study of the operational effects of passing lanes to determine whether they are effective at the lower traffic volumes in Saskatchewan's rural environment was initiated. An evaluation of the public perception of the passing lanes was also required, along with a determination of difficulties at the merge tapers. The study used traffic statistics recorders, visual observations, questionnaires and a video camera to collect the necessary data. For 2 weeks in July, weekday traffic stream characteristics were collected for 36-48 hour periods, supplemented by various visual observations for shorter time periods. A questionnaire to determine a typical driver's perception of the passing lane operation was distributed in late July to the public through local town offices, rural municipality offices, RCMP detachments, the tourist information booths at Fleming and in Regina, the weight scale on Highway no. 1 and to several trucking companies.

**Effects of a major dredging program on the sedimentary environment of Miramichi Bay, New Brunswick**

by K. Kranck and T.G. Milligan. Dartmouth,

N.S. : Bedford Institute of Oceanography, 1989. v, 61 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 112) ISSN 0711-6774  
MICROLOG 90-01866 1 fiche

The Miramichi Estuary is a large, shallow, barrier bar estuary on the Gulf of St. Lawrence coast of New Brunswick. The bay is an important centre for lobster, herring, salmon and smelt fisheries, as well as forest products industries and shipping terminals. Until recently, shipping through the bay used a 5 m draft channel which was largely natural and had required very little maintenance since 1939. In 1981-83 a major dredging program was undertaken and the channel was deepened to 7.6 m with the removal of 6.6 million metric tonnes of dredge spoils. This waste was disposed of at 3 designated dumpsites. This report discusses the impact of the dredging program on the marine environment and the apparent long term fate of bottom sediment dislodged to deepen the shipping channel.

**The Effects of addition agents on zinc electrowinning from Kidd Creek electrolyte**

by D.J. MacKinnon...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1990. vi, 64 p. : ill. Bibliogr. (Report ; MSL 90-16(TR))  
MICROLOG 90-06003 1 fiche

Study to determine an effective additive control strategy for the Kidd Creek zinc electrorefinery. In this phase of the study, systematic laboratory tests followed by several plant evaluations were done to determine the optimum mix of the various reagents required to maximize zinc deposition current efficiency and maintain a low deposit lead content. The individual and combined effects of antimony, sodium silicate, Dowfroth and Saponin on zinc deposition current efficiency and polarization and on the zinc deposit morphology and preferred orientation were determined in 6-h electrolysis tests conducted at 38C and 500 A/sq m current density. Platinum anodes and aluminum cathodes were used with Kidd Creek electrolyte containing 55 g/L Zn and 200 g/L H<sub>2</sub>SO<sub>4</sub>. The trends identified in the 6-h experiment were confirmed in 24-h electrolysis tests employing Pb-Ag anodes with SrCO<sub>3</sub> additions to simulate plant operating conditions.

**Effects of an oil spill on American lobster *Homarus americanus* from Placentia Bay, Newfoundland**

by U.P. Williams...et al. St. John's : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1988. iv, 9 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1650) ISSN 0706-6457  
MICROLOG 90-04321 1 fiche

In March 1988 an accidental spill of 500 barrels of light crude oil occurred during the offloading of a tanker at the wharf of Come by Chance refinery, Placentia Bay, Newfoundland. Concern was expressed by local fishermen as to the effect of the spill on the lobster fishery in the Bay. Studies of selected parameters were undertaken to determine the possible short and long term effects, and sensory analyses were carried out to ascertain the effects of the oil on the taste and odour of lobster. Lobster muscle and hepatopancreas were analyzed for PAH (polycyclic aromatic hydrocarbon) content and levels of gill browning were determined. Sediments were sampled at various locations in the Bay and levels of PAHs were determined to delineate the extent of contamination.

**The Effects of commercial fishing on lake sturgeon *Acipenser fulvescens* populations in the Sipiwek Lake area of the Nelson River, Manitoba, 1987-88**

by J.W. Patalas. Winnipeg : Manitoba Natural Resources, Fisheries Branch, 1988. vii, 38 p. : ill. Bibliogr. (Manuscript report ; no. 88-14)  
MICROLOG 90-02594 1 fiche

The exploitation of lake sturgeon populations in the Nelson River by the commercial fishery since the turn of the century has been characterized by periods of intensive fishing followed by collapse of the populations and temporary closure of the fishery. Since the fishery last reopened in 1970, commercial production has remained relatively stable due to reduced catch quotas. To evaluate the effects of the present management regulations on the sturgeon populations in the Sipiwek Lake area of the Nelson River, a total of 190 fish were sampled from the commercial catch in 1987 and 1988. Age frequency distributions and growth rates were compared to similar studies carried out in the past. A critical review of these studies is presented.

**Effects of commercial seed coating on alfalfa establishment in interior British Columbia**

by D.J. Thompson and D.G. Stout. Ottawa : Agriculture Canada, Research Branch, 1990. iii, 37 p. Bibliogr. (Technical bulletin ; 1990-4E) ISBN 0-662-17880-7  
MICROLOG 90-06410 1 fiche

Seed coatings of legumes involves pre-inoculation (inoculation with Rhizobium in bulk prior to sale) and as such frees growers from the task of field inoculation. In the coating process, Rhizobium inoculum is adhered to the seed, then the coat (mainly limestone with some phosphate) is added with an adhesive. Coating is claimed to increase alfalfa seedling emergence, seedling vigour and root modulation. This technical bulletin contains tests of these claims performed with commercial coats from 3 seed coating companies in 7 seedings in the Kamloops area. All of the coats evaluated added about 50% to seed weight and contained peat-based inoculum.

### The Effects of forest harvesting on marten and small mammals in western Newfoundland

by J.A. Bissonette, R.J. Fredrickson and B.J. Tucker. St John's : Newfoundland and Labrador Wildlife Division ; Corner Brook Pulp and Paper Limited, 1988. viii, 109 p. Bibliogr.  
MICROLOG 90-02621 2 fiche

Marten are classified as a threatened species in Canada, and in Newfoundland they are found only in one small area of western Newfoundland, where the Pine Marten Study Area was established. During the last 30 years, timber harvesting in western Newfoundland has extended from the Corner Brook area and encroached on the marten study area. This report assesses how timber cutting affects populations of pine marten and their prey base, and projects the impact that future cutting will have on marten in western Newfoundland. Information for the report came from field studies conducted at Little Grand Lake from November 1985 through August 1987, from prior field studies conducted in western Newfoundland, and from the published literature.

### Effects of increasing amounts of non-polar organic liquids in domestic waste leachate on the hydraulic conductivity of clay liners in southern Ontario

by R.M. Quigley and F. Fernandez. Toronto : Ministry of the Environment, Research and Technology Branch, Environmental Research Program, 1989. 2 v. : ill. Bibliogr. ISBN 0-7729-6205-7  
MICROLOG 90-01834 4 fiche

Current landfill design practice requires the presence of a clay barrier (liner) consisting of either a natural stratum or compacted clay borrow. This report presents the results of a 3-year study to assess the compatibility between a natural clay from southern Ontario and domestic waste leachate containing increasing amounts of organic solvents to

simulate leachates where co-disposal practices might have taken place or accidental spills of concentrated organics might have occurred close to a water-wet barrier clay. The clay/leachate compatibility studies were performed using fixed-ring permeameters that permitted control of the applied confining effective stresses, measurement of volume changes in the soil specimen, and assessment of the chemistry of the influent and effluent parameters. Two water-soluble organic liquids (ethanol and dioxane) were used in concentrated form and added to domestic waste leachate in various percentages. A special set of experiments were also run on leachate-moulded clays to study the effects of pre-compaction flocculation on hydraulic conductivity.

### The Effects of mixed and radial hydride morphologies on the axial fracture toughness of Zr-2.5Nb pressure tube

by A.C. Wallace. Toronto : Ontario Hydro, Research Division, 1990. i, 25 p. : ill. Bibliogr. (Report ; no. 90-44-K)  
MICROLOG 90-06106 1 fiche

Investigation of the effects of differences in hydride orientation and hydrogen concentration on the fracture toughness of Zr-2.5Nb pressure tube as a function of temperature. The morphologies were characterized by a parameter referred to as the hydride continuity coefficient, which provides a measure of the extent to which hydrides are oriented in the axial-radial plane of the pressure tube wall. Two mixed morphologies, with hydrides oriented between the radial and circumferential directions, were prepared in undeformed tube sections. The third morphology was prepared in a flattened and stress-relieved strip. Fracture toughness and ductile behaviour were observed for each.

### Effects of produced sand on short distance pipeline transportation of heavy oil in water emulsions : SRC pipeloop test results : final report

by R. Gillies, M. Small and C.A. Shook. Saskatoon, Sask. : Saskatchewan Research Council, 1989. v, 42 p. : ill. Bibliogr. (SRC

publication ; no. R-1110-2-C-89) CANMET contract : 89031-01-SQ  
MICROLOG 90-03968 1 fiche

This investigation considered the effects of temperature and sand content on the flow resistance of high concentration heavy oil emulsions. The emulsions were prepared with moderate shear using fairly low surfactant concentrations in an attempt to simulate flow in gathering system pipelines. Sand transport by fluids in turbulent flow is comparatively well understood, but little is known about laminar flows. Since high concentration oil in water emulsions have high viscosities, laminar flow is likely to occur and the test program considered this type of flow.

### Effects of size at release in rainbow trout *Salmo gairdneri* stocked in a winterkill lake

by K. Tsumura, J.M.B. Hume and B.M. Chan. Victoria : Ministry of Environment and Parks, 1987. i, 15 p. Bibliogr. (Fisheries management report ; no. 88) ISSN 0705-5390 ISBN 0-7726-0685-4  
MICROLOG 90-00637 1 fiche

Winterkill lakes are generally very productive and are suitable for supporting a trout population during the ice-free period, although they cannot sustain a population when ice and snow cover reduces the dissolved oxygen concentrations. This study was undertaken to determine whether yearling rainbow trout could be graded to include a large number of precocious males, which could then be utilized to develop a fishery in a winterkill lake, since such males become less attractive for fishing purposes after sexual maturity and spawning. The 3 size groups used for comparison were progeny from the 1984 spawning run at Pennask Creek. The fish were released into Horseshoe Lake in May 1985 and sampled for length, weight, clips, sex, maturity and gonad weights in October 1985. Fish were compared in 2 catchable size classes.

### Effects of suspended sediment on eggs and larvae of lingcod *Ophiodon elongatus*, Pacific herring *Clupea harengus pallasii*, and surf smelt *Hypomesus pretiosus*

by J.D. Morgan and C.D. Levings. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, West Vancouver Laboratory, 1989. vii, 31 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1729) ISSN 0706-6457  
MICROLOG 90-05013 1 fiche

Biological effects of ocean disposal of dredged spoils have been studied extensively in recent years but most of the published data have dealt with adult life stages, and little information is available regarding effects on egg and larval stages of marine species. This report studies the effects of dredged spoils on the eggs and larvae of lingcod, Pacific herring and surf smelt, all commercially important species. These species spawn in proximity to the Point Grey and Victoria Ocean dumpsites. Bioassay tests using eggs and larvae of each species were conducted to investigate the toxic effects of contaminated and uncontaminated sediment suspensions upon hatching success, timing of development, and larval survival after hatching. Based on these data, recommendations are made regarding the use of toxicity testing with early life history stages of marine fish species to determine the quality of dredged spoils designated for ocean dumping.

### The Effects of trade liberalization on the Canadian dairy and poultry sectors

by J.D. Graham...et al. Ottawa : Agriculture Canada, Policy Branch, 1990. 131 p. Bibliogr. (Working paper : 3/90)  
MICROLOG 90-05932 2 fiche

Under the General Agreement on Tariffs and Trade, countries are examining proposals that would change trading rules for their agricultural sector. There is pressure to dismantle many current government agricultural support programs. This study examines an extreme position of complete trade liberalization for OECD countries and measures some of the impacts of such a change upon producers' earnings for the major agricultural commodity groups in Canada. Particular attention is directed to the dairy and poultry sectors where a methodology is proposed, and used, which examines changes in these sectors as one moves to a free trade position.

### The Effects of word processing and automated data entry technology on the quantity and quality of users' jobs : summary

by J. David-McNeil and M. Garand. Laval, Que. : Dept. of Communications, Canadian Workplace Automation Research Centre, Organizational Research Directorate, 1990. v, 57 p. : ill. Bibliogr. French ed. (Les Incidences du traitement...) : 90-04984/1 ISBN 0-662-17691-X  
MICROLOG 90-04983 1 fiche

To shed more light on the effect of computer technology on jobs in Québec, research was

conducted in 2 hospitals, 2 private companies in the financial sector and 2 government agencies. The study measured the severity of certain socio-economic effects, and determined whether there is a link between them and management variables or individual characteristics of the workers, all of whom are women. The study analyzed the workers' perceptions of the positive or negative effects of data entry and word processing computer technology on the characteristics and conditions of their jobs. The data were gathered from 229 women working as data entry operators and 187 working as word processor operators. Social factors measured included variety of tasks and number of jobs, complexity of tasks, autonomy, job mobility, monitoring and supervision, health problems, physical environment, social interactions, attitude toward computer technology, and satisfaction with computer technology and working conditions.

### Effets de l'acidité sur les communautés piscicoles du nord de la Mauricie

par S. Tremblay. Québec : Gouvernement du Québec, Ministère de l'environnement, Direction de la qualité du milieu aquatique, 1989. x, 83 p. : ill., cartes géogr. Bibliogr. En tête du titre: Précipitations acides. ISBN 2-550-19961-8  
MICROLOG 90-02961 1 fiche

L'acidification des eaux douces constitue présentement une des plus sérieuses menaces pour la faune aquatique de plusieurs régions

de l'hémisphère nord. Pour connaître l'ampleur des ressources piscicoles affectées par les précipitations acides, le ministère de l'Environnement du Québec a instauré en 1986 un vaste programme d'échantillonnage, à la fois physico-chimique et ichthyologique, sur cinq grandes régions hydrographiques du Québec qui sont l'Outaouais, la Mauricie, le Saguenay-Lac Saint-Jean, la Côte-Nord et l'Abitibi. Ce rapport vise à identifier l'impact des précipitations acides sur les populations piscicoles du nord de la Mauricie.

### Les Effets des émanations de soudage sur la santé

par P. Sampara. Hamilton, Ont. : Centre canadien d'hygiène et de sécurité au travail, 1985. 12 p. Bibliogr. ISBN 0-660-91721-1  
MICROLOG 90-00396 1 fiche

Ce document présente le résumé des effets que peuvent produire les émanations de soudage sur la santé. Il vise principalement à servir comme source de renseignements pour les soudeurs, les ingénieurs en soudage, les comités d'hygiène et de sécurité, les hygiénistes du travail, les médecins et les infirmières et autres spécialistes de l'hygiène et de la sécurité du travail. Il aborde principalement les questions suivantes: les principaux procédés de soudage à l'arc, les genres de métaux qui se prêtent au soudage; comment les fumées se produisent; les principaux genres de fumées dégagées par le soudage; les effets des fumées sur la santé; comment les gaz se produisent; les principaux genre de gaz dégagés par le soudage; les effets des gaz sur la santé, et les effets combinés des fumées et des gaz sur la santé.

### Effets des rayonnements ionisants sur la santé

par B. Pathak. Hamilton, Ont. : Centre canadien d'hygiène et de sécurité au travail, 1989. ii, 22 p. Bibliogr. L'éd. anglaise (Health effects of ionizing...) : 90-03615/1. ISBN 0-660-92944-9  
MICROLOG 90-05752 1 fiche

Les dangers possibles des rayonnements ionisants concernent les travailleurs qui utilisent ou qui fabriquent des substances radioactives, des appareils à rayons X ou certains dispositifs à haute tension. Les rapports des médias sur les effets dévastateurs de la guerre nucléaire et des accidents dans les centrales nucléaires nous rappellent constamment ces dangers. Cette publication donne des renseignements de base sur les effets pathologiques possibles des rayonnements ionisants. On y trouve également un glossaire de termes techniques à la fin du texte.

#### L'Efficacité énergétique dans les édifices à bureaux et les bâtiments commerciaux : guide du gestionnaire

Québec: Gouvernement du Québec, Bureau de l'efficacité énergétique, 1989. iii, 140 p.: ill. Bibliogr. ISBN 2-550-20021-7  
MICROLOG 90-04350 2 fiche

On trouvera dans ce document un aperçu des techniques actuelles de la gestion énergétique et des possibilités que leur application offre sur le plan des économies d'énergie. Il donne un aperçu général de la gestion énergétique telle qu'elle se présente à l'heure actuelle, traite des divers éléments qui entrent en jeu dans la gestion de l'énergie (enveloppe du bâtiment, exploitation et entretien des bâtiments, systèmes de chauffage, de refroidissement et de ventilation, etc.). Chaque chapitre fait un examen des questions pertinentes et donne une liste de contrôle des économies réalisables par l'application des méthodes actuelles de gestion énergétique. Un chapitre distinct est consacré à la qualité de l'air et à ses rapports avec la gestion énergétique, questions à laquelle on s'intéresse beaucoup depuis quelque temps. Les annexes donnent certains renseignements de base ainsi qu'une bibliographie.

#### L'Efficacité énergétique dans les lieux de culte : guide technique

Québec: Gouvernement du Québec, Bureau de l'efficacité énergétique, 1988. vi, 70 p.: ill. ISBN 2-550-18975-2  
MICROLOG 90-04349 1 fiche

Pour qu'une démarche en vue d'améliorer le bilan énergétique d'un édifice de culte soit réellement positive, il faut respecter certains principes généraux. L'approche choisie est essentiellement pratique. Elle traite des grands aspects du bâtiment pour lesquels le bilan énergétique peut être amélioré: le contrôle de l'infiltration, l'isolation supplémentaire, l'amélioration du système de chauffage; le contrôle de la stratification dans les nefs, et, la réduction et l'amélioration de l'éclairage. Pour chacun de ces thèmes, on s'attache à situer l'importance de la consommation due à cet aspect; identifier les indices permettant de juger de la sévérité des pertes à ce chapitre; inventorier les principales options de correction possibles, et, indiquer les bénéfices possibles que l'on peut en retirer et la façon d'évaluer la rentabilité générale de l'opération envisagée ou déjà réalisée.

#### Efficient shell elements for three-dimensional non-linear explicit transient dynamic analysis

by R.G. Sauvé. Toronto: Ontario Hydro, Research Division, 1990. iii, 123 p.: ill. Bibliogr. (Report, no. 89-222-K)  
MICROLOG 90-06653 2 fiche

The transient dynamic analysis of 3-dimensional structures undergoing severe deformation represents a complex field in solid mechanics which is computationally very demanding. The use of explicit schemes in this area provide distinct advantages for reliability and efficiency when applied to problems involving impact, shock and finite deformation. Some applications at Ontario Hydro include the simulation of accidental impacts of radioactive waste transportation packages in support of licensing and design, impulsive loading of reactor components, and reactor component interaction using dynamic relaxation techniques. This report presents an efficient 3-dimensional bi-linear quadrilateral shell element for use in explicit transient dynamic analysis.

#### Egg loss from Pacific herring spawns in Barkley Sound in 1988

by C.W. Haegele and J.F. Schweigert.  
Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. iii, 37 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2037) ISSN 0706-6473  
MICROLOG 90-02298 1 fiche

Herring egg loss from spawning grounds is of concern mainly because stock assessments utilize spawn survey data to estimate spawner biomass. Egg loss may be determined either by sampling spawn through the incubation period to determine if there is a decrease in egg density or sources of egg loss can be identified and estimated. Both approaches were used in this study. A relatively large geographical area was selected for the study so that results would have general applicability. Spawn was sampled at 8 locations, 4 of which were on the Vancouver Island shoreline and 4 on smaller islands in northern Barkley Sound. Standard visual observations of the type used to estimate egg density from SCUBA surveys were made and spawn was sampled for egg density estimates. Predators were identified and enumerated and an attempt was made to determine rations for avian predators. Egg loss from wave action was not estimated separately since no substantial windrows of eggs were encountered and washed-up spawn appeared to be the major food item of non-diving avian predators.

#### The Elderly in Canada's small towns : recent trends and their implications

Gerald Hodge ; with the assistance of John B. Collins. Vancouver, B.C. : University of British Columbia, Centre for Human Settlements, 1987. iii, 44 p. : ill. Bibliogr. (Occasional papers ; 43) ISSN 0706-2559  
MICROLOG 90-01589 1 fiche (Available on fiche only)

This paper examines the fact that small towns in Canada (those under 10,000 population) are home to much higher proportions of the elderly than any other form of habitat. It documents this phenomenon and describes its recent trends in terms of several indicators: age structure, male-female ratios, and mobility. With this it establishes the extent of the elderly in small towns and several of its major demographic characteristics. It addresses the question of whether small town environments are equal to the demands and needs of the elderly.

#### Electrical conductivity of insulator surface ices

by P.G. Buchan. Toronto : Ontario Hydro, Research Division, 1989. 16 p. : ill. (Report ; no. 89-31-K)  
MICROLOG 90-00419 1 fiche

Hot and cold fog testing of artificially contaminated and iced insulators requires careful attention to the conductivity of the water supply, since ordinary tap water has a

conductivity and ion concentration that differ from natural rain or fog. Tap water must be conditioned prior to its use. The situation is even more complicated during freezing in that the conductivity of the water can change significantly if ice forms slowly. Investigations have shown that even the conductivity of the surface ice can vary, especially between that on the upper surface and the icicles that form on the lip. These observations led to a series of investigative experiments which included a study of ice conductivities at temperatures below freezing and a study of the conductivity of the melt water. This report deals mainly with these physical characteristics and makes no attempt to explain the behaviour of iced and contaminated insulators from the measured data.

#### Electrofishing : fish reactions with neurophysiological explanations

by P. Lamarque. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 39 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5442) Originally published in French ISSN 0704-3716  
MICROLOG 90-00612 1 fiche

Studies in various countries, primarily Germany, have shown that electrofishing could be a valuable aid in pisciculture and hydrobiological studies. An electric field is created in the water and the fish are attracted to the anode (positive galvanotaxis), immobilized, then scooped up with a net for tagging, sample-taking, removal of large pike, or count-taking. The Applied Hydrobiology Laboratory at Biarritz has been examining the mechanisms involved since 1959. This paper discusses the main findings.

#### Electronic systems in transportation : proceedings of the Canadian Conference on Electrical and Computer Engineering

edited by Micha Avni. Ottawa : Transport Canada, Policy and Coordination, Research and Development, Transportation Development Centre, 1989. xii, 151 p. : ill. Bibliogr.  
MICROLOG 90-01733 2 fiche

Following an introduction to the Transportation Development Centre, several papers under each heading cover these topics: microwave

landing systems, electronic systems in search and rescue, advanced systems for air space management, and other papers. Under the latter category are papers concerned with wide area vehicular communications, a hard real-time operating system for airborne scientific experiments, techniques for the enhancement of marine radar images, automated baggage threat detection, a graphic integrated software package for road management, an interface to expert systems in transportation and an expert system in railway information system.

### Electrophysiological study of reactions to direct current in the frog

by P. Lamarque, J. Etzensperger and N. Charlon. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 33 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5443) Originally published in French, in Paris. ISSN 0704-3716  
MICROLOG 90-00611 1 fiche

Frogs were placed in a uniform electric field and their reactions in relation to their orientation to the flow and intensity of the current are described. The origin of each of these reactions is demonstrated (excitation of muscle or nerve fibers, increase or decrease in motoneuron excitability). The methods and results are discussed in relation to their applications to other aquatic species, notably fish.

### Elimination de l'essence au plomb : répercussions sur les moteurs à essence en usage au Canada après 1990

par F.C. Lavallée et L.P. Fedoruk. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1989. x, 57 p. : ill. Bibliogr. (Rapport ; SPE 3/TS/1) L'éd. anglaise (*The Elimination of leaded gasoline...*) : 90-01432/1.  
MICROLOG 90-01450 1 fiche

Un certain nombre de voitures, de camions, de machines agricoles, de bateaux, de motocyclettes, de voitures et bateaux anciens, de tondeuses à gazon et autres équipements de jardinage, conçus pour fonctionner à l'essence au plomb, seront encore en service en 1990. Or, l'utilisation d'essence sans plomb dans ces cas risque d'accélérer l'usure des sièges de soupape (communément appelée affaïssement de soupape). Il est question dans ce rapport des propriétés du plomb tétraéthyle et de ses effets sur les moteurs. Le nombre de véhicules, de machines et d'équipements divers qui seront exposés à l'affaïssement de soupape a été estimé afin d'examiner l'étendue du problème et les solutions possibles pour l'atténuer.

### The Elimination of leaded motor gasoline : effect on Canadian gasoline engines beyond 1990

by F.C. Lavallée and L.P. Fedoruk. Ottawa : Environment Canada, Environmental Protection Service, 1989. xii, 51 p. : ill. Bibliogr. (Report ; EPS 3/TS/1) French ed. (*Elimination de l'essence au plomb...*) : 90-01450/1.  
MICROLOG 90-01432 1 fiche

Leaded gasoline will be banned in Canada, with a few exceptions, by December 1, 1990, although there are still a number of older vehicles and motor-powered equipment in operation that were designed to use leaded gasoline which would therefore experience valve seat recession if unleaded gasoline is used. This report examines the problem of valve seat recession, discusses various solutions, describes the properties of tetraethyl lead and its effects on engines, and examines the ability of engines used in cars, trucks, farm machinery, boats, motorcycles, antique cars and boats, and lawn and garden equipment to operate on unleaded gasoline and their potential for suffering valve seat recession. Canadian vehicle populations are estimated for the equipment at risk and conclusions are reached about the magnitude of the problem and alternatives available to lessen its severity.

### Emergence of chironomidae (Diptera) from continental water bodies of different climatic zones as a factor determining the food supply of fish

by Y.V. Borutsky. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 32 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5412) Originally published in Russian, in the U.S.S.R. ISSN 0704-3716  
MICROLOG 90-01507 1 fiche

Chironomidae play an important role in the economics of continental water bodies of all the climatic zones. They are the main food of benthophagous fishes and are utilized by them at all stages of development. This study clarifies the mechanisms that govern the changes in the number of emergences and generations of Chironomidae in the waters of different climatic zones, and the importance of these emergences to the food supply of the fish. Data from the literature and from observations on the ecology of chironomids were used. The study was limited to the eurythermal species of the genus Chironomus, since these species (the largest and most valuable as a food for fish), are encountered in different types of waters throughout the world, and in most of them constitute the main nucleus of not only the Chironomidae, but often the entire benthos.

### The Emergence of multiethnicities in 1981 and 1986 : their sociocultural significance

by K.J. Krótki and D. Odynak. Edmonton University of Alberta, Dept. of Sociology, 1990. 40 p. Bibliogr. (Research discussion paper ; no. 63) CSI 99241.209. ISSN 0317-2473  
MICROLOG 90-06452 1 fiche

Provides a comparison of the numbers and proportions self-reporting various ethnic groups varying from census of 1971 to census of 1986. It makes a suggestion to Statistics Canada for counting of multiethnicities, superior to current practices. Instead of giving each reported multiethnicity a value of one as was the practice in 1981 and 1986, a value of 1/k should be used, where k equals the number of ethnicities reported by each individual respondent. It considers the analytic advantages and disadvantages of such an arrangement.

### Endogenous overlapping market areas in a spatial duopoly

by M. Boyer and M. Moreaux. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 38 p. : ill. Bibliogr. (Publication ; no. 697)  
MICROLOG 90-06430 1 fiche

This paper considers competition through prices and market coverages in a spatial duopoly. A firm must inform consumers of its product and price and consumers do not search, choosing the proportion of consumers to inform is choosing market coverage. This study gives the locations of firms, and characterizes and compares the Stackelberg equilibria and the Bertrand equilibria. It shows that when the cost of informing the consumers is small, a duopolist always chooses to inform all consumers in the Bertrand equilibrium, but the leader in the Stackelberg equilibrium may choose not to inform everyone when the duopolistic competition is intense enough.

### Ener Sea Project, 1988-89 : vessel analysis computing systems

by P. Pinhorn. St. John's : Dept. of Fisheries and Oceans, Newfoundland Region, Fisheries and Habitat Management, Fisheries Development Division, 1989. v, 37 p. : ill. MICROLOG 90-01594 1 fiche

The Ener Sea project was conceived as a means of training Newfoundland inshore fishermen (those operating vessels less than 65 feet) about reducing their energy costs. Four main activities were conducted as part of the Ener Sea program from June 1988 to March 1989. They included propeller analysis, cost reduction/energy efficiency seminars, demonstrations at sea and vessel remeasurement. Propellers on 44 fishing vessels were analyzed and the vessel analysis computing system (VACS) was demonstrated. Twenty seminars were held throughout Newfoundland Region with a total of 258 fishermen in attendance.

MICROLOG 90-01667 2 fiche

Ce document regroupe des informations statistiques intéressant le secteur énergétique québécois. On y traite des points suivants: les données et informations statistiques permettant de mesurer l'évolution de la demande totale d'énergie et sa répartition par secteur de consommation, ainsi que la part de chaque forme d'énergie sur le marché énergétique québécois. On trouvera également de l'information sur les différentes industries du secteur de l'énergie, ces industries étant regroupées selon la forme d'énergie concernée (électricité, gaz naturel, pétrole et énergies non conventionnelles).
